Modeling and analysis of robot designs. Kinematics, statics, and dynamics of linkages. Design and selection of mechanical structures, actuators, transmissions, and sensors. Design of robotic control systems. Relevant computer hardware and software. Industrial applications and limitations of robot systems. Lab experiments. Same as ECE 4730. Prerequisite: MAE 3134.

MAE 4129. Biomechanics II. 3 Credits.

Mechanical analysis of physiological fluid dynamics. Application of fluid flow analysis techniques to cardiovascular, pulmonary, respiratory, and phonatory flows. Introduction to biomedical devices that manipulate physiological flows. May be taken for graduate credit with approval of department. Prerequisite: MAE 3128.

MAE 4149. Thermal Systems Design. 3 Credits.

Completion of a thermal systems design project that requires integration of engineering science, economics, reliability, safety, ethics, professional responsibility, and social considerations. Development and use of design methodology, optimization, feasibility considerations, detailed system descriptions, and presentation of results. Prerequisite: MAE 3187.

MAE 4152W. Mechanical Engineering Laboratory. 3 Credits.

Project-oriented course. Simulates working environment of professional engineers. Projects are assigned in student's areas of interest; student is expected to design and assemble own experiments. Extensive use of instrumentation and computing facilities. Project proposal, progress reports, final report, and periodic oral presentations required. (Spring).

MAE 4157. Aerodynamics Laboratory. 1 Credit.

Subsonic and supersonic wind tunnel experiments and simulations. Prerequisite: MAE 3155. (Fall).

MAE 4163. Airplane Performance. 3 Credits.

Lift and drag estimation methods. Airplane performance measures, such as range and endurance, turning flight, specific excess power and acceleration, takeoff and landing performance. Longitudinal and lateral-direction static and dynamic stability. Control surface effectiveness. Prerequisites: MAE 3134. (Fall).

MAE 4168. Intro. to Biomaterials. 3 Credits.

Fundamentals of materials science and engineering applied to artificial materials in the human body. Topics include biocompatibility, techniques to minimize corrosion or other degradation of implant materials, and the use of artificial materials in various tissues and organs. Prerequisite: Approval of department. Course not open to MAE students.

MAE 4172. Engineering Design and the Patent System. 3 Credits.

Design experience in group projects involving following precisely the teachings of a licensed patent; or avoiding infringement of a provided patent while offering a competitive alternative; or evaluating a provided patent in light of prior art or by attempting to design a competitive product. May be taken for graduate credit with approval of department. Prerequisite: MAE 3171 and senior status.

MAE 4182. Electromechanical Control System Design. 3 Credits.

Application of control theory to the design of electromechanical systems. Transducers, valves, and other control components. Mathematical models of open- and closed-loop electromechanical systems. Root locus and frequency response methods; application to the synthesis of feedback systems by both manual and computer-aided techniques. Prerequisite: MAE 2117, MAE 3134.

MAE 4183. Controls Lab. 1 Credit.

Modeling, control design, simulation, implementation, tuning, and operation of a control system. Corequisite: MAE 4182.

MAE 4193. Engineering Systems Design. 3 Credits.

Creative engineering design, problem definition, and concept generation. Design of journal and roller element bearings, fasteners and permanent joints, and springs. Design project incorporating design selection, and optimization. Project presentation using graphical and computer resources. Prerequisite: MAE 3191.

MAE 4194. Mechatronics Design. 3 Credits.

Data acquisition and digital signal processing. Sensors and their characteristics—displacement, position/velocity, force/pressure, piezoelectric. Actuators—mechanical, electrical, pneumatic, hydraulic. Modeling and simulation of dynamic systems. Mechanism design. Digital control systems. Microprocessors, digital logic/circuits, motor drives. Lab experiments. Prerequisite: MAE 4182.

MAE 4195. Mechatronics Lab. 1 Credit.

Corequisite: MAE 4194.

MAE 4198. Research. 1-3 Credits.

Applied research and experimentation projects, as arranged. Prerequisite: junior or senior status.

MAE 4199. Student Design Project. 1-3 Credits.

Special student projects involving extensive design of various mechanical engineering systems. Examples include the solar car, mini-Baja, or other design competitions that typically are national in scope. May be taken for graduate credit by graduate students.

MAE 6201. Intro to Manufacturing. 3 Credits.

Fundamentals of modern manufacturing. Processes for manufacturing mechanical and electronic components from metals, polymers, ceramics, and silicon. Manufacturing systems, CAD, robotics, and design for assembly. Current capabilities, technological needs, and competitiveness. Examples from high-tech industries. Prerequisite: approval of department.

MAE 6203. Adv Experimentation Tech. 3 Credits.

Sensors; measurement of displacement, temperature, pressure and velocity. Optical methods. Signal conditioning. Computer data acquisition. Uncertainty analysis. Case studies of instrumentation systems such as hot-wire anemometers, laser-doppler anemometers, shlieren/shadowgraph and interferometers. Laboratory projects. (As arranged).

MAE 6204. Tissue Engineering. 3 Credits.**MAE 6207. Theory of Elasticity I. 3 Credits.**

Introduction to Cartesian tensors; deformation, stress, constitutive relations for linear elasticity; formulation of boundary value problems, variational principles, torsion and bending of prismatic rods, plane problems. Prerequisite: approval of department. Same as CE 6207.

MAE 6210. Continuum Mechanics. 3 Credits.

Tensor analysis; fundamental concepts of continuum mechanics; kinematics of continuum; derivation of balance laws of mass, linear momentum, angular momentum, energy and entropy; axioms of constitutive theory; formulation of constitutive theories; Onsager's principle; objectivity; representation theorem for isotropic functions; plasticity, including concepts of internal variables, yield surface, return mapping algorithm. Prerequisite: approval of department.

MAE 6220. Applied Computational Fluid Dynamics. 3 Credits.

Basic principles of fluid dynamics and aerodynamics. Finite difference and finite volume methods. Fluid flow and heat transfer analysis of thermo-fluid mechanical systems. Computational aerodynamics codes. Individual hands-on experience with a commercial CFD code such as FLUENT. Prerequisite: approval of department.

MAE 6221. Fluid Mechanics. 3 Credits.

Continuum, kinematics of fluids; stress and strain rate tensors; fundamental equations of viscous compressible flows. Irrotational flows; sources, sinks, doublets, and vortices. Laminar flow of viscous incompressible fluids; boundary-layer concept. Prerequisite: approval of department.

MAE 6222. Applied Aerodynamics. 3 Credits.

Introduction to practical and computational methods for solving two-dimensional and three-dimensional aerodynamics problems. Linear methods, nonlinear potential methods, coordinate transforms, and boundary-layer methods. Prerequisite: MAE 6221, MAE 6286.

MAE 6223. Turbomachinery. 3 Credits.

Turbine, compressor, and pump types and uses; dimensional analysis of turbomachines; cycle analysis of gas and steam turbines; energy interchange in fluid machinery; design, characteristics, and performance of turbines, compressors, and pumps; comparison of types of turbines, compressors, and pumps. Prerequisite: MAE 6221.

MAE 6224. Viscous Flow. 3 Credits.

Exact solutions of Navier-Stokes equations; the laminar boundary-layer theory. Reynolds stresses and turbulence; internal, boundary-layer, and mixing flows. Applications to heat and mass transfer and to reacting flows. Prerequisite: APSC 6213, MAE 6221, .

MAE 6225. Computational Fluid Dynamics. 3 Credits.

Theory of discrete methods for solving the governing equations of fluid dynamics. Potential flow, Euler equations, Navier-Stokes equations. Emphasis on algorithm development appropriate to modern supercomputers. Prerequisite: MAE 6221, MAE 6286.

MAE 6226. Aero/Hydrodynamics. 3 Credits.

Inviscid flows in two and three dimensions and irrotational flow theory; conformal mapping and applications. Helmholtz theorems and vorticity dynamics. Applications such as airfoil theory, finite wing theory, panel methods, instabilities, free surface flow. Prerequisite: MAE 6221 .

MAE 6227. Aeroelasticity. 3 Credits.

Static and dynamic structural deformations; static aeroelasticity (structural deformation, divergence, control effectiveness, and reversal); dynamic aeroelasticity (flutter, response to gusts and turbulence); unsteady aerodynamics for 2-D wings; strip theory for 3-D lifting surfaces; piston and Newtonian-flow theories. Prerequisite: MAE 6221, MAE 6257.

MAE 6228. Compressible Flow. 3 Credits.

Thermodynamics and equations of compressible inviscid flow. One-dimensional flow. Isentropic flow. Normal and oblique shock waves. Quasi-one-dimensional flow. Unsteady one-dimensional and steady two-dimensional flow. Introduction to transonic flow. Prerequisite: APSC 6213, MAE 6221 .

MAE 6229. Propulsion. 3 Credits.

Basic concepts of propulsion: energy transformations in propulsive flows, gas dynamics of combustion. Thermal and propulsive efficiencies. Cycle and engine component analysis. Intake, nozzle performance. Drag and thrust generation. Augmentation. Propellers, turbojets, turbofans, ramjets, and rockets. Prerequisite: Graduate Standing or MAE 2131 and MAE 3126. (Spring).

MAE 6230. Space Propulsion. 3 Credits.

Advanced chemical propulsion: dynamic combustion and instabilities in solid propellants. Injection, atomization, mixing in liquid propellant engine performance. Plasma propulsion: electrostatic, electromagnetic, and electrothermal instabilities (laser and microwave). Nuclear propulsion. Prerequisite: MAE 6229.

MAE 6231. Structure and Transformations in Materials. 3 Credits.

Structure of crystals, crystal binding, crystal defects, dislocations, solid solutions, phases, diffusion, phase transformations, deformation twinning, and martensite. Prerequisite: APSC 2130.

MAE 6232. Fracture Mechanics. 3 Credits.

Concepts, history, and recent developments of fracture mechanics. Singularity at the crack tip; solutions around crack tip; stress intensity factors; energy release rate; J-integral; direction of crack extension; Plasticity and slow crack growth; dynamic crack propagation; molecular dynamics simulation of fracture. Prerequisite: approval of department.

MAE 6233. Mechanics of Composite Materials. 3 Credits.

Stress-strain relationship for orthotropic materials, invariant properties of an orthotropic lamina, biaxial strength theory for an orthotropic lamina. Mechanics of materials approach to stiffness, elasticity approach to stiffness. Classical lamination theory, strength of laminates. Statistical theory of fatigue damage. Same as CE 6209. Prerequisite: approval of department.

MAE 6234. Composite Materials. 3 Credits.

Principles of composites and composite reinforcement. Micromechanics and failure, interface reactions in various composites, reinforcing materials. Structure of composites: fiber-reinforced polymers, filler-reinforced polymers, fiber-reinforced metals, directionally solidified alloys, dispersion-strengthened metals. Prerequisite: approval of department.

MAE 6235. Deformation and Failure of Materials. 3 Credits.

Elastic and plastic deformation, yield, dislocation theory, strengthening mechanisms, creep, polymers, fracture, transition temperature, microstructure, fatigue. (Spring, odd years).

MAE 6237. Applied Electrochemistry. 3 Credits.

Charged interfaces, electrochemical cells, corrosion thermodynamics, electrode kinetics, general corrosion, crevice corrosion, pitting, stress-corrosion cracking, corrosion protection, batteries and fuel cells, energy storage. May include current and potential distribution in electrochemical cells and scaling effects in modeling. Prerequisite: approval of department.

MAE 6238. Biomaterials. 3 Credits.

Applications of materials science and engineering to artificial materials in the human body with the objective of detailed understanding of synthetic materials and biopolymers. Biocompatibility and its consequences on tissue-implant interfaces. Design and development of new implant materials, drug delivery systems, and biosensors. Prerequisite: MAE 3166 or MAE 4168.

MAE 6239. Computational Nanosciences. 3 Credits.

Introduction to surface force measurements in nanosciences; continuum contact mechanics in nanoscience research; intermolecular forces; empirical potentials for transition metals; surface forces in liquids; large-scale atomic/molecular massively parallel simulator; force field development from quantum mechanical density-functional theory for organic/metal molecular systems. Prerequisite: approval of department.

MAE 6240. Kinematic Synthesis. 3 Credits.

Techniques for the analysis and synthesis of function, path, and motion generating mechanisms. Methods for the dimensional design of mechanisms. Computer-aided techniques for the optimal design of planar linkages. Review of recent developments and current research. Term project. Prerequisite: MAE 3190 .

MAE 6241. Computer Models of Physical and Engineering Systems. 3 Credits.

Reduction of physical and engineering systems to simplified physical and mathematical models. Manipulation of models using C/C programming. Numerical algorithms for optimization, graph identification, mini-sum arithmetic, and searching. Styles of problem solving. Prerequisite: MAE 2117.

MAE 6242. Advanced Mechanisms. 3 Credits.

Emphasis on spatial kinematics. Analysis and synthesis of mechanisms. Analytical techniques using matrices, dual numbers, quaternion algebra, finite and instantaneous screws, theory of envelopes. Applications to design of linkages, cams, gears. Use of digital computers in mechanism analysis and design. (Spring, even years).

MAE 6243. Advanced Mechanical Engineering Design. 3 Credits.

Design of mechanical engineering components and systems emphasizing computer-aided engineering (CAE), including interactive computer graphics, finite element analysis, and design optimization. Creation of a complete design on an engineering workstation. Prerequisite: approval of department.

MAE 6244. Computer-Integrated Engineering Design. 3 Credits.

Design of engineering components and systems on engineering workstations using I-DEAS. Interactive computer graphics, finite element analysis, computer-based design optimization, and other relevant computer-based tools. Students apply design concepts in a computer-aided engineering environment to a selected project. Prerequisite: approval of department.

MAE 6245. Robotic Systems. 3 Credits.

Classification, features, and applications of industrial robots. Spatial descriptions and transformations, forward and inverse kinematics. Jacobian matrix, velocities and static forces, manipulator dynamics and controls. Robot actuators, transmissions, sensors, end effectors, and programming. Prerequisite: MAE 4182 .

MAE 6246. Electromechanical Control Systems. 3 Credits.

State-space representations of dynamic systems; dynamics of linear systems; controllability and observability; linear observers; compensator design by separation principle; linear-quadratic optimal control; Riccati equations; random processes; Kalman filter; applications of optimal stochastic control theory to robotics and earthquake engineering. Prerequisite: approval of department.

MAE 6247. Aircraft Design I. 3 Credits.

Conceptual design methods used in response to prescribed mission and performance requirements, alternate configuration concepts. Configuration general arrangement and empennage sizing. Estimation of aircraft size, weight, and balance; lift, thrust and drag; system level tradeoff and sensitivity studies. Prerequisite: Graduate Standing or MAE 4163. (Spring).

MAE 6249. Spacecraft Design. 3 Credits.

Computer-aided design of spacecraft and satellites to meet specific mission requirements. Environment, propulsion, structure, heat transfer, orbital mechanics, control considerations. Use of modern computer codes for design studies. Prerequisite: Graduate Standing or MAE 3145. (Fall).

MAE 6251. Computer-Integrated Manufacturing. 3 Credits.

Automation techniques for processing metals, polymers, and composites. Use of sensing and process modeling in process control. Numerical control and robot applications and limitations. Integration, scheduling, and tool management in the computer-integrated factory. Quality control. Social and economic considerations in CIM. Prerequisite: MAE 3192 .

MAE 6252. Projects in Computer-Integrated Design and Manufacturing. 3 Credits.

Applications of the concepts of computer-integrated manufacturing to group projects, culminating in written and oral presentations. Robot programming, vision-guided assembly, force sensing, fixturing, and end-effector design for practical applications. Factory simulation, part scheduling, and NC program-verification algorithms. Prerequisite: MAE 6251.

MAE 6253. Aircraft Structures. 3 Credits.

Statics of thin-walled beams and panels, force interplay between stiffeners and skin in the analysis and design of stiffened thin-walled structures. Strength and stiffness of locally buckled stiffened structures. Design considerations. Critical evaluation of various design procedures. Prerequisite: approval of department.

MAE 6254. Applied Nonlinear Control. 3 Credits.

Dynamic characteristics of nonlinear systems. State stability and input-output stability. Lyapunov stability theory and invariance principle. Nonlinear control systems, including feedback linearization, back-stepping, sliding mode control, and passivity-based design. Applications to robotics, aircraft, and spacecraft control systems. Geometric controls and hybrid systems. Prerequisite: approval of department.

MAE 6255. Plasma Engineering in Aerospace and Nanotechnology. 3 Credits.

Plasma fundamentals, electromagnetic waves in plasma, plasma-wall interactions, modeling and experimental techniques in plasmas, electrical discharge, plasma propulsion, plasma-based nanotechnology. Prerequisite: MAE 3126.

MAE 6257. Theory of Vibration. 3 Credits.

Damped and undamped natural vibration, response of single- and multiple-degrees-of-freedom systems to steady-state and transient excitations, modal analysis, nonproportional damping and complex modes, variation formulation of equations of motion, discretization of structural systems for vibrational analysis. Prerequisite: approval of department.

MAE 6258. Advanced Vibration Analysis and Control. 3 Credits.

Passive and active vibration control of discrete and continuous systems, dynamic vibration absorbers, random vibrations, failure analysis, modal analysis, nonlinear vibrations. Prerequisites: MAE 3134 and MAE 4182 or graduate standing. (Spring).

MAE 6260. Nanomechanics. 3 Credits.

Introduction to crystallography; interatomic potentials; phonon dispersion relations; molecular dynamics simulation; Nose-Hoover thermostat; coarse grained non-equilibrium molecular dynamics; multiple length/time scale theory of multi-physics; microcontinuum field theories; applications to nano materials/structures. Prerequisite: approval of department.

MAE 6261. Air Pollution. 3 Credits.

Introductory course on the generation, monitoring, and control of air pollution. Atmospheric pollutants; current levels and health problems. Combustion chemistry and mixing. Photochemical processes; smog and measurements. Atmospheric dispersion; inversion and acid rain. Prerequisite: approval of department.

MAE 6262. Energy Systems Analysis I. 3 Credits.

Analysis of energy resources and conversion devices. Statistical data analysis, forecasting, I/O, and net energy analyses, mathematical modeling. Prerequisite: approval of department.

MAE 6263. Advances in Energy Engineering. 3 Credits.

Review of thermodynamics, heat transfer, fluid dynamics, and materials technology used in the energy industries. New energy-efficient technologies in transportation and buildings; renewable energy (wind, solar, and biomass). Climate change and sustainability issues, such as carbon capture, cap and trade, carbon sequestration.

MAE 6270. Theoretical Acoustics. 3 Credits.

Basic acoustic theory in stationary and uniformly moving media; waves in infinite space; sound transmission through interfaces; sound radiation from simple solid boundaries, source and dipole fields; propagation in ducts and enclosures; elements of classical absorption of sound. Prerequisite: APSC 6213, MAE 6221.

MAE 6271. Time Series Analysis. 3 Credits.

Harmonic analysis of random signals; auto- and cross-correlations and spectra; coherence; modern techniques for spectral estimation, including fast Fourier transform, maximum entropy, and maximum likelihood; bias and variability; randomly sampled data; digital filtering; applications. Prerequisite: approval of department.

MAE 6274. Dynamics/Cntrl of Spacecraft. 3 Credits.

Fundamentals of satellite attitude dynamics and passive stabilization. Spacecraft attitude representation, rotational kinematics and kinetics. External torques. Dynamics of gyroscopes. Gravity gradient stabilization. Effect of internal energy dissipation on stability of spinning bodies and methods of despin. Dual spin satellites. Prerequisite: approval of department.

MAE 6275. Stability and Control of Aircraft. 3 Credits.

Derivation of equations of motion, Euler transformations and direction cosines, stability derivatives and linearization of equations of motion, stability of linear systems with application to longitudinal and lateral dynamics, Laplace transform techniques, and frequency-response analysis. Prerequisite: approval of department.

MAE 6276. Mechanics of Space Flight. 3 Credits.

Coordinate and time systems. Newton's laws; 2-, 3-, and n-body problems, Lagrange points, gravity-assisted trajectories, variation of parameters and orbit perturbations, non-central gravity effects, drag, sun-synchronous, and formation orbits. Numerical applications using MatLab. Prerequisite: approval of department.

MAE 6277. Spacecraft Attitude Control. 3 Credits.

Control of spinning and three-axis stabilized spacecraft. Elements of linear control theory for single-input, single-output systems and basic feedback control laws. Momentum management and actuator desaturation. Sensors for attitude determination. Application of modern control for multi-input, multi-output systems. Control system simulations using MatLab. (As arranged).

MAE 6280. Thermodynamics. 3 Credits.

Review of First and Second Laws of Thermodynamics and combining the two through exergy; entropy generation minimization and applications. Single phase systems, exergy analyses, multiphase systems, phase diagrams and the corresponding states principle. Prerequisite: approval of department.

MAE 6281. Advanced Thermodynamics. 3 Credits.

Development of classical and quantum statistical mechanics, including Maxwell-Boltzman distributions and microscopic origins of entropy and other thermodynamic variables. Partition functions and micro- and grand-canonical ensembles; Fermi-Dirac, Bose-Einstein, and intermediate statistics. Einstein and Debye models of solids. Prerequisite: MAE 6280.

MAE 6282. Convective Heat/Mass Transfer. 3 Credits.

Heat and momentum transfer in laminar and turbulent flow. The laminar boundary-layer solution. Similarity and nondimensional parameters. Mass-momentum heat transfer analogy. Convective heat transfer at high velocity. Stability, transition, and turbulence. Free convection. Prerequisite: MAE 6221 .

MAE 6283. Radiative Heat Transfer. 3 Credits.

Basic concepts of heat transfer by thermal radiation starting from Planck's equation for blackbody radiation. Realistic engineering problems are addressed, some involving radiative heat transfer with a variety of surfaces, geometries, and enclosures. Radiative heat flow combined with conduction and convection boundaries. Prerequisite: approval of department.

MAE 6284. Combustion. 3 Credits.

Basic combustion phenomena. Rate processes and chemical kinetics. Chain reaction theory. Detonation, deflagration, diffusion flames, heterogeneous combustion. Experimental measurements. Impact of pollution regulations and alternate fuels. Prerequisite: approval of department.

MAE 6286. Numerical Solution Techniques in Mechanical and Aerospace Engineering. 3 Credits.

Development of finite difference and finite element techniques for solving elliptic, parabolic, and hyperbolic partial differential equations. Prerequisite: APSC 6213.

MAE 6287. Applied Finite Element Methods. 3 Credits.

Review of theory of elasticity. Basic aspects of theory and application of finite element methods. Utilization of MSC/ NASTRAN for static, dynamic, linear, and nonlinear analyses of problems in mechanical, aeronautical, and astronautical engineering. Course emphasizes individual hands-on experience with the MSC/NASTRAN code. Prerequisite: approval of department.

MAE 6288. Advanced Finite Element Analysis. 3 Credits.

Review of variational formulation of the finite element method. Finite element analysis of large-strain thermomechanics. Applications to static and dynamic problems in finite elasticity, Fung elasticity (biomechanics), nonlocal theory, active stress in living biological tissues, biological growth, and large-strain plasticity. Recent developments in finite element methods. Same as CE 8330. Prerequisite: approval of department.

MAE 6290. Special Topics in Materials Science. 3 Credits.

Selected subjects of current interest. Arranged by consultation between department faculty and students. Typical topics include experimental methods in materials science and nondestructive inspection of materials. Prerequisite: approval of department.

MAE 6291. Special Topics in Mechanical Engineering. 3 Credits.

Selected subjects of current interest. Arranged by consultation between department faculty and students. Typical topics include tribology, power systems design, solar heating systems, HVAC, and plasticity theory. Prerequisite: approval of department.

MAE 6292. Special Topics in Aerospace Engineering. 3 Credits.

Selected subjects of current interest. Arranged by consultation between department faculty and students. Typical topics include environmental noise control, aeroacoustics, hypersonic flow, and flight vehicle aerodynamics. May be repeated for credit. Prerequisite: approval of department.

MAE 6298. Research. 1-6 Credits.

Basic research projects as arranged. May be repeated for credit.

MAE 6998. MS Thesis Research. 3 Credits.**MAE 6999. MS Thesis Research. 3 Credits.****MAE 8350. Advanced Topics in Materials Science. 3 Credits.**

Topics such as surface science that are of current research interest. Selected after consultation between department faculty and students. Prerequisite: approval of department.

MAE 8351. Advanced Topics in Mechanical Engineering. 3 Credits.

Topics such as advanced analytical mechanics, advanced mechanics of continua, and advanced theory of elasticity that are of current research interest. Selected after consultation between department faculty and students. Prerequisite: approval of department.

MAE 8352. Advanced Topics in Aerospace Engineering. 3 Credits.

Topics such as nonsteady flow, physical gas dynamics, turbulence, and nonlinear wave propagation that are of current research interest. Selected after consultation between department faculty and students. Prerequisite: approval of department.

MAE 8998. Advanced Reading & Research. 1-12 Credits.

Limited to students preparing for the Doctor of Philosophy qualifying examination. May be repeated for credit.

MAE 8999. Dissertation Research. 1-12 Credits.

Limited to Doctor of Philosophy candidates. May be repeated for credit.

BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing, power and propulsion systems, robotics, and control systems. The Department of Mechanical and Aerospace Engineering offers the Bachelor of Science in mechanical engineering degree which is accredited by ABET (Accreditation Board for Engineering and Technology).

REQUIREMENTS

Recommended program of study

First semester

CHEM 1111	General Chemistry I *
MAE 1001	Introduction to Mechanical and Aerospace Engineering
MATH 1231	Single-Variable Calculus I *
SEAS 1001	Engineering Orientation
UW 1020	University Writing

Humanities or social sciences elective **

Second semester

MAE 1004	Engineering Drawing and Computer Graphics
MATH 1232	Single-Variable Calculus II *
MATH 2184	Linear Algebra I
PHYS 1021	University Physics I *

Humanities or social sciences elective **

Third semester

APSC 2057	Analytical Mechanics I
APSC 2113	Engineering Analysis I
MAE 2117	Engineering Computations
MATH 2233	Multivariable Calculus *
PHYS 1022	University Physics II *

Fourth semester

APSC 2058	Analytical Mechanics II
CE 2220	Introduction to the Mechanics of Solids
CSCI 1121	Introduction to C Programming
ECE 2110	Circuit Theory
MAE 2131	Thermodynamics

Fifth semester

APSC 3115	Engineering Analysis III
MAE 3126	Fluid Mechanics I
MAE 3166	Materials Science and Enginrg

MAE 3191 Mechanical Design

MAE 3192 Manufacturing Processes and Systems

Humanities or social sciences elective **

Humanities or social sciences elective **

Humanities or social sciences elective **

*Course satisfies the university general education requirement in math, science, and writing.

**At least two social and behavioral sciences courses must be selected from the University General Education Requirement list (p. 29); the remaining courses must be selected from either the University General Education Requirement list or the SEAS General Education Requirement list (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf). At least one humanities course must be selected from the University General Education Requirement list (p. 29); the remaining courses must be selected from either the University General Education

Requirement list or the SEAS General Education Requirement list. (http://www.seas.gwu.edu/sites/www.seas.gwu.edu/files/downloads/HSS%20Form%20Fall%202015%20Admits%201_0.pdf)

Humanities and social sciences electives must include PHIL 2135 Ethics in Business and the Professions.

Technical electives are chosen from MAE courses in the 3000, 4000, and 6000 series, excluding:

MAE 3171	Patent Law for Engineers
MAE 4172	Engineering Design and the Patent System
MAE 6298	Research
MAE 6998 & MAE 6999	MS Thesis Research and MS Thesis Research

All technical electives must be approved by the undergraduate advisor. On a case-by-case basis, technical electives may be chosen from other departments if approved by both the undergraduate advisor and the department chair.

Visit the program website (<http://www.mae.seas.gwu.edu/programs-degrees>) for additional information.

BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING, AEROSPACE OPTION

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing, power and propulsion systems, robotics, and control systems.

The aerospace engineering option leads to a bachelor's degree in mechanical engineering while preparing students to work in the aerospace industry or to pursue graduate study in aerospace engineering. It provides a strong foundation in aerodynamics, airplane performance, propulsion, aerospace structures, orbital mechanics, spacecraft dynamics, and aircraft and spacecraft design.

BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING, MEDICAL PREPARATION OPTION

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing, power and propulsion systems, robotics, and control systems.

The medical preparation option leads to a bachelor's degree in mechanical engineering and prepares students for application to medical school. The student is also prepared to work in research and development or to pursue graduate study in the fields of biomechanics and biotechnology.

BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING, PATENT LAW OPTION

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex

systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing, power and propulsion systems, robotics, and control systems.

The patent law option in mechanical engineering leads to a bachelor's degree in mechanical engineering while providing a strong foundation in fundamental principles of patent law and the influences of the U.S. patent system on modern engineering design. Students in this option obtain backgrounds that can lead to work as a technical specialist in a patent law firm or in the patent department of an industrial employer. The option also provides excellent preparation for pursuit of a subsequent J.D. that may focus on intellectual property law.

BACHELOR OF SCIENCE WITH A MAJOR IN MECHANICAL ENGINEERING, ROBOTICS OPTION

Mechanical engineering encompasses a vast range of industrial activities. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of complex systems. Applications include aerospace, energy conversion, computer-aided design and manufacturing, power and propulsion systems, robotics, and control systems.

The robotics engineering option leads to a bachelor's degree in mechanical engineering while preparing the student to work in the robotics industry or to pursue graduate study in robotics engineering. It provides a strong foundation in robotic mechanisms design, analysis, and integration; kinematics, dynamics, and control of robots; mechatronics design; sensing, actuation, and measurement; microprocessors for robotic systems; robotic haptics; and topics on artificial intelligence.

MASTER OF SCIENCE IN THE FIELD OF MECHANICAL AND AEROSPACE ENGINEERING

The Master of Science in Mechanical and Aerospace Engineering degree program offers a rigorous course of study through which students are prepared for leadership careers in government and industry. Students have the

opportunity to work across disciplines in emerging areas of technology. The program is designed to build a solid background on the fundamentals of the related discipline, and at the same time it can be tailored to meet individual needs under the guidance of an academic advisor. Students can tailor their program to meet their interests and goals by choosing from offered focus areas.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

More information can be found on the departmental website (<http://www.graduate.seas.gwu.edu/programs/mechanical-and-aerospace-engineering/admissions-requirements>).

REQUIREMENTS

The following requirements must be fulfilled: non-thesis option—a minimum of 33 credits, including the required focus area curriculum; thesis option—27 credits, including the required focus area curriculum and 6 credits in thesis research.

Aerospace Engineering

Required

APSC 6212	Analytical Methods in Engineering II
or APSC 6213	Analytical Methods in Engineering III

MAE 6286	Numerical Solution Techniques in Mechanica land Aerospace Engineering
----------	---

One of the following:

MAE 6207	Theory of Elasticity I
MAE 6221	Fluid Mechanics
MAE 6276	Mechanics of Space Flight

Electives

Remaining credits in aeroacoustics, aeronautics, astronautics, propulsion, or space systems elective courses

Design of Mechanical Engineering Systems

Required

MAE 6243	Advanced Mechanical Engineering Design
MAE 6251	Computer-Integrated Manufacturing
MAE 6286	Numerical Solution Techniques in Mechanica land Aerospace Engineering

Electives

Remaining credits in computer-aided design, computer-integrated design and manufacturing, mechanical engineering design, or robotics courses

Fluid Mechanics, Thermal Sciences, and Energy

Required

APSC 6213 Analytical Methods in Engineering III

MAE 6221 Fluid Mechanics

MAE 6286 Numerical Solution Techniques in
Mechanics and Aerospace Engineering

Electives

Remaining credits in elective courses

Industrial Engineering

Required

EMSE 6755 Quality Control and Acceptance
Sampling

EMSE 6770 Techniques of Risk Analysis and
Management

MAE 6201 Intro to Manufacturing

MAE 6252 Projects in Computer-Integrated Design
and Manufacturing

One of the following:

MATH 2233 Multivariable Calculus

APSC 3115 Engineering Analysis III

CSCI 1041 Introduction to FORTRAN Programming

CSCI 1121 Introduction to C Programming

CSCI 1131 Introduction to Programming with C

Electives

Remaining credits in elective courses in two approved three-course sequences, one in the Department of Mechanical and Aerospace Engineering, the other in a cooperating department in SEAS

Solid Mechanics and Materials Science

Required

APSC 6213 Analytical Methods in Engineering III

Two of the following:

MAE 6210 Continuum Mechanics

MAE 6238 Biomaterials

MAE 6239 Computational Nanosciences

Electives

Remaining credits in elective courses

Structures and Dynamics

Required

APSC 6213 Analytical Methods in Engineering III

MAE 6207 Theory of Elasticity I

MAE 6286 Numerical Solution Techniques in
Mechanics and Aerospace Engineering

Electives

Remaining credits in elective courses

Robotics, Mechatronics, and Controls

Required

MAE 6245 Robotic Systems

MAE 6246 Electromechanical Control Systems

One of the following:

MAE 6240 Kinematic Synthesis

MAE 6242 Advanced Mechanisms

MAE 6243 Advanced Mechanical Engineering
Design

Electives

Remaining credits in elective courses

CERTIFICATE IN COMPUTER- INTEGRATED DESIGN IN MECHANICAL AND AEROSPACE ENGINEERING

REQUIREMENTS

Required:

MAE 6287 Applied Finite Element Methods

MAE 6246 Electromechanical Control Systems

MAE 6220 Applied Computational Fluid Dynamics

GRADUATE SCHOOL OF EDUCATION AND HUMAN DEVELOPMENT

Dean M.J. Feuer

Senior Associate Dean C.A. Kochhar-Bryant

Associate Dean for Research and External Relations M.B. Freund

Administrative Dean and Chief of Operations P.H. Stevenson

Assistant Dean of Academic Services R. Jakeman

The Graduate School of Education and Human Development is the administrative unit for the departments of Counseling and Human Development, Curriculum and Pedagogy, Educational Leadership, Human and Organizational Learning, and Special Education and Disability Studies. The School offers the Master of Arts in Education and Human Development, Master of Arts in Teaching, Master of Education, Education Specialist, Doctor of Education, and Doctor of Philosophy in the field of counseling degrees. Many of the master's programs are offered in numerous fields of study.

In addition to its degree programs, the School offers graduate certificate programs; credit and noncredit workshops designed to meet the unique needs of metropolitan area school systems and other clientele in industry and government; and a wide range of courses for teachers who wish to pursue advanced studies and additional endorsements and for provisional teachers who wish to prepare for teaching certificates.

All programs are designed to meet the broad needs of individuals who seek the knowledge and skills necessary to provide effective learning and teaching, research, services, and leadership in a variety of settings that cover the entire life span. Special curricula are individually tailored for liberal arts graduates and graduates of other professional schools who are interested in teaching or in other human services areas.

Clinical facilities are provided by the Community Counseling Service Center, which supports counseling internships as well as outreach services to the community. The Office of Professional Preparation and Accreditation supports liaison with schools for clinical experiences required for educator licensure. Field and internship experiences required in master's and doctoral programs are provided in cooperation with public and private schools, social and health agencies, museums, institutions in the business community, institutions of higher education, nonprofit and professional associations, and the federal government. Some program and courses are also offered at off-campus locations or via distance learning.

The Graduate School of Education and Human Development is accredited by the District of Columbia Office of the State Superintendent of Education (DC-OSSE) and the National Council for the Accreditation of Teacher Education/Council for the Accreditation of Educator Preparation (NCATE/CAEP). Programs that prepare students to become eligible for

licensure/certification as teachers and other school personnel are state-approved by the DC-OSSE.

Mission Statement

The Graduate School of Education and Human Development, strategically based in the nation's capital and serving the global community, develops informed and skilled leaders through innovative teaching and learning. Students engage in scholarly inquiry that links policy, research, and practice across the lifespan and fosters continuous self-examination and critical analysis towards excellence.

Bridging Concepts

The following bridging concepts are central to the unified conceptual framework of the School and weave through the mission, goals, and initiatives of its strategic plan.

- Research and scholarship are prerequisite to the improvement of educational practice.
- Leadership is critical in the transformation of education and human service at all levels.
- Building reflective practitioners through integration of theory and practice must be a focus of all programs.
- A community of diverse learners is prerequisite to success in the education and human service professions.

REGULATIONS

Admissions Requirements for the Master of Education, the Master of Arts in Education and Human Development, and the Master of Arts in Teaching

The Graduate School of Education and Human Development seeks applicants with strong academic potential, high motivation, and aptitude to do graduate-level work. Admission decisions are based on an evaluation of all material submitted in support of the application. The School requires a bachelor's degree from a regionally accredited institution, official transcripts of all previous undergraduate and graduate course work, and acceptable test scores on either the Graduate Record Examination or the Miller Analogies Test in some programs. In the field of education policy studies, only the GRE is acceptable.

Two letters of recommendation and a statement of purpose are required. Most programs also require an interview with program faculty. The interview may be waived with permission of the lead faculty of the desired program for those living outside the Washington metropolitan area. In addition to these basic requirements, individual programs may require relevant professional experience and other supporting documentation before a final decision on admission is made.

Advanced Standing

Advanced standing is granted for approved courses taken at other regionally accredited institutions, but a minimum of 24

credit hours must be completed in the Graduate School of Education and Human Development as a master's candidate. A maximum of 12 credit hours taken in nondegree status may be credited toward the master's degree. Advanced standing is not granted for work completed five or more years before application for admission or readmission to master's candidacy. All work accepted for advanced standing must have been earned with a grade of *B* or better and must be approved for acceptance by both the advisor and the dean. *Credit*, *Satisfactory*, *Audit*, or other nonletter grades are not acceptable.

Plan of Study

The plan of study leading to the degree of Master of Arts in Education and Human Development varies by degree, but requires a minimum of 30 hours of graduate credit. Programs include EDUC 6114 Introduction to Quantitative Research, or EDUC 6116 Introduction to Educational Statistics, or EDUC 6112 Foundations of Assessment, Testing, and Measurement in Education to satisfy the research requirements. Several programs have additional credit hour requirements.

All degree requirements must be completed within 6 years, whether study is full time or part time. An additional (or 7th) year is allowed in the case of a student who breaks enrollment and is subsequently readmitted.

Thesis Option

Students in select programs may elect a theses option. The choice of the thesis subject must be approved in writing by the student's advisor and filed in the office of the dean. All theses must be submitted electronically and meet the formatting and other requirements set forth online at www.gwu.edu/~etds. Payment of tuition for the thesis course entitles the candidate, during the period of registration, to the advice and direction of the member of the faculty under whom the theses is to be written. In case a thesis is unfinished, additional time may be granted. The student must, however, be enrolled continuously in the program.

Grades

Information on grades and computing the grade-point average is found under University Regulations (p. 20).

The symbol *I* (Incomplete) indicates that a satisfactory explanation has been given the instructor for the student's inability to complete the required work of the course during the semester of enrollment. The work must be completed within the designated time period agreed upon by the instructor, student, and school, but no more than one calendar year from the end of the semester in which the course was taken. All students who receive an Incomplete must maintain active student status during the subsequent semester(s) in which the work of the course is being completed. If not registered in other classes during this period, the student must register for Continuous Enrollment status.

When work for the course is completed, the instructor will complete a grade change form and turn it in to the Office of the Registrar. Beginning with the fall 2014 semester, the final grade will replace the symbol of *I*. If work for the course is not completed within the designated time, the grade will be converted automatically to a grade of *F*, Failure, 0 quality points, and the grade-point average and academic standing recalculated. See University Regulations for full details.

Scholarship

A grade-point average of 3.0 is required for graduation. Students who receive a grade of *C* in more than 6 credit hours are subject to suspension. Students who receive a grade of *F* must confer with the academic advisor before enrollment for further course work is allowed. More detailed information for doctoral students can be found in the Doctoral Student Handbook.

Master's Comprehensive Examination

A comprehensive examination is required for some programs. Candidates who plan to take the examination must file a written application in the Office of Student Life of the Graduate School of Education and Human Development by the published deadline.

Second Master's Degree

Persons seeking a second master's degree in the Graduate School of Education and Human Development must complete all core and specialization requirements and a minimum residency requirement of 24 credit hours.

Continuous Enrollment and Residency

Students must be continuously enrolled in GSEHD unless the Dean's Office grants a leave of absence. Failure to register each semester of the academic year will result in lapse of candidacy. Subsequent readmission is subject to whatever new conditions and regulations have been established by the School. See Continuous Enrollment Status under University Regulations.

When master's degree candidates are sitting for a comprehensive examination and are not otherwise enrolled in course work, they may prepare for and sit for the exam in continuous enrollment status. All doctoral and education specialist students and those master's students who elect to take an additional semester to prepare for the examination or who must retake the examination are required to sign up for the examination preparation course, which carries a fee equivalent to 1 credit hour of tuition. See Master's Comprehensive Examination, below.

Leave of Absence

Students who, for personal reasons, are temporarily unable to continue their program of studies may request a leave of absence for a specific period of time not to exceed one calendar year during the total period of degree candidacy. If the request is approved, the student must register for leave of absence each semester. If a student fails to register,

degree candidacy is terminated. Students who need additional semesters of leave of absence must seek approval from the appropriate appeals committee.

Class Attendance Policy

Attending class and scheduled make-up classes, discussions, and other course meetings is a fundamental student responsibility. Faculty may use class attendance and participation as factors in determining course grades.

PRAXIS® Teacher Assessments

All degree programs preparing students for initial teacher licensure require completion of the Educational Testing Service PRAXIS® teacher assessments as specified by the Office of the State Superintendent of Education of the District of Columbia.

MASTER'S

Teacher Certification Preparation Programs

Programs are available to prepare students for teacher licensure in elementary, secondary, and special education through the Master of Arts in Education and Human Development, Master of Education, and Education Specialist degree programs. Students who plan to prepare for licensure must apply to the appropriate degree program. These degree programs are also available to credentialed teachers seeking additional endorsements.

In accordance with the 2008 Higher Education Opportunity Act, Title II, Section 205, The George Washington University Graduate School of Education and Human Development provides required information in response to any request by potential applicants, guidance counselors, and prospective employers. An information sheet can be viewed at the school's website (<http://gsehd.gwu.edu>).

Master of Arts in Teaching

- Master of Arts in Teaching in the field of museum education (p. 548)

Master of Education

- Master of Education in the field of elementary education (p. 545)
- Master of Education in the field of secondary education (p. 551)

Master of Arts in Education and Human Development

- Master of Arts in Education and Human Development individualized program (p. 547)
- Master of Arts in Education and Human Development in the field of assessment, testing, and measurement in education (p. 539)

- Master of Arts in Education and Human Development in the field of clinical mental health counseling (p. 539)
- Master of Arts in Education and Human Development in the field of curriculum and instruction (p. 540)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in elementary education (p. 540)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in interdisciplinary studies of literacy and reading education (p. 541)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in secondary education (p. 541)
- Master of Arts in Education and Human Development in the field of early childhood special education (p. 542)
- Master of Arts in Education and Human Development in the field of educational leadership and administration (p. 544)
- Master of Arts in Education and Human Development in the field of education policy studies (p. 543)
- Master of Arts in Education and Human Development in the field of educational technology leadership (p. 544)
- Master of Arts in Education and Human Development in the field of experiential education and Jewish cultural arts (p. 545)
- Master of Arts in Education and Human Development in the field of higher education administration (p. 546)
- Master of Arts in Education and Human Development in the field of international education (p. 547)
- Master of Arts in Education and Human Development in the field of organizational leadership and learning (p. 548)
- Master of Arts in Education and Human Development in the field of rehabilitation counseling (p. 549)
- Master of Arts in Education and Human Development in the field of school counseling (p. 550)
- Master of Arts in Education and Human Development in the field of secondary special education and transition services (p. 552)
- Master of Arts in Education and Human Development in the field of special education for children with emotional and behavioral disabilities (p. 554)
- Master of Arts in Education and Human Development in the field of special education for culturally and linguistically diverse learners

Joint Program

- Master of Arts in Education and Human Development in the field of Educational Policy and Juris Doctor (<http://bulletin.gwu.edu/education-human-development/masters-program/education-human-development-education-policy-studies-jd>)

EDUCATION SPECIALIST

The Degree of Education Specialist

The program of advanced study leading to the degree of Education Specialist is for students with a master's degree in education who seek further professional preparation for specific objectives. The program is available in the fields of educational leadership and administration, counseling, curriculum and instruction, higher education administration, human and organizational learning, and special education.

Admission Requirements

The following are required for entrance to an Education Specialist program: an undergraduate degree and a Master of Arts in Education and Human Development or its equivalent from a regionally accredited institution, two years of pertinent experience in an education or human development field, and a graduate scholastic average of at least 3.3 and, in some programs, an acceptable score on either the Graduate Record Examination or Miller Analogies Test. Two letters of recommendation, one from a professional supervisor and one from the most recent graduate faculty advisor, are required, along with a statement of professional goals. Each applicant must be interviewed and recommended by a faculty advisor in the major field.

Programs of Study and Degree Requirements

Individual programs are developed, through a plan of study worked out with a faculty advisor, to fit the candidate's skills, interests, and career goals. A minimum of 30 credits beyond the requirements of the degree of Master of Arts in Education and Human Development is required. At least 21 credits of this work must be taken in residence at GW. A maximum of five calendar years is allowed for completion of the program.

At least 12 of the required 30 credits must be in appropriate graduate courses in education selected from the following areas: (1) foundations and cognate study, (2) background and general principles of the field of study, and (3) an area of specialization. A graduate-level research methods course must be included in the program if it was not completed in previous graduate work.

The Comprehensive Examination

Successful completion of a six-hour written or oral examination or its equivalent, at the option of the major field advisor, is required. Candidates taking the examination must be registered for at least 1 credit in the semester it is to be taken and submit an online comprehensive examination application by the published deadline.

Education Specialist Programs

- Education Specialist in the field of educational leadership and administration (p. 556)
- (p. 556)

DOCTORAL

The Degree of Doctor of Education

The Graduate School of Education and Human Development offers programs of advanced study leading to the degree of Doctor of Education (EdD). These programs provide major fields of study in curriculum and instruction, special education, educational administration and policy studies, human and organizational learning, and higher education administration. Supporting fields are available in educational administration, higher education administration, counseling, curriculum and instruction, education policy, elementary education, human development, human and organizational learning, international education, program evaluation, secondary education, special education, supervision, and teacher education. With the approval of a student's program planning committee, course work may be taken in other departments of the University and through the Consortium. All programs require study of interrelated areas of education and a doctoral dissertation in the major field of study.

All doctoral programs are designed to accommodate the needs of full-time students as well as working professionals who must pursue their studies on a part-time basis. Required graduate courses, with few exceptions, are offered in the late afternoon and evening. In some programs, selected courses may be taken at off-campus locations.

Admission Requirements

The applicant must have adequate preparation for advanced study, including the undergraduate degree and graduate work from a regionally accredited institution in the fields prerequisite to his or her objective and comparable to that required for the degree of Master of Arts in Education and Human Development at this University. Students with a master's degree in a field other than education may be considered for doctoral study provided that the degree and previous experience are judged relevant by the major field program faculty.

For an application to be considered by the major field program faculty, an applicant must have a minimum graduate scholastic average of 3.3 on a scale of 4.0 and an acceptable score on the Miller Analogies Test or Graduate Record Examination. In the field of human organizational learning, the Graduate Management Admissions Test is acceptable as well. Programs often set higher admissions standards, and the number of new doctoral students in each program is limited. All applicants must have an interview with faculty members in the major field. Students receiving favorable recommendations from the major field faculty are admitted to precandidacy for the degree.

Precandidacy and Candidacy

The Doctor of Education program is divided into two states: precandidacy and candidacy. In general, the degree program requires three or more years of full-time study beyond the master's degree or the equivalent in part-time study. Course

work and the comprehensive examination must be completed within five years, and the entire program must be completed within eight years. The minimum residency requirement in degree status for the EdD is 36 credits of course work in the precandidacy stage and 12 to 24 credits of dissertation research in the candidacy stage. In most cases, course work beyond the minimum is required.

In the precandidacy stage, all course work in the program must be completed and the comprehensive examination passed. Course work toward the doctorate is established on the basis of a framework of seven domains: knowledge of foundations; critical literature review; research methods; clarity of thought, as expressed both in speech and in writing; professional development; technological skills; and depth of knowledge of the specialty area. A program plan of study is developed between the doctoral student and a doctoral study advising team, generally consisting of two members of the program faculty.

The comprehensive examination is generally a two-day examination held each semester and taken upon completion of all course work (Pre-Dissertation Seminar may be excepted). Students taking the examination must be registered for at least 1 credit in the semester it is to be taken and must file an online application in the dean's office by the published deadline. Programs may have specific comprehensive exam requirements.

The candidacy stage of doctoral study begins after successful completion of the content course work *and* the comprehensive examination. A doctoral research dissertation committee is established and the candidate develops a dissertation proposal (this may be while registered in Pre-Dissertation Seminar). Upon successful completion of course work listed on the approved program plan of study, students must register for dissertation research at the rate of 3 or 6 credits each fall and spring semester. A minimum of 12 dissertation research credits are required for graduation. Students who have not defended their dissertation after 12 credits continue to register at the rate of 3 or 6 credits until they have reached 24 credits of dissertation research. Once they have reached their 24 credit maximum, they must register each subsequent fall and spring semester for 1 credit of Continuing Research until completion of their degree program with the successful defense of the dissertation to the Dissertation Oral Examination Committee. The accepted dissertation is submitted electronically, with a processing fee paid directly to Proquest/UMI.

Detailed information on the EdD program and its administration is available in the GSEHD Doctoral Student Handbook (<http://gsehd.gwu.edu/sites/default/files/2014%20-%202015%20Doctoral%20Handbook.pdf>). Students completing their degree program should refer to the section on Graduation Requirements, Participating in the Commencement Ceremony, under University Regulations.

The Degree of Doctor of Philosophy in the Field of Counseling

A Ph.D. in the field of counseling is accredited by the Council for Accreditation of Counseling and Related Educational Programs.

Doctoral programs

- Doctor of Education in the field of curriculum and instruction (p. 558)
- Doctor of Education in the field of educational administration and policy studies (p. 559)
- Doctor of Education in the field of higher education administration (p. 561)
- Doctor of Education in the field of human and organizational learning (p. 561)
- Doctor of Education in the field of special education (p. 563)
- Doctor of Philosophy in the field of counseling (p. 564)

CERTIFICATES

The Graduate School of Education and Human Development offers the following graduate certificate programs. Graduate certificates do not constitute eligibility for an initial license or assure admission to a subsequent degree program. Courses taken as part of a certificate program may be applied toward advanced credentials or endorsements added to an initial license.

- Assessment, Testing, and Measurement in Education (p. 565)
- Autism Spectrum Disorders
- Brain Injury: Educational and Transition Services
- Counseling and Life Transitions
- Design and Assessment of Adult Learning
- Educational Leadership and Administration
- E-Learning
- Global Leadership in Teams and Organizations
- Incorporating International Perspectives in Education (p. 566)
- Instructional Design
- Integrating Technology into Education (p. 566)
- Job Development and Placement
- Leadership Development
- Leadership in Educational Technology
- Multimedia Development
- Organizational Learning and Change
- Professional Teaching Standards
- Reading and Literacy
- Secondary Special Education and Transition Services
- Special Education for Culturally and Linguistically Diverse Learners

- STEM Master Teacher (p. 566)
- Teaching English Language Learners
- Training and Educational Technology

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
- Counseling (CNSL) (p. 1023)
- Curriculum and Pedagogy (CPED) (p. 1026)
- Education (EDUC) (p. 1039)
- Human and Organizational Learning (HOL) (p. 1122)
- Special Education (SPED) (p. 1308)

MASTER'S PROGRAMS

Teacher Certification Preparation Programs

Programs are available to prepare students for teacher licensure in elementary, secondary, and special education through the Master of Arts in Education and Human Development, Master of Education, and Education Specialist degree programs. Students who plan to prepare for licensure must apply to the appropriate degree program. These degree programs are also available to credentialed teachers seeking additional endorsements.

In accordance with the 2008 Higher Education Opportunity Act, Title II, Section 205, The George Washington University Graduate School of Education and Human Development provides required information in response to any request by potential applicants, guidance counselors, and prospective employers. An information sheet can be viewed at the school's website (<http://gsehd.gwu.edu>).

Master of Arts in Teaching

- Master of Arts in Teaching in the field of museum education (p. 548)

Master of Education

- Master of Education in the field of elementary education (p. 545)
- Master of Education in the field of secondary education (p. 551)

Master of Arts in Education and Human Development

- Master of Arts in Education and Human Development individualized program (p. 547)
- Master of Arts in Education and Human Development in the field of assessment, testing, and measurement in education (p. 539)
- Master of Arts in Education and Human Development in the field of clinical mental health counseling (p. 539)
- Master of Arts in Education and Human Development in the field of curriculum and instruction (p. 540)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in elementary education (p. 540)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in interdisciplinary studies of literacy and reading education (p. 541)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in secondary education (p. 541)
- Master of Arts in Education and Human Development in the field of early childhood special education (p. 542)
- Master of Arts in Education and Human Development in the field of educational leadership and administration (p. 544)
- Master of Arts in Education and Human Development in the field of education policy studies (p. 543)
- Master of Arts in Education and Human Development in the field of educational technology leadership (p. 544)
- Master of Arts in Education and Human Development in the field of experiential education and Jewish cultural arts (p. 545)
- Master of Arts in Education and Human Development in the field of higher education administration (p. 546)
- Master of Arts in Education and Human Development in the field of international education (p. 547)
- Master of Arts in Education and Human Development in the field of organizational leadership and learning (p. 548)
- Master of Arts in Education and Human Development in the field of rehabilitation counseling (p. 549)
- Master of Arts in Education and Human Development in the field of school counseling (p. 550)
- Master of Arts in Education and Human Development in the field of secondary special education and transition services (p. 552)
- Master of Arts in Education and Human Development in the field of special education for children with emotional and behavioral disabilities (p. 554)
- Master of Arts in Education and Human Development in the field of special education for culturally and linguistically diverse learners

Joint Program

- Master of Arts in Education and Human Development in the field of Educational Policy and Juris Doctor (<http://bulletin.gwu.edu/education-human-development/masters-program/education-human-development-education-policy-studies-jd>)

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF ASSESSMENT, TESTING AND MEASUREMENT IN EDUCATION

The M.A.Ed.&H.D. in the field of assessment, testing, and measurement (ATM) in education program is designed for individuals who are entering or advancing in positions associated with assessment, testing, and measurement in diverse settings. This specialized field combines the study of human behavior with statistical analysis, testing theory, educational measurement, and evaluation. ATM is the science of measuring educational factors such as learning, preference, aptitude, and personality. ATM specialists (commonly called psychometricians) design tests that collect empirical data and quantify the personal characteristics of individuals, comparing those results within or across populations. In addition to creating assessment instruments, some psychometricians also govern the tests and analyze the results.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://gsehd.gwu.edu/programs/assessment-testing-and-measurement-education>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 24 credits in required courses and 6 credits in electives, and completion of a written qualifying examination.

Required

EDUC 6112	Foundations of Assessment, Testing, and Measurement in Education
EDUC 8120	Group Comparison Designs and Analyses
EDUC 8170	Educational Measurement
EDUC 8171	Predictive Designs and Analyses
EDUC 8175	Item Response Theory
EDUC 8177	Assessment Engineering

EDUC 8179	Capstone Project in Assessment, Testing, and Measurement in Education
-----------	---

Elective

6 credits in approved electives

Elective courses should be selected in consultation with the program advisor.

A written qualifying exam (administered during the early spring semester by an ATM committee).
--

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF CLINICAL MENTAL HEALTH COUNSELING

The M.A.Ed.&H.D. in the field of mental health counseling program prepares graduates to enter the counseling profession in a variety of human service settings, including welfare and other social service agencies, mental health centers, penal institutions, court systems, employment centers, allied health agencies, government service agencies, community college counseling centers, employee assistance programs, and private practice. A subspecialty in employee assistance counseling is available to prepare counselors for business, industry, and government settings. The program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP).

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://gsehd.gwu.edu/programs/clinical-mental-health-counseling>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 60 credits, including 54 credits in required courses and 6 credits in elective courses, and completion of 600 hours in internships and 100 hours in a practicum.

Required

EDUC 6114	Introduction to Quantitative Research
CNSL 6151	Professional and Ethical Orientation to Counseling
CNSL 6153	Counseling Interview Skills
CNSL 6154	Theories and Techniques of Counseling
CNSL 6155	Career Counseling

CNSL 6157	Individual Assessment in Counseling
CNSL 6159	Psychosocial Adaptation
CNSL 6161	Group Counseling
CNSL 6163	Social/Cultural Dimensions-Cns
CNSL 6169	Counseling Substance Abusers
CNSL 6171	Family Counseling
CNSL 6173	Diagnosis and Treatment Planning
CNSL 6174	Trauma and Crisis Intervention
CNSL 6185	Practicum/Internship in Counseling
CNSL 6186	Advanced Internship in Counseling
CNSL 6268	Foundations/Practicum: Clinical Mental Health Counseling
HDEV 6108	Life Span Human Development
HDEV 6109	Child Development
or HDEV 6110	Adolescent Development
or HDEV 8244	Adult and Aging Development

Elective

6 credits in elective courses

Elective courses should be selected in consultation with the program advisor

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF CURRICULUM AND INSTRUCTION

This program prepares teachers and other educational personnel for increased responsibilities in the planning, implementation, research, and evaluation of curriculum and instruction. The minimum 30-credit program includes study in curriculum development, research and evaluation of instructional practice, teacher education, work with special populations, and school policy and leadership. Students must select from one of the following program specialty concentrations:

- Concentration in elementary education (p. 540)
- Concentration in interdisciplinary studies of literacy and reading education (p. 541)
- Concentration in secondary education (p. 541)

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF CURRICULUM AND INSTRUCTION WITH A CONCENTRATION IN ELEMENTARY EDUCATION

The M.A.Ed.&H.D. in the field of curriculum and instruction with a concentration in elementary education program prepares teachers and other educational personnel for increased responsibilities in the planning, implementation, research, and evaluation of curriculum and instruction. The program includes study in curriculum development, research and evaluation of instructional practice, teacher education, work with special populations, and school policy and leadership. A program specialty concentration may include reading and literacy, elementary education, or secondary education.

Students enrolled in the Master's in Curriculum and Instruction program can do so concurrently with the Incorporating International Perspectives in Education certificate. Courses can be double counted toward earning the master's degree and certificate.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://bulletin.gwu.edu/education-human-development/masters-program/education-human-development-curriculum-instruction/elementary-education/Master%20of%20Arts%20in%20Education%20and%20Human%20Development%20in%20the%20Field%20of%20Curriculum%20and%20Instruction%20with%20a%20Concentration%20in%20Elementary%20Education>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits, including 9 credits in core courses, 15 credits in courses in the concentration, 9 credits in elective courses, and completion of the Master of Arts in Education and Human Development comprehensive examination.

Core

EDUC 6114	Introduction to Quantitative Research
CPED 6340	Teacher Leadership in Education
CPED 6608	Development and Diversity

Elementary education concentration

CPED 6305	Foundations of Curriculum Theory
CPED 6622	Foundations of Reading Development
CPED 6225	Introduction to International Curricula
EDUC 6640	Selected Topics in International Education

Elective

9 credits in elective courses. Electives should be selected in consultation with the program advisor.

Master of Arts in Education and Human Development comprehensive exam required

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF CURRICULUM AND INSTRUCTION WITH A CONCENTRATION IN INTERDISCIPLINARY STUDIES OF LITERACY AND READING EDUCATION

The M.A.Ed.&H.D. in the field of curriculum and instruction with a concentration in interdisciplinary studies of literacy and reading education program prepares teachers, education professionals, and others with diverse experiences for leadership roles in school and out-of-school settings. The program incorporates traditional aspects of literacy curriculum and instruction and provides pathways to becoming reading specialists and literacy coaches. Study in theories and practices in the arts, humanities, museums and informal learning environments, and digital technologies helps prepare educators for new teaching and learning opportunities.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 9 credits in core course, 21 credits in courses in the concentration, and completion of the Master of Arts in Education and Human Development comprehensive examination.

Core

EDUC 6114	Introduction to Quantitative Research
CPED 6340	Teacher Leadership in Education

CPED 6608	Development and Diversity

CPED 6292	Practicum 2: Leadership in Interdisciplinary Literacy; Collaboration, Planning & Communication
CPED 6624	Foundations and Research of Literacy and Reading Education
CPED 6626	Reading Diagnosis, Assessment & Solutions
CPED 6628	Teaching and Learning of Literacies in Informal Learning Environments
CPED 6691	Interdisciplinary Adolescent Literacies

Master of Arts in Education and Human Development comprehensive exam required

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF CURRICULUM AND INSTRUCTION WITH A CONCENTRATION IN SECONDARY EDUCATION

The M.A.Ed.&H.D. in the field of curriculum and instruction with a concentration in secondary education program prepares teachers and other educational personnel for increased responsibilities in the planning, implementation, research, and evaluation of curriculum and instruction. The program of study includes curriculum development, research and evaluation of instructional practice, teacher education, work with special populations, and school policy and leadership. A program specialty concentration may include reading and literacy, elementary education, or secondary education.

Students enrolled in the master's in curriculum and instruction program can do so concurrently with the Incorporating International Perspectives in Education certificate. Courses can be double counted toward earning the master's degree and certificate.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://gsehd.gwu.edu/programs/secondary-education>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits, including 9 credits in core courses, 21 credits in the concentration, 3 credits in elective courses, and completion of the Master of Arts in Education and Human Development comprehensive examination.

Core

EDUC 6114	Introduction to Quantitative Research
CPED 6340	Teacher Leadership in Education
CPED 6608	Development and Diversity

Secondary education concentration requirements:

CPED 6305	Foundations of Curriculum Theory
CPED 6365	Perspectives and Research in Teaching Computer Science
CPED 6366	Perspectives and Research in Teaching English
CPED 6367	Perspectives and Research in Teaching Science
CPED 6368	Perspectives and Research in Teaching Social Studies
CPED 6370	Perspectives and Research in Teaching Mathematics
CPED 6239	Practicum in Curriculum and Instruction

The remaining credits should be selected in consultation with the departmental advisor

Master of Arts in Education and Human Development comprehensive exam required

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF EARLY CHILDHOOD SPECIAL EDUCATION

The M.A.Ed.&H.D. in the field of early childhood special education offers students the opportunity to train in age-related specialties of preprimary, birth to age five, or primary school age, or K - grade 3. The program is approved by the National Association for the Education of Young Children (NAEYC) and the Division of Early Childhood (DEC) of

the Council for Exceptional Children. Students gain knowledge and skills in the specific content areas recommended by NAEYC and DEC: child development and learning; curriculum development and implementation; routine-based intervention in natural environments; family-centered services delivery models; child assessment, evaluation, and progress monitoring; cultural, linguistic, and economic diversity; and field-based practicum and internships.

REQUIREMENTS

The following requirements must be fulfilled: for the regular degree—39 credits, including the required core courses and general courses; or, for the degree with an optional concentration in infant special education—42 credits, including the required core courses and infant special education courses. In both cases, completion of the Master of Arts in Education and Human Development comprehensive examination, and completion of the relevant teacher licensure assessments (see below) are required.

Core

EDUC 6114	Introduction to Quantitative Research
SPED 6222	Legal Issues and Public Policy for Individuals With Disabilities
SPED 6240	Family Support and Guidance in Special Education
or SPED 6100	Selected Topics
SPED 6261	Practicum: Methods and Materials for Young Children with Disabilities
SPED 6266	The Development of Language and Literacy
SPED 6268	Development of Children and Youth with Disabilities
SPED 6269	Etiology, Symptomatology, and Approaches to Intervention with Children with Disabilities
SPED 6290	Affective Development and Behavior Management in Special Education

Students may choose to complete the regular degree with the following four courses or to complete the degree with the optional concentration in infant special education, below.

CPED 6622	Foundations of Reading Development
SPED 6260	Developmental Assessment in Special Education
SPED 6262	Formal Assessment of Young Children with Disabilities

SPED 6993 Internship: Teaching Young Children with Disabilities (taken for six credits)

Master of Arts in Education and Human Development comprehensive exam required

Completion of the relevant teacher licensure assessments (i.e., PRAXIS) required by the District of Columbia Educator Licensure Services Office

Infant special education concentration option courses

CPED 6221 Developmental Reading: Emergent Literacy

SPED 6242 Neurodevelopmental Assessment and Programming for Infants and Toddlers with Disabilities

SPED 6243 Developmental Assessment of Infants

SPED 6267 Instructional and Assistive Technology in Early Childhood Special Education

SPED 6994 Internship: Early Intervention (taken for six credits)

Master of Arts in Education and Human Development comprehensive exam required

Completion of the relevant teacher licensure assessments (i.e., PRAXIS) required by the District of Columbia Educator Licensure Services Office

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF EDUCATION POLICY STUDIES

The M.A.Ed.&H.D in the field of education policy studies program helps students develop skills in analyzing problems and policies related to education policy issues at the national, state, and local levels, and in the K-12 and higher education sectors. Emphasis is placed on developing an understanding of the political, economic, and social environments affecting education policy and on the competencies needed to develop policy options, analyze their potential, select the most promising, implement policies effectively, and evaluate their impact. Internships are possible in a variety of federal, state, and local agencies. Topics covered in this field include school reform, urban education problems, student achievement, school finance and its equity, teacher quality and effectiveness, equal opportunity, access to higher education, and accountability. Elective credits are used to develop expertise and skills in a substantial area of education policy.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://gsehd.gwu.edu/programs/education-policy-studies>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 24 credits in required courses and 12 credits in elective courses.

Required

EDUC 6114 Introduction to Quantitative Research

or EDUC 6116 Introduction to Educational Statistics

EDUC 6314 History of American Education Reform

Elective

12 credits in approved electives

Elective courses should be selected in consultation with the program advisor.

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF EDUCATIONAL LEADERSHIP AND ADMINISTRATION

Offered in both classroom and distance learning formats, the M.A.Ed.&H.D in the field of educational leadership and administration program prepares students for various school-based and central office leadership positions, supervisory positions, and increased responsibility in teaching. The program is designed to prepare graduates for advanced levels of professional responsibility in diverse educational communities and to increase their technical, conceptual, political, and leadership skills. Emphasis is on leadership and management, change, communication, organizational learning, administrative and legal issues, human relations, human resource development, general supervisory principles and responsibilities, and supervision of instruction.

The program includes courses and field experiences designed to meet administrative certification requirements in the District of Columbia, Maryland, Virginia, North Carolina, and other states that honor interstate compact agreements.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://gsehd.gwu.edu/programs/educational-leadership-administration-0>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits in required courses.

Required

EDUC 6422	Instructional Needs Analysis
EDUC 6240	Fundamentals of Educational Leadership and the Change Process
EDUC 6232	Supervision and Evaluation of Instruction
EDUC 6234	Site-Based Leadership: K-12
EDUC 6244	School-Community Relations
EDUC 6236	School Law and Policy
EDUC 6114	Introduction to Quantitative Research
EDUC 6246	Seminar: Applied Educational Administration

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF EDUCATIONAL TECHNOLOGY LEADERSHIP

The M.A.Ed.&H.D in the field of education and human development in the field of educational technology leadership is designed for individuals who are entering or advancing in positions associated with schools, higher education, alternative educational settings, or other human service occupations in which computers and related information delivery technologies are used. The program of study is delivered online and provides students with opportunities to develop the knowledge, understanding, and skills necessary to provide leadership in the rapidly changing environment of technology in education.

This pioneering program is delivered in an interactive distance learning format to students around the world. The required curriculum covers the theory and practice of educational technology, including the use of computers and other instructional technology systems, technological management systems, policy making, research methods, and leadership.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://gsehd.gwu.edu/programs/educational-technology-leadership>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 27 credits in required courses and 9 credits in elective courses.

Required

EDUC 6114	Introduction to Quantitative Research
or EDUC 6116	Introduction to Educational Statistics
EDUC 6368	Power, Leadership & Education
EDUC 6371	Education Policy
EDUC 6401	Applying Educational Media and Technology
EDUC 6402	Computers in Education and Human Development
EDUC 6403	Educational Hardware Systems
EDUC 6404	Managing Computer Applications

EDUC 6405	Developing Multimedia Materials
EDUC 6406	Instructional Design
Elective	
Three of the following	
EDUC 6421	Critical Issues in Distance Education
EDUC 6422	Instructional Needs Analysis
EDUC 6425	Developing Effective Training with Technology
EDUC 6426	Computer Interface Design for Learning
EDUC 6427	Advanced Instructional Design
EDUC 6428	Developing Digital Professional Portfolios

MASTER OF EDUCATION IN THE FIELD OF ELEMENTARY EDUCATION

The Master of Education in the field of elementary education is designed for those with an undergraduate degree in the arts and sciences. The program includes coursework for students who wish to become eligible for licensure/certification for teaching at the elementary school level (grades 1-6). Additional coursework in content areas may be needed to meet specific jurisdictional requirements for licensure/certification.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://gsehd.gwu.edu/programs/elementary-education>) for additional program information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits in required courses.

Required

Foundations

CPED 6604	Perspectives in American Education
CPED 6606	Theories of Learning and Development
CPED 6608	Development and Diversity
SPED 6290	Affective Development and Behavior Management in Special Education

Methodology

CPED 6410	Reading Children's Literature across the Curriculum

CPED 6412	Elementary School Curriculum and Methods (Science)
CPED 6412	Elementary School Curriculum and Methods (Language Arts)
CPED 6412	Elementary School Curriculum and Methods (Social Studies)
CPED 6623	Foundations of Reading Development
EDUC 6114	Introduction to Quantitative Research
Internship	
CPED 6635	Professional Internship in Elementary Education (taken for 6 credits)

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF EXPERIENTIAL EDUCATION AND JEWISH CULTURAL ARTS

The Graduate School of Education and Human Development, in concert with the Columbian College of Arts and Sciences, offers an interdisciplinary, two-year program in experiential education and Jewish cultural arts. The program is designed to prepare graduates for leadership in Jewish cultural programming in museums and historic sites, arts organizations and festivals, community centers and campus associations, cultural diplomacy and heritage tourism, as well as private and public educational institutions.

Students more specifically interested in museum education should refer to the M.A. in teaching, museum education program (<http://gsehd.gwu.edu/programs/museum-education>). Those interested in museum studies more generally should refer to the M.A. in the field of museum studies program (<http://bulletin.gwu.edu/arts-sciences/museum-studies>) in Columbian College.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://gsehd.gwu.edu/programs/experiential-education-jewish-cultural-arts>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits in required courses.

Required

EDUC 6100	Experimental Courses (Mosaic: The Institute I (taken for 1 credit)
EDUC 6100	Experimental Courses (Mosaic: The Institute II (taken for 2 credits)
EDUC 6100	Experimental Courses (An Introduction to Experiential Jewish Education (taken for 6 credits)
JSTD 6211	Displaying Jewish Culture: Landmark Exhibitions on Judaism and the Jewish Experience
or JSTD 6001	Topics in Judaic Studies
JSTD 6298	Behind the Scenes: The Jewish Arts World in Contemporary Perspective
or JSTD 6202	Multiple Lives: The Fate of Jewish Cultural Expression
EDUC 6711	Museum as a Learning Environment
EDUC 6100	Experimental Courses (Behind the Scenes: Experiential Museum Education (taken for 3 credits)
EDUC 6100	Experimental Courses (Artful Synthesis: Experiential Jewish Education in Theory and Practice (taken for 6 credits)
EDUC 6100	Experimental Courses (Capstone Fellows Program (taken for 3 credits)

Mosaic Workshop (credits earned in Mosaic: The Institute II)

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF HIGHER EDUCATION ADMINISTRATION

The M.A.Ed.&H.D in the field of higher education administration program is designed to provide students with the skills and knowledge for successful work in entry- and mid-career professional positions in institutions of higher education, associations, national and international government agencies, and other related organizations. Students may select a concentration in general administration, student affairs administration, higher education policy and finance, and international education. The program of study includes an introduction to higher education administration, research

design and analysis, the concentration (in-depth focus on a particular aspect of higher education and its administration), application electives (including internships and practicums), and leadership integration.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://gsehd.gwu.edu/programs/higher-education-administration-0>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 12 credits in required core courses, 12 to 15 credits in one concentration, and 3 to 6 credits in elective courses.

Higher education administration core courses:

EDUC 6112	Foundations of Assessment, Testing, and Measurement in Education
EDUC 6500	Intro Stu Aff & Higher Ed
EDUC 6510	Administration of Higher Education
EDUC 6585	Master's Internship in Higher Education Administration

General administration concentration:

EDUC 6540	Group and Organizational Theories
EDUC 6560	Legal Problems in Higher Education
EDUC 6555	Higher Education Policy
or EDUC 6565	Financing Higher Education
EDUC 8560	Case Studies in Higher Education Administration

Electives

6 credits in elective courses to be selected in consultation with the advisor.

Higher education policy and finance concentration:

EDUC 6555	Higher Education Policy
EDUC 6565	Financing Higher Education
EDUC 6560	Legal Problems in Higher Education
EDUC 8540	History of Higher Ed

Electives

6 credits in elective courses to be selected in consultation with the advisor.

International education concentration:

EDUC 6602	Regional Studies in International Education
or EDUC 6615	Internationalizing U.S. Schools
or EDUC 6630	International Experiences
EDUC 6610	Programs and Policies in International Education
EDUC 6620	Strategies and Analysis in International Education
EDUC 8560	Case Studies in Higher Education Administration

Electives

6 credits in elective courses to be selected in consultation with the advisor.

Student affairs administration concentration:

EDUC 6520	Foundations of College Student Development
EDUC 6525	Managing College Student Services Programs
EDUC 6530	Intercultural Campus Ldrshp
EDUC 6540	Group and Organizational Theories
EDUC 6585	Master's Internship in Higher Education Administration

Electives

3 credits in elective courses to be selected in consultation with the advisor.

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT - INDIVIDUALIZED PROGRAM

The M.A.Ed.&H.D. individualized program provides students with an opportunity to develop a program of study that cuts across existing fields, both within the Graduate School of Education and Human Development and between the School and other schools and departments of the University and the Consortium. It is designed to meet specific career and professional objectives of applicants who have unique needs. The flexible program structure can be tailored to prepare for new and emerging fields in education and human

development. This program is available within or across the five departments of the Graduate School of Education and Human Development.

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

REQUIREMENTS

The following requirements must be fulfilled: 30 credits distributed as outlined below:

12 credits of core foundation curriculum courses in human development, social/historical/philosophical foundations in education, and curriculum

12 credits of courses that meet student's program goals and objectives

Minimum of 6 credits of fieldwork or the equivalent

All work toward the degree must be specified at the time the initial program is developed.

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF INTERNATIONAL EDUCATION

The M.A.Ed.&H.D. in the field of international education program is designed for individuals who are entering or advancing in positions associated with training, education, adult learning, and development activities in diverse settings that require international understanding. Students acquire knowledge of other countries and cultures, using the education system as a means of interpreting and translating knowledge across cultures, and analysis of the formal and non-formal school systems as they reflect history, culture, development, values, contemporary concerns, and future trends. In addition, students acquire tools, methods, and habits of analysis that enable them to play a variety of roles as leaders and change agents.

Students in this program can also enroll in and receive a graduate certificate in incorporating international perspectives in education.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://gsehd.gwu.edu/programs/international-education>) for additional information.

REQUIREMENTS

Required: 36 credits, including 18 credits in required courses, 9 credits in courses in a specialization, and 9 credits in elective courses.

Required

EDUC 6114	Introduction to Quantitative Research
or EDUC 6116	Introduction to Educational Statistics

And five of the following:

EDUC 6601	International and Comparative Education
EDUC 6602	Regional Studies in International Education
EDUC 6610	Programs and Policies in International Education
EDUC 6615	Internationalizing U.S. Schools
EDUC 6620	Strategies and Analysis in International Education
EDUC 6630	International Experiences
EDUC 6660	Capstone in International Education
EDUC 6631	Internship: International Education
EDUC 6640	Selected Topics in International Education
EDUC 6650	Education and National Development

Specialization

9 credits in a professional, academic, or regional specialization selected in consultation with the program advisor.

Elective

9 credits of approved electives selected in consultation with the program advisor.

Up to 6 additional credit hours of internship may be required for students who do not have international education related experience.

MASTER OF ARTS IN TEACHING IN THE FIELD OF MUSEUM EDUCATION

The M.A.Ed.&H.D. in the field of museum education is an intensive, interdisciplinary program designed to prepare graduates for work fulfilling the educational mission of history or science museums; zoos, aquaria, or nature centers; and historical societies or sites. Graduates also qualify to serve as liaisons between schools and museums and as professionals in museum-related private and public agencies.

Students interested in museum studies more generally should refer to Museum Studies (p. 277). Those interested in the collaborative program on Jewish cultural arts should refer to Experiential Education and Jewish Cultural Arts (p. 545).

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://gsehd.gwu.edu/programs/museum-education>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits, including 27 credits in required courses and 6 credits in elective courses.

Required

EDUC 6701	Museums as Institutions I: Fundamentals
EDUC 6702	Facilitating Museum Learning I: Fundamentals
EDUC 6703	Museum Audiences
EDUC 6704	Facilitating Museum Learning II: Field Placement and Seminar
EDUC 6705	Museums as Institutions II: Field Placement and Seminar
EDUC 6706	Evaluating Museum Learning
EDUC 6707	Museum Proposal Writing

Elective

6 credits in elective courses.

Elective courses should be selected in consultation with the program advisor.

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF ORGANIZATIONAL LEADERSHIP AND LEARNING

The M.A.Ed.&H.D. in the field of organizational leadership and learning program is designed for individuals entering or advancing in positions associated with learning in organizational settings in all sectors of society. Typical careers are in organizational development, internal and external consulting, and training and development. The program is interdisciplinary, and students are encouraged to tailor their programs to individual career needs and objectives.

The required courses in the 30-credit program cover human behavior in organizations, adult learning, group dynamics, research methods, organizational change, strategic change, global leadership, leadership development, and assessing the impact of change efforts. Project work in Washington-area business, industry, government, and community organizations may be a part of the learning experience.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://gsehd.gwu.edu/programs/organizational-leadership-learning>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 21 credits in required courses and 9 credits in elective courses.

Required

EDUC 6112	Foundations of Assessment, Testing, and Measurement in Education
HOL 6700	Human Behavior and Learning in Organizations
HOL 6701	Adult Learning
HOL 6702	Organizational Change I
HOL 6703	Organizational Change II
HOL 6704	Leadership in Organizations
HOL 6746	Work Groups and Teams in Organizations

Elective

Any combination of 3 courses from the following tracks for a broader competency or 3 courses from any one track for a more in-depth competency

Leadership Track

Global Leadership	
HOL 6706	Current Issues in Organizational Leadership
Leadership Development	
HOL 6101	Research and Independent Study
HOL 6725	Internship in Human Resource Development

Learning Track

HOL 6101	Research and Independent Study
----------	--------------------------------

HOL 6707	Organizational Learning
HOL 6724	Increasing the Capacity to Learn
HOL 6725	Internship in Human Resource Development
HOL 6742	Design of Adult Learning Interventions
HOL 6743	Action Learning
Change Track	
HOL 6101	Research and Independent Study
HOL 6705	Strategic Change
HOL 6721	Assessing the Impact of Organizational Change
HOL 6725	Internship in Human Resource Development
HOL 6744	Meaningful Workplaces
Globalization Track	
HOL 6100	Special Workshop (Global Mindset)
HOL 6100	Special Workshop (Globalization, Change and Learning)
HOL 6101	Research and Independent Study
HOL 6725	Internship in Human Resource Development
HOL 6747	International and Multicultural Issues in Organizations

Note: Internship and research/independent study courses might be used as electives in a track, provided the subject matter of the work is relevant. For example, a research project in leadership could qualify for 3 elective credits in the Leadership Track.

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF REHABILITATION COUNSELING

The M.Ed.&H.D. in the field of education and human development rehabilitation counseling program prepares highly knowledgeable students to become professional practitioners assisting persons who are physically, mentally, emotionally, or socially disabled to become empowered and to assume or to resume their place in society. This program leads to licensure and public and private employment opportunities.

Areas of concentration include autism spectrum disorder, traumatic brain injury, and psychiatric disabilities and substance abuse.

Specific admission requirements are shown on the Graduate Program (<http://www.gwu.edu/all-graduate-programs>) Finder.

Visit the program website (<http://gsehd.gwu.edu/programs/rehabilitation-counseling>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: A minimum of 48 credits (50 credits for the specialization in the rehabilitation of individuals who are mentally ill) from the following:

Required

CNSL 6130	Vocational Assessment of Individuals with Disabilities
or CNSL 6157	Individual Assessment in Counseling
CNSL 6151	Professional and Ethical Orientation to Counseling
CNSL 6153	Counseling Interview Skills
CNSL 6154	Theories and Techniques of Counseling
CNSL 6155	Career Counseling
CNSL 6161	Group Counseling
CNSL 6163	Social/Cultural Dimensions-Cns
CNSL 6185	Practicum/Internship in Counseling
CNSL 6186	Advanced Internship in Counseling
CNSL 6376	Foundations/Practicum: Rehabilitation and Case Management
CNSL 6378	Disability Management and Psychosocial Rehabilitation
CNSL 6380	Job Placement and Supported Employment
CNSL 6381	Medical and Psychosocial Aspects of Disabilities
EDUC 6114	Introduction to Quantitative Research
or EDUC 6116	Introduction to Educational Statistics

Electives

Six credits of electives selected in consultation with advisor

Optional concentrations are available in autism and spectrum disorders, substance abuse and psychiatric disabilities, and traumatic brain injury.

Students who are admitted to the program with a specialization in the rehabilitation of individuals who are mentally ill must complete 50 credits of the following:

Rehabilitation of individuals who are mentally ill specialization requirements:

EDUC 6114	Introduction to Quantitative Research
CNSL 6100	Special Workshop
CNSL 6101	Research and Independent Study
CNSL 6130	Vocational Assessment of Individuals with Disabilities
CNSL 6151	Professional and Ethical Orientation to Counseling
CNSL 6153	Counseling Interview Skills
CNSL 6154	Theories and Techniques of Counseling
CNSL 6155	Career Counseling
CNSL 6161	Group Counseling
CNSL 6163	Social/Cultural Dimensions-Cns
CNSL 6173	Diagnosis and Treatment Planning
CNSL 6185	Practicum/Internship in Counseling
CNSL 6186	Advanced Internship in Counseling
CNSL 6376	Foundations/Practicum: Rehabilitation and Case Management
CNSL 6378	Disability Management and Psychosocial Rehabilitation
CNSL 6380	Job Placement and Supported Employment
CNSL 6381	Medical and Psychosocial Aspects of Disabilities

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF SCHOOL COUNSELING

The M.A.Ed.&H.D. in the field of school counseling is accredited by Council for Accreditation of Counseling and Related Educational Programs (CACREP) and provides professional preparation for individuals who wish to become

certified as counselors in public and private schools. The program is designed to equip students with the requisite knowledge and skills to provide professional counseling, assessment, consultation, and guidance services in a school setting.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://gsehd.gwu.edu/programs/school-counseling>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits, including 42 credits in required courses and 6 credits in elective courses:

Required	
EDUC 6114	Introduction to Quantitative Research
or EDUC 6116	Introduction to Educational Statistics
CNSL 6151	Professional and Ethical Orientation to Counseling
CNSL 6153	Counseling Interview Skills
CNSL 6154	Theories and Techniques of Counseling
CNSL 6155	Career Counseling
CNSL 6157	Individual Assessment in Counseling
CNSL 6159	Psychosocial Adaptation
CNSL 6161	Group Counseling
CNSL 6163	Social/Cultural Dimensions-Cns
CNSL 6185	Practicum/Internship in Counseling
CNSL 6186	Advanced Internship in Counseling
CNSL 6466	Foundations of School Counseling K-12
HDEV 6108	Life Span Human Development
HDEV 6109	Child Development
or HDEV 6110	Adolescent Development
Elective	
6 credits of approved electives	
The remaining credits should be selected in consultation with the program advisor.	

Counseling students are required to complete 600 hours as part of their internships (300 hours per course) and 100 hours as part of their practicum.

MASTER OF EDUCATION IN THE FIELD OF SECONDARY EDUCATION

The M.Ed. in the field of secondary education program is designed for those individuals with an undergraduate degree in the arts and sciences. Students are expected to enter the program with substantial coursework in an academic field taught in secondary schools. Degree candidates may specialize in English, English as a second language, foreign languages (Arabic, Chinese, French, German, Italian, Latin, Russian, and Spanish), mathematics, science (biology, chemistry, general science, and physics), or social studies. Required program coursework includes credits leading to eligibility for teacher licensure/certification; specific course work in the subject area to be taught may be needed to meet jurisdictional requirements for licensure/certification.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://gsehd.gwu.edu/programs/secondary-education>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits (36 credits for the ESL concentration), including required core courses, all courses in one concentration, and elective credits indicated in each concentration, if applicable; completion of master of education comprehensive examination; and completion of the relevant teacher licensure assessments, in this case PRAXIS, which is required by the District of Columbia Educator Licensure Services Office.

Required core	
CPED 6340	Teacher Leadership in Education
CPED 6507	Instructional Models and Classroom Management
CPED 6532	Professional Internship in Middle School Education
CPED 6534	Professional Internship in Secondary Education
CPED 6606	Theories of Learning and Development
CPED 6608	Development and Diversity
EDUC 6112	Foundations of Assessment, Testing, and Measurement in Education

English concentration

CPED 6546 Teaching English in Secondary Schools

CPED 6691 Interdisciplinary Adolescent Literacies

3 credits of electives selected in consultation with program advisor

Master of Education comprehensive exam required

Completion of the relevant teacher licensure assessments (i.e., PRAXIS) required by the District of Columbia Educator Licensure Services Office

General science concentration

CPED 6547 Teaching Science in Secondary Schools

CPED 6691 Interdisciplinary Adolescent Literacies

3 credits of electives selected in consultation with program advisor

Master of Education comprehensive exam required

Completion of the relevant teacher licensure assessments (i.e., PRAXIS) required by the District of Columbia Educator Licensure Services Office

Social studies concentration

CPED 6548 Teaching Social Studies in Secondary Schools

CPED 6691 Interdisciplinary Adolescent Literacies

3 credits of electives selected in consultation with program advisor

Master of Education comprehensive exam required

Completion of the relevant teacher licensure assessments (i.e., PRAXIS) required by the District of Columbia Educator Licensure Services Office

Mathematics concentration

CPED 6550 Teaching Mathematics in Secondary Schools

CPED 6691 Interdisciplinary Adolescent Literacies

3 credits of electives selected in consultation with program advisor

Master of Education comprehensive exam required

Completion of the relevant teacher licensure assessments (i.e., PRAXIS) required by the District of Columbia Educator Licensure Services Office

Completion of the relevant teacher licensure assessments (i.e., PRAXIS) required by the District of Columbia Educator Licensure Services Office

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF SECONDARY SPECIAL EDUCATION AND TRANSITION SERVICES

This interdisciplinary M.A.Ed.&H.D. program prepares educators and support personnel to address the needs of youth and young adults with special needs for careers and transition from school to postsecondary education, employment, and independent self-adjustment. Teacher licensure certification preparation in categorical learning, emotional, and behavioral disabilities or noncategorical special education is available through the program. The curriculum integrates the roles of relevant disciplines and service agencies, including postsecondary planning, alternative service models, and extended career support and adjustment to independent living. The program includes traditional course work, practicum, and field-based professional practice and

research. Students can plan their programs to emphasize secondary and career programming, learning disabilities, collaborative vocational evaluation, traumatic brain injury, corrections, and business-education partnerships.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://gsehd.gwu.edu/programs/secondary-special-education-and-transition-services>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: a minimum of 39 credits, including 15 credits in core courses, 24 to 27 credits within a concentration, and successful completion of the master's comprehensive examination. Requirements for completion of the comprehensive examination and for teacher licensure assessments (PRAXIS) vary by concentration.

Secondary special education and transition services required core courses:

EDUC 6114	Introduction to Quantitative Research
SPED 6222	Legal Issues and Public Policy for Individuals With Disabilities
SPED 6233	Curriculum in Secondary Special Education and Transition
SPED 6236	Introduction to Career and Career-Technical Education and Transition Services
SPED 6280	Developmental Assessment of Adolescents

Adolescents with emotional and behavioral disabilities concentration:

CPED 6626	Practicum 1: Reading Diagnosis, Assessment and Solutions
SPED 6201	Introduction to Special Education
SPED 6231	Instructional Methods in Secondary Special Education and Transition
SPED 6238	Issues in Educating Individuals with Learning, Emotional, and Intellectual Disabilities
SPED 6239	Collaboration for Professionals Working with Students with Disabilities
SPED 6288	Characteristics of Individuals with Learning, Emotional, and Intellectual Disabilities

SPED 6290	Affective Development and Behavior Management in Special Education
SPED 6992	Behavior Management Practicum: Adolescents with Disabilities
SPED 6996	Teaching Internship in Transition Special Education
Master of Arts in Education and Human Development comprehensive exam required	
Completion of the relevant teacher licensure assessments (i.e., PRAXIS) required by the District of Columbia Educator Licensure Services Office	

Adolescents with learning disabilities concentration:

CPED 6626	Practicum 1: Reading Diagnosis, Assessment and Solutions
SPED 6201	Introduction to Special Education
SPED 6231	Instructional Methods in Secondary Special Education and Transition
SPED 6238	Issues in Educating Individuals with Learning, Emotional, and Intellectual Disabilities
SPED 6239	Collaboration for Professionals Working with Students with Disabilities
SPED 6288	Characteristics of Individuals with Learning, Emotional, and Intellectual Disabilities
SPED 6290	Affective Development and Behavior Management in Special Education
SPED 6996	Teaching Internship in Transition Special Education (taken twice)
Master of Arts in Education and Human Development comprehensive exam required	
Completion of the relevant teacher licensure assessments (i.e., PRAXIS) required by the District of Columbia Educator Licensure Services Office	

Brain injury special educator concentration:

CPED 6626	Reading Diagnosis, Assessment & Solutions
SPED 6201	Introduction to Special Education
SPED 6223	Introduction to Brain Injury: Programs, Policies, and Resources

SPED 6224	Brain Function and Impact of Brain Injury on Learning and Education
SPED 6231	Instructional Methods in Secondary Special Education and Transition
SPED 6240	Family Support and Guidance in Special Education
SPED 6255	Collaboration with Systems and Families
SPED 6290	Affective Development and Behavior Management in Special Education
SPED 6996	Teaching Internship in Transition Special Education

Master of Arts in Education and Human Development comprehensive exam required

Completion of the relevant teacher licensure assessments (i.e., PRAXIS) required by the District of Columbia Educator Licensure Services Office

Brain injury specialist concentration (without licensure):

SPED 6223	Introduction to Brain Injury: Programs, Policies, and Resources
SPED 6224	Brain Function and Impact of Brain Injury on Learning and Education
SPED 6230	Vocational Assessment of Individuals with Disabilities (taken for 3 credits)
SPED 6240	Family Support and Guidance in Special Education
SPED 6255	Collaboration with Systems and Families
SPED 6290	Affective Development and Behavior Management in Special Education
SPED 6995	School- and Community-Based Internship in Special Education and Transition (taken twice)

Master of Arts in Education and Human Development comprehensive exam required

Interdisciplinary transition services concentration (without licensure):

SPED 6210	Universal Design for Learning and Assessment
SPED 6230	Vocational Assessment of Individuals with Disabilities (taken for 3 credits)

SPED 6231	Instructional Methods in Secondary Special Education and Transition
-----------	---

SPED 6234	Seminar in Advanced Writing and Professional Presentation (taken for 3 credits)
-----------	---

SPED 6235	Employment Models for Individuals with Disabilities
-----------	---

SPED 6255	Collaboration with Systems and Families
-----------	---

SPED 6995	School- and Community-Based Internship in Special Education and Transition (taken twice)
-----------	--

Master of Arts in Education and Human Development comprehensive exam required

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF SPECIAL EDUCATION FOR CHILDREN WITH EMOTIONAL AND BEHAVIORAL DISABILITIES

The M.A.Ed.&H.D. in the field of special education for children with emotional and behavioral disabilities (EBD) is an intensive program that prepares its graduates to work with learning and emotional problems in grades K-8. The program is designed to develop competencies in the nature and needs of troubled children; assessment, programming, and teaching; and working effectively as an interdisciplinary and interagency team member. EBD students have the opportunity to work intensively with students with disabilities in a therapeutic school setting, applying their coursework directly to practice while being mentored by school-based cooperating teachers and University faculty and staff.

The program is nationally recognized by the Council for Exceptional Children, is accredited by the Council for the Accreditation of Educator Preparation (CAEP), and has been training exemplary special educators for twenty years.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://gsehd.gwu.edu/programs/special-education-children-emotional-behavioral-disorders>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 39 credits in required courses, completion of the Master of Arts in Education and Human Development comprehensive examination,

and completion of the relevant teacher licensure assessments (see below).

Required	
CPED 6224	Diagnostic Teaching of Reading: K-6
CPED 6236	Analysis of Teaching
CPED 6411	Elementary School Curriculum and Methods (in subject matter Social Studies, Mathematics, Science, or Language Arts)
CPED 6411	Elementary School Curriculum and Methods (in subject matter Social Studies, Mathematics, Science, or Language Arts)
EDUC 6114	Introduction to Quantitative Research
SPED 6201	Introduction to Special Education
SPED 6238	Issues in Educating Individuals with Learning, Emotional, and Intellectual Disabilities
SPED 6239	Collaboration for Professionals Working with Students with Disabilities
SPED 6260	Developmental Assessment in Special Education
SPED 6288	Characteristics of Individuals with Learning, Emotional, and Intellectual Disabilities
SPED 6290	Affective Development and Behavior Management in Special Education
SPED 6990	Internship in Teaching Children with Emotional and Behavioral Disabilities: Assistant Teacher
SPED 6991	Internship in Teaching Children with Emotional and Behavioral Disabilities: Co-Teacher
Master of Arts in Education and Human Development comprehensive exam	
Completion of the relevant teacher licensure assessments (i.e., PRAXIS) required by the District of Columbia Educator Licensure Services Office	

MASTER OF ARTS IN EDUCATION AND HUMAN DEVELOPMENT IN THE FIELD OF SPECIAL EDUCATION FOR CULTURALLY AND LINGUISTICALLY DIVERSE LEARNERS

This M.A.Ed. & H.D. program equips current educators with the knowledge and skills needed to understand and address the cultural, linguistic, social, and learning needs of students –including those with special needs–whose diversity impacts their school success. The program is designed for licensed teachers and educators who wish to expand their knowledge to address the changing demographics of the modern classroom. Program course work and field experiences are built around competencies in the areas of assessment, lesson planning, and teaching, with a focus on culturally and linguistically diverse students. Master’s degree students develop a professional portfolio and sit for the ESOL PRAXIS, and SPED PRAXIS exams at the end of the program. Graduates are prepared to work with students who have disabilities and those in the process of second language acquisition. Course work is offered in both distance learning and on-campus formats.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://gsehd.gwu.edu/programs/special-education-culturally-linguistically-diverse-learners>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 42 credits in required courses; completion of the Master of Arts in Education and Human Development comprehensive examination; and completion of the relevant teacher licensure assessments (see below).

Required	
EDUC 6114	Introduction to Quantitative Research
CPED 6221	Developmental Reading: Emergent Literacy
CPED 6551	Second Language Instruction
CPED 6556	Linguistic Applications in English as a Second Language
CPED 6627	Teaching Second Language Reading and Writing
SPED 6255	Collaboration with Systems and Families

SPED 6273	Impact of Culture on Education
SPED 6266	The Development of Language and Literacy
SPED 6268	Development of Children and Youth with Disabilities
SPED 6272	Strategies for Inclusion: Addressing the Needs of Diverse Learners
SPED 6275	The Culturally and Linguistically Diverse Student with Disabilities: Policy, Research, and Trends
SPED 6276	Academic and Psychosocial Assessment of the Culturally and Linguistically Diverse Student
SPED 6277	Teaching Culturally and Linguistically Diverse Students with Disabilities
SPED 6997	Internship in Teaching Culturally and Linguistically Diverse Students with Disabilities
Master of Arts in Education and Human Development comprehensive exam	

Completion of the relevant teacher licensure assessments (i.e., PRAXIS) required by the District of Columbia Educator Licensure Services Office

EDUCATION SPECIALIST PROGRAMS

The Degree of Education Specialist

The program of advanced study leading to the degree of Education Specialist is for students with a master's degree in education who seek further professional preparation for specific objectives. The program is available in the fields of educational leadership and administration, counseling, curriculum and instruction, higher education administration, human and organizational learning, and special education.

Admission Requirements

The following are required for entrance to an Education Specialist program: an undergraduate degree and a Master of Arts in Education and Human Development or its equivalent from a regionally accredited institution, two years of pertinent experience in an education or human development field, and a graduate scholastic average of at least 3.3 and, in some programs, an acceptable score on either the Graduate Record Examination or Miller Analogies Test. Two letters of recommendation, one from a professional supervisor and one from the most recent graduate faculty advisor, are required, along with a statement of professional goals. Each applicant

must be interviewed and recommended by a faculty advisor in the major field.

Programs of Study and Degree Requirements

Individual programs are developed, through a plan of study worked out with a faculty advisor, to fit the candidate's skills, interests, and career goals. A minimum of 30 credits beyond the requirements of the degree of Master of Arts in Education and Human Development is required. At least 21 credits of this work must be taken in residence at GW. A maximum of five calendar years is allowed for completion of the program.

At least 12 of the required 30 credits must be in appropriate graduate courses in education selected from the following areas: (1) foundations and cognate study, (2) background and general principles of the field of study, and (3) an area of specialization. A graduate-level research methods course must be included in the program if it was not completed in previous graduate work.

The Comprehensive Examination

Successful completion of a six-hour written or oral examination or its equivalent, at the option of the major field advisor, is required. Candidates taking the examination must be registered for at least 1 credit in the semester it is to be taken and submit an online comprehensive examination application by the published deadline.

Education Specialist Programs

- Education Specialist in the field of educational leadership and administration (p. 556)

EDUCATION SPECIALIST IN THE FIELD OF EDUCATIONAL LEADERSHIP AND ADMINISTRATION

The Education Specialist degree program, which can be pursued either on campus or in a distance learning format, prepares students to lead and promote high-quality student achievement at the district, sub-district, or school-wide level. Graduates are prepared to be PK-12 leaders who understand curriculum design, instructional excellence, motivation and support of classroom professionals, and the needs of diverse learning communities. Course work emphasizes leadership and management, change, communication, administrative and legal issues, human relations, supervision of instruction, and curriculum analysis.

The Education Specialist academic program includes courses and field experiences designed to meet administrative certification requirements in the District of Columbia, Maryland, Virginia, North Carolina, and other states that honor interstate compact agreements.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://gsehd.gwu.edu/programs/educational-leadership-administration>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits in required courses.

Required:	
EDUC 6100	Experimental Courses
EDUC 6232	Supervision and Evaluation of Instruction
EDUC 6234	Site-Based Leadership: K-12
EDUC 6236	School Law and Policy
EDUC 6240	Fundamentals of Educational Leadership and the Change Process
EDUC 6244	School-Community Relations
EDUC 6246	Seminar: Applied Educational Administration
EDUC 6287	Internship: Administration (taken twice)
EDUC 6422	Instructional Needs Analysis

DOCTORAL PROGRAMS

The Graduate School of Education and Human Development offers programs of advanced study leading to the degree of Doctor of Education (Ed.D.) and a Ph.D. in the field of counseling is offered through Columbian College of Arts and Sciences in collaboration with the Graduate School of Education and Human Development.

The Degree of Doctor of Education

The Graduate School of Education and Human Development offers programs of advanced study leading to the degree of Doctor of Education (EdD). These programs provide major fields of study in curriculum and instruction, special education, educational administration and policy studies, human and organizational learning, and higher education administration. Supporting fields are available in educational administration, higher education administration, counseling, curriculum and instruction, education policy, elementary education, human development, human and organizational learning, international education, program evaluation, secondary education, special education, supervision, and teacher education. With the approval of a student's program planning committee, course work may be taken in other departments of the University and through the Consortium. All programs require study of

interrelated areas of education and a doctoral dissertation in the major field of study.

All doctoral programs are designed to accommodate the needs of full-time students as well as working professionals who must pursue their studies on a part-time basis. Required graduate courses, with few exceptions, are offered in the late afternoon and evening. In some programs, selected courses may be taken at off-campus locations.

Admission Requirements

The applicant must have adequate preparation for advanced study, including the undergraduate degree and graduate work from a regionally accredited institution in the fields prerequisite to his or her objective and comparable to that required for the degree of Master of Arts in Education and Human Development at this University. Students with a master's degree in a field other than education may be considered for doctoral study provided that the degree and previous experience are judged relevant by the major field program faculty.

For an application to be considered by the major field program faculty, an applicant must have a minimum graduate scholastic average of 3.3 on a scale of 4.0 and an acceptable score on the Miller Analogies Test or Graduate Record Examination. In the field of human organizational learning, the Graduate Management Admissions Test is acceptable as well. Programs often set higher admissions standards, and the number of new doctoral students in each program is limited. All applicants must have an interview with faculty members in the major field. Students receiving favorable recommendations from the major field faculty are admitted to precandidacy for the degree.

Precandidacy and Candidacy

The Doctor of Education program is divided into two states: precandidacy and candidacy. In general, the degree program requires three or more years of full-time study beyond the master's degree or the equivalent in part-time study. Course work and the comprehensive examination must be completed within five years, and the entire program must be completed within eight years. The minimum residency requirement in degree status for the EdD is 36 credits of course work in the precandidacy stage and 12 to 24 credits of dissertation research in the candidacy stage. In most cases, course work beyond the minimum is required.

In the precandidacy stage, all course work in the program must be completed and the comprehensive examination passed. Course work toward the doctorate is established on the basis of a framework of seven domains: knowledge of foundations; critical literature review; research methods; clarity of thought, as expressed both in speech and in writing; professional development; technological skills; and depth of knowledge of the specialty area. A program plan of study is developed between the doctoral student and a doctoral study advising

team, generally consisting of two members of the program faculty.

The comprehensive examination is generally a two-day examination held each semester and taken upon completion of all course work (Pre-Dissertation Seminar may be excepted). Students taking the examination must be registered for at least 1 credit in the semester it is to be taken and must file an online application in the dean's office by the published deadline. Programs may have specific comprehensive exam requirements.

The candidacy stage of doctoral study begins after successful completion of the content course work *and* the comprehensive examination. A doctoral research dissertation committee is established and the candidate develops a dissertation proposal (this may be while registered in Pre-Dissertation Seminar). Upon successful completion of course work listed on the approved program plan of study, students must register for dissertation research at the rate of 3 or 6 credits each fall and spring semester. A minimum of 12 dissertation research credits are required for graduation. Students who have not defended their dissertation after 12 credits continue to register at the rate of 3 or 6 credits until they have reached 24 credits of dissertation research. Once they have reached their 24 credit maximum, they must register each subsequent fall and spring semester for 1 credit of Continuing Research until completion of their degree program with the successful defense of the dissertation to the Dissertation Oral Examination Committee. The accepted dissertation is submitted electronically, with a processing fee paid directly to Proquest/UMI.

Detailed information on the EdD program and its administration is available in the GSEHD Doctoral Student Handbook (<http://gsehd.gwu.edu/sites/default/files/2014%20-%202015%20Doctoral%20Handbook.pdf>). Students completing their degree program should refer to the section on Graduation Requirements, Participating in the Commencement Ceremony, under University Regulations.

The Degree of Doctor of Philosophy in the Field of Counseling

A Ph.D. in the field of counseling is accredited by the Council for Accreditation of Counseling and Related Educational Programs.

Doctoral programs

- Doctor of Education in the field of curriculum and instruction (p. 558)
- Doctor of Education in the field of educational administration and policy studies (p. 559)
- Doctor of Education in the field of higher education administration (p. 561)
- Doctor of Education in the field of human and organizational learning (p. 561)

- Doctor of Education in the field of special education (p. 563)
- Doctor of Philosophy in the field of counseling (p. 564)

DOCTOR OF EDUCATION IN THE FIELD OF CURRICULUM AND INSTRUCTION

The Doctor of Education in Curriculum and Instruction prepares education leaders whose objective is to improve pre-K through 16+ education in local, national, and international settings. The program encourages critical thought and creative work through course work focusing on curriculum, instruction, research, and other learning opportunities that intentionally link teaching and learning, policy, and evaluation to students' prior experiences.

The program focuses on understanding how curriculum and instruction can be constructed and applied to educational reform and diverse student populations. Doctoral students become part of a community that links scholars with practicing professionals, policy makers, and educational organizations in Washington, D.C., and beyond. Students can also use the program to expand their content knowledge or delve into other fields through linkages with Columbian College of Arts and Sciences or other schools at GW.

Graduates of the program can be found working in government agencies, teaching in university settings, or running informal education organizations. They may be curriculum supervisors in school systems or master teacher leaders in schools.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://gsehd.gwu.edu/programs/curriculum-instruction>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

Requirements for the doctoral program (<http://bulletin.gwu.edu/education-human-development/doctoral-programs/education>).

A minimum of 66 credits.

Required

CPED 6305	Foundations of Curriculum Theory
CPED 8325	Advanced Ideas in Curriculum Theory
CPED 8330	Paradigms of Instruction and Assessment
CPED 8331	Seminar in Instruction

Approved dissertation proposal required	

Successful completion of comprehensive exam required

DOCTOR OF EDUCATION IN THE FIELD OF EDUCATIONAL ADMINISTRATION AND POLICY STUDIES

The Doctor of Education (Ed.D.) in Educational Administration and Policy Studies program provides students with the skill and knowledge they need either to excel within policy research and analysis or achieve high-level success in a K-12 school setting. Though these specialties are offered under the same degree title, they are offered at different campus locations with entirely different curricula.

Offered at GW's Foggy Bottom campus in Washington, D.C., the Ed.D. in Education Policy prepares researchers and analysts to advance knowledge and improve practice for the purposes of promoting excellence, equity, and efficiency in educational systems and organizations. The goal is for students to graduate with leadership positions as skilled analysts who are able to solve problems, make informed decisions, and help improve practice.

The Ed.D. in Education Administration program is offered at three GW campus locations—the Virginia Science and Technology Campus, Alexandria Graduate Center, and Hampton Roads Center. This academically rigorous program prepares students for leadership responsibilities within all facets of the educational arena. Researchers and practitioners who aspire to high levels of responsibility in educational organizations will develop leadership skills through course work, seminars, research associations with faculty, and self-directed activities.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://gsehd.gwu.edu/programs/educational-administration-policy-studies>) for additional information.

REQUIREMENTS

The degree is offered in two specialized areas. All requirements in one specialized area must be fulfilled:

Educational administration specialty—a minimum of 48 credits, including 27 credits in required courses, a 3-credit research course, 18 credits in dissertation courses, and successful completion of the comprehensive examination.

Education policy specialty—a minimum of 54 credits, including 12 credits in required courses, 12 credits in research courses, 15 credits in dissertation courses, 15 credits in elective courses, and successful completion of the comprehensive

examination. Six additional credits in prerequisite courses may be required.

Fulfillment of the requirements for the Doctor of Philosophy programs (<http://bulletin.gwu.edu/education-human-development/doctoral-programs/education>) is required for both specialties.

Educational Administration and Policy Studies (Educational Administration)

Required

EDUC 6116	Introduction to Educational Statistics
EDUC 6368	Power, Leadership & Education
EDUC 6371	Education Policy
EDUC 6570	Educational Planning
EDUC 8110	Advanced Study: Ideas, Issues, and Practices in Education
EDUC 8120	Group Comparison Designs and Analyses
EDUC 8122	Qualitative Research Methods
EDUC 8276	Seminar: Administration and Supervision
EDUC 8280	Critical Review of Educational Leadership Literature

Research

3 credits from the following:

EDUC 8100	Experimental Courses
EDUC 8130	Survey Research Methods
EDUC 8131	Case Study Research Methods
EDUC 8140	Ethnographic Research Methods
EDUC 8142	Phenomenological Research Methods
EDUC 8144	Discourse Analysis
EDUC 8170	Educational Measurement
EDUC 8171	Predictive Designs and Analyses

Dissertation

EDUC 8998	Pre-Dissertation Seminar (taken for 6 credits)
EDUC 8999	Dissertation Research (12 credits minimum)

Approved dissertation proposal required

Successful completion of comprehensive exam required

Educational Administration and Policy Studies (Education Policy)

Prerequisites

EDUC 6116	Introduction to Educational Statistics
EDUC 6371	Education Policy

Required

EDUC 8110	Advanced Study: Ideas, Issues, and Practices in Education
EDUC 8321	Economics of Education
EDUC 8322	Education Policy Implementation
EDUC 8340	Methods of Policy Analysis in Education

Research

EDUC 6381	Program Evaluation: Theory and Practice
EDUC 8120	Group Comparison Designs and Analyses
EDUC 8122	Qualitative Research Methods
EDUC 8171	Predictive Designs and Analyses

Dissertation

EDUC 8998	Pre-Dissertation Seminar (taken for 3 credits)
EDUC 8999	Dissertation Research (minimum 12 credits)

Approved dissertation proposal required

Electives

15 credits selected in consultation with advisor

Students may elect to take elective courses to develop expertise in a specific area in policy and/or take additional research methods courses to advance their research methods skills.

Successful completion of comprehensive exam required

DOCTOR OF EDUCATION IN THE FIELD OF HIGHER EDUCATION ADMINISTRATION

The mission of the Doctor of Education in Higher Education Administration program is to prepare exceptional leaders for administrative, academic, and research positions in two- and four-year higher education institutions, national and international associations, government agencies, and other post-secondary educational settings. The degree provides a high-quality, fast-paced scholarly experience in which students can integrate theory and research seamlessly with practice.

Program graduates rise rapidly within administrative and scholarly ranks based on their knowledgeable of critical issues in the field of higher education, ability to conduct independent primary research, and possession of the skills necessary for academic and administrative career development.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://gsehd.gwu.edu/programs/higher-education-administration>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

The requirements for the Doctor of Education programs (<http://bulletin.gwu.edu/education-human-development/doctoral-programs/education>).

A minimum of 63 credits and successful completion of a comprehensive examination.

Required

EDUC 6510	Administration of Higher Education
EDUC 6520	Foundations of College Student Development
EDUC 6555	Higher Education Policy
EDUC 8505	Seminar: Higher Education Administration

DOCTOR OF EDUCATION IN THE FIELD OF HUMAN AND ORGANIZATIONAL LEARNING

The Doctor of Education (Ed.D.) in Human and Organizational Learning is designed to provide professionals with a foundation in relevant theories, concepts, and practices towards facilitating change initiatives and in becoming more effective leaders and decision makers.

The program is offered with two distinct focuses at different GW campuses.

Foggy Bottom campus offers working professionals evening courses on weeknights. The curriculum focuses on organizational issues such as strategic change, transformational leadership, individual and group learning processes, organizational development, global and international issues, the humane organization, virtual organizations, meaning of work, and self-directed learning. In addition to completing the required course work, students work with an advisor to create

an individually designed program around the student's area of interest. All classes at the Foggy Bottom campus are offered on weeknights.

The Virginia Science and Technology campus cohort focuses on the interrelationships among people, organizations, and learning, while using systemic change processes. The program encourages students to challenge assumptions through critical reflection and fosters group and self-directed learning. Program students come from a variety of professions including business, health care, the military, education, federal agencies, information technology, and manufacturing, and have a variety of academic backgrounds with degrees in fields such as engineering, psychology, health and medical sciences, the humanities, and business. This diverse population enriches the learning experience for fellow students and provides both local and global networking opportunities. All classes at the Virginia Science and Technology campus are offered over a two-day period (Friday- Saturday), once a month, enabling students to continue working full time while pursuing the degree. In addition to the general requirements for admission to the Ed.D., applicants must have at least five years of full-time experience in a field related to human and organizational learning.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://gsehd.gwu.edu/programs/human-organizational-learning>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

Requirements for the doctoral program (<http://bulletin.gwu.edu/education-human-development/doctoral-programs/education>).

A minimum of 69 credits for students at the main campus location and 72 credits for students in the Executive Leadership program as well as and successful completion of a comprehensive examination.

Main Campus Program

Required

EDUC 8110	Advanced Study: Ideas, Issues, and Practices in Education
HOL 8700	Foundations of Human and Organizational Learning
HOL 8701	Theory, Research, and Practice in Adult Learning and Development
HOL 8702	Theory and Design of Organizational Diagnosis and Development

HOL 8703	Human Systems Change
HOL 8704	Leadership Theory, Research, and Practice
HOL 8706	Interdisciplinary Readings in Human and Organizational Learning

Research methods

EDUC 8120	Group Comparison Designs and Analyses
EDUC 8122	Qualitative Research Methods
HOL 8720	Seminar: Applied Research in Human and Organizational Learning
HOL 8722	Seminar: Advanced Issues in Human and Organizational Learning

Three credits from the following:

EDUC 8100	Experimental Courses
EDUC 8130	Survey Research Methods
EDUC 8131	Case Study Research Methods
EDUC 8140	Ethnographic Research Methods
EDUC 8142	Phenomenological Research Methods
EDUC 8144	Discourse Analysis
EDUC 8170	Educational Measurement
EDUC 8171	Predictive Designs and Analyses
EDUC 8173	Structural Equation Modeling

Dissertation

HOL 8998	Predissertation Seminar
HOL 8999	Dissertation Research (minimum 12 credits needed to complete requirement)

Approved dissertation proposal required

Successful completion of comprehensive exam required

DOCTOR OF EDUCATION IN THE FIELD OF SPECIAL EDUCATION

The Doctor of Education in the field of special education program advances students' understanding of the relationship between structural and functional changes in the brain across time and experiences, examines cognitive processing, and considers the implications of these findings for teaching, learning, and educational policy. The program also addresses the challenging demands of disability in society and institutional improvements essential to support individuals with disabilities. The curriculum includes leadership, policy, and research courses, as well as foundational courses in brain development from early childhood through adulthood. The program works closely with Graduate School of Education and Human Development's Center for Applied Developmental Science and Neuroeducation (<http://gsehd.gwu.edu/center-applied-developmental-science-and-neuroeducation>) to provide research and internship opportunities for students to translate and apply research related to learning for diverse populations. Graduates leave prepared to have an impact through leadership in academic settings, research communities, policy institutions, and advocacy organizations.

Specific admission requirements are shown on the Graduate Program Finder.

Visit the program website for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

The requirements for the Doctor of Education programs (<http://bulletin.gwu.edu/education-human-development/doctoral-programs/education>).

66 credits, including 27 credits in required courses, a minimum 12 credits in research courses including 3 credits in advanced research, 6 credits in internship courses, a minimum 15 credits in dissertation courses, 6 credits in elective courses, and successful completion of a comprehensive examination.

Required

SPED 8305	Foundations of Neuroscience in Special Education

DOCTOR OF PHILOSOPHY IN THE FIELD OF COUNSELING

The Ph.D. in counseling program balances rigorous research with clinical work to graduate scholar practitioners. Graduates are prepared for a number of roles, such as teaching in universities, practicing in a variety of settings from directing high school counseling departments, and leading county mental health treatment programs. The program offers challenging course work, practical experience at mental health sites, and the opportunity to train as supervisors at GSEHD's Community Counseling Service Center. Designed to be completed in four to five years, the program is unique in building students' knowledge and capacity to conduct research, publish, provide clinical services, and educate at the graduate level. Instruction is provided in areas including trauma, human sexuality, child and adolescent development, grief and loss, substance abuse, multicultural counseling, as well as a deep knowledge of diagnosis, assessments, interventions and treatment approaches. The program is accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP).

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://gsehd.gwu.edu/programs/counseling>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled:

Requirements for the doctoral program (<http://bulletin.gwu.edu/education-human-development/doctoral-programs/education>).

A minimum of 69 credits, including 24 credits in core courses, 15 credits in research courses, 6 credits in human development courses, 9 credits in area of specialization, 15 credits in dissertation courses, and successful completion of the comprehensive examination.

A Ph.D. in the field of counseling is offered through Columbian College of Arts and Sciences in collaboration with the Graduate School of Education and Human Development. The program is accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP). Application for admission is made to Columbian College of Arts and Sciences.

GRADUATE CERTIFICATE PROGRAMS

The Graduate School of Education and Human Development offers the following graduate certificate programs. Graduate certificates do not constitute eligibility for an initial license or assure admission to a subsequent degree program. Courses taken as part of a certificate program may be applied toward advanced credentials or endorsements added to an initial license.

- Assessment, Testing, and Measurement in Education (p. 565)
- Autism Spectrum Disorders
- Brain Injury: Educational and Transition Services
- Counseling and Life Transitions
- Design and Assessment of Adult Learning
- Educational Leadership and Administration
- E-Learning
- Global Leadership in Teams and Organizations
- Incorporating International Perspectives in Education (p. 566)
- Instructional Design
- Integrating Technology into Education (p. 566)
- Job Development and Placement
- Leadership Development
- Leadership in Educational Technology
- Multimedia Development
- Organizational Learning and Change

- Professional Teaching Standards
- Reading and Literacy
- Secondary Special Education and Transition Services
- Special Education for Culturally and Linguistically Diverse Learners
- STEM Master Teacher (p. 566)
- Teaching English Language Learners
- Training and Educational Technology

Visit the Graduate School of Education and Human Development website (<http://gsehd.gwu.edu/home>) for more information.

GRADUATE CERTIFICATE IN ASSESSMENT, MEASUREMENT, AND TEACHING IN EDUCATION

Assessment, Testing, and Measurement (ATM) is a specialization within education and human development combining statistical analysis, testing theory, and the study of human behavior, educational measurement, and evaluation. ATM is the science of measuring educational factors such as learning, preference, aptitude, and personality.

This 18-credit graduate certificate program is designed for individuals who are entering or advancing in positions associated with assessment, testing, and measurement in diverse settings or as preparation for admission to master's or Ph.D. programs in the field. This program offers premier graduate training in psychometric and statistical methods taught by faculty who are engaged in world-class research.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Required:

EDUC 6112	Foundations of Assessment, Testing, and Measurement in Education
EDUC 8170	Educational Measurement
EDUC 8171	Predictive Designs and Analyses
EDUC 8175	Item Response Theory
EDUC 8177	Assessment Engineering
EDUC 8179	Capstone Project in Assessment, Testing, and Measurement in Education

GRADUATE CERTIFICATE IN INCORPORATING INTERNATIONAL PERSPECTIVES IN EDUCATION

The 12-credit Incorporating International Perspectives in Education certificate is designed for individuals with either a bachelor's or master's degree who are interested in introducing global perspectives into curriculum, pedagogy, and school policy and practice. The curriculum of two required and two elective courses allows students to pursue individual interests while providing a foundation in internationalization as it relates to school systems and the development of curriculum in K-12 settings.

REQUIREMENTS

The following requirements must be met: 12 credits, including 6 credits in required courses and 6 credits in elective courses.

Required	
CPED 6305	Foundations of Curriculum Theory
EDUC 6615	Internationalizing U.S. Schools
Elective	
6 credits from the following:	
CPED 6225	Introduction to International Curricula
CPED 6557	Second Language Acquisition
CPED 6608	Development and Diversity
CPED 6627	Teaching Second Language Reading and Writing
EDUC 6602	Regional Studies in International Education (Comparative Solutions to Common Educational Problems)
EDUC 6602	Regional Studies in International Education (Education and Modernization in Asia)
EDUC 6602	Regional Studies in International Education (Education and Transition in Eastern Europe and the former Soviet Union)
EDUC 6602	Regional Studies in International Education (Education and Equality in Latin America and the Caribbean)
EDUC 6602	Regional Studies in International Education (Education and Tradition in Islamic Societies)

EDUC 6602	Regional Studies in International Education (Education and Diversity in Europe and the EU)

GRADUATE CERTIFICATE IN INTEGRATING TECHNOLOGY INTO EDUCATION

The Graduate Certificate in Integrating Technology into Education provides students from varied professional educational backgrounds (including public and private sectors, K-12, and higher education) with the foundational knowledge and skills required to integrate technology effectively into their instruction. The curriculum, which is taught in a distance learning format, prepares students to apply, manage, and evaluate theories, standards, technologies, and techniques for integrating technology within their professional educational settings. Students integrate their professional experiences into their learning, apply their course assignments to their current professional activities, and actively engage with other professionals.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

REQUIREMENTS

The following requirements must be fulfilled: 18 credits in required courses.

Required	
EDUC 6368	Power, Leadership & Education
EDUC 6401	Applying Educational Media and Technology
EDUC 6402	Computers in Education and Human Development
EDUC 6404	Managing Computer Applications
EDUC 6405	Developing Multimedia Materials
EDUC 6406	Instructional Design

GRADUATE CERTIFICATE IN STEM MASTER TEACHER

The GW STEM Master Teacher Certificate provides licensed K-12 educators with an opportunity to expand their skills and methods for engaging students in rich, powerful STEM (science, technology, engineering, and mathematics) learning experiences. The establishment of this 12-credit certificate

coincides with adoption of the Next Generation Science Standards and Common Core State Standards for Mathematics and addresses the anticipated professional development needs of school districts adopting these new standards.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

REQUIREMENTS

The following requirements must be fulfilled: 12 credits, including 9 credits in required courses and a 3-credit elective course.

Required

CPED 6701	Arts in the STEM Curriculum
CPED 6702	Integrating Engineering in the Math and Science Classroom
CPED 6703	Advanced STEM Teaching Methods

Elective

One of the following:

CPED 6367	Perspectives and Research in Teaching Science
CPED 6370	Perspectives and Research in Teaching Mathematics
CPED 8309	Supervising Preservice Clinical Experience

Students may apply courses toward the Master of Arts in Education and Human Development in the field of Curriculum and Instruction.

COUNSELING AND HUMAN DEVELOPMENT

GRADUATE

Master's programs

- Master of Arts in Education and Human Development in the field of clinical mental health counseling (p. 539)
- Master of Arts in Education and Human Development in the field of rehabilitation counseling (p. 549)
- Master of Arts in Education and Human Development in the field of school counseling (p. 550)
- Master of Arts in Education and Human Development individualized program (p. 547)

Doctoral program

- Doctor of Philosophy in the field of counseling (p. 564)

FACULTY

Professors J. Garcia, K.C. Hergenrather (*Chair*), C.H. Hoare, S.A. Marotta-Walters,

Associate Professors R. Lanthier, M.C. McGuire-Kuletz, M.M. Megivern, S. Steen

Assistant Professors S. Beveridge, S. Cho Kim, R.M. Dedmond, D.M. Pittman

Professorial Lecturers O. Madison, R.J. Pasi, B.J. Thompson, R.C. Windham,

Lecturers E. Rhymers, P. Tschudi

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Programs in counseling are offered at the graduate level by the Graduate School of Education and Human Development (<http://gsehd.gwu.edu>) through its Department of Counseling and Human Development (<http://gsehd.gwu.edu/counseling-and-human-development>).

CNSL 0920. Continuing Research - Masters. 1 Credit.

CNSL 0940. Cont Research - Doctoral. 1 Credit.

CNSL 2102. Foundations of Counseling. 3 Credits.

CNSL 2162. Professional and Ethical Orientation to Counseling. 3 Credits.

The roles and functions of a professional counselor and the ethical standards that govern the profession.

CNSL 2163. Psychosocial Adjustment. 3 Credits.

Mental health problems; emphasis on needs of counselors, teachers, and others working with children and adolescents.

CNSL 2376. Introduction to Rehabilitation Counseling. 3 Credits.

Overview of rehabilitation profession, including philosophy, history, ethics, theory, legislation, settings, and practice.

CNSL 2378. Disability Management and Psychosocial Rehabilitation. 3 Credits.

Case management services for persons with physical, mental, and emotional disabilities.

CNSL 2381. Medical and Psychosocial Aspects of Disabilities. 3 Credits.

Chronic and traumatic disorders; rehabilitation and psychosocial implications.

CNSL 6100. Special Workshop. 1-12 Credits.

Topics to be announced in the Schedule of Classes. May be repeated for credit.

CNSL 6101. Research and Independent Study. 1-3 Credits.

Individual research under guidance of a staff member. Program and conferences arranged with an instructor.

CNSL 6103. Thesis Research. 3 Credits.

CNSL 6104. Thesis Research. 3 Credits.

CNSL 6130. Vocational Assessment of Individuals with Disabilities. 3 Credits.

Investigation of vocational appraisal processes and techniques for individuals with disabilities. Includes assessment for transition using field-based assignments. Three credits of practicum experience for students specializing in vocational evaluation. Material fee. Same as SPED 6230.

CNSL 6151. Professional and Ethical Orientation to Counseling. 3 Credits.

The roles and functions of a professional counselor and the ethical standards that govern the profession.

CNSL 6153. Counseling Interview Skills. 3 Credits.

Acquisition of counseling skills common to all theories through lectures, demonstrations by faculty, role playing, and videotaping. Prerequisite or concurrent registration: CNSL 6151 (for counseling majors); permission of instructor is required for others. Material fee.

CNSL 6154. Theories and Techniques of Counseling. 3 Credits.

An introduction to basic counseling and psychotherapeutic theories and associated techniques. Prerequisite or concurrent registration: CNSL 6151 (for counseling majors); permission of instructor is required for others.

CNSL 6155. Career Counseling. 3 Credits.

A consideration of theory, practice, and the body of information related to career counseling, choice, and development over the life span. Prerequisite: CNSL 6153, EDUC 6114 for counseling majors; permission of instructor is required for others. Material fee.

CNSL 6157. Individual Assessment in Counseling. 3 Credits.

Detailed study of individual analysis and appraisal techniques. Development of systematic case study. Prerequisite: CNSL 6153, EDUC 6114 for counseling majors; permission of instructor is required for others. Material fee.

CNSL 6159. Psychosocial Adaptation. 3 Credits.

Mental health problems; emphasis on needs of counselors, teachers, and others working with children, adolescents, and adults.

CNSL 6161. Group Counseling. 3 Credits.

Principles of group dynamics as related to interaction within groups. Techniques and practice in group counseling. Prerequisite or concurrent registration: CNSL 6151 (for counseling majors); permission of instructor is required for others.

CNSL 6163. Social/Cultural Dimensions-Cns. 3 Credits.

Basic sociocultural concepts in counseling theory and how they apply to the practice of the counseling profession. Prerequisite or concurrent registration: CNSL 6153 (for counseling majors); permission of instructor is required for others.

CNSL 6164. Values, Spiritual, and Religious Issues in Counseling. 3 Credits.

The theoretical and practical intersection of counseling, psychotherapy, and mental health considerations with religion and spirituality. The clinically effective and ethically responsible integration of religion and spirituality into counseling. Prerequisite or concurrent registration: CNSL 6151 (for counseling majors); permission of instructor is required for others.

CNSL 6169. Counseling Substance Abusers. 3 Credits.

Individual, group, family, and self-help counseling applied to substance abusers. Prerequisite or concurrent registration: CNSL 6153 (for counseling majors); permission of instructor is required for others.

CNSL 6170. Grief and Loss. 3 Credits.

Exploration and discussion of grief and loss from theoretical, practical, cross-cultural, and personal perspectives; implications for counselors within a multidisciplinary environment.

CNSL 6171. Family Counseling. 3 Credits.

The family as a system: how it affects the client and how the client affects it. Didactic presentations, role playing, and work with simulated families. Prerequisite or concurrent registration: CNSL 6153 (for counseling majors); permission of instructor is required for others.

CNSL 6172. Human Sexuality for Counselors. 3 Credits.

Issues of sexuality as related to counseling in contemporary society. Prerequisite or concurrent registration: CNSL 6153 (for counseling majors); permission of instructor is required for others.

CNSL 6173. Diagnosis and Treatment Planning. 3 Credits.

For counselors and mental health practitioners. Symptoms and treatment of various mental disorders. The process of making psychiatric diagnoses. A variety of treatment strategies are covered, along with their application to various disorders. Prerequisite: CNSL 6153.

CNSL 6174. Trauma and Crisis Intervention. 3 Credits.

This course provides the counseling student with an introduction to research, theory, and practices within the field of traumatology. The course will cover the historical evolution of the field; biopsychosocial underpinnings of trauma and trauma spectrum disorders; issues in diagnosis, assessment, and intervention from a culturally diverse framework; and a synthesis of best practices as they are currently evolving. Using a developmental and systemic approach, the course will provide a counseling perspective on the knowledge base from the multiple disciplines that contribute to the field of traumatology.

CNSL 6175. Living and Dying: A Counseling Perspective. 3 Credits.

Survey of fundamental psychosocial issues surrounding grief, loss, and life-threatening illness. Topics include AIDS, suicide, multiple loss, caregiver's grief, spirituality, and cross-cultural issues.

CNSL 6177. Spirituality and Loss. 3 Credits.

Exploration of how spiritual beliefs, faith traditions, and life philosophy affect the process of dying, bereavement, and grieving. Effective counseling approaches.

CNSL 6179. Children and Loss. 3 Credits.

The process of grief, loss, and death as experienced by children and adolescents from theoretical, moral, spiritual, and developmental perspectives. Development of effective and sensitive skills and competencies to meet the needs of children and their families as they face life-challenging transitions.

CNSL 6185. Practicum/Internship in Counseling. 3 Credits.

Part of a two-semester clinical experience for degree and certificate candidates in counseling. Includes 100 hours of supervised practicum in a counseling setting. Material fee.

CNSL 6186. Advanced Internship in Counseling. 3-6 Credits.

Part of a two-semester clinical experience for degree and certificate candidates in counseling. Material fee. Prerequisite: CNSL 6185.

CNSL 6188. Systems in Career Counseling Development. 3 Credits.

The complex role of systems in career counseling and development. Class and work experience in the areas of career assessment, computerized career planning, and the design and evaluation of career counseling systems.

CNSL 6189. Career Development and the Contemporary Workforce. 3 Credits.

Through case studies, simulations, and group work, the demographics and challenges of the workforce in the United States are examined. The knowledge, skills, and competencies necessary to respond to current trends and projected changes in the global workforce.

CNSL 6190. Advanced Career Counseling. 3 Credits.

Expansion of career development theory, concepts, and practice: the helping relationship, delivery systems, current market and economic information, and available resources. Prerequisite: CNSL 6155 (for counseling majors); permission of instructor is required for others. Material fee.

CNSL 6268. Foundations/Practicum: Clinical Mental Health Counseling. 3 Credits.

Description of community counseling settings, problems clients present, and a consideration of appropriate intervention strategies.

CNSL 6376. Foundations/Practicum: Rehabilitation and Case Management. 3 Credits.

Survey of history, philosophy, basic principles, legislation, roles, and services.

CNSL 6378. Disability Management and Psychosocial Rehabilitation. 3 Credits.

Disability management services; psychosocial aspects of disability; rehabilitation services for persons with psychiatric disabilities.

CNSL 6380. Job Placement and Supported Employment. 3 Credits.

Job development and modification: placement of persons with disabilities.

CNSL 6381. Medical and Psychosocial Aspects of Disabilities. 3 Credits.

Chronic and traumatic disorders with rehabilitation and psychosocial implications.

CNSL 6395. Foundations of Forensic Rehabilitation Counseling I. 3 Credits.

Overview of the roles and functions of professionals who provide forensic rehabilitation services in matters of litigation. Vocational assessments, labor market issues, transferable skills analysis, job analyses. Instruments utilized in forensic rehabilitation.

CNSL 6396. Foundations of Forensic Rehabilitation Counseling II. 3 Credits.

Workers' compensation, personal injury, medical/professional malpractice, catastrophic injury, loss of earnings capacity, and life care planning. Ethical standards, practices, federal court rules, and common situations found in the litigation process.

CNSL 6397. Law and the Rehabilitation Consultant. 3 Credits.

Overview of law and court procedures for forensic rehabilitation professionals. Qualification of forensic experts, roles and functions of expert witnesses, discovery, work product, hearsay, direct and cross-examination, admissibility of evidence, and opinions in state and federal venues.

CNSL 6398. Psychopharmacology. 3 Credits.

CNSL 6466. Foundations of School Counseling K-12. 3 Credits.

Study of the environmental and specialty elements for school counseling, with special attention to the principles and practices of school counseling.

CNSL 8100. Special Workshop. 1-12 Credits.

Topics to be announced in the Schedule of Classes. May be repeated for credit.

CNSL 8101. Research and Independent Study. 1-3 Credits.

CNSL 8244. Advanced Group Counseling. 3-6 Credits.

A post-master's course on interpersonal process groups, with didactic, experiential, and supervisory components. Prerequisite: CNSL 6161 ; permission of instructor is required.

CNSL 8252. Advanced Leadership and Advocacy in Counseling. 3 Credits.

Theory and practice of consultation and administration, with focus on school, community, and rehabilitation settings. Research issues. Admission by permission of instructor.

CNSL 8253. Work, Identity, and Adult Development. 3 Credits.

The influence of work on identity, intellectual and personality development, and other developmental attributes. Same as HDEV 8253/HOL 8742.

CNSL 8254. Advanced Multicultural Counseling. 3 Credits.

Recent research addressing key aspects of multicultural counseling. Practical knowledge about effective skills practice in the provision of services to clients from different cultural backgrounds, with emphasis on experiential and cognitive/behavioral approaches. Restricted to Admission by permission of instructor. Prerequisites: CNSL6163 Social and Cultural Dimensions of Counseling. Recommended background: PhD degree student in the field of counseling; completed a master's degree in counseling.

CNSL 8255. Advanced Supervision in Counseling. 3 Credits.

Theory and practice of clinical supervision and consultation for preparation to enter supervisory positions in the field of counselor education. Current thinking regarding supervisory theory/models, practice, research, and ethics. Restricted to Admission by permission of instructor. Recommended background: For PhD degree students.

CNSL 8257. Doctoral Practicum in Counseling. 3 Credits.

Experiential learning of advanced counseling and counseling-related competencies through direct, supervised participation in group work, research, teaching, and/or consultation. Admission by permission of instructor.

CNSL 8258. Advanced Theories of Counseling. 3 Credits.

Current research on counseling and psychotherapy process and outcome; critical analysis of theory with applications for practice and research. For Ed.S. and Ph.D. degree candidates in the field of counseling. Admission by permission of instructor.

CNSL 8259. Doctoral Internship in Counseling and Counselor Supervision I. 3 Credits.

CNSL 8260. Doctoral Internship in Counseling and Counselor Supervision II. 3 Credits.

CNSL 8961. Seminar: Counseling. 1-12 Credits.

CNSL 8998. Predissertation Seminar. 3 Credits.

CNSL 8999. Dissertation Research. 3,6 Credits.

Prerequisite: CNSL 8998/ EDUC 8998.

HDEV 6108. Life Span Human Development. 3 Credits.

Continuity and change in developmental attributes. The developing person in relation to social norms, roles, and stage-graded expectations from birth to death. Interaction between biogenetics and environment.

HDEV 6109. Child Development. 3 Credits.

Typical development and the familial and social antecedents of developmental risk. Environments that foster competent children and developmental sequelae of childhood vulnerability and trauma. For graduate students in counseling, psychology, and related disciplines.

HDEV 6110. Adolescent Development. 3 Credits.

Key attributes and problems in adolescent development. Typical adolescent development and contemporary social problems in relation to stress, risk, and resilience. For graduate students in counseling, psychology, and related areas.

HDEV 6129. Cultural Effects on Human Development. 3 Credits.

Effects of culture on the experience and expression of self, others, space, time, faith systems, norms, and other attributes. Egocentric and sociocentric effects, primitive and technological effects. Group immersion as the basis for prejudice. Developmental consequences as a consequence of cultural context.

HDEV 6161. Practicum in Human Development. 3 Credits.

Admission by permission of instructor.

HDEV 6162. Internship in Human Development. 3 Credits.

Admission by permission of instructor.

HDEV 6701. Adult Learning. 3 Credits.

Same as HOL 6701.

HDEV 8100. Issues and Special Topics in Human Development. 3-6 Credits.

Issues and special contemporary topics related to child, adolescent, and adult development. Applications for professional roles.

HDEV 8241. Emotional and Cognitive Dev. 3 Credits.

Emotional and cognitive development as related to self-esteem, social cognition, and interpersonal skills. Relationships among cognitive development, intellectual reasoning, insight, and social development.

HDEV 8244. Adult and Aging Development. 3 Credits.

Theories and research on personality and intelligence in adulthood. Research designs and methods. Implications of developmental data for counseling and selected professional roles.

HDEV 8253. Work, Identity, and Adult Development. 3 Credits.

The influence of work on identity, intellectual and personality development, and other developmental attributes. Same as CNSL 8253/ HOL 8742.

CURRICULUM AND PEDAGOGY

GRADUATE

Master's programs

- Master of Arts in Education and Human Development in the field of curriculum and instruction (p. 540)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in elementary education (p. 540)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in interdisciplinary studies of literacy and reading education (p. 541)
- Master of Arts in Education and Human Development in the field of curriculum and instruction, concentration in secondary education (p. 541)
- Master of Arts in Education and Human Development individualized program (p. 547)
- Master of Education in the field of elementary education (p. 545)
- Master of Education in the field of secondary education (p. 551)

Doctoral program

- Doctor of Education in the field of curriculum and instruction (p. 558)

FACULTY

Professors A.U. Chamot, S.J. Lynch

Associate Professors S.S. Beck, B. Casemore (Asst. Chair), J. Eakle, C. Green, C.L. Pyke, P.S. Tate,

Assistant Professors M.G. Sheppard (Chair), T. Sikorski

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work

- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CPED 0920. Continuing Research - Masters. 1 Credit.**CPED 0940. Continuing Research - Doctoral. 1 Credit.****CPED 6100. Special Topics. 1-12 Credits.**

Topics and fees announced in the Schedule of Classes.

CPED 6100W. Special Topics. 1-12 Credits.**CPED 6101. Research and Independent Study. 1-3 Credits.**

Individual research under the guidance of a staff member; program and conferences arranged with an instructor.

CPED 6172. Strategies for Inclusion: Addressing the Needs of Diverse Learners. 3 Credits.

Strategies by which teachers can more effectively assume the responsibility to serve all children in an inclusionary setting, including those who are second language learners and students with disabilities. Same as SPED 6272.

CPED 6175. The Culturally and Linguistically Diverse Student with Special Needs: Policy, Research, and Trends. 3 Credits.

Educational service delivery for the culturally and linguistically diverse student. National, state, and local policies; current research in bilingual education, special education, and bilingual special education. Material fee. Same as SPED 6275.

CPED 6176. Academic and Psychosocial Assessment of the Culturally and Linguistically Diverse Student. 3 Credits.

Issues in academic and psychosocial assessment of second language learners. The impact of second language acquisition and culture on the assessment process; differentiation between language difference and disability; IEP development; the use of interpreters and translators; the involvement of family and communities; standardized and alternative assessments; and legislative mandates. Material fee. Same as SPED 6276.

CPED 6199. Federal Education Policy Institute. 3 Credits.

The federal role in education policymaking in the context of national, state, and local efforts to create school environments for effective learning and the promotion of social and emotional health in children and youth. Same as SPED 6299.

CPED 6221. Developmental Reading: Emergent Literacy. 3 Credits.

The components of a balanced literacy program for emergent, beginning, and early-instructional-level readers. Incorporation of phonological awareness, phonics, fluency, reading comprehension, and writing lessons into a balanced reading-literacy program.

CPED 6223. Interdisciplinary Elementary School Literacies. 3 Credits.

Theory and practice of interdisciplinary elementary school studied in the context of the interactions between the domain-specific and strategic processes involved in teaching and learning from printed text and other media in science, literature, mathematics, social studies, and the arts.

CPED 6224. Diagnostic Teaching of Reading: K-6. 3 Credits.

Collection of diagnostic data; construction of informal traditional and non-traditional reading and writing tests; other instruments of evaluation; selecting and planning activities suitable to specific problems. Prerequisite: at least one previous course in reading.

CPED 6225. Introduction to International Curricula. 3 Credits.

CPED 6229. Current Issues in Elementary Education. 3 Credits.

Identification, definition, and analysis of some of the most important problems facing the contemporary American elementary school.

CPED 6236. Analysis of Teaching. 3 Credits.

Teaching viewed as a system; component aspects are examined with a view toward developing a critical method of analysis. Material fee.

CPED 6239. Practicum in Curriculum and Instruction. 3-6 Credits.

Supervised field experience in curriculum and instruction. Admission by permission of instructor.

CPED 6289. New Literacies Coach and Reading Specialist. 3 Credits.

Contemporary issues and conditions influencing literacy/reading leadership roles and the expanded roles of the new literacy reading coach and reading specialist. Topics include designing and evaluating interdisciplinary literacy education environments. Students work with educators on instructional and professional development activities to meet the literacy education needs of children. Prerequisites: CPED 6224 and departmental approval.

CPED 6292. Practicum 2: Leadership in Interdisciplinary Literacies. 3-6 Credits.

Drawing on prior program experiences in leadership and interdisciplinary literacies, students develop and refine effective interdisciplinary literacy education leadership qualities and skills, facilitate change in school communities, and foster teacher growth and student achievement. Students demonstrate lessons and provide assistance with lesson planning to teachers in, across, and between subject area disciplines and conduct professional development workshops in school settings. Prerequisite: CPED 6289.

CPED 6305. Foundations of Curriculum Theory. 3 Credits.

Examination of the educational ideas of individuals and groups that have influenced American and international curriculum development and practice during the 20th and 21st centuries. Comparisons of the issues, models, and principles that have guided curricular thought, development, and innovation.

CPED 6340. Teacher Leadership in Education. 3 Credits.

From the perspectives of educational theory and practice, the ideals and realities of contemporary public school teaching are viewed within a system of local, state, and federal organizations, with the goal of enhancing the role of teachers as knowledgeable and effective leaders in their profession. Material fee.

CPED 6353. Post-Master's Internship in Curriculum and Instruction. 3-6 Credits.

Supervised professional internship in curriculum, instruction, teaching, research, or policymaking. Internships are individually arranged. (Same as SPED 8353).

CPED 6365. Perspectives and Research in Teaching Computer Science. 3 Credits.

CPED 6366. Perspectives and Research in Teaching English. 3 Credits.

Prerequisite: the appropriate subject content course from CPED 6545 through CPED 6550.

CPED 6367. Perspectives and Research in Teaching Science. 3 Credits.

Significant trends, findings, and perspectives in science education in the United States from the early 19th century to the present.

CPED 6368. Perspectives and Research in Teaching Social Studies. 3 Credits.

Deepens students' understanding of the social studies curriculum through analysis of current research, theory, and practice, and application of this knowledge to instructional planning.

CPED 6370. Perspectives and Research in Teaching Mathematics. 3 Credits.

Survey of the history of mathematics, mathematics education research, instructional design, and the teaching of science, technology, engineering, and mathematics (STEM) curriculum standards. The impact of history in the field and research on teaching.

CPED 6410. Reading Children's Literature across the Curriculum. 2,3 Credits.

Participants read and analyze multicultural children's literature (from folktale to nonfiction) while simultaneously practicing discussion, dramatization, art, and writing response strategies suitable for involving all students and integrating literature across the school curriculum.

CPED 6411. Elementary School Curriculum and Methods. 3 Credits.

A comprehensive block course with subsections in mathematics, science, language arts, and social studies. Integrated with CPED 6635. May be repeated for up to 15 credits; with permission, up to four blocks (to a total of 12 credits) may be taken in one semester. Admission by permission of advisor. Material fee.

CPED 6412. Elementary School Curriculum and Methods. 2 Credits.

A comprehensive block course with sections in mathematics, science, language arts, and social studies. Integrated with CPED 6635. Pre-service teachers taking the four sections learn to be successful teachers of elementary methods in all content areas, including how to incorporate content and pedagogy into practice at their internships. May be repeated for up to 8 credits; with permission, up to four blocks (to a total of 8 credits) may be taken in one semester. Restricted to Admission by permission of advisor.

CPED 6507. Instructional Models and Classroom Management. 3 Credits.

The interconnections between effective instruction and positive classroom management. Through planning, implementing, and evaluating learning activities that apply research-based practices, students link instructional and management strategies to specific content and thinking goals. Microteaching lab. Material fee.

CPED 6530. Assessment in the Secondary Classroom. 3 Credits.

Key concepts and principles in the field of educational assessment, with emphasis on practical applications for classroom teachers. Students design and evaluate a range of assessment tools in their content areas.

CPED 6532. Professional Internship in Middle School Education. 3-6 Credits.

Supervised internship in middle schools; required seminar. Admission by permission of instructor. Material fee.

CPED 6534. Professional Internship in Secondary Education. 3-6 Credits.

Supervised internship; required seminar. Admission by permission of instructor. Material fee.

CPED 6544. Educational Technology and Computer Literacy Methods. 3 Credits.

Computers and related technologies in educational settings. Using national technology standards for teachers as a framework, the course combines discussion of key issues related to technology in education, demonstration of technology-related instructional methods, and hands-on computer use and materials development. Material fee.

CPED 6545. Teaching Computer Science in Secondary Schools. 3 Credits.

Theoretical, curricular, and practical considerations. Thirty hours of field experience in a secondary classroom is required. Material fee.

CPED 6546. Teaching English in Secondary Schools. 3 Credits.

Offers theoretical, curricular, and practical considerations for teaching the content area concerned. Requires a 30-hour field experience in a secondary classroom. Prerequisite: CPED 6606 and CPED 6507 and the approved certification course work in the content area. Material fee.

CPED 6547. Teaching Science in Secondary Schools. 3 Credits.

Offers theoretical, curricular, and practical considerations for teaching the content area concerned. Requires a 30-hour field experience in a secondary classroom. Prerequisite: CPED 6606 and CPED 6507 and the approved certification course work in the content area. Material fee.

CPED 6548. Teaching Social Studies in Secondary Schools. 3 Credits.

Theoretical, curricular, and practical considerations. 30-hour field experience in a secondary classroom is required. Material fee. Prerequisites: CPED 6606, CPED 6507.

CPED 6549. Teaching Art in Secondary Schools. 3 Credits.

Theoretical, curricular, and practical considerations. Material fee.

CPED 6550. Teaching Mathematics in Secondary Schools. 3 Credits.

Introductory course in mathematics teaching that derives its goals from pedagogy standards for secondary mathematics developed in collaboration with the National Council of Teachers of Mathematics (NCTM). Focus on developing and understanding middle and high school curriculum standards. Material fee.

CPED 6551. Second Language Instruction. 3 Credits.

Offers theoretical, curricular, and practical considerations for teaching the content area concerned. Requires a 30-hour field experience in a secondary classroom. Prerequisite: CPED 6606 and CPED 6507 and the approved certification course work in the content area. Material fee.

CPED 6554. Issues, Study & Practices-ESL. 3 Credits.

A critical review of scholarship and research findings in English as a second language. Major policy issues and implications that relate to ESL practice.

CPED 6555. Educating Language Minorities. 3 Credits.

A study of federal, state, and local policies and issues affecting the education of linguistically diverse populations. Resources for use with specific linguistically diverse groups.

CPED 6556. Linguistic Applications in English as a Second Language. 3 Credits.

A study of the science of language (phonology, morphology, syntax, semantics) and how its different branches (descriptive, social, applied, etc.) may be used for ESL teacher training, classroom instruction, material development, evaluation, research, and policy development.

CPED 6557. Second Language Acquisition. 3 Credits.

The nature of first and second language acquisition and development; emphasis on sociolinguistics and psycholinguistics most pertinent to educational settings.

CPED 6604. Perspectives in American Education. 3 Credits.

Historical and social development of education in the United States; evolution of American education related to the growth of the nation and the changing social order; examination of selected issues in contemporary education.

CPED 6606. Theories of Learning and Development. 3 Credits.

A comprehensive investigation of the complex relationship between teaching and learning. How learning takes place, how it is motivated, and how it is influenced. Material fee.

CPED 6608. Development and Diversity. 3 Credits.

Student diversity in relation to theories of human growth and development. Diverse student strengths and needs; the special needs population; dynamics of inclusion; and intercultural issues related to the teaching/learning process. Material fee.

CPED 6623. Foundations of Reading Development. 2 Credits.

Basic theories and processes of reading acquisition and assessment; linguistic, cognitive, developmental, social, and affective bases of reading; influences of media, instructional strategies, including formal and informal assessment. Design and implementation of instruction in critical literacy.

CPED 6624. Foundations and Research of Literacy and Reading Education. 3 Credits.

Study of the scholarship on foundational and new literacy knowledge, concepts, and practices. Topics include models of literacy, theories and relations of multimodal and printed text reading (e.g., linguistic, psychological, and sociocultural), and the uses of these theories for the teaching and learning of literacies.

CPED 6626. Practicum 1: Reading Diagnosis, Assessment and Solutions. 3 Credits.

Candidates learn advanced diagnostic and assessment procedures to determine specific difficulties associated with printed-text reading, generate diagnostic profiles, and make instructional recommendations. Data are collected from children who struggle with printed texts; and, from those data, case studies are developed with implications for instruction.

CPED 6627. Teaching Second Language Reading and Writing. 3 Credits.

Acquisition and continuing development of content literacy, including integrated methods, media, and teaching demonstrations geared toward second language learning requirements. Material fee.

CPED 6628. Literacies in Informal Learning Environments. 3 Credits.

How culture, language, and out-of-school literacy experiences, particularly those in museums, influence attitude, learning, affective and interdisciplinary knowledge, and teaching practices. New literacy research, curriculum, and literature, and how social and cultural factors contribute to the literacies of everyday life.

CPED 6635. Professional Internship in Elementary Education. 3-6 Credits.

Supervised internship; required seminar. Admission by permission of instructor. Material fee.

CPED 6691. Interdisciplinary Adolescent Literacies. 3 Credits.

Theory and practice of interdisciplinary adolescent literacies studied in the context of the interactions between the domain-specific and strategic processes involved in teaching and learning from printed text and other media in science, literature, mathematics, social studies, and the arts.

CPED 6701. Arts in the STEM Curriculum. 3 Credits.

In-depth coverage of approaches to integrating arts and design into STEM curricula ("STEAM") for student learning; criteria and approaches for assessing student learning in arts-integrated STEM curricula; building a culture of craftsmanship; and collaborating with arts and design professionals.

CPED 6702. Integrating Engineering in the Math and Science Classroom. 3 Credits.

Approaches to integrating engineering and design into K-12 math and science classrooms. Students develop competencies by engaging in various forms of engineering and design, from small "design challenges" to more complex, semester-long engineering projects.

CPED 6703. Advanced STEM Teaching Methods. 3 Credits.

Advanced approaches for integrating science, technology, engineering, and mathematics into the K-12 classroom.

CPED 8100. Special Topics. 1-12 Credits.

Topics and fees announced in the Schedule of Classes.

CPED 8101. Research and Independent Study. 1-3 Credits.

Individual research under guidance of a faculty member. Program and conferences arranged with an instructor.

CPED 8199. Federal Educ Policy Institute. 3 Credits.**CPED 8309. Supervising Preservice Clinical Experience. 1-3 Credits.**

.

CPED 8325. Advanced Ideas in Curriculum Theory. 3 Credits.

Examination of reviews and research studies on curriculum theory. Focus on trends, values, interpretations, design systems, and evaluation. Prerequisite: CPED 6305.

CPED 8330. Paradigms of Instruction and Assessment. 3 Credits.

A foundation of theory, models, and variables that have contributed to the fields of instruction and assessment. The major paradigms of instruction and assessment. Material fee.

CPED 8331. Seminar in Instruction. 3 Credits.

Analysis of alternative models of instruction and the factors that influence the instructional process in schools. Connections among learning, instructional theory, research, and practice. Material fee.

CPED 8332. Search of the Literature in Curriculum and Instruction. 3 Credits.

Analysis of types of literature reviews in the field of curriculum and instruction and development of a literature review; the relationship of theory building to review of literature, and how research questions arise from extant theory and related literature. For doctoral students in curriculum and instruction, to precede CPED 8998. Material fee.

CPED 8333. School Reform through Professional Development. 3 Credits.

Fundamental perspectives of school reform through professional development of educators (K-12); evolution of contemporary professional development models and trends; examination of interactive modules using selected professional development activities. Material fee.

CPED 8334. Seminar in Research in Curriculum and Instruction I. 1-3 Credits.

Models of curriculum and instruction research that span various research methods.

CPED 8335. Seminar in Research in Curriculum and Instruction II. 1-3 Credits.

Development of initial research proposal ideas for the dissertation.

CPED 8340. Education Policy, Reform & Teacher Leadership. 3 Credits.

This online course will engage students in the study of education policies and reforms that specifically focus on teaching and teachers. Further, this course will examine teacher leadership as it impacts school reform through professional development initiatives that sustain change efforts. Four areas of study ground the focus of this course: education policy, change theories and school reform, teacher leadership, and professional development. Restricted to Doctoral level course; masters students by permission of instructor. Prerequisites: None.

CPED 8341. Evaluation in Curriculum & Instruction. 3 Credits.

This course will teach doctoral and masters' students about evaluating curriculum and instruction related programs, projects, or policies. This course provides students with the theoretical grounding and practical experiences they need to develop and implement evaluation research. Students in the course are required to: 1) read current literature that covers the breadth of theories and models applied in the field of evaluation, 2) participate in live online discussions and instructor presentations and, 3) design, implement and report on a targeted evaluation of a curriculum and instruction related program, project or policy. Restricted to doctoral students; masters students with approval of instructor.

CPED 8354. Doctoral Internship: Teacher Education. 3-6 Credits.

Supervised professional internship in college teaching, administration, supervision, research, policymaking, or private agency function. Admission by permission of advisor.

CPED 8998. Doctoral Seminar in Curriculum and Instruction. 3-6 Credits.

Review of literature; preparation of a dissertation proposal and a manuscript of publishable quality. Admission by permission of instructor and approval of major advisor. Material fee.

CPED 8999. Dissertation Research. 3-6 Credits.

Prerequisite: CPED 8998.

EDUCATIONAL LEADERSHIP

GRADUATE

Master's programs

- Master of Arts in Education and Human Development in the field of assessment, testing, and measurement in education (p. 539)
- Master of Arts in Education and Human Development in the field of education policy studies (p. 543)
- Master of Arts in Education and Human Development in the field of educational leadership and administration (p. 544)
- Master of Arts in Education and Human Development in the field of educational technology leadership (p. 544)
- Master of Arts in Education and Human Development in the field of experiential education and Jewish cultural arts (p. 545)
- Master of Arts in Education and Human Development in the field of higher education administration (p. 546)
- Master of Arts in Education and Human Development in the field of international education (p. 547)
- Master of Arts in Education and Human Development individualized program (p. 547)
- Master of Arts in Teaching in the field of museum education (p. 548)

Post-master's program

- Education Specialist (p. 536)

Doctoral program

- Doctor of Education in the field of educational administration and policy studies (p. 559)
- Doctor of Education in the field of higher education administration (p. 561)

FACULTY

Professors W.K. Cummings, M.J. Feuer, M.H. Futrell, N.B. Paley, I.C. Rotberg (*Research*), R. Whitaker,

Associate Professors R.A. Chernak, J. Choi, M.D. Corry, S.A. Dannels, J. Gomez (*Chair*), M. Kim, L. Lemasters, N.B. Milman, Y. Nakib, P.H. Stevenson, C.B. Stapp, A.A. Tekleselassie, R.R. Watkins, J.H. Williams

Assistant Professors A.A. Ali, J.K. Clayton, A.J. Collins, W.R. Dardick, P. Ehrensall, L.C. Engel, L.C. Howard, R.C. Jakeman, D. Klasik, L. Malcom-Piqueux, K.A. Sherrill, B.T. Streitweiser, S. Swayze, B.A. Weiss,

Lecturers B. Bowers, L. Lent, J.A. Washburn

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

EDUC 0920. Continuing Research - Masters. 1 Credit.

EDUC 0940. Cont Research: Doctoral. 1 Credit.

EDUC 2701. Museums as Cultural and Educational Resources. 3 Credits.

A general introduction to museums as institutions, sources of information, and places for enjoyment. Classes take place on campus and at museums in the metropolitan area. Admission by permission of instructor.

EDUC 3002. Special Workshops. 3 Credits.

EDUC 6100. Experimental Courses. 1-12 Credits.

Topic to be announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

EDUC 6101. Research and Independent Study. 1-3 Credits.

Individual research under guidance of a staff member. Program and conferences arranged with a program advisor.

EDUC 6112. Foundations of Assessment, Testing, and Measurement in Education. 3 Credits.

Foundations of assessment, testing, and measurement with a focus on basic statistical concepts for assessment data literacy, research design issues for assessments, a review of other educational assessments (IQ and psychological, personality and diagnostic), and other issues with assessment and testing including technology, ethical, and legal issues.

EDUC 6114. Introduction to Quantitative Research. 3 Credits.

Development of a conceptual understanding of research design and quantitative analysis options for the consumer of research. Appropriate use of vocabulary and interpretation of research findings. Critique of research articles and/or development of a small-scale proposal.

EDUC 6116. Introduction to Educational Statistics. 3 Credits.

Fundamentals of descriptive statistics and hypothesis testing; introduction to inferential statistics and research design, distinguishing between nonexperimental, quasi-experimental, and true experimental designs. Designed for those with little preparation in quantitative methods or who are not prepared for Educ 8120.

EDUC 6232. Supervision and Evaluation of Instruction. 3 Credits.

The roles and functions of educational leaders in the areas of curriculum, staff development, instructional supervision, and evaluation of personnel. Theory and practice to increase teacher effectiveness and improve student learning through supervisory strategies.

EDUC 6234. Site-Based Leadership: K-12. 3 Credits.

A general introduction to the principalship. Stresses leadership theory, roles, and management tasks in instruction, curriculum, budget, staff development, supervision, interagency services, student learning, and policy considerations. Site-based management and communication within a changing and diverse school environment.

EDUC 6236. School Law and Policy. 3 Credits.

The legal basis of education and public schools in the United States. Constitutional provisions and federal statutes that guide school law. Legal factors that influence school policy. Consideration of practical school situations for legal implications, development of skills to research legal issues affecting schools, and preventive law measures.

EDUC 6240. Fundamentals of Educational Leadership and the Change Process. 3 Credits.

Current leadership theory and systems behavior in the context of administrative practice in educational settings. Key elements of leadership and management. The impact of context, culture, power, politics, change, communications, and organizational learning on administration.

EDUC 6242. Administrative Issues in Education. 3 Credits.

The impact of major social, political, economic, and education issues on the role of school leaders and the delivery and quality of programs and services.

EDUC 6244. School-Community Relations. 3 Credits.

The purpose, scope, essential elements, and impact of a successful school-community relations program. Community power structures, the roles of policy and leadership, communication techniques for interacting with various audiences and the media, evaluation of public relations and marketing for educational institutions.

EDUC 6246. Seminar: Applied Educational Administration. 3-6 Credits.

Application of the theories and principles of administration to public and private schools. Field experience in a phase of administration and supervision. Admission by permission of instructor.

EDUC 6252. Human Relations Diversity. 3 Credits.

Application of current theory and research findings in human relations to staff motivation, change, conflict management, and communication techniques for working with individuals and groups within organizations.

EDUC 6256. School Business Management. 3 Credits.

Management and control of the business functions of school districts. Assessing, planning, developing, and presenting educational budgets; the legal contexts affecting school business management. Risk management and school-site budgeting.

EDUC 6258. School Finance. 3 Credits.

The financing of public elementary and secondary education in the United States; current revenue sources, distribution decisions, and trends in the fiscal operations of schools. Litigation, finance policies, and equitable investments of public monies.

EDUC 6260. Practicum in Supervision. 3-6 Credits.

Practical experience in supervision of instruction. Admission by permission of instructor.

EDUC 6262. Internship in Supervision and Instructional Leadership. 3-6 Credits.

Service in a school situation directed by the University's faculty and school systems; integration of theory and practice.

EDUC 6264. Problems and Practices in Staff. 3 Credits.

Application of principles and practices concerned with change and evaluation of educational administration.

EDUC 6287. Internship: Administration. 3-6 Credits.

Service in an educational institution or education-related program directed by the University's faculty.

EDUC 6314. History of American Education Reform. 3 Credits.

An examination of how evolving social, economic, and political forces have propelled and opposed American education reform efforts throughout history.

EDUC 6368. Leadership and Education. 3 Credits.

A general introduction to issues of leadership applicable to education settings and to key features of educational organizations; leadership as a process and a set of skills and how its styles interact with organizational contexts.

EDUC 6371. Education Policy. 3 Credits.

An introduction to the development, implementation, and assessment of education policies at national, state, and local levels.

EDUC 6381. Program Evaluation: Theory and Practice. 3 Credits.

Introduction to the theory of social program evaluation, alternative evaluation models and methodologies, and the political and social contexts of evaluation.

EDUC 6388. Analysis of Education Policy Issues. 3 Credits.

Covers a range of education policy options, assessing their advantages and disadvantages based on evidence, and drawing implications for policy formulation. A critical approach is applied to the assigned readings, questioning the sources of evidence, appropriateness of analysis, and validity of the findings. Prerequisite: EDUC 6371, EDUC 6114, or permission of instructor.

EDUC 6392. Practicum in Educational Policy Program Evaluation. 3-6 Credits.

Supervised practical experience in field placements. Admission by permission of instructor. Prerequisite: EDUC 6381.

EDUC 6401. Applying Educational Media and Technology. 3 Credits.

Theory and practice of educational technology. Key characteristics of different media, principles of application, and issues concerning their appropriate use.

EDUC 6402. Computers in Education and Human Development. 3 Credits.

The research and practice surrounding the use of computers in educational and training settings. Students will acquire the practical knowledge necessary to the development and evaluation of computer-related curricula through projects and case studies.

EDUC 6403. Educational Hardware Systems. 3 Credits.

Design and implementation of educational hardware systems, including computers and computer networks.

EDUC 6404. Managing Computer Applications. 3 Credits.

For managers and prospective managers in education and human services who are concerned with the automation of their operations. Basic principles needed to design, implement, and manage an information system. Admission by permission of instructor.

EDUC 6405. Developing Multimedia Materials. 3 Credits.

The design, development, integration, and use of multimedia resources in education and training settings. Students examine and critique multimedia technologies, develop instructional materials, and create a unit or module that applies instructional design theory.

EDUC 6406. Instructional Design. 3 Credits.

Designing, implementing, and evaluating instructional strategies for learners. Assessing needs, writing objectives, selecting curriculum/content, selecting and implementing methods and techniques, selecting appropriate devices and evaluating instruction.

EDUC 6407. Design and Implementation of Educational Software. 3 Credits.

Theory and practice of creating educational software; psychological basis of using software in learning; instructional programs; authoring tools; artificial intelligence applications; interactive media. Students design and evaluate an educational program. Prerequisite: EDUC 6401 or permission of instructor.

EDUC 6421. Critical Issues in Distance Education. 3 Credits.

Historical, conceptual, theoretical, and practical issues associated with distance education as a foundation for research and practice in the domain of distance education as well as adult learning, educational systems design, and school administration and policy.

EDUC 6422. Instructional Needs Analysis. 3 Credits.

An introduction to the role of instructional needs analysis and assessment. The design and development of instruction. Key elements of the instructional design cycle, including data analysis.

EDUC 6423. Technology and Disabilities. 3 Credits.

Assistive technology as it impacts the lives of people with disabilities, including the performance of tasks related to employment, education, and activities of daily living.

EDUC 6424. Learning Technologies and Organizations. 3 Credits.

The role of learning technology in organizations, learning in the workplace, and knowledge management in corporations, schools, and universities.

EDUC 6425. Developing Effective Training with Technology. 3 Credits.

Development of skills in planning and producing effective technology-rich training that meets institutional and organizational needs.

EDUC 6426. Computer Interface Design for Learning. 3 Credits.

Human-computer interaction, both in general and with emphasis on issues in education. General design aspects; theories, principles, and guidelines related to human-computer interaction.

EDUC 6427. Advanced Instructional Design. 3 Credits.

Development of a prototype instructional design project and documentation report requiring rapid design and development strategies. Prerequisites: EDUC 6406.

EDUC 6428. Developing Digital Professional Portfolios. 3 Credits.

Students create a digital professional portfolio, using advanced skills in the design, development, integration, and use of multimedia resources.

EDUC 6441. Internship in Educational Technology Leadership. 3 Credits.

Students are assigned to a cooperating agency and work in consultation under the guidance of the course instructor. Admission by permission of instructor.

EDUC 6442. Educational Technology Leadership Master's Project. 1-6 Credits.

Students design, develop, implement, and evaluate an individual project. Admission by permission of instructor.

EDUC 6500. Intro Stu Aff & Higher Ed. 3 Credits.

Introduction to the study of higher education and the student affairs profession, including the ways in which broader aspects of higher education research, theory and policy inform the work of student affairs practitioners. Historical and current contexts of American higher education, the academic community, and existing issues and emerging challenges surrounding the practice of student affairs in the current higher education landscape.

EDUC 6510. Administration of Higher Education. 3 Credits.

Government, organization, and administration of colleges and universities; duties of trustees and administrators.

EDUC 6520. Foundations of College Student Development. 3 Credits.

College student development theories, practices, and problems, including historical overview and human development theories related to college students.

EDUC 6525. Managing College Student Services Programs. 3 Credits.

An overview of student affairs administrative practices, including planning models, budgeting, policy development, program development, facility management, and team building. Admission by permission of instructor.

EDUC 6530. Intercultural Campus Ldrshp. 3 Credits.

This course is designed to explore intercultural leadership skills through the lens of understanding group identity differences, multicultural competence, and the foundations of effective advocacy for social justice. Lectures, readings, class discussions, written assignments, and experiential activities are used to promote an understanding of intercultural leadership skills to help create inclusive learning environments. The course will explore how oppression and privilege relate to differences based on gender, race and ethnicity, sexual orientation, and (dis)ability. Students will also study how these identities intersect with each other.

EDUC 6540. Group and Organizational Theories. 3 Credits.

Review of major organizational theories inside and outside higher education, including systems, institutional, cultural, cognitive, environmental, ecological, as well as power and influence.

EDUC 6550. Assessment in Higher Ed. 3 Credits.

Key concepts in the assessment of outcomes in higher education and in student affairs. History of the assessment movement in higher education, strategies and methods for measuring outcomes of the college experience, identifying the limitations of operational processes that can be improved, and current issues in measuring student success in higher education.

EDUC 6555. Higher Education Policy. 3 Credits.

Assessment of policies that impact higher education, including the relationship of K-12 policy to higher education. Policy networks and mechanisms of policymaking. Policy development and assessment.

EDUC 6560. Legal Problems in Higher Education. 3 Credits.

Investigation of legal problems in higher education related to the legal structure of higher education, religious concerns, students, faculty, and academic programs.

EDUC 6565. Financing Higher Education. 3 Credits.

Analysis of private, state, federal, and other revenue sources; strategic planning, program budgets, and financial methods and practices.

EDUC 6570. Educational Planning. 3 Credits.

An examination of the planning movement in education: its historical development and the recent shift in premises, context, and expectations. Different approaches to the planning process; its role in research; and overview of main analytical techniques currently in use.

EDUC 6572. Dynamics of Change. 3 Credits.

An analysis of the process of change, particularly as it relates to educational policy. Comparison of theories; analytical tools; historical precedents; examples of federal education policies.

EDUC 6575. Personnel Administration. 3 Credits.

Human resource management: planning, recruitment, selection, placement and induction, staff development, rewards, and negotiations. Issues and legislation that influence personnel functions and policy; communication skills for human resource leadership.

EDUC 6579. Managing Multicultural Environments. 3 Credits.

Application of multicultural research in identifying key elements for managing diverse environments, communicating with families, planning professional development activities, and increasing student learning.

EDUC 6585. Master's Internship in Higher Education Administration. 3-6 Credits.

Supervised field experience in higher education settings. Admission by permission of instructor.

EDUC 6601. International and Comparative Education. 3 Credits.

Theoretical foundations of comparative and international education; systematic investigation of the structure and practices of selected representative school systems in different parts of the world. Emphasis on development of methodologies for comparative study.

EDUC 6602. Regional Studies in International Education. 3 Credits.

In-depth study of education in a selected region of the world. Structures and issues facing education systems in social, political, economic, cultural, and historical context. Prospects of education for human national development. May be repeated for credit provided the region differs.

EDUC 6610. Programs and Policies in International Education. 3 Credits.

Overview of policies and programmatic responses to issues in international education. Topics include education and development, international higher education and student services, and education and marginalized people. May be repeated for credit provided the topic differs.

EDUC 6615. Internationalizing U.S. Schools. 3 Credits.**EDUC 6620. Strategies and Analysis in International Education. 3 Credits.**

Strategies for improving education in international contexts. Topics include education and development, international higher education and student services, or education and marginalized people. May be repeated for credit provided the topic differs.

EDUC 6630. International Experiences. 1-6 Credits.

Study and research in a foreign country as part of a group program. Admission by permission of the instructor.

EDUC 6631. Internship: International Education. 1-6 Credits.

Service in an international education institution or related individually designed program planned to enable the student to connect theory to practice. Admission by permission of instructor.

EDUC 6640. Selected Topics in International Education. 3 Credits.

Current trends, themes, and issues in international education. May be repeated for credit provided the topic differs.

EDUC 6650. Education and National Development. 3 Credits.

In terms of the basic assumption that education contributes to national development, the course examines the role education plays in the process of national development in advanced industrial societies and societies moving to industrialism.

EDUC 6660. Capstone in International Education. 3 Credits.

Review of core topics in international education and completion of major supervised project or paper. Taken near the end of the master's program in lieu of the Comprehensive Examination.

EDUC 6701. Museums as Institutions I: Fundamentals. 3 Credits.

An overview of the museum as an environment for learning, considering the influence of institutional history and organizational structure on the museum's mission of serving the public.

EDUC 6702. Facilitating Museum Learning I: Fundamentals. 3 Credits.

Theory of and practice in the development of communication skills in the museum. Educational concepts; teaching strategies and techniques; institutional liaison and group process.

EDUC 6703. Museum Audiences. 3 Credits.

A survey of the museum's diverse audience, emphasizing implications for effective programming, with attention to audience research.

EDUC 6704. Facilitating Museum Learning II: Field Placement and Seminar. 3-6 Credits.

Sixteen-hours per week placement in local educational institutions supervised by GW faculty. On-campus seminar focuses on human development and learning theory.

EDUC 6705. Museums as Institutions II: Field Placement and Seminar. 6 Credits.

Thirty-two hours-per-week supervised placement in education departments in area museums; students carry out projects in cooperation with the site. On-campus seminar includes presentations by leading practitioners.

EDUC 6706. Evaluating Museum Learning. 3 Credits.

Evaluation and research methods appropriate to the museum setting. Review of research on museum audiences; designing exhibition and program evaluations.

EDUC 6707. Museum Proposal Writing. 3 Credits.

Preparation of proposals for museums seeking support from public and private funders. Proposals are developed in cooperation with local museums.

EDUC 6709. Interpretation in the Historic House Museum. 3 Credits.

Seminar integrating advanced practices of museum education with current scholarship in architectural history, material culture, and social history. Extensive use of Washington museum resources. Same as AMST 6709. Admission by permission of instructor.

EDUC 6710. Museums and Technology. 3 Credits.

Applications of technology that link the public with the museum: Internet exhibitions, interactive computer programs, video conferencing, the electronic classroom. Guest lectures, field trips, and group projects.

EDUC 6711. Museum as a Learning Environment. 3 Credits.

Exploration of why visitors frequent museums and how they create personal meaning. Approaches to support the audience's engagement with the museum's resources.

EDUC 6998. Thesis Research. 3 Credits.

Thesis research.

EDUC 6999. Thesis Research. 3 Credits.

EDUC 8100. Experimental Courses. 1-12 Credits.

Topic to be announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

EDUC 8101. Research and Independent Study. 1-3 Credits.

Review of literature. Preparation of a dissertation proposal and a manuscript of publishable quality.

EDUC 8110. Advanced Study: Ideas, Issues, and Practices in Education. 3 Credits.

For precandidates for the Ed.D. Alternative means of responding to the complexities of the educational process. Topics vary but concern education as an individual process and as sociocultural preservation and renewal. May be repeated for credit.

EDUC 8120. Group Comparison Designs and Analyses. 3 Credits.

Designs and analyses to assess differences for more than two groups when compared on one dependent variable. Fixed, random, and mixed effects ANOVA and ANCOVA models within factorial design, multiple comparison tests, and introduction to regression analysis. Prerequisites: EDUC 6116.

EDUC 8122. Qualitative Research Methods. 3 Credits.

A general introduction to several major qualitative research traditions (e.g., biography, grounded theory, ethnography, phenomenology, and case study). Application of qualitative research design and procedures, including preliminary data collection, analysis, and writing.

EDUC 8130. Survey Research Methods. 3 Credits.

Techniques used to collect an array of information from a large number of people through structured interviews and mailed, e-mailed, or web-based questionnaires. Defining the research question and design; sampling, survey development, data collection procedures, pretesting, and data handling. Prerequisite: EDUC 8120, EDUC 8122.

EDUC 8131. Case Study Research Methods. 3 Credits.

Techniques used to examine one or a few complex cases, collecting data from several types of sources and by several methods. The course covers design, data collection, and data analysis/integration. Prerequisite: EDUC 8122.

EDUC 8140. Ethnographic Research Methods. 3 Credits.

Techniques used to examine systematically the contemporary daily life of a given group in its natural setting, focusing on culture—the recurring patterns of thought and social relations. Issues of research design and data collection and analysis. Prerequisite: EDUC 8122.

EDUC 8142. Phenomenological Research Methods. 3 Credits.

Techniques used to elicit and recognize perceptions, interpretations, motives, expectations, and imaginations. The framing of appropriate research questions, data collection and analysis, and the statement of conclusions. Prerequisite: EDUC 8122.

EDUC 8144. Discourse Analysis. 3 Credits.

Techniques used to examine verbal and nonverbal communication to understand identity, beliefs, intentions, relationships, and culture. The framing of appropriate research questions; data collection and analysis. Prerequisite: EDUC 8122.

EDUC 8170. Educational Measurement. 3 Credits.

Classical and modern measurement theory, item response theory, and factor analysis. Educational and psychological instrument development and validation. Interpretation of scale scores and assessment of instrument adequacy. Prerequisites: EDUC 8120. Recommended background: EDUC 6112 or equivalent.

EDUC 8171. Predictive Designs and Analyses. 3 Credits.

Techniques used to assess how independent variables are related to one dependent variable. Multiple linear regression, logistic regression, ordinal regression, and non-linear regression. Appropriate research questions, data interpretation, and design within generalized linear modeling. Prerequisites: EDUC 8120.

EDUC 8172. Multivariate Analysis. 3 Credits.

Techniques for assessment of relationships among multiple independent variables and dependent variables. Multivariate analysis of variance (MANOVA), multivariate analysis of covariance (MANCOVA), discriminant analysis, and exploratory factor analysis. Prerequisite: EDUC 8171.

EDUC 8173. Structural Equation Modeling. 3 Credits.

Multivariate techniques used for assessment of structural (causal) relations among latent (unobserved) variables with multiple observed indicators: observed and latent variable path analysis and confirmatory factor analysis. Latent means analysis and latent growth modeling. Prerequisite: EDUC 8171.

EDUC 8174. Hierarchical Linear Modeling. 3 Credits.

Techniques appropriate for analyses of hierarchically structured data. Theoretical concepts of hierarchical linear models (HLM); social and behavioral research; popular HLM software such as HLMwin; and large scale datasets. Prerequisites: EDUC 8171.

EDUC 8175. Item Response Theory. 3 Credits.

Conceptual, mathematical, and applied issues in item response theory. Dichotomous models, item response theory software used for estimation and model fit, test construction, differential item functioning, and item response theory equating. Prerequisites: EDUC 8170.

EDUC 8177. Assessment Engineering. 3 Credits.

In-depth coverage of topics related to assessment engineering, including cognitive model development using cognitive diagnostic assessment and formative assessment modeling, item model development using auto item generation, and automated test assembly and psychometric model development using computer adaptive testing. Introduction to current assessment engineering and educational big-data analytic applications. Prerequisites: EDUC 8170.

EDUC 8179. Capstone Project in Assessment, Testing, and Measurement in Education. 3,6 Credits.

Multifaceted assessment that serves as a culminating academic and intellectual experience for students during the end of their academic program. The capstone project is similar to a thesis or dissertation but may take a variety of forms. Restricted to Permission of instructor. Prerequisites: EDUC 8170.

EDUC 8276. Seminar: Administration and Supervision. 1-12 Credits.**EDUC 8277. Advanced Instructional Leadership for School Improvement. 3 Credits.**

Introduction to the role of the instructional leader from school and district perspectives. Students gain theoretical and practical skills and knowledge in areas including instructional improvement; education reform; accountability; conditions for improvement; and planning and sustaining change.

EDUC 8280. Critical Review of Educational Leadership Literature. 1,3 Credit.

The techniques, tools, and presentation of critical reviews and syntheses of educational literature used to inform forthcoming research. Systematic mapping of what is known and deriving research questions, conceptual frameworks, and applicable methods. Prerequisite: an approved dissertation topic or permission of instructor.

EDUC 8320. The Politics of Education. 3 Credits.

Examination of the contextual factors (political, economic, and historical) and the nature of political decision making on education issues, primarily at the state and local level. Prerequisite: EDUC 6371.

EDUC 8321. Economics of Education. 3 Credits.

Application of economic theory and analysis to education problems and policies. Contemporary education reforms that are adopted to improve educational outcomes are analyzed with emphasis on their complexities. Prerequisites: EDUC 6371, EDUC 8120.

EDUC 8322. Education Policy Implementation. 3 Credits.

The evolution and implementation of education policies. Analysis of policy implementation at varying governance levels and types of educational systems. Policy is analyzed as a process and as it interacts with organizational, social, economic, and political factors. Prerequisites: EDUC 6371.

EDUC 8323. Policies of Education Equity. 3 Credits.

Analysis of the development, implementation, and evaluation of education equity policies, with consideration of their context, formulation, and application. Prerequisite: EDUC 6371.

EDUC 8325. Policy Design: Accountability in Education. 3 Credits.

Issues of policy design that underlie the push for greater accountability in education. Students review research articles and conceptual argument, discuss evidence on actual practice, and identify strengths and weaknesses of a range of policy tools. Prerequisite: EDUC 6371.

EDUC 8329. Seminar in Program Evaluation. 3 Credits.

Contemporary problems and issues in evaluation of social programs: design, implementation, analysis, and utilization. Prerequisite: EDUC 6381 and approval of instructor.

EDUC 8334. Doctoral Internship in Educational Policy. 3-6 Credits.

Methods of analysis used in the study of educational policy issues. Case studies on a range of policy issues and trends, including testing and accountability, school finance, school choice, and the federal role. Prerequisite: EDUC 6371, EDUC 6114, or permission of instructor.

EDUC 8340. Methods of Policy Analysis in Education. 3 Credits.

Methods of analysis used in the study of educational policy issues. Case studies on a range of policy issues and trends, including testing and accountability, school finance, school choice, and the federal role. Prerequisite: EDUC 6371, EDUC 6114, or permission of instructor.

EDUC 8345. Advanced Studies in Educational Policy Analysis. 1-12 Credits.

The process by which education policies are designed, adopted, and implemented by education systems. Case studies of specific policies, examining their assumptions and objectives, the criteria for assessing their effectiveness, and their governance at federal, state, and local levels. Prerequisite: EDUC 6371, EDUC 8120, or permission of instructor.

EDUC 8505. Seminar: Higher Education Administration. 1-12 Credits.**EDUC 8525. College and University Curriculum. 3 Credits.**

Development, patterns, creative design, issues, problems, evaluation, and trends in the higher education curriculum.

EDUC 8530. Leadership in Higher Education. 3 Credits.

Cognitive leadership theory as articulated in higher education: what leadership is, how it works, how it is practiced, how it is considered by scholars and practitioners, and how it is researched.

EDUC 8540. History of Higher Ed. 3 Credits.

History, philosophy, scope, purpose, present status, programs, and trends in higher education in the United States.

EDUC 8560. Case Studies in Higher Education Administration. 3 Credits.

An analysis of case studies related to administrative functions in colleges and universities.

EDUC 8565. College and University Governance. 3 Credits.

Organizational and administrative structures, patterns, and relationships in higher education.

EDUC 8580. The Community/Junior College. 3 Credits.

The two-year college as it relates to secondary education, four-year colleges, and universities. Objectives, curricula, students, faculty, legal concerns, and special problems of two-year colleges.

EDUC 8582. Administration and Governance of Two-Year Colleges. 3 Credits.

A study of the community/junior college, focusing on administrative and governance patterns and national, regional, state, and local influences, as well as the theory and structure of two-year college organization.

EDUC 8585. Doctoral Internship in Higher Education Administration. 3-6 Credits.

Service in a higher education situation directed by the University and the cooperating institution to integrate theory and practice. Admission by permission of instructor.

EDUC 8594. Current Issues in Higher Education. 3 Credits.

Analysis of contemporary issues in higher education practice and scholarship.

EDUC 8998. Pre-Dissertation Seminar. 3-6 Credits.

Required of all departmental Ed.D. degree candidates. Approval of the dissertation research proposal by the dissertation committee is necessary for successful completion of the seminar. Admission by permission of instructor.

EDUC 8999. Dissertation Research. 3,6 Credits.

Prerequisite: EDUC 8998.

HUMAN AND ORGANIZATIONAL LEARNING

GRADUATE

Master's programs

- Master of Arts in Education and Human Development in the field of organizational leadership and learning (p. 548)
- Master of Arts in Education and Human Development individualized program (p. 547)

Doctoral program

- Doctor of Education in the field of human and organizational learning (p. 561)

FACULTY

Professors D. Burley, S. Khilji, M. Marquardt (*Chair*), D.R. Schwandt,

Associate Professors A.J. Casey, N.E. Chalofsky, M. Cseh, E. Goldman, R.B. Morgan, J. Storberg-Walker

Assistant Professor E.M. Scully-Russ

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work

- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

HOL 0920. Continuing Research - Master's. 1 Credit.

HOL 0940. Cont. Res. - Doctoral. 1 Credit.

HOL 6100. Special Workshop. 1-12 Credits.

Topics to be announced in the Schedule of Classes. May be repeated for credit.

HOL 6101. Research and Independent Study. 1-3 Credits.

Preparation of an in-depth project under the guidance of a faculty member. The course is arranged individually with the program advisor.

HOL 6700. Human Behavior and Learning in Organizations. 3 Credits.

How individuals and groups learn and interact within organizations and how organizations function and learn. Motivation, group dynamics, leadership, systems theory, organizational culture, and change.

HOL 6701. Adult Learning. 3 Credits.

Premises and theories used to meet learning needs of adults. Overview of various learning theories and the impact of various stages of adult development on learners. Topics including self-directed learning, accommodating individual learning needs, and creation of effective learning techniques. Same as HDEV 6701.

HOL 6702. Organizational Change I. 3 Credits.

The assessment of organizational conditions, including collection and interpretation of information, operations, and problems (human, structural, and systemic). Course participants collect and analyze data to provide solutions to enhance organizational effectiveness.

HOL 6703. Organizational Change II. 3 Credits.

Introduction to the concepts, methods, and skills required for effective consultation in organizations, as either an internal or an external consultant. Meeting the human needs in organizations, while improving performance and productivity. Students undertake a consulting project in an organization.

HOL 6704. Leadership in Organizations. 3 Credits.

Developments in theory and research centered on organizational leadership. Emphasis on various types of leadership including transformational, responsible, authentic, and ethical.

HOL 6705. Strategic Change. 3 Credits.

Overview of best practices for organizing and managing people and organizations to compete successfully. Leading an organization through a process of self-examination, redesign, and change that results in sustained effectiveness, learning, and high performance.

HOL 6706. Current Issues in Organizational Leadership. 3 Credits.

Current issues and future trends in organizational leadership. Students gather data and analyze key topics associated with areas such as talent management, leading through demographic shifts, leadership in a globalized world, leading global change, and developing new forms of leadership, ethics, and sustainability.

HOL 6707. Organizational Learning. 3 Credits.

Learning in an organizational context. Processes through which the organization as a system learns, unlearns, changes, and disseminates information. Organizational learning theories address the processes and barriers of gathering, using, developing, and retaining knowledge in organizations.

HOL 6708. Global Leadership. 3 Credits.

The changes taking place in organizations due to the process of globalization and the requirements for leadership. The changing global environment, how those changes influence operational and strategic issues within global organizations, and how a leader can better understand the global environment to help organizations meet these new challenges.

HOL 6709. Leadership Development. 3 Credits.

The processes employed to develop leaders/leadership and how individuals change as a result of the process. Examination of the context within which leadership is developed. Prerequisites: HOL 6704.

HOL 6710. Globalization, Change, and Learning. 3 Credits.

With learning as the coping strategy, focus on how policymakers and global leaders can be helped to take advantage of the opportunities and address the challenges that globalization presents.

HOL 6720. Advanced Strategies for Adult Learning. 3 Credits.

Theoretical and practical strategies of adult learning in various settings, including corporate environments. Learning strategies, such as creative thinking and self-directed learning. Critical adult learning issues.

HOL 6721. Assessing the Impact of Organizational Change. 3 Credits.

Knowledge and skills needed to evaluate the impact and return on investment of change efforts. Focus on how to plan and conduct systematic evaluations of change efforts, including the choice, development, and use of various tools for measuring individual, group, and organizational change. Assessing the success of the planned change.

HOL 6724. Increasing the Capacity to Learn. 3 Credits.

Identification of actions that can help increase the capacity to learn. Emphasis on experimental learning and critical reflection.

HOL 6725. Internship in Human Resource Development. 3-6 Credits.

Supervised experience in selected areas of human resource development and adult education. Admission by permission of the program advisor.

HOL 6742. Design of Adult Learning Interventions. 3 Credits.

Designing and implementing adult learning programs. Topics include instructional design techniques, designing effective programs, program planning and marketing techniques, and conducting needs assessments and evaluations of adult learning programs.

HOL 6743. Action Learning. 3 Credits.

Processes, principles, and skills necessary to participate in and lead both single- and multiple-problem action learning sets. The six dimensions of action learning; educational psychological, political, sociological, and management theories underlying action learning.

HOL 6744. Meaningful Workplaces. 3 Credits.

Characteristics of the humane organization and of meaningful work. Intrinsic motivation, work-life balance, and the workplace community.

HOL 6745. Technology and Human Resource Development. 3 Credits.

How technology can best be utilized in the HRD environment. Discussion of CBT, use of the Internet for instruction, and distance learning techniques.

HOL 6746. Work Groups and Teams in Organizations. 3 Credits.

Exploration of the nature of work groups and teams as they are utilized in organizational settings. Group and team dynamics, facilitating and leading skills, and group roles and culture.

HOL 6747. International and Multicultural Issues in Organizations. 3 Credits.

The impact of culture and globalization on U.S. and international human and organizational learning programs and practices. Adult learning and organizational change approaches that develop and utilize the synergy of a global workforce.

HOL 6998. Thesis Research. 3 Credits.

Thesis research.

HOL 6999. Thesis Research. 3 Credits.

Thesis research.

HOL 8100. Special Topics in Human and Organizational Learning - Doctoral Studies. 3 Credits.

Topics to be announced in the Schedule of Classes. May be repeated for credit.

HOL 8101. Research and Independent Study. 1-3 Credits.

HOL 8700. Foundations of Human and Organizational Learning. 3 Credits.

The study of individuals and their interactions within an organizational context. Overview of key theories in leadership, systems theory, group dynamics, learning, organizational culture, and motivational theory. The use of research in human and organizational learning.

HOL 8701. Theory, Research, and Practice in Adult Learning and Development. 3 Credits.

Learning theories as applied to adults in individual and group learning transactions; effect of age on learning; psychological, physical, and social environments in adult education situations.

HOL 8702. Theory and Design of Organizational Diagnosis and Development. 3 Credits.

Focus on various paradigms through which organizations and their functions may be viewed; a variety of analytical models of organizations; techniques for assessing systems; application of analysis techniques.

HOL 8703. Human Systems Change. 3 Credits.

The classical and contemporary ideas related to social systems change; the relation of these ideas to current issues in organizations.

HOL 8704. Leadership Theory, Research, and Practice. 3 Credits.

Leadership in organizations with a focus on transformational leadership. Historical review of leadership theory and research; current developments in understanding leadership. Students examine their own leadership style and plan for continued development as a leader.

HOL 8705. Organizational Culture. 3 Credits.

Theory and research on organizational culture, from the multidisciplinary seminal works in anthropology, psychology, sociology, and management to current day theorizing and empirical research on culture. The rituals, values, and behaviors that differentiate cultural groups and the way cultural identities manifest themselves in organizational practices; and how organizational culture evolves and its relationship to other organizational phenomena such as innovation, strategy, sensemaking, and performance. Current trends in organizational culture theorizing.

HOL 8706. Interdisciplinary Readings in Human and Organizational Learning. 3 Credits.

Seminal works from various disciplines related to current research and practice.

HOL 8707. Advanced Organizational Learning. 3 Credits.

The psychological and sociological paradigms associated with the learning of a collective whole.

HOL 8708. Intro to Doctoral Research. 3 Credits.

HOL 8720. Seminar: Applied Research in Human and Organizational Learning. 3 Credits.

Identification of initial constructs and theories that support the identified research interest, with a problem statement and critical analysis of research reports and review of research literature.

HOL 8721. Practicum in Human and Organizational Learning. 3-6 Credits.

HOL 8722. Seminar: Advanced Issues in Human and Organizational Learning. 1-12 Credits.

Forum in which candidates critically examine relevant classic and contemporary literature, with analysis and synthesis to defend their research questions and conceptual frameworks.

HOL 8723. Organizations and Strategy in Human Resource Systems. 3 Credits.

Overview of paradigms, theories, models, and constructs of organizations and strategy to understand organizations and their environments.

HOL 8741. Managerial and Organizational Cognition. 3 Credits.

The emerging field of collective cognition in organizations, including theoretical foundations and seminal and current literature on knowledge structures and their role in strategy formation, organizational change, and sensemaking.

HOL 8742. Work, Identity, and Adult Development. 3 Credits.

The influence of work on identity, intellectual and personality development, and other developmental attributes. Same as CNSL 8253/HDEV 8253.

HOL 8746. Work Groups and Teams in Organizations. 3 Credits.

Theoretical understanding and practical considerations of working with groups and teams. Group dynamics, facilitating and leading groups, and member roles. Group facilitation techniques across different group settings and environments.

HOL 8997. Preparation and Delivery of Doctoral Research. 3 Credits.

Students develop and present a mock dissertation proposal, receiving feedback from faculty and colleagues in order to refine their proposal. Prerequisites: none. Recommended background: Students are expected to have developed a literature review, conceptual framework, and research question for their dissertation research prior to enrolling in this class.

HOL 8998. Predissertation Seminar. 3-6 Credits.

Platform for further development of the dissertation proposal.

HOL 8999. Dissertation Research. 3,6 Credits.

Prerequisite: HOL 8998.

SPECIAL EDUCATION AND DISABILITY STUDIES

GRADUATE

Master's programs

- Master of Arts in Education and Human Development in the field of early childhood special education (p. 542)
- Master of Arts in Education and Human Development in the field of secondary special education and transition services (p. 552)

- Master of Arts in Education and Human Development in the field of special education for children with emotional and behavioral disabilities (p. 554)
- Master of Arts in Education and Human Development in the field of special education for culturally and linguistically diverse learners (p. 555)
- Master of Arts in Education and Human Development individualized program (p. 547)

Doctoral program

- Doctor of Education in the field of special education (p. 563)

FACULTY

Professors M.S. Castleberry, M.B. Freund, C.A. Kochhar-Bryant, J.M. Taymans

Associate Professor E.K. Rice (*Chair*)

Assistant Professors J.R. Frey, K. Ihrig, P. Peng, E. Tuckwiller

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

SPED 0920. Continuing Research - Masters. 1 Credit.

SPED 0940. Cont Research - Doctoral. 1 Credit.

SPED 6100. Selected Topics. 1-12 Credits.

Topics and fees announced in the Schedule of Classes.

SPED 6101. Research and Independent Study. 1-3 Credits.

Individual study or research under guidance of staff member. Admission by permission of advisor. May be repeated for credit.

SPED 6201. Introduction to Special Education. 3 Credits.

Survey course to acquaint prospective teachers with special education and to help them become aware of the various educational modifications necessary to accommodate children with special needs in a school program.

SPED 6210. Universal Design for Learning and Assessment. 3 Credits.

Overview and introduction to universal design for learning, including contemporary issues, applications of digital and assistive technologies, and tools for developing a comprehensive plan for implementation. Same as CPED 6110.

SPED 6221. Accessing Community Systems for Individuals with Disabilities. 3 Credits.

Overview of access to community systems and service delivery for individuals with special needs and their families. Material fee.

SPED 6222. Legal Issues and Public Policy for Individuals With Disabilities. 3 Credits.

Examination, interpretation, and analysis of legislation and policies affecting the education and career development of individuals with disabilities. Emphasis on federal legislation in the context of national policy reform in disability services. Material fee.

SPED 6223. Introduction to Brain Injury: Programs, Policies, and Resources. 3 Credits.

An overview of acquired brain injury and its effects; current trends in the field, related policy, research, and development of new resources.

SPED 6224. Brain Function and Impact of Brain Injury on Learning and Education. 3 Credits.

Provides an in-depth understanding of neuroanatomy related to the impact of brain injury on child and adolescent development and learning to prepare educators to participate in educational assessment and planning.

SPED 6227. Technology in Vocational Evaluation. 3 Credits.

Introduction to an array of assistive technology services and products facilitating professional interventions and vocational evaluation procedures; application to the assessment of persons with disabilities. Material fee.

SPED 6228. Community-Based Assessment and Work Sample Development. 3 Credits.

Introduction to community-based vocational appraisal methods; development of job training analysis skills, labor market surveys, work samples; requirements of The Americans with Disabilities Act; incorporation of assistive technology; classroom theory and field work. Material fee.

SPED 6229. Interpretation and Application of Academic and Vocational Assessment Information. 3 Credits.

Specific strategies and techniques to analyze, interpret, and synthesize assessment information for the development of comprehensive academic/vocational profiles for adolescents and adults with disabilities. Observation and recording procedures, report development, and postassessment conferencing are emphasized. Material fee.

SPED 6230. Vocational Assessment of Individuals with Disabilities. 3-6 Credits.

Investigation of vocational appraisal processes and techniques for individuals with disabilities. Includes assessment for transition using field-based assignments. Three credits of practicum experience for students specializing in vocational evaluation. Material fee. Same as CNSL 6130.

SPED 6231. Instructional Methods in Secondary Special Education and Transition. 3 Credits.

Techniques and processes used in programming for the needs of individuals with disabilities as they prepare for transition to postsecondary programs and employment. Emphasis on skills related to professional liaison and support roles in the design of instructional arrangements and cooperative training. Material fee.

SPED 6232. Foundations in Special Education, Career Development, and Transition. 3 Credits.

Overview of historical, theoretical, and philosophical foundations of career development and transition. Explores directions for career development/transition practices in the context of educational reform and social and political change. Material fee.

SPED 6233. Curriculum in Secondary Special Education and Transition. 3 Credits.

Theory and practice in planning, implementing, and evaluating curriculum for individuals with disabilities. Emphasis on techniques for modifying curriculum and materials for individualized programming. Requires field-site curriculum implementation. Material fee.

SPED 6234. Seminar in Advanced Writing and Professional Presentation. 3-6 Credits.

Analysis and development of advanced professional writing skills, including literature synthesis, persuasive writing, and proposal writing. Material fee.

SPED 6235. Employment Models for Individuals with Disabilities. 3 Credits.

Rationale, occupational resources, and programming strategies for job placement and the development and coordination of employment programs for individuals with disabilities. Material fee.

SPED 6236. Introduction to Career and Career-Technical Education and Transition Services. 3-6 Credits.

Introduction to programs and services that provide career development and transition planning for individuals with disabilities. Material fee.

SPED 6237. Learning Strategies, Assessment, and Instruction for Individuals with Learning Disabilities. 3-6 Credits.

Theory and practice in evidence-based reading interventions. Learning strategies; content enhancement focused on literacy and self-determination. Material fee.

SPED 6238. Issues in Educating Individuals with Learning, Emotional, and Intellectual Disabilities. 3 Credits.

Introduction to the academic, cognitive, social, and emotional characteristics of individuals with learning disabilities; etiological theories; educational service delivery models, with particular emphasis on the adolescent with learning disabilities. Policy issues, continuum of services, and the transition from school to post-school environments. Material fee.

SPED 6239. Collaboration for Professionals Working with Students with Disabilities. 3 Credits.

Exploration of attitudes and beliefs about team teaching, collaboration and inclusionary environments. Development of knowledge and skills related to collaborative consultation and team teaching; interpersonal communication; the dynamics of collaborative teams; examination of the variety of environments in which special educators work. Material fee.

SPED 6240. Family Support and Guidance in Special Education. 3 Credits.

The developmental process of parenting and how that process is affected by having a child with developmental delay or disability. Family systems theory, stress and coping mechanisms, and communication and support strategies. Material fee.

SPED 6242. Neurodevelopmental Assessment and Programming for Infants and Toddlers with Disabilities. 3 Credits.

Application of the neurodevelopmental model to techniques for developing and implementing educational programs for infants and toddlers with disabilities. Prerequisite or concurrent registration: SPED 6263 or SPED 6268 or permission of instructor. Material fee.

SPED 6243. Developmental Assessment of Infants. 3 Credits.

Theory and current practice in the assessment of infants with or at risk for developmental disabilities. Material fee.

SPED 6244. Ethical Considerations in Neonatal and Infant Intervention. 3 Credits.

Overview of the major ethical issues involved in neonatal and infant intervention. The impact of recent and emerging technological innovations considered from medical, legal, ethical, and psychosocial perspectives. Material fee.

SPED 6245. Developmental Implications of Prematurity and Risk. 3 Credits.

Causes of prematurity. Conditions that place children at developmental and educational risk.

SPED 6253. Introduction to Autism Spectrum Disorders. 3 Credits.

Overview of autism spectrum disorders with a focus on etiology, characteristics, and evidence-based practices. Topics include defining, assessing, accommodating, and instructing students with autism spectrum disorders.

SPED 6254. Autism Spectrum Disorders and Transition to Employment and Post-Secondary Life. 3 Credits.

The policies, principles, models, and processes involved in job development, job accommodations and modifications, and employment and post-secondary placement services for individuals with autism and related disabilities. Legislation is reviewed in terms of its impact on placement of persons with autism who will transition into the workplace and/or post-secondary education.

SPED 6255. Collaboration with Systems and Families. 3 Credits.

Overview of models and strategies for coordinating services across disciplines and among school and community agencies for special populations. Emphasis on interdisciplinary team coordination, communication, decision making, planning, and follow-up for individuals with disabilities. Material fee.

SPED 6260. Developmental Assessment in Special Education. 3 Credits.

Examination of formal psychoeducational tests used with preschool and elementary-school-aged children. Development of formal and informal assessment techniques. Introduction to the skills necessary to write psychoeducational reports. Material fee.

SPED 6261. Practicum: Methods and Materials for Young Children with Disabilities. 3,6 Credits.

Implementation of educational strategies and materials, including designing and developing teaching materials, classroom teaching, feedback and evaluation with professor. A seminar accompanies this clinical experience.

SPED 6262. Formal Assessment of Young Children with Disabilities. 3 Credits.

Weekly seminar designed to prepare early childhood special educators to translate formal assessment data into instructional programming. Requires fieldwork with children. Material fee. Prerequisite: SPED 6260 .

SPED 6263. Development of the Infant with Special Needs. 3 Credits.

The processes of normal infant development and interrelationships among areas of development; relationship of these processes to the growth and development of infants with or at risk for developmental disabilities. Material fee.

SPED 6264. Medical and Genetic Conditions of Infants and Children with Developmental Disabilities. 3 Credits.

Introduction to medical and genetic conditions that affect the cognitive, language, and social development of infants and children with developmental disabilities.

SPED 6266. The Development of Language and Literacy. 3 Credits.

Within the context of typical and atypical development, the impact of various disabilities on language and literacy development. Material fee.

SPED 6267. Instructional and Assistive Technology in Early Childhood Special Education. 2,3 Credits.

Instructional strategies and assistive technology and their implications and uses for young children (0-5 yrs) in a wide variety of environments. Lectures, laboratory, and demonstrations. Material fee.

SPED 6268. Development of Children and Youth with Disabilities. 3 Credits.

Theories of human growth and development are considered as a framework for examination of typical and atypical development of children and youth. Material fee.

SPED 6269. Etiology, Symptomatology, and Approaches to Intervention with Children with Disabilities. 3 Credits.

An in-depth examination of the causes and characteristics of various disabilities. Current principles and approaches to intervention are examined. Material fee.

SPED 6272. Strategies for Inclusion: Addressing the Needs of Diverse Learners. 3 Credits.

Strategies by which teachers can more effectively assume the responsibility to serve all children in an inclusionary setting, including those who are second language learners and students with disabilities. Same as CPED 6172. Material fee.

SPED 6273. Impact of Culture on Education. 3 Credits.

The impact of culture and ethnicity on educational experiences. The relationship between school culture in the United States, one's own culture(s), and the cultures of diverse populations existing within our schools. Values, norms, rules, ethics, beliefs, attitudes, expectations, and assumptions of various cultures. Material fee.

SPED 6274. In-Service Planning/Programmng. 3 Credits.

SPED 6275. The Culturally and Linguistically Diverse Student with Disabilities: Policy, Research, and Trends. 3 Credits.

Educational service delivery for the culturally and linguistically diverse student. National, state, and local policies; current research in bilingual education, special education, and bilingual special education. Same as CPED 6175. Material fee.

SPED 6276. Academic and Psychosocial Assessment of the Culturally and Linguistically Diverse Student. 3 Credits.

Issues in academic and psychosocial assessment of second language learners. The impact of second language acquisition and culture on the assessment process; differentiation between language difference and disability; IEP development; the use of interpreters and translators; the involvement of family and communities; standardized and alternative assessments; and legislative mandates. Same as CPED 6176. Material fee.

SPED 6277. Teaching Culturally and Linguistically Diverse Students with Disabilities. 3 Credits.

Methods and materials for teaching students with disabilities who are English language learners. Classroom management, instructional and assessment strategies, materials and curricula, and collaborating with families and communities to meet the cultural, linguistic, academic, social, and emotional needs of students in various settings. Material fee.

SPED 6280. Developmental Assessment of Adolescents. 3 Credits.

Formal and informal psychoeducational assessment; assessment instruments commonly used with upper-elementary, junior, and senior high school students; the writing of psychoeducational reports. Material fee.

SPED 6283. The Urban Impact on Children and Youth with Disabilities. 3 Credits.

Effects of the total environment in which inner-city children live on their ability to learn and their cognitive, social-behavioral, and physical/health development. Material fee.

SPED 6288. Characteristics of Individuals with Learning, Emotional, and Intellectual Disabilities. 3 Credits.

An in-depth examination of typical and atypical growth and development, psychiatric diagnosis and psychosocial development issues, and general and specific characteristics of the student with serious emotional disabilities. May be repeated for credit. Material fee.

SPED 6290. Affective Development and Behavior Management in Special Education. 3 Credits.

Theory, programming, and behavior management strategies from theoretical and practical points of view. Material fee.

SPED 6299. Federal Education Policy Institute. 3 Credits.

The federal role in education policymaking in the context of national, state, and local efforts to create school environments for effective learning and the promotion of social and emotional health in children and youth. Same as CPED 6199.

SPED 6990. Internship in Teaching Children with Emotional and Behavioral Disabilities: Assistant Teacher. 3-6 Credits.

The federal role in education policymaking in the context of national, state, and local efforts to create school environments for effective learning and the promotion of social and emotional health in children and youth. Same as CPED 6199.

SPED 6991. Internship in Teaching Children with Emotional and Behavioral Disabilities: Co-Teacher. 3-6 Credits.

Continuation of SPED 6990. Graduate students become the primary teaching team in the classroom with ongoing supervision. Graduate students plan and apply psychoeducational teaching strategies with children with emotional and behavioral disabilities. Refinement of instructional and behavior management strategies. Weekly seminar continues. Material fee.

SPED 6992. Behavior Management Practicum: Adolescents with Disabilities. 3 Credits.

Field-based examination of theory of behavior development and techniques for classroom management. Material fee.

SPED 6993. Internship: Teaching Young Children with Disabilities. 3,6 Credits.

Supervised internship in early childhood special education. Weekly seminar. Material fee.

SPED 6994. Internship: Early Intervention. 3-6 Credits.

Supervised internship in early intervention. Weekly seminar. Material fee.

SPED 6995. School- and Community-Based Internship in Special Education and Transition. 1-9 Credits.

A 50- to 450-hour supervised internship in school- and community-based settings involved in career, vocational, and transition services.

SPED 6996. Teaching Internship in Transition Special Education. 3-6 Credits.

Supervised teaching internship; seminar required. Permission by instructor. Material fee.

SPED 6997. Internship in Teaching Culturally and Linguistically Diverse Students with Disabilities. 3-6 Credits.

Supervised internship and weekly seminar. A full-time, field-based teaching experience working with students with disabilities who are English language learners. Writing an appropriate IEP, interacting with families and communities, and planning and implementing instructional approaches and strategies. Material fee.

SPED 8100. Selected Topics. 1-12 Credits.

Topics and fees announced in the Schedule of Classes.

SPED 8101. Research and Independent Study. 1-3 Credits.

Individual research under guidance of a staff member. Program and conferences arranged with program advisor.

SPED 8301. Research Seminar in Special Education. 1-12 Credits.

Participation in a small group with a selected faculty member; research on and discussion of an area of common interest. Admission by permission of instructor.

SPED 8303. Administration and Supervision of Special Education. 3 Credits.

Philosophy and nature of special education; program organization, administration, and development. Surveying local needs; program evaluation and supervision. Admission by permission of instructor. Material fee.

SPED 8304. Research and Trends in Special Education. 3 Credits.

Emphasis on topical research issues, problems of conducting research, and research syntheses. Material fee.

SPED 8305. Foundations of Neuroscience in Special Education. 3 Credits.

Develops understanding of the neurological bases of sensation and perception, object recognition, control of motor action, learning and memory, emotion and language, attention, consciousness and cognitive control, and social cognition.

SPED 8306. Advanced Study in Development Science and Variance I: The Early Years. 3 Credits.

Consideration of cognitive neuroscience research on developmental issues of infancy and early years; assessment, identification, and related prevention and intervention. Prerequisite: SPED 8305.

SPED 8308. Preparation for the Professoriate in Special Education. 3 Credits.

Philosophical, ethical, and methodological aspects of personnel preparation in university and field-based programs; opportunities for practice in pedagogical design and delivery. Material fee.

SPED 8310. Advanced Study in Development Science and Variance II: The Later Years. 3 Credits.

Consideration of cognitive neuroscience research on adolescent development, including executive functioning, self-regulation, atypicality in learning, social and emotional behavior, motivation, and attention. Prerequisite: SPED 8306.

SPED 8311. Proseminar in Special Education: The Interdisciplinary Foundations. 3 Credits.

A theoretical and research-based course that introduces students to strategies by which data from cognitive neuroscience research can be applied to conceptualizing research in special education. A doctoral student forum addresses interdisciplinary research knowledge. Prerequisite: SPED 8310.

SPED 8343. Psychoeducational Diagnosis in Special Education. 3 Credits.

The range of diagnostic and intervention strategies applicable to the student who presents psychosocial and related learning difficulties. Admission by permission of instructor. Material fee.

SPED 8345. Consultation and the Change Process. 3 Credits.

Consultation models from organizational development, organizational psychology, and mental health applied to professional practice in education and special education. Material fee.

SPED 8352. Disability and Public Policy. 3 Credits.

Overview of current legislation and public policy affecting education, employment, and civil rights of individuals with disabilities. The evolution of disability policies and their relationship to principles of social justice. Material fee.

SPED 8353. Post-Master's Internship in Special Education. 1-6 Credits.

Supervised professional internship in college teaching, administration, supervision, research, or policymaking. Internships are individually arranged. Admission by permission of instructor.

SPED 8354. Doctoral Internship: Special Education. 1-6 Credits.

Supervised professional internship in research college teaching, administration, policymaking, or private agency function. Admission by permission of advisor.

SPED 8360. Interdisciplinary Techniques in the Diagnostic Process in Special Education. 3 Credits.

Application of theoretical concepts of assessment; development of assessment programs; interpretation and application of interdisciplinary diagnostic evaluations. Prerequisite: SPED 6260, and permission of instructor. Material fee.

SPED 8998. Doctoral Seminar in Special Education. 3-6 Credits.

Review of literature in a topical area; preparation of a dissertation proposal and a manuscript of publishable quality. Admission by permission of instructor and approval of major advisor. Material fee.

SPED 8999. Dissertation Research. 3,6 Credits.

Prerequisite: SPED 8998.

SCHOOL OF BUSINESS

Dean L.A. Livingstone

Vice Dean J. Spencer

Associate Deans R. Achrol (*Interim*), G. Jabbour, V. Perry (*Interim*), L. Moersen (*Interim*)

First organized as the School of Government in 1928, the School of Business (<http://www.business.gwu.edu>) has been responsible for the professional development of individuals assuming leadership roles in society. The School has eight departments—Accountancy, Decision Sciences, Finance, Information Systems and Technology Management, International Business, Management, Marketing, and Strategic Management and Public Policy. The use of a multidisciplinary approach in educational programming helps prepare both the generalist and specialist for professional careers in today's complex, organizational society.

The School of Business is a member of AACSB International—The Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu>), and the undergraduate and graduate programs in business administration and accounting are accredited by the Association.

Mission Statement

The mission of The George Washington University School of Business is to have a lasting intellectual impact by offering quality education through innovative programs that provide theoretical frameworks and real-world learning experiences; engaging in rigorous scholarship that advances knowledge in the management of organizations in the global environment; and contributing as a local, national, and global citizen. The School accomplishes this within a community built upon respect, integrity, and active engagement.

Vision

The George Washington University School of Business will set itself apart as a thought leader at the intersection of the private, public, and nonprofit sectors. It will be recognized for advancing knowledge on the role of organizations in the global arena. Its graduates will possess the multidisciplinary knowledge, critical-thinking skills, and ethical standards to make a positive impact on economies and societies.

Strategic Goals

The School of Business's strategic goals address three areas that translate the School's mission into specific strategies, programs, and initiatives. The School aspires to enhance its reputation and prestige among internal and external stakeholders through recognition, accreditation, and rankings.

Educational Goal

The School of Business offers a distinctive educational experience to prepare global business leaders through a portfolio of niche programs that emphasize academic rigor,

learning outcomes, and teaching excellence in both delivery and content.

Intellectual Contribution Goal

The School of Business engages in scholarly research that contributes to the creation of knowledge for improving the management and performance of organizations.

Service and Outreach Goal

The School of Business engages as citizen-leaders in the communities of which it is a part.

REGULATIONS

- Undergraduate Programs (p. 590)
- Graduate Programs (p. 591)

Undergraduate Programs

The School offers programs leading to the degrees of Bachelor of Accountancy, Bachelor of Business Administration, and Bachelor of Science. The programs include foundation knowledge for business in accounting, economics, mathematics, and statistics. Curricula are designed to provide perspectives on ethical and global issues, the influence of political, social, legal and regulatory, environmental, and technological issues, and the impact of demographic diversity on organizations. A Bachelor of Business Administration student selects a field of concentration from among accountancy; business analytics; business economics and public policy; finance; information systems and technology management; innovation and entrepreneurship; international business; marketing; sport, event, and hospitality management; or, with faculty approval, may structure an individualized field of concentration reflecting a specific interest in management. Additionally, a minor in non-business field is required. The Bachelor of Science integrates the University's emphasis on interdisciplinary study at the undergraduate level by requiring one major in the School of Business and a second major in a non-business field.

Advising

Students entering the School of Business are assigned a professional academic advisor who advises them through graduation. The GWSB Advising Center (<http://business.gwu.edu/ugrad/advising-center>) staff empower students to take ownership of, and responsibility for, their educational experiences. Students partner with advisors to successfully navigate their academic careers through conversations that range from understanding University and School requirements, exploring degree and major possibilities, overcoming academic challenges, setting goals, and finding appropriate campus resources.

Students should meet with their GWSB advisor each semester to ensure that they remain on track for fulfilling all degree requirements. Students are also encouraged to build a support system that ensures academic success. Professors, faculty mentors, professional advisors, tutors, and/or

counselors should be part of that support system. Assistance is also available through the Division of Student Affairs (<http://students.gwu.edu>), Mental Health Services (<http://counselingcenter.gwu.edu>), Multicultural Student Services Center (<http://gwired.gwu.edu/mssc?url=mssc>), International Services Office (<http://internationalservices.gwu.edu>), and Writing Center (<http://writingprogram.gwu.edu/writing-center>).

Scholarship Requirements

A student must have the following to graduate:

1. a minimum of 120 credits;
2. an overall grade-point average of at least 2.0; and
3. a grade-point average of at least 2.0 in all required upper-division B.B.A., B.Accy., or B.S. courses and concentration-related courses (the major field grade-point average).

All courses taken at GW are included in the overall grade-point average calculation. Elective courses in or out of the School of Business cannot be used as substitutes for required courses in the calculation of the major field grade-point average.

Academic Standing

Rules governing academic probation and suspension, described under University Regulations, are applicable to undergraduate students at the School of Business. In addition, students are required to maintain a 2.0 grade-point average in their business core and major/concentration courses. Students who do not meet these requirements will be placed on academic probation or may be academically suspended from the University.

Undergraduate Policies

Pass/No Pass Option—A junior or senior student who has a cumulative grade-point average of 2.5 or better may, with approval of the instructor, the advisor, and the director of the Advising Center, take one upper-level non-business or unrestricted elective a semester and receive a grade of *P*, Pass, or *NP*, No Pass, which will be recorded on the student's transcript but will not be reflected in the grade-point average. No student will be allowed to take more than four pass/no pass courses, with a limit of one per semester. Under no circumstances may a student change from pass/no pass status to graded status, or vice versa, after the last date to withdraw from a course. Required courses (including WID courses) may not be taken on the pass/no pass basis. A transfer student may not choose this option until the second semester of enrollment in the University.

Incomplete Grades—Conditions under which the symbol *I* (Incomplete) may be assigned are described under University Regulations. In the School of Business, the conditions for granting a notation of *I* should be documented by a written contract between the faculty member and the student; this Incomplete Contract can be found on the GWSB Advising Center website (<http://business.gwu.edu/ugrad/advising-center>).

center). These contracts are kept in the student's file in the Advising Center.

Independent Study—A junior or senior of demonstrated capacity, with a special interest in the subject matter of a course, may be permitted to undertake study under the personal direction of a regular, full-time member of the faculty, in accordance with the rules of the appropriate department. Credit under this plan is limited to the specific credits normally allowed when a course is taken on a class basis. A petition outlining the student's specific study plan must be submitted to the director of the Advising Center (<http://business.gwu.edu/ugrad/advising-center>) prior to beginning any independent study. Generally, a maximum of two independent studies in two separate semesters is permitted.

Concentration Regulations—A student may pursue up to two concentrations in the B.B.A. Degree. When double counting courses between concentrations (and other degree requirements such as the minor), each concentration must have at least four unique courses. Additionally, the maximum number of credits may transfer into each concentration, including study abroad credits, is two courses (six credits).

Signature Courses—Signature courses for the School of Business undergraduate degrees must be taken in residence at GW. These courses include BADM 1001 and 1002 *First Year Development Program*; BADM 1003 *Transfer Student Development Course*; BADM 1004 *Age of Globalization*; BADM 2001W *Markets and Politics*; BADM 3001 *Career Management Strategy*; and BADM 4101 *Business Law and Ethics*.

Graduate Programs

Entrance Requirements

To be considered for admission, applicants must present a bachelor's degree from a regionally accredited college or university. Admission to master's programs is highly competitive. Previous academic history, performance on the applicable entrance examination, letters of recommendation, motivation and aptitude to do graduate-level work, and professional experience are all taken into consideration.

Applicants for admission to programs leading to the Master of Business Administration, Master of Accountancy, Master of Science in Finance, and Master of Tourism Administration must submit scores on the Graduate Management Admission Test or the Graduate Record Examination. Test scores that are more than five years old are not accepted for admissions review.

English Language Requirements for International Students

Applicants who are not citizens of countries where English is the official language or who do not hold a degree from a regionally accredited U.S. institution of higher learning are required to submit scores from the Test of English as a Foreign Language (TOEFL), the academic International English Language Testing System (IELTS),

or the Pearson Test of English–Academic (PTE). Specified possible exemptions from this policy can be found at graduate.admissions.gwu.edu/english-language-requirements (<http://graduate.admissions.gwu.edu/english-language-requirements>).

The Master of Science in Finance program requires a minimum score of 550 paper-based or 80 Internet-based on the TOEFL, or an overall band score of 6.5 on the IELTS with no individual band score below 5.5. All other School of Business graduate degree programs require a minimum TOEFL score of 600 paper-based or 100 Internet-based, or an overall band score of 7.0 on the IELTS with no individual band score below 6.0, or a score of 68 on the PTE. In some instances, an interview will be required of applicants.

Applicants for graduate teaching assistantships must have a minimum score of 600 paper-based or 100 Internet-based on the TOEFL, an overall band score of 7.0 on the IELTS with no individual band score below 6.0, or a score of 68 on the PTE.

Students with the following English language test scores are exempt from taking English for Academic Purposes (EAP) courses: TOEFL, 600 paper-based or 100 Internet-based; IELTS, overall band score of 7.0 with no individual band score below 6.0; PTE, 68. Students with test scores below these minimums must register for an EAP course during their first semester. Students assigned EAP courses should anticipate additional tuition expenses as well as a possible extended period of time required to complete their degree program. EAP courses do not count toward degree requirements.

Transfer Within the School

Currently enrolled students wishing to transfer from one graduate degree program to another within the School must complete a new application for admission through the appropriate degree program office. Applicants for transfer are subject to requirements in effect at the time of transfer. In addition, students must submit all required credentials no later than the established completion dates for the term for which the transfer is requested. Students must be in good academic standing (3.0 grade-point average) for transfer consideration.

Readmission

A student who withdraws, is suspended, or is otherwise absent without authorization from the University for one semester or more must make formal application for readmission to the director of the student's degree program and resubmit all supporting credentials including transcripts from previous schools attended, including George Washington University, and entrance examination scores. If readmitted, the student is subject to the rules and regulations in force at the time of return. If the student has attended one or more regionally accredited colleges or universities during absence from the University, complete official transcripts must accompany the application for readmission.

The application fee is waived for a student applying for readmission who was registered as a degree candidate at the time of last registration at the University and has not since registered at another college or university.

General Requirements

All students must complete the prescribed minimum number of credits of graduate course work. A maximum of 6 credits of graduate course work may be approved for transfer to the School of Business from enrollment at GW in nondegree status or from another degree-granting school of this University, or another regionally accredited college or university under the following conditions: The course work must be approved as part of the student's program of studies; it must not have been applied to the completion of requirements for another degree, it must be at the graduate level, it must have been taken within the two years prior to acceptance into the program, and the student must have received a grade of *B* or better. A transcript and description of the course work must be on file before the petition can be considered. Should advanced standing be granted, the credit will count but not the grade.

Students who enroll in course work at a School of Business exchange partner institution while enrolled in a GWSB degree program may transfer a maximum of 12 credits from the partner institution after participation in an official exchange program. Such credits do not count toward the 6-credit maximum transfer restriction. Exchange partners must have an established Memorandum of Understanding with the School of Business. Course work must be approved as part of the student's program of study; it must be at the graduate level and must meet the GWSB program's grade requirements for transfer credit. For additional information, contact the Office for Global and Experiential Education.

Master's degrees are awarded by vote of the Faculty on completion of the required course work and completion of an acceptable thesis (if one is elected) in the chosen degree or field of concentration.

Although work counted toward a bachelor's degree may not be counted toward a master's degree, a student who has completed the equivalent of a Master of Accountancy or Master of Business Administration core prerequisite course with a grade of *B* or better as part of the bachelor's degree program may request a waiver of that course at the master's level. A grade of *B* or better is required to waive remaining core prerequisite courses on the basis of equivalent graduate-level courses completed at GW or another AACSB-accredited college or university prior to admission to the program. All courses presented for waiver consideration must have been taken within five years prior to the first semester of enrollment into the program. Students should contact their degree program director for specific waiver criteria and deadlines for requesting waivers.

A full-time student may register for a minimum of 9 to a maximum of 15 credits each semester and 6 credits each

summer session (the maximum is 18 for full-time M.B.A. students). All work for a master's degree must be completed in five years.

Students who expect to continue studies for a doctoral degree after receiving the master's degree should ask for assistance in planning their programs of study.

No credit is granted for work done in absentia or without formal instruction, except for supervised field experience, independent study, and the thesis, which may be completed in absentia with the permission of the department, designated faculty advisor, or committee concerned.

Independent Study Plan

A graduate student of demonstrated capacity, with a special interest in the subject matter of a course, may be permitted to undertake study under the personal direction of an instructor, in accordance with the rules of the appropriate department. Credit under this plan is limited to the specific credits normally allowed when a course is taken on a class basis. A petition outlining the student's specific study plan must be submitted to the student's degree program director prior to beginning any independent study. The student may petition to complete a maximum of two independent studies in two separate semesters.

Students from Other Schools Within the University

Degree candidates from other schools of the University cannot register for more than 12 credits from the Master of Accountancy, Master of Science in Finance, or Master of Business Administration degree programs.

Scholarship Requirements

The University's general scholarship requirements, including information on grades and computing the grade-point average, appear under University Regulations in this Bulletin. A minimum grade-point average of 3.0 must be maintained and is required for award of a graduate degree. All graduate courses and undergraduate courses taken for graduate credit after matriculation as a degree candidate (except those audited or taken for the grade of *CR*) will be used in the calculation of the grade-point average.

Probation

A student whose grade-point average falls below 3.0 at any point after completing 9 credits will be placed on probation. This probation extends through the period in which the student next attempts up to 12 credits of work, including prescribed courses. A student's program may be restricted by the program director if deemed necessary. During this period, the student's performance will be monitored to determine suitability for continued study. A student who fails to raise the cumulative grade-point average to 3.0 or better during the period of probation will be suspended. Incomplete grades and grades of *F* are not allowed during the probation period and are

grounds for automatic suspension. A student who is subject to probation for a second time at any point during the program is automatically suspended and subsequent readmission will be denied.

Grade of F

A master's degree candidate who receives a grade of *F* is required to present cause, for consideration by the director of the student's degree program, as to why continued study should be permitted. Once a grade of *F* is earned in a core, required, or elective course, it remains a part of the student's permanent record and is calculated into the grade-point average. A master's degree candidate given the grade of *F* in a core or other required course, and permitted to continue in graduate studies, must repeat the course and achieve at least the grade of *B*. If the grade earned is below *B*, the student will be denied further registration as a degree candidate.

Suspension

A graduate student who does not meet the conditions of probation (see above) will be suspended. A student who is suspended or withdraws under these conditions may apply for readmission after the lapse of one semester except when suspended a second time. An outstanding Incomplete grade at the time of suspension will become an *F*. To be readmitted the student must submit evidence that indicates academic success if readmitted. A student so readmitted will continue on academic probation and must achieve a minimum grade-point average of 3.5 in the next 12 credits of graduate study. Should the student fail to achieve this minimum grade-point average, a second suspension will result and subsequent readmission will be denied.

Incompletes

Conditions under which the symbol *I* (Incomplete) may be assigned and changed are described under University Regulations. The symbol *I* must be changed by a date agreed on by the instructor and the student but usually no later than the last day of the examination period within one calendar year for the fall, spring or summer semester in which the symbol *I* is assigned. An Incomplete that is not changed within this period automatically becomes an *IF*, at which time a student is placed on *F*-Probation (see Grade of *F* above). In cases of well-documented extenuating circumstances, an instructor and a student may jointly petition the director of the student's degree program for additional time in which to complete the work of the course. Such petitions should be submitted within the same period. The symbol of *I* cannot be changed by reregistering for the course here or by taking its equivalent elsewhere. Upon submission of the assigned grade, the *I* is removed from the transcript.

Withdrawing From a Course

The School of Business requires that students requesting to withdraw from a course after the eighth week of classes (or after the fourth week for modules) must present a petition to the dean and receive written permission. The student must

be passing the class and obtain the written approval of the instructor. If approved, a *W* (Authorized Withdrawal) will appear on the transcript. Tuition will not be refunded.

Thesis

Students contemplating doctoral study are strongly urged to include the thesis as an elective in their master's program. The thesis subject should be selected as early as possible to permit effective integration with the course work.

The subject must be approved by the professor in charge of the student's field. The thesis in its final form must have the approval of the professor in charge. All theses must be submitted electronically and meet the formatting and other requirements set forth on line at GW's Electronic Theses and Dissertations Submission website (<http://library.gwu.edu/etds>)

Payment of tuition for the thesis entitles the candidate, during the semesters in which registered for thesis seminar and/or thesis research, to the advice and direction of the member of the faculty under whom the thesis is to be written. In case a thesis is unfinished, additional time is granted. The student must, however, be enrolled continuously in the program. If the preparation of the thesis extends more than three semesters beyond the date registered for thesis research, the student must register for the entire required thesis credits again and pay additional tuition.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Accountancy (p. 595)
- Bachelor of Business Administration (p. 599)
 - concentration in accountancy (p. 602)
 - concentration in business analytics (p. 602)
 - concentration in business economics and public policy (p. 603)
 - concentration in innovation and entrepreneurship (p. 603)
 - concentration in finance (p. 604)
 - concentration in information systems (p. 605)
 - concentration in international business (p. 606)
 - concentration in marketing (p. 607)
 - concentration in sport, event, and hospitality management (p. 608)
 - concentration in individualized field (p. 609)
- Bachelor of Science with a major in finance (p. 609)
- Dual degree programs (p. 613)

Minor

- Minor in business administration (p. 614)

GRADUATE

Master's programs

- Master of Accountancy (p. 615)
- Master of Science in Business Analytics (p. 616)
- Master of Science in Finance (p. 616)
- Master of Science in Information Systems Technology (p. 617)
- Master of Science in Government Contracts (p. 617)
- Master of Science in Project Management (p. 618)
- Master of Tourism Administration (p. 618)

Masters of Business Administration programs

- Global Master of Business Administration (p. 619)
- Healthcare Master of Business Administration (p. 625)
- Professional Master of Business Administration (p. 626)
- World Executive Master of Business Administration (p. 632)

Joint Degree Programs

- Joint Master of Business Administration/Juris Doctor with the Law School (p. 633)
- Joint Master of Business Administration/Master of Arts with a focus on international business with the Elliott School of International Affairs (p. 633)
- Joint Master of Business Administration/Master of Science in Finance (p. 633)
- Joint Master of Business Administration/Master of Science in Project Management (p. 633)

Doctoral program

- Doctor of Philosophy in the field of business administration (p. 633)

CERTIFICATES

The School of Business Post-Master's Graduate Certificate is designed to provide School of Business master's degree alumni an opportunity to build upon their graduate study to keep pace with today's business climate. Participants may undertake a 12-credit program of study in an existing School of Business field or from a series of specially designed program offerings. Further information is available from the Office of the Dean.

In addition, three graduate certificate programs of study are available in the following fields:

- Walkable Urban Development: A 16.5-credit graduate certificate is available to current School of Business students and to non-degree students.
- Responsible Management: A 12-credit graduate certificate is available to current M.B.A. students.

- Nonprofit Management: A 12-credit graduate certificate is available to current M.B.A. students.

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
- Accountancy (ACCY) (p. 891)
- Business Administration (BADM) (p. 926)
- Decision Sciences (DNSC) (p. 1030)
- Finance (FINA) (p. 1077)
- Information Systems and Technology Management (ISTM) (p. 1126)
- International Business (IBUS) (p. 1137)
- Management (MGT) (p. 1183)
- Marketing (MKTG) (p. 1185)
- Master of Business Administration (MBAD) (p. 1187)
- Strategic Management and Public Policy (SMPP) (p. 1320)
- Tourism Studies (TSTD) (p. 1326)

UNDERGRADUATE PROGRAMS

Bachelor's programs

- Bachelor of Accountancy (p. 595)
- Bachelor of Business Administration (p. 599)
 - concentration in accountancy (p. 602)
 - concentration in business analytics (p. 602)
 - concentration in business economics and public policy (p. 603)
 - concentration in innovation and entrepreneurship (p. 603)
 - concentration in finance (p. 604)
 - concentration in information systems (p. 605)
 - concentration in international business (p. 606)
 - concentration in marketing (p. 607)
 - concentration in sport, event, and hospitality management (p. 608)
 - concentration in individualized field (p. 609)
- Bachelor of Science with a major in finance (p. 609)
- Dual degree programs (p. 613)

Minor

- Minor in business administration (p. 614)

BACHELOR OF ACCOUNTANCY

The Bachelor of Accountancy offers both specialized knowledge in accounting and a general education leading to a broad understanding of the business world. The program is designed to prepare students for a professional career in accounting in the public or private sector as well as for graduate study in business, finance, information systems, or law. Students are provided with multiple opportunities to gain practical experience, such as the ability to study the stock market in a classroom that looks like a Wall Street trading venue.

Visit the program website (<http://business.gwu.edu/undergraduate/baccy>) for additional information.

REQUIREMENTS

General education and pre-business courses

BADM 1001 & BADM 1002	First Year Development Course I and First Year Development Course II (*)
--------------------------	--

or BADM 1003	Transfer Student Development
--------------	------------------------------

BADM 1004	The Age of Globalization
-----------	--------------------------

ECON 1011	Principles of Economics I
-----------	---------------------------

ECON 1012	Principles of Economics II
-----------	----------------------------

STAT 1051	Introduction to Business and Economic Statistics
-----------	---

or STAT 1053	Introduction to Statistics in Social Science
--------------	--

or STAT 1111	Business and Economic Statistics I
--------------	------------------------------------

or APSC 3115	Engineering Analysis III
--------------	--------------------------

UW 1020	University Writing

One humanities course**

Two science courses**

A sequence of two math courses from the following:

MATH 1051 & MATH 1252	Finite Mathematics for the Social and Management Sciences and Calculus for the Social and Management Sciences
--------------------------	--

Or

MATH 1231 & MATH 1232	Single-Variable Calculus I and Single-Variable Calculus II
--------------------------	---

Business core courses

ACCY 2001	Intro Financial Accounting
ACCY 2002	Introductory Managerial Accounting
BADM 2001W	Markets and Politics
BADM 2301	Management Information Systems Technology
or BADM 2301W	Mgt Information Systems Tech
BADM 3001	Career Management Strategy
BADM 3103	Human Capital in Organizations
BADM 3401	Basic Marketing Management
or BADM 3401W	Basic Marketing Management
BADM 3501	Financial Management and Markets
BADM 4801	Strategy Formulation and Implementation

Accountancy major courses

ACCY 3101	Intermediate Accounting I
ACCY 3102	Intermediate Accounting 2
ACCY 3401	Federal Income Tax:Individuals
ACCY 3403	Advanced Tax
ACCY 3601	Business Law: Contracts, Torts, and Property
ACCY 4107	Advanced Accounting
ACCY 4301	Auditing
ACCY 4501	Accounting Systems
ACCY 4601	Business Law: Enterprise Organization
ACCY 4801	Financial Accounting Capstone

International field course

One of the following:

ECON 2180	Survey of International Economics
ECON 2181	International Trade Theory and Policy
IBUS 3001	Introduction to International Business
IBUS 3101	Global Financial Environment
IBUS 3301	International Business Finance
IBUS 4401	Managing the Multinational Enterprise

Electives [‡]

6 credits in non-business courses numbered 1000-4999. Courses cannot be in GWSB, MATH, STAT, ECON, CSCI, or LSPA.

9 credits in upper-level non-business courses numbered 2000-4999. Courses cannot be in GWSB, MATH, STAT, ECON, CSCI, or LSPA.

3 credits in an unrestricted elective course numbered 1000-4999.

12 credits in upper-level unrestricted elective courses numbered 2000-4999.

*Freshmen are required to take BADM 1001 and BADM 1002; transfer students are required to take BADM 1003.

**A list of approved courses can be found on the General Education Requirement page (p. 29).

‡Elective courses may include a maximum of one HLWL (health and wellness) course.

Students who intend to take the C.P.A. examination should be aware that the course work required for admission to the examination varies from state to state. Students are advised to consult the Board of Accountancy for the state in which they plan to take the examination and choose courses that meet that state's requirements.

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ACCY 2001. Intro Financial Accounting. 3 Credits.

The fundamental concepts underlying financial statements and the informed use of accounting information. Analysis and recording of business transactions; preparation and understanding of financial statements. Measurement of the profitability and financial position of a business. Restricted to sophomore standing.

ACCY 2002. Introductory Managerial Accounting. 3 Credits.

The use of accounting information to plan and control the activities of a business. Several widely used methods of determining the cost of business activities for use in making business decisions. Prerequisite: ACCY 2001.

ACCY 3101. Intermediate Accounting I. 3 Credits.

Financial accounting concepts underlying the preparation and interpretation of financial statements. Topics include revenue and expense recognition; accounting for receivables, inventories, fixed assets, intangible assets, and liabilities. Prerequisite: ACCY 2001.

ACCY 3102. Intermediate Accounting 2. 3 Credits.

Financial accounting concepts underlying the preparation and interpretation of financial statements. Topics include accounting for stockholders' equity, earnings per share, debt and equity investments, incomes taxes, pensions and other postretirement benefits, accounting changes, statements of cash flows, financial statement analysis, and disclosure. Prerequisite: ACCY 2001.

ACCY 3106. Financial Statement Analysis. 3 Credits.

Introduction to the analysis and interpretation of corporate financial statements within the context of a company's industry and economic environment. Cash flow analysis, profitability and risk analysis, accounting policy analysis, forecasting and performance analysis, elements of equity valuation, and decision perspectives of creditors. Students cannot earn credit for both this course and ACCY 4801. Prerequisite: ACCY 2002.

ACCY 3401. Federal Income Tax:Individuals. 3 Credits.

A study of federal income tax concepts, including what shall be taxed, and when, and at what rate. Taxable entities, income measurement, the use of different tax rates for different types of income, and the use of the tax laws to motivate taxpayer behavior to achieve economic goals.

ACCY 3403. Advanced Tax. 3 Credits.

Taxation of partnerships, corporations, and their owners. Formation, operation, and liquidation of each type of entity. Financial and tax accounting for each type of transaction, with the goal of gaining a better understanding of each system by comparing and contrasting it with the other one. Prerequisites: ACCY 2001 & ACCY 3401.

ACCY 3601. Business Law: Contracts, Torts, and Property. 3 Credits.

Essential legal principles of contracts, torts, and property, including trusts and estates, leases, professional liability, and the Uniform Commercial Code.

ACCY 4107. Advanced Accounting. 3 Credits.

Accounting for corporate combinations, foreign currency financial statements, and derivative financial instruments. Governmental and not-for-profit accounting. Prerequisites: ACCY 3101 and ACCY 3102.

ACCY 4301. Auditing. 3 Credits.

A study of generally accepted auditing standards and accepted professional auditing practices and procedures, including reviewing and evaluating financial controls, auditing financial statements, and testing financial data of manual and automated accounting systems. Prerequisite: ACCY 3102.

ACCY 4501. Accounting Systems. 3 Credits.

Introduction to the design and operation of accounting systems and data management controls. Principles and applications of internal control applicable to manual and automated accounting systems. Prerequisite: ACCY 3102.

ACCY 4601. Business Law: Enterprise Organization. 3 Credits.

The legal aspects of organizing, financing, and operating an enterprise: agency, partnerships, corporations, securities regulation, insurance, secured credit financing, and commercial paper. Prerequisite: ACCY 2001.

ACCY 4801. Financial Accounting Capstone. 3 Credits.

Synthesis and application of knowledge of financial accounting to specific contexts, using the perspectives of the preparer and user of financial statements. Students cannot earn credit for both this course and ACCY 3106. Restricted to seniors only.

ACCY 4900. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods. Restricted to department approval.

ACCY 4995. Independent Study. 3 Credits.

Assigned topics. Admission by permission of the department chair.

ACCY 6101. Financial Accounting. 3 Credits.

The basic concepts and methods used in financial reports for understanding their content and context. The income statement, balance sheet, and statement of cash flows. Detailed accounting procedures and choices. How the most important accounting procedures are calculated and how different choices impact financial statements. Same as MBAD 6211.

ACCY 6104. Intermediate Accounting I. 3 Credits.

Accounting principles and concepts for financial accounting and reporting; emphasis on the preparation of general-purpose financial statements. Prerequisite: ACCY 6101 and MBAD 6211.

ACCY 6105. Intermediate Accounting II. 3 Credits.

Revenue recognition, employee compensation and pension plans, income tax expense, and earnings per share. Prerequisites: ACCY 6104.

ACCY 6106. Financial Statement Analysis. 3 Credits.

Analysis and interpretation of financial statements for managers, stockholders, creditors, and financial analysts; ratio-driven financial analysis; earnings-based and cash-flow-based equity valuation; sales and EPS forecasting; preparation of projected financial statements. Prerequisites: ACCY 6101/MBAD 6211.

ACCY 6107. Corp Reorganizatn &Affiliation. 3 Credits.

Financial and tax accounting for intercorporate investments and corporate acquisitions and for consolidated groups of corporations. Consolidation procedures, accounting for goodwill, intercompany sales, foreign subsidiaries, and taxation of the corporations and their shareholders. Prerequisite: ACCY 6102, ACCY 6401.

ACCY 6110. International Reporting and Control. 1.5 Credit.

International comparisons of forces that shape financial management, such as corporate governance mechanisms, tax policies, economic development, and privatization. Same as IBUS 6308.

ACCY 6111. International Accounting. 1.5 Credit.

Financial management in multinational enterprises: management techniques that improve international financial reporting and control, such as hedging foreign currency fluctuations, and controlling foreign subsidiaries. Prerequisite: ACCY 6101. Same as IBUS 6309.

ACCY 6112. International Financial Reporting Standards. 1.5 Credit.

Financial reporting standards that are used throughout most of the world other than the United States. Comparisons of these standards with those of the United States. Prerequisite: ACCY 6101/MBAD 6211. Same as IBUS 6310.

ACCY 6201. Managerial Accounting I. 1.5 Credit.

Effective use of accounting information in decision making and control of organizations. Same as MBAD 6213. Prerequisite: ACCY 6101/MBAD 6211.

ACCY 6202. Managerial Accounting II. 1.5 Credit.

Further topics in applying concepts of control and decision analysis to optimize the financial management of organizations. Prerequisite: ACCY 6201/MBAD 6213.

ACCY 6203. Controls, Alignment & the Org.. 1.5 Credit.

ACCY 6301. Contemporary Auditing Theory. 3 Credits.

A comprehensive survey of contemporary auditing as practiced by external auditors (primarily certified public accountants) and internal auditors (those employed within government and corporate entities). Generally accepted auditing standards; government auditing standards. Planning, directing, and reporting on various audits. Prerequisite: ACCY 6101/MBAD 6211; corequisite: ACCY 6104.

ACCY 6302. Fraud Examination and Forensic Accounting. 3 Credits.

Financial statement fraud, misappropriation of assets, and methods of deterrence, prevention, detection, and investigation. Prerequisite: ACCY 6101/MBAD 6211; a course in auditing preferred but not required.

ACCY 6401. Federal Income Taxation. 3 Credits.

A study of federal income taxation, covering gross income, deductions and credits, sales and other disposition of property, capital gains and losses, and timing of income and deductions.

ACCY 6402. Federal Income Taxation of Partnerships. 3 Credits.

Financial and tax accounting for partnerships; formation and operation, distribution to partners, liquidation, and transfer of partnership interests. S corporations are also considered. Prerequisite: ACCY 6401.

ACCY 6403. Federal Income Taxation of Corporations. 3 Credits.

Federal income taxation of C corporations, covering formation, capital structure, nonliquidating distributions, complete liquidations, corporate accumulations, and the alternative minimum tax.

ACCY 6501. Accounting Information Systems and EDP. 3 Credits.

Development and application of accounting system theory, including analysis, design, control concepts, and implementation. Integration of electronic data processing, accounting systems, and management information systems. Prerequisite: ACCY 6101/MBAD 6211.

ACCY 6601. Business Law: Contracts, Torts, and Property. 3 Credits.

Essential legal principles of contracts, torts, and property, including trusts and estates, leases, professional liability, and the Uniform Commercial Code.

ACCY 6602. Business Law: Enterprise Organization. 3 Credits.

The legal aspects of organizing, financing, and operating an enterprise: agency, partnerships, corporations, securities regulation, insurance, suretyship, secured credit financing, and commercial paper.

ACCY 6701. Government and Nonprofit Accounting and Auditing. 3 Credits.

The budgeting, accounting, financial reporting, and auditing required of federal, state, and local governments, nonprofit organizations, and colleges and universities. The financial practices and requirements applicable to organizations receiving governmental financial assistance and those subject to governmental audits. Prerequisite: ACCY 6101/MBAD 6211.

ACCY 6801. Corporate Governance and Ethics. 3 Credits.

The theory, practice, and public policy environment of corporate governance. Purpose, functioning, and responsibilities of boards of directors. Power, control, and compensation of corporate management. Shareholders and stakeholders. Corporate governance in comparative national settings. Same as SMPP 6215.

ACCY 6900. Special Topics. 1-3 Credits.

Experimental offering; new course topics and teaching methods.

ACCY 6998. Directed Readings and Research. 1-3 Credits.

ACCY 8001. Doctoral Seminar. 1-12 Credits.

Reasoning and research in technical areas of accounting; theoretical issues and their application to practice; conceptual themes in professional literature; comparative accounting research analyses.

ACCY 8002. Doctoral Seminar. 0-3 Credits.

ACCY 8009. Dissertation Research. 1-12 Credits.

Limited to doctoral candidates. May be repeated for credit.

ACCY 8999. Advanced Reading and Research. 1-12 Credits.
Limited to doctoral candidates preparing for the general examination. May be repeated for credit.

BACHELOR OF BUSINESS ADMINISTRATION

The Bachelor of Business Administration (B.B.A.) degree offers general management preparation with an opportunity for specialization in a specific field of business. It represents a careful balance of structure and choice, with flexibility that allows students to tailor their programs to reflect the individual career goals they have selected. While each student takes the same basic business core classes, many of the general education courses and courses in the field of concentration are individually selected to suit each student.

Changes to degree requirements

The Bachelor of Business Administration curriculum was revised for all B.B.A. students entering the University in fall 2014 and beyond. Students who entered prior to fall 2014 will continue with the curriculum for the academic year in which they entered. This degree requires a minor outside of the School of Business. In addition, the B.B.A. curriculum includes general education and pre-business courses, business core courses, business concentration courses, and electives. The B.B.A. degree program integrates the University's emphasis on interdisciplinary study.

REQUIREMENTS

The Bachelor of Business Administration curriculum has been revised for all students entering the University in fall 2014 or after (see below). Students who entered prior to fall 2014 will continue with the curriculum for the academic year in which they entered.

General education and pre-business

UW 1020	University Writing
BADM 1004	The Age of Globalization
ECON 1011 & ECON 1012	Principles of Economics I and Principles of Economics II
STAT 1051	Introduction to Business and Economic Statistics
or STAT 1053	Introduction to Statistics in Social Science
or STAT 1111	Business and Economic Statistics I
or APSC 3115	Engineering Analysis III
STAT 2112	Business and Economic Statistics II
or STAT 2118	Regression Analysis

One humanities course*

Two science courses*	
A sequence of two math courses from the following:	
MATH 1051 & MATH 1252	Finite Mathematics for the Social and Management Sciences and Calculus for the Social and Management Sciences
Or	
MATH 1231 & MATH 1232	Single-Variable Calculus I and Single-Variable Calculus II

Business core

BADM 1001	First Year Development Course I
BADM 1002	First Year Development Course II
ACCY 2001	Intro Financial Accounting
ACCY 2002	Introductory Managerial Accounting
BADM 2001W	Markets and Politics
BADM 2301	Management Information Systems Technology
or BADM 2301W	Mgt Information Systems Tech
BADM 3001	Career Management Strategy
BADM 3103	Human Capital in Organizations
BADM 3401	Basic Marketing Management
or BADM 3401W	Basic Marketing Management
BADM 3501	Financial Management and Markets
BADM 3601	Operations Management
BADM 4101	Business Law and Ethics
BADM 4801	Strategy Formulation and Implementation

***A list of approved courses can be found on the General Education Requirement page (p. 29).**

Business concentration courses

A business concentration is required for all Bachelor of Business Administration students. Students select a field of concentration from among accountancy; business analytics; business economics and public policy; innovation and entrepreneurship; finance; information systems and technology management; international business; marketing; sport, event, and hospitality management; or, with faculty approval, may structure an individualized field of concentration reflecting a

specific interest in management. The concentration consists of five field courses plus an international focus field course designated by the department. The concentration must be selected no later than the second semester of the sophomore year; students should contact the advising center to declare a concentration. Students may declare two concentrations, but they should note that this may increase the number of credits required to complete the B.B.A. In all cases, students must consult the academic advisor for an appropriate international focus field course. Concentration requirements are available at the School of Business website (<http://business.gwu.edu/ugrad>) or at the Undergraduate Advising Center (<http://business.gwu.edu/ugrad/advising-center>).

A B.B.A. student with a minimum GPA of 3.2 and a specific interest in an area of management not reflected by the standard B.B.A. concentrations may design and seek approval for an individualized concentration drawing upon courses across the University. Such a concentration consists of five field courses and one international focus field course selected with the guidance of faculty with expertise in the area of interest. All individualized concentration proposals must be submitted by the end of the junior year and must be approved in advance by the individualized concentration faculty review committee. Interested students should discuss their idea with the GWSB advisor who oversees individualized fields in the GWSB Advising Center (<http://business.gwu.edu/ugrad/advising-center>).

Minor courses

A minor outside of the School of Business is required for this degree. Courses will vary according to minor and may require 15 to 18 credits. Students should reference the Bulletin and consult their academic advisor for assistance and additional information.

Elective courses

Elective courses may be numbered 1000-4999; at least six credits must be upper-level (numbered 2000-4999). Electives may not include LSPA (Lifestyle, Sport, and Physical Activity) courses and may include a maximum of one HLWL (Health and Wellness) course. In general, students will complete 18 credits of electives, or the minimum necessary to reach 120 credits for the degree.

Students may select their required concentration from the following:

- accountancy (p. 602)
- business analytics (p. 602)
- business economics and public policy (p. 603)
- innovation and entrepreneurship (p. 603)
- finance (p. 604)
- information systems (p. 605)
- international business (p. 606)
- marketing (p. 607)

- sport, event, and hospitality management (p. 608)
- individualized field of concentration

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

BADM 1001. First Year Development Course I. 1 Credit.

Required of all first-year students in School of Business. This course is designed to enhance students' education and begin preparation for business careers. The course meets periodically during the semester. Course fee. Restricted to students in the first year of enrollment in School of Business.

BADM 1002. First Year Development Course II. 1 Credit.

Continuation of BADM 1001. Required of all first-year students in School of Business. This course is designed to enhance students' education and begin preparation for business careers. The course meets periodically during the semester. Course fee. Restricted to students in the first year of enrollment in School of Business.

BADM 1003. Transfer Student Development. 1 Credit.

Required for all transfer students entering the School of Business. Provides information on University and School resources to assist with the student's transition. Helps students develop career-based knowledge; begin preparation for business careers; and learn the importance of civility and integrity in business discourse. Students perform service within the District of Columbia in order to apply business concepts and entrepreneurship skills. Restricted to GW School of Business students.

BADM 1004. The Age of Globalization. 3 Credits.

A multidisciplinary foundation in the globalization of people, markets, and firms. For all School of Business freshmen.

BADM 1900. Special Topics. 1-3 Credits.

BADM 2001. Markets and Politics. 3 Credits.

Economic and political resource allocation; social and political influences on business organizations; contemporary problems and issues.

BADM 2001W. Markets and Politics. 3 Credits.

Economic and political resource allocation; social and political influences on business organizations; contemporary problems and issues.

BADM 2301. Management Information Systems Technology. 3 Credits.

An introduction to data and information processing concepts and systems viewed from a contemporary management perspective. Emphasis on uses and applications as well as emerging managerial issues with the potential to reshape the form and function of information systems. Lab required. Prerequisite: basic knowledge of Microsoft Word, Excel, and PowerPoint.

BADM 2301W. Mgt Information Systems Tech. 3 Credits.

An introduction to data and information processing concepts and systems viewed from a contemporary management perspective. Emphasis on uses and applications as well as emerging managerial issues with the potential to reshape the form and function of information systems. Lab required. Prerequisite: basic knowledge of Microsoft Word, Excel, and PowerPoint.

BADM 3001. Career Management Strategy. 1 Credit.

Restricted to School of Business students in their junior year. The career development process, including job search strategies and formulation of a career management plan, with practice in producing a resume and interviewing for a position.

BADM 3101. Human Resource Management. 3 Credits.

Global and strategic implications of human capital policies and practices, including human resource planning, recruitment, selection, training, development, compensation, and collective bargaining. Prerequisite: BADM 1101 or PSYC 1001.

BADM 3102. Business and Government Relations. 3 Credits.

Economic and legal environment of business enterprise; social and political influences; contemporary problems and issues.

BADM 3102W. Business/Government Relations. 3 Credits.

BADM 3103. Human Capital in Organizations. 3 Credits.

An introduction and integration of concepts drawn from human resource management and organizational behavior. Application of these concepts to individual, group/team, and organizational scenarios through experiential exercises, cases, and projects. Development of skills in analyzing and evaluating human capital problems and determining appropriate solutions.

BADM 3401. Basic Marketing Management. 3 Credits.

Consumer and organizational buying behavior. Strategic marketing processes (market research, segmentation, targeting, positioning, and relationship-building). Product development and brand management, valuation and pricing, channel and logistics management, integrated marketing communications, e-commerce. Prerequisite: ECON 1012 or HONR 2044.

BADM 3401W. Basic Marketing Management. 3 Credits.

Consumer and organizational buying behavior. Strategic marketing processes (market research, segmentation, targeting, positioning, and relationship-building). Product development and brand management, valuation and pricing, channel and logistics management, integrated marketing communications, e-commerce. Prerequisites: ECON 1012 or HONR 2044.

BADM 3501. Financial Management and Markets. 3 Credits.

Introduction to financial markets, investment analysis, and financial management. Financial analysis, risk management, working capital management, capital budgeting, financial structure, cost of capital, and dividend policy. Prerequisites: ACCY 2001; ECON 1012 or HONR 2044; MATH 1221 or MATH 1231 or MATH 1252; and STAT 1051 or STAT 1053 or STAT 1111 or APSC 3115.

BADM 3601. Operations Management. 3 Credits.

Production planning concepts and analytical tools. Designing and managing production processes: facilities, equipment, process control systems. Design issues, demand forecasting, material planning, acquisition techniques. Managing the factory floor: scheduling, total quality management, continuous improvement concepts and methods. Prerequisite: STAT 1051, STAT 1053, STAT 1111 or APSC 3115.

BADM 3999. Bus. Admin. Trans. Cred-Upper. 1-36 Credits.

BADM 4101. Business Law and Ethics. 3 Credits.

An introduction to practical reasoning at the intersection of business and society. Emphasis on application of ethics frameworks and core principles of business law to problems of individual, organizational, and social responsibility in business.

BADM 4101W. Business Law and Ethics. 3 Credits.

An introduction to practical reasoning at the intersection of business and society. Emphasis on application of ethics frameworks and core principles of business law to problems of individual, organizational, and social responsibility in business. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

BADM 4801. Strategy Formulation and Implementation. 3 Credits.

An integrative capstone course to develop skills in diagnosing organizational problems, formulating and selecting strategic alternatives, and recognizing problems inherent in strategy implementation. Restricted to seniors in the B.B.A., B.Accy., and SEAS business concentration programs.

BADM 4900. Special Topics. 0-3 Credits.

Experimental offering; new course topics and teaching methods.

BADM 4900W. Special Topics. 0-3 Credits.

Experimental offering; new course topics and teaching methods.

BADM 4950. Internship. 0 Credits.

School of Business undergraduates may register for this course when they wish to have an internship recorded on the transcript. The supervisor must verify that the internship has been completed for a minimum of six hours per week. An administrative fee is charged. May be repeated each semester if desired.

BADM 4995. Independent Study. 1-6 Credits.

Assigned topics with interdisciplinary focus. Admission by prior permission of advisor. May be repeated once for credit but in a separate semester.

BACHELOR OF BUSINESS ADMINISTRATION WITH A CONCENTRATION IN ACCOUNTANCY

The Bachelor of Business Administration (B.B.A.) with a concentration in Accountancy provides undergraduate students with the analytical tools and conceptual framework needed to understand and record financial transactions.

GWSB offers two options for students to study accountancy: the Bachelor of Business Administration degree (B.B.A.) with a concentration in Accountancy and the Bachelor of Accountancy (B.Accy.) degree. For students who plan to work as an accountant, often with a CPA designation, the B.Accy. degree program is more appropriate because it offers substantially more preparation in accounting. The B.B.A. degree with an accountancy concentration is intended to be paired with a complementary field of concentration. In the B.Accy. degree program, students take ten upper-level accounting classes, compared to five courses for the B.B.A. concentration in accountancy. For B.B.A. students who plan to pursue careers in finance, accountancy is an ideal second concentration with finance because it provides a strong background in the accounting information that underlies many financial decisions. B.B.A. students with a concentration in information systems often pursue jobs related to accounting information systems, which would make accountancy an excellent choice for a second concentration.

REQUIREMENTS

In addition to the requirements for the Bachelor of Business Administration (p. 599) the concentration in Accountancy requires five field courses and one international field course:

Field	
ACCY 3101	Intermediate Accounting I
ACCY 3102	Intermediate Accounting 2
ACCY 3106	Financial Statement Analysis *

or ACCY 4501	Accounting Systems
Two of the following:	
ACCY 3106	Financial Statement Analysis *
ACCY 3401	Federal Income Tax:Individuals
ACCY 3403	Advanced Tax
ACCY 4107	Advanced Accounting
ACCY 4301	Auditing
ACCY 4501	Accounting Systems *

International field	
One of the following:	
ECON 2180	Survey of International Economics
ECON 2181	International Trade Theory and Policy
IBUS 3001	Introduction to International Business
IBUS 3101	Global Financial Environment

*ACCY 3106 Financial Statement Analysis and ACCY 4501 Accounting Systems are options for both the required and additional field course categories. If only one is taken, it will apply to the required field course category; if both are taken, one will apply to the required field courses, and one will apply to the additional field course category.

Students should consult with the advisor for specific Bachelor of Business Administration general education courses (p. 599) that apply to this concentration

BACHELOR OF BUSINESS ADMINISTRATION WITH A CONCENTRATION IN BUSINESS ANALYTICS

A concentration in Business Analytics provides undergraduate students with analytical tools and conceptual framework needed to understand and apply data and decision modeling regardless of the size of the data and complication of the decision problem in real life settings. Analytics is defined as the extensive use of data, statistical and quantitative models, and fact based management to drive decisions and actions. It is more than just modeling and data manipulation; it is a process of transforming data into actions through analysis and insights in the context of organizational decision making and problem solving.

REQUIREMENTS

In addition to the requirements for the Bachelor of Business Administration (p. 599) the concentration in business analytics requires five field courses and one international field course:

Field	
DNSC 3401	Introduction to Business Analytics
DNSC 3402	Data Mining
ISTM 4121	Database Design and Applications
Two of the following:	
DNSC 4404	Essentials of Project Management
DNSC 4900	Special Topics (Decision Modeling; Forecasting; Marketing Analytics; or Supply Chain Analytics)
ISTM 3119	Introduction to Programming
International field	
One of the following:	
IBUS 3001	Introduction to International Business
IBUS 3101	Global Financial Environment
IBUS 4401	Managing the Multinational Enterprise
IBUS 4203	Foreign Market Analysis
IBUS 4402	Managing in Developing Countries
ORSC 2046	Global Organizations
PSC 2992	Special Topics in American Politics and Government (Politics of the Internet)

Students should consult with the advisor for specific Bachelor of Business Administration general education courses (p. 599) that apply to this concentration.

BACHELOR OF BUSINESS ADMINISTRATION WITH A MAJOR IN INNOVATION AND ENTREPRENEURSHIP

The Bachelor of Business Administration (B.B.A.) with a major in innovation and entrepreneurship (INEN) provides undergraduate students with a broad spectrum of skills that enable them to start, manage, and grow a new and/or existing business. With that as background, graduates are equipped to work in major organizations that develop new products, procedures, and services. The program provides students

with opportunities to explore new organizational types, both for- and not for-profit, and to develop the skills needed to become effective consultants. The INEN concentration emphasizes practical learning and encourages students to excel in the classroom while participating in field-related activities. Exposure to scenarios designed to sharpen their ability to use fast-paced decision making, INEN students are challenged to operate with success in turbulent environments.

REQUIREMENTS

In addition to the requirements for the Bachelor of Business Administration (p. 599) the concentration in Innovation and Entrepreneurship requires five field courses and one international field course:

Field	
MGT 3300W	Entrepreneurship
MGT 4003	Management of the Growing Entrepreneurial Venture
Three of the following:	
MGT 3301	Small Business Management
MGT 3302	e-Entrepreneurship
MGT 3303	Women's Entrepreneurial Leadership
MGT 4900	Special Topics (Human Capital and Sustainability)
International field	
One of the following:	
IBUS 3001	Introduction to International Business
IBUS 3101	Global Financial Environment
IBUS 3201	International Marketing Management
IBUS 3301	International Business Finance
PSC 1003	Introduction to International Politics

Students should consult with the advisor for specific Bachelor of Business Administration general education courses (p. 599) that apply to this concentration.

BACHELOR OF BUSINESS ADMINISTRATION WITH A CONCENTRATION IN BUSINESS ECONOMICS AND PUBLIC POLICY

The Bachelor of Business Administration degree (BBA) with a concentration in Business Economics and Public Policy (BEPP) is

concerned with the continuing business-government dialogue that leads to effective decision making and equitable relations between the public and private sectors of society. Study of the economic and social foundations of government programs and regulatory activity is used to establish a basis for developing and evaluating effective business responses.

The field is designed to develop understanding and skills useful for a wide variety of positions in public, private, for-profit, and not-for-profit organizations. Students deepen their understanding of the social and legal environments that influence business and its relationships with government at all levels. Students also receive strong in-depth training in micro- and macroeconomic analysis. This key element of the field prepares students to perform rigorous and sophisticated analyses of the economic impacts of policy decisions on various types of institutions and organizations.

The field is also designed to ensure that students understand the workings of political systems and institutions, particularly the U.S. federal government. This understanding includes recognizing not only what government can do and achieve, but also the limits of its power and the role of private interests in driving political decision-making in Congress and in the agencies.

REQUIREMENTS

In addition to the requirements for the Bachelor of Business Administration (p. 599) (p. 599)the concentration in Business Economics and Public Policy requires five field courses and one international field course:

Field	
ECON 2101	Intermediate Microeconomic Theory
One of the following:	
ECON 2102	Intermediate Macroeconomic Theory
ECON 2158	Industrial Organization
One of the following:	
PSC 2217	Executive Branch Politics
PPPA 2117	Executive Branch Politics
PSC 2101	Scope and Methods of Political Science
One of the following:	
PSC 2216	The American Presidency
PSC 2218	Legislative Politics
One of the following:	
ANTH 3513	Anthropology of Human Rights

ECON 2136	Environmental and Natural Resource Economics
ECON 2148	Survey of Health Economics
ECON 3190	Law and Economics
GEOG 3120	World Regional Geography
MGT 4900	Special Topics (Human Capital and Sustainability)
PSC 2222	Science, Technology, and Politics

International field

One of the following:	
ECON 2181	International Trade Theory and Policy
IBUS 3001	Introduction to International Business
IBUS 3101	Global Financial Environment
IBUS 3301	International Business Finance

Students should consult with the advisor for specific Bachelor of Business Administration general education courses (p. 599) that apply to this concentration

BACHELOR OF BUSINESS ADMINISTRATION WITH A CONCENTRATION IN FINANCE

The Bachelor of Business Administration (B.B.A.) with a concentration in finance provides undergraduate students with the analytical tools and conceptual framework needed to evaluate financial transactions and make financial decisions within firms. The academic program allows students to understand finance from three interrelated perspectives:

- Financial management related to capital budgeting, financial structure, financial analysis, working capital management, and dividend policy;
- Investment and portfolio management related to the valuation of stocks, bonds, and derivative contracts and the construction of efficient portfolios; and
- The money and capital market related to the issuance and investment in financial instruments by banking organizations with emphasis on the consequence of interest rates and interest rate structure on valuation and risk.

Upon successful completion of the B.B.A. with a concentration in finance, students can apply for professional positions such as a credit analyst, equity analyst, or financial analyst with governmental agencies, for-profit corporations, and investment banks. Finance also provides an excellent foundation for graduate study in business, economics, public policy, and law.

REQUIREMENTS

In addition to the requirements for the Bachelor of Business Administration (p. 599) the concentration in finance requires five field courses and one international field course:

Field	
FINA 3001	Intermediate Finance
FINA 3101	Investment and Portfolio Management
FINA 4001	Advanced Financial Management
or FINA 4001W	Advanced Financial Management
Two of the following:	
FINA 3201W	Exploring Finance w/Simulation
FINA 3301	Money and Capital Markets
FINA 4101	Applied Financial Securities Analysis
FINA 4201	Real Estate Investment
FINA 4900	Special Topics (Derivatives)
International field	
One of the following:	
ECON 2180	Survey of International Economics
ECON 2181	International Trade Theory and Policy
ECON 2182	International Macroeconomic Theory and Policy
FINA 4900	Special Topics (History of Finance)
IBUS 3001	Introduction to International Business
IBUS 3101	Global Financial Environment
IBUS 3301	International Business Finance
IBUS 4302	International Banking
IBUS 4303	International Monetary and Financial Issues

Students should consult with the advisor for specific Bachelor of Business Administration general education courses (p. 599) that apply to this concentration

BACHELOR OF BUSINESS ADMINISTRATION WITH A CONCENTRATION IN INFORMATION SYSTEMS

The Bachelor of Business Administration (B.B.A.) with a concentration in Information Systems and Technology Management (ISTM) enables undergraduate students to acquire an in-depth understanding of information technology (IT) and the skills and analytical methods needed to design and develop the information systems (IS) that businesses find indispensable. The IT overview covers areas ranging from data communications, including the Internet and the World Wide Web, to data management. Students also learn about and have opportunities for practical experience in the structured development of information systems, programming, database design, and other techniques needed for successful IS design and develop. These IS/IT-specific skills and knowledge, coupled with an understanding of the other aspects of business acquired in the program, give students a competitive start in their chosen careers.

REQUIREMENTS

In addition to the requirements for the Bachelor of Business Administration (p. 599) the concentration in Information Systems and Technology Management requires five courses in the field and one course in the international field:

Field	
ISTM 3119	Introduction to Programming
ISTM 4120	Business Systems Development
ISTM 4121	Database Design and Applications
Two of the following:	
ISTM 4123	Business Data Communications
ISTM 4130	Writing on the Ethics of Technology
or ISTM 4130W	WritingOnTheEthicsofTechnology
ISTM 4900	Special Topics *
International field	
One of the following:	
IAFF 6141	International Science and Technology Policy Cornerstone
IAFF 6158	Special Topics in International Science and Technology Policy
IBUS 3101	Global Financial Environment

IBUS 4401	Managing the Multinational Enterprise
IBUS 4402	Managing in Developing Countries
ISTM 4900	Special Topics (Management of Technology and Innovation/Innovation Ventures**)
ORSC 2046	Global Organizations
PSC 2992	Special Topics in American Politics and Government (Politics of the Internet)

*Enrollment in ISTM 4900 on topics announced in the Schedule of Classes requires ISTM program director approval.

**ISTM 4900 offered as *Management of Technology and Innovation/Innovation Ventures* may be used toward either the Field course requirement or the International Field course requirement, but not both.

Students should consult with the program director for specific Bachelor of Business Administration general education courses (p. 599) that apply to this concentration

BACHELOR OF BUSINESS ADMINISTRATION WITH A CONCENTRATION IN INTERNATIONAL BUSINESS

The Bachelor of Business Administration (B.B.A.) with a concentration in International Business provides undergraduates with the analytical tools and conceptual framework needed to understand the international financial, political, and economic environment; how that environment influences a firm's strategy and performance; how culture plays a role in guiding a firm's strategic activities; and how a firm can leverage home and host country resources to overcome challenges inherent in managing a multinational enterprise. The academic program allows students to understand international business from three interrelated perspectives: international economics and finance, international marketing, and international corporate strategy.

This field provides the basic academic foundations for entry-level positions in international business, particularly in multinational corporations, international banks, and governmental agencies. Such organizations include the Export-Import Bank, Overseas Private Investment Corporation, and the Departments of Commerce, State, and Treasury, in addition to international institutions such as the World Bank and the International Finance Corporation.

REQUIREMENTS

In addition to the requirements for the Bachelor of Business Administration (p. 599) the concentration in International Business requires five field courses, one international field

course, one foreign language course, and one upper-level course.

Field

IBUS 3001	Introduction to International Business
IBUS 3101	Global Financial Environment
Three of the following:	
IBUS 3201	International Marketing Management
IBUS 3301	International Business Finance
IBUS 4202	Regional Strategy for Multinationals
IBUS 4203	Foreign Market Analysis
IBUS 4302	International Banking
IBUS 4303	International Monetary and Financial Issues
IBUS 4401	Managing the Multinational Enterprise
IBUS 4402	Managing in Developing Countries
IBUS 4900	Special Topics
IBUS 4995	Independent Study

International field

One of the following:	
ECON 2169	Introduction to the Economy of China
ECON 2181	International Trade Theory and Policy
ECON 2182	International Macroeconomic Theory and Policy
ECON 2185	Economic History and Problems of Latin America
GEOG 2145	Cultural Geography
or GEOG 2145W	Cultural Geography
GEOG 2146	Political Geography
GEOG 3154	Geography of the Middle East and North Africa
PSC 2330	Comparative Politics of Western Europe
PSC 2442	International Organizations
PSYC 3125	Cross-Cultural Psychology
SOC 2168	Economic Sociology

Other requirements

One foreign language course at the intermediate I or higher level

One upper-level course numbered 2000-4999 from any department with the exception of AH, FA, EXSC, IBUS, MUS, or TRDA

Students should consult with the advisor for specific Bachelor of Business Administration general education courses (p. 599) that apply to this concentration.

BACHELOR OF BUSINESS ADMINISTRATION WITH A CONCENTRATION IN MARKETING

The Bachelor of Business Administration (B.B.A.) with a concentration in Marketing provides undergraduate students with the analytical and conceptual foundations for strategic marketing processes. These processes include market research, segmentation, targeting, positioning, integrated marketing communications, and relationship building. Students develop competencies and skills in identifying customer needs and wants; making decisions about which markets organizations should serve; designing product, service, and program offerings for these markets; planning and implementing strategies to communicate with and sell to these markets; and creating value through profitable relationships with customers as well as channel partners, suppliers, and other stakeholders.

REQUIREMENTS

In addition to the requirements for the Bachelor of Business Administration (p. 599) the concentration in Marketing requires five field courses and one international field course:

Field

MKTG 3142 Consumer Behavior

MKTG 3143 Marketing Research

Three of the following:

MKTG 4148 Advertising

MKTG 4149 Advanced Advertising Campaigns *

MKTG 4159 Marketing Strategy

MKTG 4150 Salesmanship and Sales Management

MKTG 4152 Retailing Management

MKTG 4900 Special Topics **

International field

One of the following:

IBUS 3001 Introduction to International Business

IBUS 3101 Global Financial Environment

IBUS 3201 International Marketing Management

* Students with a specific interest in advertising may apply to take MKTG 4149. If accepted, they must also register for MKTG 4151W - Marketing Communications Planning. MKTG 4151W cannot be used to fulfill a field course, but can be used to fulfill an elective requirement, if needed. Students who wish to take MKTG 4149 must complete MKTG 4148 as one of their field courses before spring of their senior year.

**MKTG 4900 may be taken multiple times as a field course providing the topics differ.

Students should consult with the advisor for specific Bachelor of Business Administration general education courses (p. 599) that apply to this concentration

Required Field Courses:

MKTG 3142 Consumer Behavior

MKTG 3143 Marketing Research

Additional Field Courses

Choose three from the following:

MKTG 4148 Advertising and Marketing Communications

MKTG 4149 Advanced Advertising Campaigns (*)

MKTG 4159 Marketing Strategy

MKTG 4150 Salesmanship and Sales Management

MKTG 4152 Retailing Management

MKTG 4900 Special Topics (Multiple MKTG 4900 courses may be taken as field courses as long as they are different topics; options vary by semester. Examples include: Digital Marketing or Integrated Marketing Communication)

International Field Course

Choose one from the following:

IBUS 3001 Introduction to International Business

IBUS 3101 Global Financial Environment

IBUS 3201 International Marketing Management

Special Notes for the Marketing Concentration:

- *** MKTG 4149:** Students with a specific interest in advertising may apply to take MKTG 4149. If accepted, students must also register for MKTG 4151W – *Marketing Communications Planning*. MKTG 4151W cannot be used to fulfill a Field Course, but can be used to fulfill an elective requirement, if needed. Students who wish to take MKTG 4149 must complete MKTG 4148 as one of their Field Course Choices before Spring of their Senior Year.
- **BADM 3001** *Career Management Strategy* should ideally be completed by the end of sophomore year and marketing-specific sections are available; please register for a section that aligns with your career goals.

BACHELOR OF BUSINESS ADMINISTRATION WITH A CONCENTRATION IN SPORT, EVENT, AND HOSPITALITY MANAGEMENT

The Bachelor of Business Administration (B.B.A.) with a concentration in Sport, Event, and Hospitality Management provides students with a theoretical and practical understanding of the sport, event, and hospitality industries through three different tracks:

- Sport management track focuses on the management and marketing of sport events, organizations, products, and athletes, as well as in special events, conferences, meetings, expositions, festivals, and other entertainment properties including sport and event facilities.
- Event management track focuses on the marketing and management of businesses related to conventions, meetings, special events, conferences, expositions, and festivals.
- Hospitality management track focuses on the marketing, management, and financing of both hotels and those businesses related to tourism, including cities, attractions, restaurants, and airlines.

Typical entry-level positions include those in collegiate and professional sport organizations, sport marketing agencies, sport manufacturers, sport and event facilities, hotels and resorts, restaurants and food service operations, visitor and convention bureaus, theme parks and recreation centers, museums, tour operators, travel management firms, destination management companies, event producers, associations, corporate sponsors, and consulting firms.

REQUIREMENTS

In addition to the requirements for the Bachelor of Business Administration (p. 599), the concentration in Sport, Event, and Hospitality Management requires completion of five

courses in the field, all courses in one track, and one course in the international field.

Field

TSTD 3001	Intro-Tourism/Hospitality Mgt
-----------	-------------------------------

TSTD 4102	Practicum
-----------	-----------

Or MGT 4900 Human Capital & Sustainability
--

All courses from one of the following tracks:

Track A - Sport Management

TSTD 3101	Sport & Event Business Mgt
-----------	----------------------------

TSTD 3102W	Sport and Event Marketing
------------	---------------------------

TSTD 4101	Issues in Sport & Event Mgmt
-----------	------------------------------

Track B - Event Management

TSTD 3301	Hospitality Industry Management
-----------	---------------------------------

or TSTD 3101	Sport & Event Business Mgt
--------------	----------------------------

TSTD 4301	Travel Marketing Communication
-----------	--------------------------------

or TSTD 3102W	Sport and Event Marketing
---------------	---------------------------

TSTD 4900	Special Topics (Convention and Meeting Management)
-----------	--

Track C - Hospitality Management

TSTD 3301	Hospitality Industry Management
-----------	---------------------------------

TSTD 3302	Financial Mgt-Tourism/Hospitality
-----------	-----------------------------------

TSTD 4301	Travel Marketing Communication
-----------	--------------------------------

International field

One of the following:

GEOG 2145	Cultural Geography
-----------	--------------------

or GEOG 2145W	Cultural Geography
---------------	--------------------

IBUS 3001	Introduction to International Business
-----------	--

IBUS 3101	Global Financial Environment
-----------	------------------------------

IBUS 3201	International Marketing Management
-----------	------------------------------------

Students should consult with the advisor for specific Bachelor of Business Administration general education courses (p. 599) that apply to this concentration

BACHELOR OF BUSINESS ADMINISTRATION, INDIVIDUALIZED CONCENTRATION

The purpose of the individualized concentration is to assist Bachelor of Business Administration students who have a clear career objective that falls outside of the nine standard B.B.A. concentrations (<http://gwsbwebsite.com/undergraduate/bba>). The career objectives of most B.B.A. students can easily be met by one of the standard concentrations, in which case pursuing an individualized program of study is not recommended.

REQUIREMENTS

Program of study

The program of study for the B.B.A. individualized concentration varies greatly depending on the individual student's objectives. Past individualized concentrations pursued include entrepreneurship and/or small business management, health administration, human resource management, performing arts management, real estate development, strategic management, and supply chain management.

Proposal and application process

As part of the application process, students must create a proposal that includes the following core requirements:

- five field courses
- one international field course

Students develop their full proposal based on extensive research and with the assistance of faculty members who focus in related fields. Complete criteria and application directions can be found in the Individualized Field Application Packet (http://business.gwu.edu/wp-content/uploads/2014/02/Individualized_Field_Information_and_Application_packet_FA14.pdf).

Two key factors to be aware of:

- GWSB students must have a 3.2 or higher cumulative GPA in order to submit an Individualized concentration proposal.
- Proposals must be submitted before the start of senior year.

Important Note

The Individualized concentration application process typically takes 10 to 12 weeks from initial research to receiving the faculty committee's final decision; therefore, it is recommended that students start this process no later than spring of their junior year. Students are advised not to take proposed courses prior to approval of the individualized field.

BACHELOR OF SCIENCE WITH A MAJOR IN FINANCE

Emphasizing a finance-focused education, the Bachelor of Science with a Major in Finance degree program directly targets the financial industry including commercial banks, investment banks, investment companies, and insurance companies.

The degree is offered by the School of Business both to its own students and to those enrolled in other GW schools. School of Business students enrolled in the program are required to take a second major in another GW school, while those from other GW schools take the program as a second major. Having two majors that span the School of Business and another school ensures the breadth and depth of a student's program while integrating the University's emphasis on interdisciplinary study. The degree is offered with a major in finance requiring a minimum of 120 credits and completion of all required courses. Students must apply and be admitted to this competitive program.

Visit the (<http://business.gwu.edu/undergraduate/bs-finance>) program website (<http://business.gwu.edu/ugrad>) for additional information.

REQUIREMENTS

General education

UW 1020	University Writing
One humanities course from approved list **	
Two science courses from approved list **	

Prerequisite

MATH 1231 & MATH 1232	Single-Variable Calculus I and Single-Variable Calculus II
ECON 1011 & ECON 1012	Principles of Economics I and Principles of Economics II
STAT 1051	Introduction to Business and Economic Statistics
or STAT 1053	Introduction to Statistics in Social Science
or STAT 1111	Business and Economic Statistics I
or APSC 3115	Engineering Analysis III
STAT 2118	Regression Analysis

Signature

BADM 1001 & BADM 1002	First Year Development Course I and First Year Development Course II *
or BADM 1003	Transfer Student Development
BADM 1004	The Age of Globalization

IBUS 4302	International Banking
IBUS 4303	International Monetary and Financial Issues

*Freshmen are required to take BADM 1001 and BADM 1002; transfer students are required to take BADM 1003.

**A list of approved courses can be found on the General Education Requirement page (p. 29).

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

FINA 3001. Intermediate Finance. 3 Credits.

Theory and practice of acquiring and using funds. Simulations of business decisions by cases and/or models to assess the risk/return interaction of investment, financing, and dividend decisions. Prerequisite: BADM 3501.

FINA 3101. Investment and Portfolio Management. 3 Credits.

Theory and principles of security analysis and portfolio management, including analysis of the national economy, industry, company, and security markets. Risk-reward and computer-aided analysis. Prerequisite: BADM 3501.

FINA 3201W. Exploring Finance w/Simulation. 3 Credits.

Corporate financial analysis as explored through the FINGAME financial simulation software. Focus on intertemporal decision making for capital budgeting and financing of a simulated firm. Prerequisite: BADM 3501.

FINA 3301. Money and Capital Markets. 3 Credits.

The process of capital formation in a free enterprise economy, with special emphasis on factors affecting the level and structure of interest rates. Money market, capital market, and derivative contracts (futures and swaps) are evaluated from both investment and financing perspectives. Prerequisite: BADM 3501.

FINA 4001. Advanced Financial Management. 3 Credits.

Analysis and readings covering applications of theory to financial management. Case studies for decision making involving working capital, capital budgeting, financing, dividend policy, and valuation. Prerequisite or concurrent registration: BADM 3501 and FINA 3301 or FINA 3001.

FINA 4001W. Advanced Financial Management. 3 Credits.

Analysis and readings covering applications of theory to financial management. Case studies for decision making involving working capital, capital budgeting, financing, dividend policy, and valuation. Prerequisite or concurrent registration: BADM 3501 and FINA 3301 or FINA 3001.

FINA 4101. Applied Financial Securities Analysis. 3 Credits.

Practical security analysis techniques and investing approaches employed by professional investment managers. Prerequisite: BADM 3501.

FINA 4121W. Exploring Finance w/Simulation. 3 Credits.**FINA 4201. Real Estate Investment. 3 Credits.**

Principles of real estate investment, including valuation, appraisal, financing, and development, in addition to a discussion of the mortgage market and its institutions. Prerequisite: BADM 3501.

FINA 4301. Financial Derivatives. 3 Credits.

The defining properties of and uses for financial derivatives. Institutional features; forward and futures contracts, option contracts, and swap agreements; and valuation methodologies. The proper use of financial derivatives and the potential for unintended consequences. Prerequisites: BADM 3501. Recommended background: undergraduate students in finance with exposure to another discipline such as mathematics, physics, computer science, economics, or statistics.

FINA 4900. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods. Prerequisite: BADM 3501.

FINA 4900W. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods.

FINA 4995. Independent Study. 1-15 Credits.

Assigned topics. Admission by prior permission of advisor. May be repeated once for credit. Prerequisite: BADM 3501.

FINA 6220. Business Financial Management. 3 Credits.**FINA 6221. Financial Decision Making. 3 Credits.**

Theory and practice of business finance, emphasizing the impacts of long- and short-term uses and sources of funds on the firm's market value. Prerequisite: MBAD 6234 or MBAD 6235.

FINA 6222. Capital Formation. 3 Credits.

Determinants of saving and investment and resultant funds flow are evaluated. Special emphasis on the level and risk structure and term structure of interest rates. The role and management of financial institutions is stressed. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6223. Investment Analysis and Portfolio Management. 3 Credits.

Risk-reward analysis of security investments, including analysis of national economy, industry, company, and market; introduction to portfolio management; emphasis on theory and computer methods. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6224. Financial Management. 3 Credits.

Advanced case studies in domestic and international financial management; working capital policy, capital budgeting, financing with debt and equity, dividend policy, valuation, project finance, venture capital, and mergers and acquisitions. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6230. Urban Development Economics. 3 Credits.**FINA 6231. Sem:Investment & Portfolio Mgt. 3 Credits.****FINA 6234. New Venture Financing: Due Diligence and Valuation Issues. 3 Credits.**

Fundamentals and practice of due diligence and screening of early-stage investment opportunities. Prerequisites: MBAD 6234 or MBAD 6235. (Same as MGT 6293).

FINA 6235. Futures Markets: Trading and Hedging. 3 Credits.

Organization and regulation of futures markets. Alternative strategies for trading of futures contracts for possible hedging uses. High risk-high return investment alternatives. The use of futures markets to manage risks. Recommended: FINA 6221. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6236. Options. 3 Credits.

Pricing of options on financial instruments. Role of options in risk management, trading strategies, hedging implications for national and international investors, financial engineering, and structure and regulation of option markets. Recommended: FINA 6221. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6237. Private Wealth Management and Personal Financial Advising. 3 Credits.

Income and estate taxation, retirement plans and pensions, life and disability insurance, investment portfolio management, and personal finances. Prerequisites: MBAD 6234 or MBAD 6235. Recommended background: ACCY 6401 and knowledge of Excel.

FINA 6238. Financial Engineering. 3 Credits.

Valuation and risk management theory for bonds, forward contracts, swaps, options, exotic options, and interest rate options. Development of financial software, including Monte Carlo simulation modeling. Case studies of innovative solutions to investment, corporate finance, and financial institution management problems. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6239. Applied Portfolio Management. 3 Credits.

Synthesis of the theoretical concepts of securities analysis and portfolio management with the application of analyzing securities and building an actual portfolio. Prerequisites: (MBAD 6234 or MBAD 6235) and permission of instructor.

FINA 6240. Real Estate Development. 3 Credits.

Examination of the forces that shape real estate development; market analysis methods and techniques to evaluate project feasibility; the institutional and legal framework within which real estate development occurs and that influences controls, land value, and development potential. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6241. Financing Real Estate. 3 Credits.

Principles of real estate finance; evaluating different methods of financing real estate; sources of real estate funding with emphasis on securitization. Incentives provided by governments. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6242. Real Estate Valuation and Investment. 3 Credits.

Understanding the valuation of different types of real estate from different viewpoints. Analysis of the risks and opportunities of investing. Solid theoretical framework is augmented with practical examples and applications. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6245. Land Development Law. 3 Credits.

FINA 6247. Urban Development Economics. 3 Credits.

FINA 6248. Real Estate Development Cases. 3 Credits.

Case study analysis of large-scale commercial real estate developments to gain comprehension of financial, political, legal, and technical complexities and constraints inherent in the real estate development process. Prerequisite: FINA 6221 or permission of instructor.

FINA 6250. Securities Regulation and Financial Scandals. 3 Credits.

Philosophy and framework of laws governing the sale of securities, including stocks, bonds, and investment contracts; financial scandals and the role that changes in securities law and housing policy has played in such events.

FINA 6271. Financial Modeling and Econometrics. 4 Credits.

Applied statistical and econometric analysis and modeling in finance. Methodologies include descriptive and inferential statistics, multivariate regression, and time series analysis. Empirical studies are reviewed, and a series of research projects are undertaken. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6272. Global Financial Markets. 4 Credits.

Theories explaining domestic and international interest rate and exchange rate structures. Roles of financial institutions and markets are investigated and forecasting methodologies are applied. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6273. Cases in Financial Management and Investment Banking. 4 Credits.

Computer modeling for analysis and forecasting of a firm's financial statements to reflect possible future performance. Application and integration of financial accounting and financial analysis, using a different case study each week. Financial issues faced by companies and their commercial and investment bankers as tactical and strategic decisions are made about organic growth, growth through merger and acquisition, and corporate reorganization. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6274. Corporate Financial Management and Modeling. 4 Credits.

Causal connections between decisions made by business firms, their expected performance, and the resulting current valuation of the firm's common stock. Factors affecting the level and structure of interest rates, which are incorporated by many financial models, theories, and decisions. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6275. Investment Analysis and Global Portfolio Management. 4 Credits.

Financial markets and instruments viewed from the investor's perspective. Analysis of the value of equity and fixed-income securities and the construction of efficient portfolios in a global financial market. Issues of market efficiency, tax structures, and investment funds; computer-based models. Prerequisite: Master of Science in Finance degree candidacy.

FINA 6276. Financial Engineering and Derivative Securities. 4 Credits.

Mathematical and theoretical foundations to value-derivative securities, including options, futures, and swaps; hedging and trading applications of these contracts. Arbitrage trading across cash and derivative markets and its role in maintaining equilibrium prices. Prerequisite: Master of Science in Finance degree candidacy.

FINA 6277. Comparative Financial Market Regulation and Development. 4 Credits.

Theory and current status of comparative regulation of domestic and international financial institutions and markets. Effects on country economic development and international trade. Prerequisite: Master of Science in Finance degree candidacy.

FINA 6278. Financial Theory and Research. 4 Credits.

Theoretical constructs of business investment and financing decisions and of financial asset pricing structures in domestic and international environments. Analytical and numerical models are developed, and empirical studies are evaluated. Prerequisite: Master of Science in Finance degree candidacy.

FINA 6279. Real Estate Finance and Fixed-Income Security Valuation. 4 Credits.

Application of financial theory to real estate investment: the housing market, mortgage valuation and securitization, commercial properties, CMBS, and REITs. Fixed-income security valuation with focus on theory and data applications on interest rate movements, fixed-income security and derivative pricing, and credit risk. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6280. Financial Institution Management and Modeling. 4 Credits.

Analysis of the financial performance and condition of a bank, toward understanding of the financial environment in which banks operate and regulation of the banking system. Application of asset/liability management principles and statistical and mathematical models employed in bank risk management. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6281. Cases in Financial Modeling and Engineering. 4 Credits.

Through the use of real-world examples from various aspects of finance, students are exposed to the modeling of complex financial instruments and techniques used in market and credit risk management. Underlying mathematics and theoretical constructs are explored and solidified through modeling exercises that make use of analytical solutions and numerical methods. As a practical course, students are asked to implement models. Examples may be motivated by corporate finance, corporate and investment banking, asset management, or other activities. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6282. Advanced Financial Econometrics and Modeling. 0-4 Credits.

Testing of several types of applied financial econometric models typically used in practice. Advanced quantitative techniques applied to aspects of financial markets, the behavior of agents, and market and credit risk management. Various software packages used to implement and program models. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6290. Special Topics. 0-3 Credits.

Experimental offering; new course topics and teaching methods. May be repeated once for credit.

FINA 6297. International Management Experience. 3 Credits.

Same as IBUS 6297/ MGT 6297/ MKTG 6297/ SMPP 6297. May be repeated for credit.

FINA 6298. Directed Readings and Research. 2-4 Credits.

FINA 6299. Thesis Seminar. 3 Credits.

FINA 6999. Thesis Research. 3 Credits.

FINA 8311. Seminar: Public/Private Sector Institutions and Relationships. 3 Credits.

An analysis and critique of alternative theoretical frameworks for describing, understanding, and predicting the nature, values, and actions of American public and private institutions. Problems, potentials, and alternatives for structuring public and private institutional arrangements to meet the needs of society. Same as SMPP 8311.

FINA 8321. Seminar: Financial Markets Research. 3 Credits.

Market efficiency, utility testing, the capital asset pricing model, the arbitrage pricing theory, the option pricing model, and aggregate market volatility.

FINA 8322. Seminar: Corporate Finance Research. 3 Credits.

Capital budgeting, capital structure issues, dividend policy, microeconomic foundations, mergers, and agency theory.

FINA 8323. Seminar: Continuous-Time Finance. 3 Credits.

Review of the stochastic calculus methods needed for continuous-time pricing models. The most important continuous-time models, including pricing of derivative securities, consumption-portfolio selection models, continuous-time capital asset pricing models, consumption-based capital asset pricing models, continuous-time arbitrage pricing theory, and different yield curve models.

FINA 8324. Seminar: Financial Markets and Institutions. 3 Credits.

Multi-period asset pricing, term structure of interest rates, market imperfections and institutional factors, auctions, manipulation, derivative markets, market microstructure, and financial institutions.

FINA 8397. Doctoral Seminar. 1-3 Credits.

FINA 8998. Advanced Reading and Research. 1-12 Credits.

Limited to doctoral candidates preparing for the general examination. May be repeated for credit.

FINA 8999. Dissertation Research. 1-12 Credits.

Limited to doctoral candidates. May be repeated for credit.

DUAL DEGREE PROGRAMS

- Five-Year Dual Bachelor of Accountancy and Master of Accountancy
- Five-Year Dual Bachelor of Business Administration and Master of Accountancy
- Five-Year Dual Bachelor of Business Administration and Master of Science in Information Systems Technology
- Five-Year Dual Bachelor of Business Administration and Master of Tourism Administration

Five-Year Dual B.Accy./M.Accy. and B.B.A./M.Accy.

Students in the five-year dual degree program leading to the Master of Accountancy (p. 615) first pursue either the Bachelor of Accountancy or Bachelor of Business Administration. They may apply for admission to the M.Accy. after completion of 75 credits toward the undergraduate degree and successful completion of the Graduate Management Admission Test (GMAT). Students typically earn the B.Accy. or B.B.A. after four years and the M.Accy. at the end of the fifth year. The dual degree program requires 150 credits including 30 credits of graduate work.

Five-Year Dual B.B.A./M.S.I.S.T.

Students in the five-year dual degree program leading to the Master of Science in Information Systems Technology first pursue the Bachelor of Business Administration with a concentration in Information Systems. Students pursue the regular B.B.A. curriculum in their first three years of study and are enrolled in courses at both the undergraduate and graduate levels during the final two years. Students can apply for admission to the program when they apply for admission to the University (they must meet specified GPA and other

requirements to remain in the program), or they may apply after earning 75 credits. Students typically earn the B.B.A. after four years and the M.S.I.S.T. at the end of the fifth year. Students who choose to discontinue the program at the end of four years may be required to take additional courses to complete requirements for the B.B.A.

Five-Year Dual B.B.A./M.T.A.

Students in the five-year dual degree program leading to the Master of Tourism Administration first pursue the Bachelor of Business Administration with a concentration in Sport, Event, and Hospitality Management. Students pursue the regular B.B.A. curriculum in their first three years of study and are enrolled in courses at both the undergraduate and graduate levels during the final two years. Students can apply for admission to the program when they apply for admission to the University (they must meet specified GPA and other requirements to remain in the program), or they may apply after earning 75 credits. Students typically earn the B.B.A. after four years and the M.T.A. at the end of the fifth year. Students who choose to discontinue the program at the end of four years may be required to take additional courses to complete requirements for the B.B.A.

MINOR IN BUSINESS ADMINISTRATION

REQUIREMENTS

The School of Business offers a minor in business administration for students from other schools of the University.

The following requirements must be fulfilled: 27 credits, including 15 credits in required courses and 12 credits in pre-approved courses.

Required

ECON 1011	Principles of Economics I
ECON 1012	Principles of Economics II
STAT 1051	Introduction to Business and Economic Statistics
or STAT 1053	Introduction to Statistics in Social Science
or STAT 1111	Business and Economic Statistics I
or APSC 3115	Engineering Analysis III
MATH 1221	Calculus with Precalculus II
or MATH 1231	Single-Variable Calculus I
or MATH 1252	Calculus for the Social and Management Sciences
ACCY 2001	Intro Financial Accounting

At least four of the following:

BADM 2301	Management Information Systems Technology
BADM 3103	Human Capital in Organizations
BADM 3401	Basic Marketing Management
or BADM 3401W	Basic Marketing Management
BADM 3501	Financial Management and Markets
BADM 3601	Operations Management
IBUS 3001	Introduction to International Business

School of Business students may pursue a minor in other GW schools after receiving approval from the appropriate faculty member in the minor department or program.

GRADUATE PROGRAMS

Master's programs

- Master of Accountancy (p. 615)
- Master of Science in Business Analytics (p. 616)
- Master of Science in Finance (p. 616)
- Master of Science in Information Systems Technology (p. 617)
- Master of Science in Government Contracts (p. 617)
- Master of Science in Project Management (p. 618)
- Master of Tourism Administration (p. 618)

Masters of Business Administration programs

- Global Master of Business Administration (p. 619)
- Healthcare Master of Business Administration (p. 625)
- Professional Master of Business Administration (p. 626)
- World Executive Master of Business Administration (p. 632)

Joint Degree Programs

- Joint Master of Business Administration/Juris Doctor with the Law School (p. 633)
- Joint Master of Business Administration/Master of Arts with a focus on international business with the Elliott School of International Affairs (p. 633)
- Joint Master of Business Administration/Master of Science in Finance (p. 633)
- Joint Master of Business Administration/Master of Science in Project Management (p. 633)

Doctoral program

- Doctor of Philosophy in the field of business administration (p. 633)

MASTER OF ACCOUNTANCY

The Master of Accountancy (M.Accy.) program consists of 36 credits, with a shorter track of 30 credits available to qualified students who possess a bachelor's degree in accounting or business from a U.S.-accredited university. GW's program, which may be pursued on a full-time or part-time basis, is tailored to individual interests and career objectives in accounting, financial management, and tax practice. No business background is necessary prior to joining the program.

In addition to required courses in accounting, finance, and economics, students can choose from a wide range of specialized accounting subjects and other topics within the School of Business that help them prepare for their professional certification.

Day and evening classes are available to accommodate working professionals, although prior work experience is not required.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://business.gwu.edu/programs/specialized-masters/master-of-accountancy>) for additional program information.

REQUIREMENTS

The program requires 30 to 36 credits, depending upon whether the student holds a Bachelor of Accountancy or has similar academic preparation.

Students holding a Bachelor of Accountancy degree from a U.S. institution or a CPA certification

The 30-credit program for students who hold a Bachelor of Accountancy requires 13.5 credits that may be waived on the basis of approved prior preparation with substitution of other coursework. One finance course is required unless students have completed two undergraduate finance courses with a *B* or better in the last five years.

The required but waivable courses are:

ACCY 6104	Intermediate Accounting I
ACCY 6105	Intermediate Accounting II
ACCY 6301	Contemporary Auditing Theory
MBAD 6235	Finance
MBAD 6242	Microeconomics for the World Economy
A statistics workshop	

Elective requirements are 16.5 graduate courses in the School of Business which must include 6 credits in accountancy.

Students holding a Bachelor or Master of Business Administration degree from a U.S. institution

The 30-credit program for students who hold a B.B.A. or M.B.A. degree requires 12 credits that may be waived on the basis of approved prior preparation with substitution of other coursework in the same field of study. One advanced graduate finance course is required unless students have completed two undergraduate finance courses with a *B* or better in the last five years.

Prerequisites are: Financial Accounting, Managerial Accounting, Financial Management, Microeconomics, and Statistics courses taken within five years with a *B* or better.

The required but waivable courses are:

ACCY 6104	Intermediate Accounting I
ACCY 6105	Intermediate Accounting II
ACCY 6301	Contemporary Auditing Theory

Elective requirements are 18 graduate courses in the School of Business which must include 12 credits in accountancy.

Students holding other undergraduate degrees

The 36-credit program requires 18 credits that may be waived with substitution of approved graduate coursework in the same field of study and 1.5 credits that may be waived without substitution (thereby bringing the minimum credit requirement to 34.5). One finance course is required unless students have completed two undergraduate finance courses with a *B* or better in the last five years.

ACCY 6101	Financial Accounting
ACCY 6201	Managerial Accounting I
ACCY 6202	Managerial Accounting II
ACCY 6104	Intermediate Accounting I
ACCY 6105	Intermediate Accounting II
ACCY 6301	Contemporary Auditing Theory
MBAD 6235	Finance
MBAD 6242	Microeconomics for the World Economy (Waivable with substitution)

A statistics workshop

Elective requirements are 16.5 credits of graduate courses in the School of Business, which must include 6 credits in accountancy.

Students who intend to take the C.P.A. examination should be aware that the coursework required for admission to the examination varies from state to state. Students are advised to consult the Board of Accountancy for the state in which they plan to take the examination and choose electives that meet that state's requirements.

MASTER OF SCIENCE IN BUSINESS ANALYTICS

The Master of Science in Business Analytics (M.S.B.A.) is designed to prepare students for careers that help organizations make better decisions through analytics. The program is designed for those with quantitative backgrounds looking to gain a competitive edge before entering the job market, and for those working in analytics and looking to further develop their skills. The program has a rigorous and balanced curriculum that addresses the growing need for analytics professionals in organizations.

The curriculum is a blend of foundational courses in descriptive, predictive, and prescriptive analytics; elective courses in analytics applied to a specific functional area or industry; workshops in communication, team, and project management; and hands-on exposure to industry-standard analytics tools/software. The program culminates in an industry-related project that students complete by working in teams on a real problem and presenting their findings to the client firm at the end of the project.

The 33-credit program is offered in an intensive 10-month format designed for the full-time student and in a part-time, two-year format designed for the working professional.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled: 33 credits, including 25.5 credits in required courses and 7.5 credits in elective courses.

Required	
DNSC 6201	Intro to Business Analytics
DNSC 6203	Statistics for Analytics
DNSC 6206	Stochastic Fndn: Prob Models
DNSC 6208	Computational Optimization
DNSC 6209	Forecasting for Analytics

DNSC 6210	Decision and Risk Analytics
DNSC 6211	Programming for Analytics
DNSC 6212	Optimization Methods and Applications
DNSC 6216	Business Analytics Skills Workshops
DNSC 6217	Business Analytics Practicum
DNSC 6279	Data Mining
ISTM 6211	Data Warehousing and Online Analytical Processing

Electives

7.5 credits selected in consultation with advisor

MASTER OF SCIENCE IN FINANCE

The Master of Science in Finance degree is designed to prepare students with specific career interests in the areas of financial management and research. The program of study emphasizes the theoretical foundations of finance and quantitative methods in financial management. Students engage in applied research and modeling using a variety of data sets and computer software packages. The curriculum provides in-depth study of the international and federal government regulatory dimensions of finance.

The degree program is designed to be completed in either 12 months of intensive study including a summer session or in 24 months of regular study including two summer sessions.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled: 48 credits in required courses

Required:	
FINA 6271	Financial Modeling and Econometrics
FINA 6272	Global Financial Markets
FINA 6273	Cases in Financial Management and Investment Banking
FINA 6274	Corporate Financial Management and Modeling
FINA 6275	Investment Analysis and Global Portfolio Management
FINA 6276	Financial Engineering and Derivative Securities

FINA 6277	Comparative Financial Market Regulation and Development
FINA 6278	Financial Theory and Research
FINA 6279	Real Estate Finance and Fixed-Income Security Valuation
FINA 6280	Financial Institution Management and Modeling
FINA 6281	Cases in Financial Modeling and Engineering
FINA 6282	Advanced Financial Econometrics and Modeling

MASTER OF SCIENCE IN INFORMATION SYSTEMS TECHNOLOGY

The Master of Science in Information Systems Technology is designed to provide an in-depth understanding of management information systems and information technology. The Executive Master's in Information Systems Technology is offered on the Virginia Science and Technology Campus.

Applicants with deficiencies in preparation may be required to take prescribed foundation courses before beginning course work in the program. Although test scores are not required, applicants who have not previously demonstrated strong academic performance in a related field should submit GRE or GMAT examination scores as additional evidence of their capability to perform competitively at the graduate level.

The program consists of 33 credits of graduate course work. If foundation courses are prescribed, as many as 9 additional credits will be required. Students must take eight core courses and three electives in their chosen area of specialization.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits, including 21 credits in core courses and 12 credits in elective courses.

Core

ISTM 6201	Information Systems Development and Applications
ISTM 6202	Relational Databases
ISTM 6203	Telecommunications and Enterprise Networks
ISTM 6204	Information Technology Project Management

ISTM 6205	Internet Computing
ISTM 6206	Information Systems Security
ISTM 6207	Information Resources Management
ISTM 6210	Integrated Information Systems Capstone

Electives

Three courses from one of the following concentrations.

Management:

ISTM 6221 Management Perspectives in Electronic Commerce

ISTM 6222 IS/IT Strategy and Implementation

ISTM 6223 Technology Entrepreneurship

ISTM 6224 Management of Technology and Innovation

ISTM 6225 Enterprise Architecture

Technical:

ISTM 6211 Data Warehousing and Online Analytical Processing

ISTM 6213 Enterprise Web and Database Applications

ISTM 6214 Advanced Programming and Business Applications

ISTM 6215 Human-Computer Interaction

General or customized:

ISTM 6211 through ISTM 6225

Students should consult with the advisor regarding their program of study.

MASTER OF SCIENCE IN GOVERNMENT CONTRACTS

The Master of Science in Government Contracts (M.S.G.C.) degree program is designed to give working professionals the knowledge and skills necessary to excel in the world of federal acquisition and is intended for professionals from a variety of acquisition-related jobs in both government and private industry. The 36-credit program blends the study of government procurement law and policy, taught by the Law School, with a core business curriculum taught by the School of Business. The innovative curriculum balances practice and theory, developing the skills that acquisition professionals need to become effective professionals, managers, and leaders. The

M.S.G.C. program can be completed in 24 months in evening or online classes.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Required

DNSC 6202	Mathematics and Statistics for Management
DNSC 6261	Introduction to Project and Program Management
GCON 6502	Formation of Government Contracts
GCON 6503	Performance of Government Contracts
GCON 6505	Marketing for the Government Marketplace
GCON 6506	Pricing Issues in Government Contracts
MBAD 6211	Financial Accounting
Capstone courses	
GCON 6501	Capstone Research and Writing Project (Must be taken in final semester)
GCON 6504	MSGC Capstone Scholarly Writing (Must be taken prior to or concurrent with GCON 6501)

Electives

11 credits in law or business selected in consultation with advisor

MASTER OF SCIENCE IN PROJECT MANAGEMENT

The Master of Science in Project Management (M.S.P.M.) is a 36-credit degree program designed for professionals who wish to enhance their ability to motivate people, integrate complex projects, and achieve cost-effective results. The curriculum focuses on traditional and modern project management techniques in an industry-independent manner. The curriculum goes beyond the project management body of knowledge and exposes students to international methodologies, decision sciences, advanced project management applications, and management. The M.S.P.M. program is offered both on campus and through distance learning.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://business.gwu.edu/programs/specialized-masters/mspm>) for additional information.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled: 36 credits, including 30 credits in required courses and 6 credits in elective courses.

Required

DNSC 6202	Mathematics and Statistics for Management
DNSC 6247	Organization, Management, and Leadership
DNSC 6250	Project Management Finance
DNSC 6251	Optimization Models for Decision Making
DNSC 6252	Risk Analysis for Decision Making
DNSC 6254	Risk Management
DNSC 6257	Cost Estimation and Control
DNSC 6258	Executive Decision Making
DNSC 6259	Project Portfolio Management
DNSC 6261	Introduction to Project and Program Management
DNSC 6262	Directed Computational Project Management
DNSC 6267	Planning and Scheduling
DNSC 6269	Project Management Application

Elective

6 credits in elective courses approved by the advisor.

MASTER OF TOURISM ADMINISTRATION

The Master of Tourism Administration program is designed to prepare students for competitive professional management positions in public, commercial, or nonprofit organizations providing visitor services at the local, national, or international level. In addition to course work, students have opportunities to learn from culturally diverse colleagues and from a wide range of visitor-service organizations. Students may choose one of the four formal concentration areas: sustainable tourism, event and meeting management, sport management, or hospitality

management. They also may develop an individualized studies program.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://business.gwu.edu/programs/specialized-masters/master-of-tourism-administration>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits, including 15 credits in required courses, 12 credits in courses in one field of concentration, and 9 credits in elective courses.

Required		Systems
TSTD 6249	Sustainable Destination Development	Individualized studies
TSTD 6251	Quantitative Applications in Tourism/ Hospitality Management	The student designs a plan of study and provides a brief justification specifying the courses to be taken, and submits it by petition through the faculty advisor.
TSTD 6270	Tourism and Hospitality Management Research	Electives
One of the following capstone course series:		6 credits selected in consultation with the advisor.
TSTD 6283 & TSTD 6297	Practicum and Advanced Topical Studies	
TSTD 6998 & TSTD 6999	Thesis Research and Thesis Research	
Fields of concentration		
Sustainable tourism management		
TSTD 6250	Destination Management	
TSTD 6260	Destination Economics	
TSTD 6261	Tourism Planning	
TSTD 6262	Tourism Policy Analysis	
TSTD 6263	Destination Marketing	
Event and meeting management		
TSTD 6276	Risk Management for Events and Meetings	
TSTD 6277	Event Management	
TSTD 6278	Conference and Exposition Management	
TSTD 6279	Event Entertainment Management	
Sport management		
TSTD 6264	Sport Marketing	

<h2>GLOBAL MASTER OF BUSINESS ADMINISTRATION</h2> <p>The Global Master of Business Administration (Global M.B.A.) is a 55.5-credit program that emphasizes the quantitative and qualitative aspects of business practice with a curriculum that incorporates the application of concepts and analytical tools to current management problems. GLOBAL MASTER OF BUSINESS ADMINISTRATION

The Global Master of Business Administration (Global M.B.A.) is a 55.5-credit program that emphasizes the quantitative and qualitative aspects of business practice with a curriculum that incorporates the application of concepts and analytical tools to current management problems. Teamwork and communication skills are taught through team projects with an emphasis on private and public sector issues.

The first semester of the Global M.B.A. program concentrates on core business skills in strategy, organizations and human capital, accounting, finance, and marketing. The second semester incorporates the core values of the School of Business: ethics and globalization. Course work in global perspectives, business ethics, and public policy allows students to examine specific problems in overseas markets and develop case studies detailing how they would resolve the identified issues. The program culminates in an international consulting abroad project (CAP) where students work with a company on a real-world, overseas project.

Students may choose from 11 concentration options and four graduate-level certificates. In addition, they have the option to customize their studies to their specific career goals through elective courses. Global M.B.A. students wishing to participate in a short-term study abroad program may do so as part of their elective course work; ten such programs usually are available in a one- to two-week format each calendar year.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://business.gwu.edu/programs/masters-of-business-administration/global-mba>) for additional information.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled: 55 credits, including 28.5 credits in required courses, 3 credits in the consulting abroad project, and 24 credits in elective courses.

Required

MBAD 6211	Financial Accounting
MBAD 6213	Managerial Accounting
MBAD 6224	Decision Making and Data Analysis
MBAD 6223	Operations Management
MBAD 6233	Financial Markets
MBAD 6234	Financial Management
MBAD 6242	Microeconomics for the World Economy
MBAD 6245	Global Perspectives
MBAD 6263	Organizations and Human Capital
MBAD 6289	Business Ethics & Public Policy
MBAD 6274	Marketing
MBAD 6287	Strategy Fundamentals
MBAD 6286	Strategy Formulation and Implementation

Consulting abroad project

MBAD 6294	Consulting Abroad Project
-----------	---------------------------

Students must complete both the on-campus and study abroad components of the Consulting Abroad Project.

Electives

Electives may be taken in courses numbered 6000 and above in any GWSB department. Up to 12 credits may be taken in courses outside of GWSB.

MBAD 6298 may not be applied towards the MBA degree requirements.

Concentration Options

Students may choose to complete a 12-credit concentration.

Each concentration comprises 3 to 6 credits in required courses and 6 to 9 credits selected from a list of suggesting courses. For more information on concentration options (<http://business.gwu.edu/current-students-2/mba-programs-and-concentrations/concentrations>), transfer credit, and Consortium registration, please visit the MBA Current Student (<http://business.gwu.edu/current-students-2>) website. (Students must complete 12 unique credits to complete the concentration.)

The concentration options include:

- Accounting and Advisory Services (p. 620)
- Consulting* (p. 621)
- Entrepreneurship (p. 622)
- Finance* (p. 622)
- Global Management* (p. 623)
- Government Contracts (p. 623)
- Information Systems and Technology Management* (p. 624)
- Marketing Communications and Digital Marketing (p. 624)
- Project Management* (p. 624)
- Sports Management (p. 624)
- Tourism (p. 625)

*Concentration can be completed either on-campus or online.

Accounting and Advisory Services

Required

ACCY 6106	Financial Statement Analysis
-----------	------------------------------

Electives

9 credits from the following:

ACCY 6104	Intermediate Accounting I
ACCY 6105	Intermediate Accounting II
ACCY 6110	International Reporting and Control
ACCY 6111	International Accounting
ACCY 6112	International Financial Reporting Standards

HEALTHCARE MASTER OF BUSINESS ADMINISTRATION

Offered in a distance learning format, the Healthcare Master of Business Administration (Healthcare M.B.A.) is designed for working healthcare professionals who wish to develop the practical business skills and leadership expertise needed to take an active role in transforming the future of the healthcare industry. The 52.5-credit program can be completed in as little as two years and as many as the maximum allowed--five years.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (http://healthcaremba.gwu.edu/gw-mbahc-video-lp3/?Access_Code=GW-MBAHC-GOOGLE&kwd=%2Bhealthcare%20%2Bmba&gclid=COiNz4zGyMICFSxk7AodOm8ACw) for additional information.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled: 52.5 credits, including 43.5 credits in required core and advanced core courses and 9 credits in elective courses.

Required core

MBAD 6211 Financial Accounting

MBAD 6213 Managerial Accounting

MBAD 6221 Judgment, Uncertainty, and Decisions

MBAD 6222	Data Analysis and Decisions
MBAD 6223	Operations Management
MBAD 6233	Financial Markets
MBAD 6234	Financial Management
MBAD 6241	Global Perspectives
MBAD 6242	Microeconomics for the World Economy
MBAD 6243	Macroeconomics for the World Economy
MBAD 6244	International Management
MBAD 6261	Organizations and Leadership
MBAD 6262	Managing Human Capital
MBAD 6265	Entrepreneurship
MBAD 6272	Nature of Markets
MBAD 6273	Marketing Decisions
MBAD 6281	Business Ethics
MBAD 6284	Business and Public Policy
MBAD 6285	Business Law
MBAD 6286	Strategy Formulation and Implementation
Advanced core	
MBAD 6252	Mgmt of Information Systems
ISTM 6251	Info Systems Applications
MGT 6290	Special Topics (Entrepreneurship Planning)
MGT 6290	Special Topics (Electronic Medical Records)
SMPP 6290	Special Topics (Ethics in Health Services Management)
SMPP 6290	Special Topics (Healthcare Policy and Analysis I)
SMPP 6290	Special Topics (Healthcare Policy and Analysis II)

Electives

Electives may be taken in courses numbered 6000 and above in any GWSB department.

Elective courses must be taken for a letter grade with the exception of courses taken at the Law School where courses are letter graded and then converted to a CR on the graduate transcript.

Specially designated healthcare-related electives for the Healthcare MBA program will be offered each semester.

Up to 12 credits may be taken outside of GWSB and up to 6 of those credits may be fulfilled outside of the University. This 12-credit maximum includes approved transfer credit, Consortium coursework, and graduate-level courses completed at GW outside of GWSB.

MBAD 6298 may not be applied towards the MBA degree requirements.

*Up to 6 credits of required core courses may be waived based on previous academic coursework. See the Core Course Waiver Policy (<http://business.gwu.edu/current-students-2/academic-policies/core-course-waivers>) for details.

PROFESSIONAL MASTER OF BUSINESS ADMINISTRATION

The GW Professional Master of Business Administration (PMBA) helps students achieve proficiency in the fundamentals of business and to see the growing value in ethical leadership, globalization, sustainability, and social responsibility.

This part-time program is flexible, being offered in two options: self-paced or cohort. The self-paced option allows students to design their own course schedule to meet their professional and personal needs; students are allowed up to 5 years for completion. The cohort option is structured to be completed in 2 years; students complete all core requirements together during their first three semesters. The 27 credits of electives built into the curriculum allow students to craft a program of study to meet their own objectives.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

The following requirements must be fulfilled: 55.5 credits, including 28.5 credits in required courses and 27 credits in elective courses.

Required

MBAD 6211	Financial Accounting
MBAD 6213	Managerial Accounting
MBAD 6224	Decision Making and Data Analysis
MBAD 6223	Operations Management

MBAD 6235	Finance
MBAD 6242	Microeconomics for the World Economy
MBAD 6245	Global Perspectives
MBAD 6263	Organizations and Human Capital
MBAD 6289	Business Ethics & Public Policy
MBAD 6274	Marketing
MBAD 6288	Strategic Management

Electives

Electives may be in courses numbered 6000 and above in any GWSB department. Up to 12 credits in elective courses may be from outside GWSB.

MBAD 6298 may not be applied toward PMBA degree requirements.

Concentration Options

Students may complete an elective concentration by completing coursework as outlined by the academic department. All concentrations require the successful completion of 12 unique credits. Each concentration includes both required coursework (3-6 credits) that must be completed and a list of optional courses to fulfill the remaining credits (6-9 credits). For more information on concentration options (<http://business.gwu.edu/current-students-2/mba-programs-and-concentrations/concentrations>), please visit the MBA Current Student (<http://business.gwu.edu/current-students-2>) website.

The concentration options include:

- Accounting and Advisory Services (p. 627)
- Consulting* (p. 627)
- Entrepreneurship (p. 629)
- Finance* (p. 629)
- Global Management* (p. 629)
- Government Contracts (p. 630)
- Information Systems and Technology Management* (p. 630)
- Marketing Communications and Digital Marketing (p. 631)
- Project Management* (p. 631)
- Sports Management (p. 631)
- Tourism (p. 632)

*Concentration can be completed either on-campus or online.

JOINT DEGREE PROGRAMS

Master of Business Administration/Juris Doctor with the Law School

Students may work concurrently toward both the Juris Doctor degree and the Master of Business Administration. In consultation with their faculty advisors, students in these programs may transfer up to 14 credits of Law School course work to their M.B.A. program and 12 credits of School of Business course work to fulfill requirements for the J.D. Students must be admitted separately both to the Law School and to the School of Business and must meet all requirements in each degree program prior to receiving either diploma. It is possible for a student to complete work for both degree programs within four years.

Master of Business Administration/Master of Arts with a focus on international business with the Elliott School of International Affairs

A joint degree program is offered with the Elliott School of International Affairs. The joint Master of Business Administration and Master of Arts is available to students who plan a focus on international business. As part of this program, each School accepts up to 12 credits of course work from the other school in fulfillment of its degree requirements. Students must be admitted separately both to the School of Business and to the Elliott School of International Affairs and must meet all requirements for each program prior to receiving either diploma.

Master of Business Administration/Master of Science in Finance

Master of Business Administration/Master of Science in Project Management

Within the School of Business, students may elect a joint Master of Business Administration and Master of Science in Finance,

or Master of Science in Project Management; students must be admitted simultaneously to both degree programs to be eligible for the joint degree. Students interested in the joint M.B.A. and Master of Science in Information Systems Technology may be either simultaneously or consecutively admitted to both degree programs. All joint degree programs are completed simultaneously.

DOCTOR OF PHILOSOPHY IN BUSINESS ADMINISTRATION

The Doctor of Philosophy in business administration is a highly specialized research degree designed to prepare students who wish to pursue academic and research careers in a particular field of business.

The minimum admission requirement is a bachelor's degree from a regionally accredited college or university, although most applicants have completed a master's degree in an appropriate field. Applicants whose degrees are in fields other than their proposed area of focus are expected to obtain the necessary background either before or soon after admission to the program. Scores on the Graduate Record Examination or the Graduate Management Admission Test are required; scores may not be more than five years old. Students from countries where English is not the official language and non-native English speakers are required to take either the Test of English as a Foreign Language (TOEFL) or the academic International English Language Testing System (IELTS). Exceptions may be made for applicants who hold a degree from a university located in a country in which English is the official language and also the language of instruction at the university. Minimum acceptable scores for TOEFL are 600 or above (paper exam) or 100 or above (Internet exam); for IELTS, an overall band score of 7.0 with no individual band score below 6.0. The Doctoral Committee does not use specific cutoff points for grade averages and test scores. In making admission decisions it carefully reviews each applicant's entire record and makes its selection on a competitive basis in keeping with enrollment limitations.

The doctoral program consists of two major parts: the pre-dissertation stage and the dissertation stage. The pre-dissertation stage normally involves two years of studies described in an individual study plan developed by the student under the guidance of a committee of at least three faculty advisors. The objective of the dissertation stage is to have the student apply the obtained theoretical and practical knowledge and analytical methods to the resolution of a research problem. The research should be original and result in a contribution, either applied or theoretical, to the existing body of knowledge.

All course work, other educational activities, and required comprehensive evaluations must be completed within five years of matriculation. The total program must be finished in seven years.

The doctoral program is administered and supervised by the Associate Dean and the Committee on Doctoral Studies. For more detailed information on the program, see the Handbook on the Doctoral Program, available in the Doctoral Program Office.

ACCOUNTANCY

GW Business School's Bachelor of Accountancy and Master of Accountancy degree programs prepare students to make significant contributions to both private and public organizations in the global economy. In addition to a rigorous program of study, students gain practical experience through internships and the opportunity to study the stock market in a classroom outfitted like a Wall Street trading venue. The faculty coordinates access to executives in high-profile firms and agencies and government officials so that students further their exposure to, and training in, the discipline.

Visit the program website (<http://business.gwu.edu/programs/specialized-masters/master-of-accountancy>) for more information.

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ACCY 2001. Intro Financial Accounting. 3 Credits.

The fundamental concepts underlying financial statements and the informed use of accounting information. Analysis and recording of business transactions; preparation and understanding of financial statements. Measurement of the profitability and financial position of a business. Restricted to sophomore standing.

ACCY 2002. Introductory Managerial Accounting. 3 Credits.

The use of accounting information to plan and control the activities of a business. Several widely used methods of determining the cost of business activities for use in making business decisions. Prerequisite: ACCY 2001.

ACCY 3101. Intermediate Accounting I. 3 Credits.

Financial accounting concepts underlying the preparation and interpretation of financial statements. Topics include revenue and expense recognition; accounting for receivables, inventories, fixed assets, intangible assets, and liabilities. Prerequisite: ACCY 2001.

ACCY 3102. Intermediate Accounting 2. 3 Credits.

Financial accounting concepts underlying the preparation and interpretation of financial statements. Topics include accounting for stockholders' equity, earnings per share, debt and equity investments, incomes taxes, pensions and other postretirement benefits, accounting changes, statements of cash flows, financial statement analysis, and disclosure. Prerequisite: ACCY 2001.

ACCY 3106. Financial Statement Analysis. 3 Credits.

Introduction to the analysis and interpretation of corporate financial statements within the context of a company's industry and economic environment. Cash flow analysis, profitability and risk analysis, accounting policy analysis, forecasting and performance analysis, elements of equity valuation, and decision perspectives of creditors. Students cannot earn credit for both this course and ACCY 4801. Prerequisite: ACCY 2002.

ACCY 3401. Federal Income Tax: Individuals. 3 Credits.

A study of federal income tax concepts, including what shall be taxed, and when, and at what rate. Taxable entities, income measurement, the use of different tax rates for different types of income, and the use of the tax laws to motivate taxpayer behavior to achieve economic goals.

ACCY 3403. Advanced Tax. 3 Credits.

Taxation of partnerships, corporations, and their owners. Formation, operation, and liquidation of each type of entity. Financial and tax accounting for each type of transaction, with the goal of gaining a better understanding of each system by comparing and contrasting it with the other one. Prerequisites: ACCY 2001 & ACCY 3401.

ACCY 3601. Business Law: Contracts, Torts, and Property. 3 Credits.

Essential legal principles of contracts, torts, and property, including trusts and estates, leases, professional liability, and the Uniform Commercial Code.

ACCY 4107. Advanced Accounting. 3 Credits.

Accounting for corporate combinations, foreign currency financial statements, and derivative financial instruments. Governmental and not-for-profit accounting. Prerequisites: ACCY 3101 and ACCY 3102.

ACCY 4301. Auditing. 3 Credits.

A study of generally accepted auditing standards and accepted professional auditing practices and procedures, including reviewing and evaluating financial controls, auditing financial statements, and testing financial data of manual and automated accounting systems. Prerequisite: ACCY 3102.

ACCY 4501. Accounting Systems. 3 Credits.

Introduction to the design and operation of accounting systems and data management controls. Principles and applications of internal control applicable to manual and automated accounting systems. Prerequisite: ACCY 3102.

ACCY 4601. Business Law: Enterprise Organization. 3 Credits.

The legal aspects of organizing, financing, and operating an enterprise: agency, partnerships, corporations, securities regulation, insurance, secured credit financing, and commercial paper. Prerequisite: ACCY 2001.

ACCY 4801. Financial Accounting Capstone. 3 Credits.

Synthesis and application of knowledge of financial accounting to specific contexts, using the perspectives of the preparer and user of financial statements. Students cannot earn credit for both this course and ACCY 3106. Restricted to seniors only.

ACCY 4900. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods. Restricted to department approval.

ACCY 4995. Independent Study. 3 Credits.

Assigned topics. Admission by permission of the department chair.

ACCY 6101. Financial Accounting. 3 Credits.

The basic concepts and methods used in financial reports for understanding their content and context. The income statement, balance sheet, and statement of cash flows. Detailed accounting procedures and choices. How the most important accounting procedures are calculated and how different choices impact financial statements. Same as MBAD 6211.

ACCY 6104. Intermediate Accounting I. 3 Credits.

Accounting principles and concepts for financial accounting and reporting; emphasis on the preparation of general-purpose financial statements. Prerequisite: ACCY 6101 and MBAD 6211.

ACCY 6105. Intermediate Accounting II. 3 Credits.

Revenue recognition, employee compensation and pension plans, income tax expense, and earnings per share. Prerequisites: ACCY 6104.

ACCY 6106. Financial Statement Analysis. 3 Credits.

Analysis and interpretation of financial statements for managers, stockholders, creditors, and financial analysts; ratio-driven financial analysis; earnings-based and cash-flow-based equity valuation; sales and EPS forecasting; preparation of projected financial statements. Prerequisites: ACCY 6101/MBAD 6211.

ACCY 6107. Corp Reorganizatn &Affiliation. 3 Credits.

Financial and tax accounting for intercorporate investments and corporate acquisitions and for consolidated groups of corporations. Consolidation procedures, accounting for goodwill, intercompany sales, foreign subsidiaries, and taxation of the corporations and their shareholders. Prerequisite: ACCY 6102, ACCY 6401.

ACCY 6110. International Reporting and Control. 1.5 Credit.

International comparisons of forces that shape financial management, such as corporate governance mechanisms, tax policies, economic development, and privatization. Same as IBUS 6308.

ACCY 6111. International Accounting. 1.5 Credit.

Financial management in multinational enterprises: management techniques that improve international financial reporting and control, such as hedging foreign currency fluctuations, and controlling foreign subsidiaries. Prerequisite: ACCY 6101. Same as IBUS 6309.

ACCY 6112. International Financial Reporting Standards. 1.5 Credit.

Financial reporting standards that are used throughout most of the world other than the United States. Comparisons of these standards with those of the United States. Prerequisite: ACCY 6101/MBAD 6211. Same as IBUS 6310.

ACCY 6201. Managerial Accounting I. 1.5 Credit.

Effective use of accounting information in decision making and control of organizations. Same as MBAD 6213. Prerequisite: ACCY 6101/MBAD 6211.

ACCY 6202. Managerial Accounting II. 1.5 Credit.

Further topics in applying concepts of control and decision analysis to optimize the financial management of organizations. Prerequisite: ACCY 6201/MBAD 6213.

ACCY 6203. Controls, Alignment & the Org.. 1.5 Credit.**ACCY 6301. Contemporary Auditing Theory. 3 Credits.**

A comprehensive survey of contemporary auditing as practiced by external auditors (primarily certified public accountants) and internal auditors (those employed within government and corporate entities). Generally accepted auditing standards; government auditing standards. Planning, directing, and reporting on various audits. Prerequisite: ACCY 6101/MBAD 6211; corequisite: ACCY 6104.

ACCY 6302. Fraud Examination and Forensic Accounting. 3 Credits.

Financial statement fraud, misappropriation of assets, and methods of deterrence, prevention, detection, and investigation. Prerequisite: ACCY 6101/MBAD 6211; a course in auditing preferred but not required.

ACCY 6401. Federal Income Taxation. 3 Credits.

A study of federal income taxation, covering gross income, deductions and credits, sales and other disposition of property, capital gains and losses, and timing of income and deductions.

ACCY 6402. Federal Income Taxation of Partnerships. 3 Credits.

Financial and tax accounting for partnerships; formation and operation, distribution to partners, liquidation, and transfer of partnership interests. S corporations are also considered. Prerequisite: ACCY 6401.

ACCY 6403. Federal Income Taxation of Corporations. 3 Credits.

Federal income taxation of C corporations, covering formation, capital structure, nonliquidating distributions, complete liquidations, corporate accumulations, and the alternative minimum tax.

ACCY 6501. Accounting Information Systems and EDP. 3 Credits.

Development and application of accounting system theory, including analysis, design, control concepts, and implementation. Integration of electronic data processing, accounting systems, and management information systems. Prerequisite: ACCY 6101/MBAD 6211.

ACCY 6601. Business Law: Contracts, Torts, and Property. 3 Credits.

Essential legal principles of contracts, torts, and property, including trusts and estates, leases, professional liability, and the Uniform Commercial Code.

ACCY 6602. Business Law: Enterprise Organization. 3 Credits.

The legal aspects of organizing, financing, and operating an enterprise: agency, partnerships, corporations, securities regulation, insurance, suretyship, secured credit financing, and commercial paper.

ACCY 6701. Government and Nonprofit Accounting and Auditing. 3 Credits.

The budgeting, accounting, financial reporting, and auditing required of federal, state, and local governments, nonprofit organizations, and colleges and universities. The financial practices and requirements applicable to organizations receiving governmental financial assistance and those subject to governmental audits. Prerequisite: ACCY 6101/MBAD 6211.

ACCY 6801. Corporate Governance and Ethics. 3 Credits.

The theory, practice, and public policy environment of corporate governance. Purpose, functioning, and responsibilities of boards of directors. Power, control, and compensation of corporate management. Shareholders and stakeholders. Corporate governance in comparative national settings. Same as SMPP 6215.

ACCY 6900. Special Topics. 1-3 Credits.

Experimental offering; new course topics and teaching methods.

ACCY 6998. Directed Readings and Research. 1-3 Credits.

ACCY 8001. Doctoral Seminar. 1-12 Credits.

Reasoning and research in technical areas of accounting; theoretical issues and their application to practice; conceptual themes in professional literature; comparative accounting research analyses.

ACCY 8002. Doctoral Seminar. 0-3 Credits.

ACCY 8009. Dissertation Research. 1-12 Credits.

Limited to doctoral candidates. May be repeated for credit.

ACCY 8999. Advanced Reading and Research. 1-12 Credits.

Limited to doctoral candidates preparing for the general examination. May be repeated for credit.

MASTER OF ACCOUNTANCY

The Master of Accountancy (M.Accy.) program consists of 36 credits, with a shorter track of 30 credits available to qualified students who possess a bachelor's degree in accounting or business from a U.S.-accredited university. GW's program, which may be pursued on a full-time or part-time basis, is tailored to individual interests and career objectives in accounting, financial management, and tax practice. No business background is necessary prior to joining the program.

In addition to required courses in accounting, finance, and economics, students can choose from a wide range of specialized accounting subjects and other topics within the School of Business that help them prepare for their professional certification.

Day and evening classes are available to accommodate working professionals, although prior work experience is not required.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://business.gwu.edu/programs/specialized-masters/master-of-accountancy>) for additional program information.

REQUIREMENTS

The program requires 30 to 36 credits, depending upon whether the student holds a Bachelor of Accountancy or has similar academic preparation.

Students holding a Bachelor of Accountancy degree from a U.S. institution or a CPA certification

The 30-credit program for students who hold a Bachelor of Accountancy requires 13.5 credits that may be waived on the basis of approved prior preparation with substitution of other coursework. One finance course is required unless students have completed two undergraduate finance courses with a B or better in the last five years.

The required but waivable courses are:

ACCY 6104	Intermediate Accounting I
ACCY 6105	Intermediate Accounting II
ACCY 6301	Contemporary Auditing Theory
MBAD 6235	Finance
MBAD 6242	Microeconomics for the World Economy
A statistics workshop	

Elective requirements are 16.5 graduate courses in the School of Business which must include 6 credits in accountancy.

Students holding a Bachelor or Master of Business Administration degree from a U.S. institution

The 30-credit program for students who hold a B.B.A. or M.B.A. degree requires 12 credits that may be waived on the basis of approved prior preparation with substitution of other coursework in the same field of study. One advanced graduate finance course is required unless students have completed two undergraduate finance courses with a B or better in the last five years.

Prerequisites are: Financial Accounting, Managerial Accounting, Financial Management, Microeconomics, and Statistics courses taken within five years with a B or better.

The required but waivable courses are:

ACCY 6104	Intermediate Accounting I
ACCY 6105	Intermediate Accounting II
ACCY 6301	Contemporary Auditing Theory

Elective requirements are 18 graduate courses in the School of Business which must include 12 credits in accountancy.

Students holding other undergraduate degrees

The 36-credit program requires 18 credits that may be waived with substitution of approved graduate coursework in the

same field of study and 1.5 credits that may be waived without substitution (thereby bringing the minimum credit requirement to 34.5). One finance course is required unless students have completed two undergraduate finance courses with a B or better in the last five years.

ACCY 6101	Financial Accounting
ACCY 6201	Managerial Accounting I
ACCY 6202	Managerial Accounting II
ACCY 6104	Intermediate Accounting I
ACCY 6105	Intermediate Accounting II
ACCY 6301	Contemporary Auditing Theory
MBAD 6235	Finance
MBAD 6242	Microeconomics for the World Economy (Waivable with substitution)

A statistics workshop

Elective requirements are 16.5 credits of graduate courses in the School of Business, which must include 6 credits in accountancy.

Students who intend to take the C.P.A. examination should be aware that the coursework required for admission to the examination varies from state to state. Students are advised to consult the Board of Accountancy for the state in which they plan to take the examination and choose electives that meet that state's requirements.

DECISION SCIENCE

GRADUATE

Master's programs

- Master of Science in Business Analytics (p. 616)
- Master of Science in Project Management (p. 618)

FACULTY

Professors P.K. Bagchi, E.H. Forman, R. Soyer (*Chair*), M.M. Tarimcilar, P.W. Wirtz

Associate Professors S. Jain, A. Jarrah, S. Kanungo, Y.H. Kwak, P. Delquie, S.Y. Prasad,

Assistant Professors M. Altug, H. Khamooshi, J.S. Kettunen, M.A. Lejeune, M.E. Matta,

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses

- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

DNSC 3401. Introduction to Business Analytics. 3 Credits.

Fundamentals of business analytics: what information it provides, how and when that information is used, and how it affects decision making. Working with uncertainty; understanding the dynamic nature of decision making; using data, regardless of its size; and making decisions with incomplete data. The simulation of real-life scenarios to support optimal decision making.

DNSC 3402. Data Mining. 3 Credits.

Introduction to the practice of exploring and discovering actionable business intelligence from large amounts of data. Data mining concepts, methods, and tools with concrete examples from business applications. Overview of various supervised and unsupervised data mining techniques that can be used both to discover relationships in large data sets and build predictive models. Techniques covered include regression models, decision trees, neural networks, clustering, and association analysis. Prerequisites: STAT 1051 and MATH 1052.

DNSC 4403. Decision Models. 3 Credits.

Students learn to design and develop decision models using spreadsheet software with specialized decision support add-ins, and to effectively interpret the models’ outputs. Commonly used classes of models including, optimization, Monte Carlo simulation and decision analysis. Models discussed span business disciplines including finance, accounting, marketing, human resources, economics, and operations. Prerequisites: DNSC 3401.

DNSC 4404. Essentials of Project Management. 3 Credits.

Theoretical foundations of and practical insights into project management; the role of project management in contemporary business and government organizations; the link between projects and strategy. Project design and development.

DNSC 4900. Special Topics. 0-3 Credits.

DNSC 6201. Introduction to Business Analytics. 1.5 Credit.

An introduction to business analytic concepts, methods, and tools with concrete examples from industry applications; Big Data and the opportunities it has created for businesses to store, organize, and analyze vast amounts of information. Completion of a basic course in statistics prior to enrollment is recommended.

DNSC 6202. Mathematics and Statistics for Management. 3 Credits.

Mathematical and statistical concepts employed in the solution of managerial problems. Applications of functions, elements of calculus, and linear algebra. Introduction to probability, frequency distributions, statistical inference, and regression and correlation.

DNSC 6203. Statistics for Analytics I. 1.5 Credit.

The foundations of statistical methodologies used in business analytics; statistical inference and probability models; methods of estimation, hypothesis testing, contingency table analysis, analysis of regression models and logit and probit analysis. Restricted to students in the master of science in business analytics program; departmental approval may be substituted. Prerequisite: DNSC 6206.

DNSC 6206. Stochastic Fndn: Prob Models. 1.5 Credit.

DNSC 6207. Applied Probability Models. 1.5 Credit.

DNSC 6208. Computational Optimization. 3 Credits.

DNSC 6209. Forecasting for Analytics. 1.5 Credit.

DNSC 6210. Decision and Risk Analytics. 1.5 Credit.

Concepts, methods, and practical tools to analyze managerial decisions involving risk and uncertainty. Decision tree modeling, the strategic value of information, real options valuation, measurement and incorporation of risk preferences, and Monte Carlo simulation. The roles and limitations of judgment and sensitivity and robustness analysis as means to deal with the ambiguities inevitably present in real situations.

DNSC 6211. Programming for Analytics. 3 Credits.

Accessing, preparation, handling, and processing data that differ in variety, volume, and velocity. The ability to handle and process data is a core capability in the context of any analytics position in the industry. Development of a theoretical grounding in emerging paradigms like schema-less data. The programming environments that will be typically employed include Python and R.

DNSC 6212. Optimization Methods and Applications. 3 Credits.

Linear, network, integer, and nonlinear models and their fundamental underlying analytic concepts and solution methods. Emphasis on development of an intuitive understanding of solution methods and their underpinning theoretical paradigms for effective use of optimization models. Model formulation, solutions, and interpretation of results.

DNSC 6213. Statistics for Analytics II. 1.5 Credit.

DNSC 6214. Pricing and Revenue Management. 1.5 Credit.

DNSC 6215. Social Network Analytics. 1.5 Credit.

DNSC 6216. Business Analytics Skills Workshops. 0-1.5 Credits.

A series of workshops covering project management techniques for analytics projects, team dynamics skills, communicating quantitative information, and ethics, security, and privacy policies in analytics.

DNSC 6217. Business Analytics Practicum. 1.5 Credit.

Working in small teams, students apply their analytics skills to projects sponsored by public or private institutions. Each team is advised by a faculty member, and the practicum sponsor designates a mentor to provide guidance to the team for the duration of the project. Prerequisite: MSBA degree candidacy.

DNSC 6219. Time Series Forecasting for Analytics. 3 Credits.**DNSC 6225. Business Process Simulation. 1.5 Credit.****DNSC 6230. Mgt of Technology Innovation. 3 Credits.****DNSC 6234. Procurement & Contracting. 3 Credits.**

Principles and concepts essential to effecting large procurement programs. Planning, sourcing, and contractual design for diverse acquisitions. Emphasis on federal government policy with comparison of buying at other governmental levels and the private sector.

DNSC 6247. Organization, Management, and Leadership. 3 Credits.

Fundamentals of human resource management for project managers. Tools and techniques for success in managing and leading people in a project environment.

DNSC 6250. Project Management Finance. 3 Credits.**DNSC 6251. Optimization Models for Decision Making. 1.5 Credit.**

Optimization techniques, including linear programming, sensitivity analysis, networks, integer programming and multiple objective optimization, and nonlinear and evolutionary programming. Prerequisites: DNSC 6202 (equivalent to MBAD 6221 and MBAD 6222 or MBAD 6224).

DNSC 6252. Risk Analysis for Decision Making. 1.5 Credit.

Probabilistic modeling techniques, including influence diagrams, utility theory, subjective and empirical probability distribution assessment, simulation models, queuing theory, Markov chains, and game theory. Prerequisites: DNSC 6202 or MBAD 6221, MBAD 6222 or MBAD 6224.

DNSC 6254. Risk Management. 1.5 Credit.

Basic principles of risk management practices. Developing a risk management plan, including identifying, analyzing, mitigating, and monitoring projects risks. Prerequisites: DNSC 6202 or MBAD 6224 or MBAD 6221, MBAD 6222.

DNSC 6257. Cost Estimation and Control. 1.5 Credit.

Methods of developing project estimates during the planning stages and updating the estimates throughout the life of the project; monitoring, reporting, controlling, and managing project cost; relationships between project cost and other parameters, including scope, time, quality, reliability and procurement risk. Prerequisites: DNSC 6202 or MBAD 6221, MBAD 6222 or MBAD 6224.

DNSC 6258. Executive Decision Making. 1.5 Credit.**DNSC 6259. Project Portfolio Management. 1.5 Credit.**

Management of an organization's portfolio of projects for the overall success of the enterprise; alignment of projects with an organizations strategy and goals and consistency with values and culture. Prerequisites: DNSC 6202 or MBAD 6221, MBAD 6222 or MBAD 6224.

DNSC 6261. Introduction to Project and Program Management. 3 Credits.

Practical examination of how projects can be managed from start to finish, including specific emphasis on planning and controlling to avoid common pitfalls. Identifying needs, defining requirements, project costing, scheduling, resource allocation, and project politics.

DNSC 6262. Directed Computational Project Management. 3 Credits.

Practical examination of project management concepts by quantitative application using various software tools. Research in real cost data to support project calculations. Prerequisite: DNSC 6254, DNSC 6257, DNSC 6261, DNSC 6267.

DNSC 6263. Managing External Projects. 3 Credits.

Fundamentals of contract management from a project manager's perspective. The outsourcing process, associated project strategies, and legal elements. Acquisition planning, vendor selection, contract formulation, and performance control.

DNSC 6267. Planning and Scheduling. 3 Credits.

Integrated planning, scheduling, and control systems for planning the scope of a project; optimizing time, cost, and resources; and monitoring and controlling schedules, including those for delayed projects. Prerequisites: DNSC 6202 or MBAD 6221, MBAD 6222 or MBAD 6224.

DNSC 6269. Project Management Application. 3 Credits.

Students will be expected to demonstrate integration of the knowledge accumulated in their study plan and apply integrated knowledge and experience to best practices, a project case history, and a handbook. Prerequisites: M.S.P.M. candidacy or permission of instructor/advisor.

DNSC 6274. Statistical Modeling and Analysis. 3 Credits.

The process of specifying, analyzing, and testing models of human and systemic behavior. Formalization of models; statistical test comparison and selection; computer implementation of univariate, bivariate, and multivariate tests. General linear model: linear regression, analysis of variance, and analysis of covariance. Prerequisite: MBAD 6221 and MBAD 6222 .

DNSC 6275. Advanced Statistical Modeling and Analysis. 3 Credits.

Advanced topics associated with the general linear model. Testing for and remediation of assumption violations. Detection of outliers, influential observations, and multicollinearity. Alternative design strategies in the analysis of variance; latent growth analysis; hierarchical linear modeling; testing for interactions and parallelism. Prerequisite: DNSC 6274 or permission of instructor.

DNSC 6276. Exploratory and Multivariate Data Analysis. 3 Credits.

Methods for exploratory and multivariate data analysis. Application and comparison of advanced multivariate analytical procedures. Multivariate and discriminant analysis, LISREL analysis, and canonical correlation. Prerequisite: DNSC 6274 or permission of instructor.

DNSC 6277. Applied Forecasting and Time-Series Analysis for Managers. 3 Credits.

Introduction to various forecasting techniques, including time-series regression models, cyclical trends, exponential smoothing methods, seasonal and nonseasonal ARIMA processes, and the Box-Jenkins approach. Application of forecasting methods in economics, finance, and marketing. Prerequisite: MBAD 6222 or permission of instructor.

DNSC 6279. Data Mining. 3 Credits.

How organizations make better use of the increasing amounts of data they collect and how they convert data into information that is useful for managerial decision making. Examination of several data mining and data analysis methods and tools for exploring and analyzing data sets. State-of-the-art software tools for developing novel applications.

DNSC 6290. Special Topics. 0-3 Credits.

Experimental offering; new course topics and teaching methods. May be repeated once for credit.

DNSC 6298. Directed Readings and Research. 0-3 Credits.

DNSC 6300. Thesis Seminar. 3 Credits.

DNSC 8328. Special Topics in Decision Making. 3 Credits.

Special topics and advanced applications, such as catastrophe theory, Markovian decision processes, and Bayesian statistics. May be repeated once for credit.

DNSC 8385. Special Topics in Research Methods. 3 Credits.

Research problems and issues related to student dissertations form topics for readings, group discussions, and assigned papers.

DNSC 8397. Advanced Special Topics. 1-3 Credits.

Current research and scholarly issues in management science.

DNSC 8998. Advanced Rds & Research. 1-12 Credits.

Limited to doctoral candidates preparing for the general examination. May be repeated for credit.

DNSC 8999. Dissertation Research. 1-12 Credits.

Limited to doctoral candidates. May be repeated for credit.

FACULTY

Professors I.G. Bajeux-Besnainou, T.M. Barnhill, W. Handorf, G.M. Jabbour, M.S. Klock, R. Van Order (*Chair*)

Associate Professors S. Agca, A. Baptista, N.G. Cohen, T. Geurts (*Teaching*), M. Hwang, G. Jostova, P.S. Peyser, R. Savickas, A.J. Wilson

Assistant Professors O. Altinkilic, B.J. Henderson, J. Lee

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Note: MBAD 6234 Financial Management is prerequisite to FINA 6221 Financial Decision Making through FINA 6248 Real Estate Development Cases.

FINA 3001. Intermediate Finance. 3 Credits.

Theory and practice of acquiring and using funds. Simulations of business decisions by cases and/or models to assess the risk/return interaction of investment, financing, and dividend decisions. Prerequisite: BADM 3501.

FINA 3101. Investment and Portfolio Management. 3 Credits.

Theory and principles of security analysis and portfolio management, including analysis of the national economy, industry, company, and security markets. Risk-reward and computer-aided analysis. Prerequisite: BADM 3501.

FINA 3201W. Exploring Finance w/Simulation. 3 Credits.

Corporate financial analysis as explored through the FINGAME financial simulation software. Focus on intertemporal decision making for capital budgeting and financing of a simulated firm. Prerequisite: BADM 3501.

FINA 3301. Money and Capital Markets. 3 Credits.

The process of capital formation in a free enterprise economy, with special emphasis on factors affecting the level and structure of interest rates. Money market, capital market, and derivative contracts (futures and swaps) are evaluated from both investment and financing perspectives. Prerequisite: BADM 3501.

FINA 4001. Advanced Financial Management. 3 Credits.

Analysis and readings covering applications of theory to financial management. Case studies for decision making involving working capital, capital budgeting, financing, dividend policy, and valuation. Prerequisite or concurrent registration: BADM 3501 and FINA 3301 or FINA 3001.

FINA 4001W. Advanced Financial Management. 3 Credits.

Analysis and readings covering applications of theory to financial management. Case studies for decision making involving working capital, capital budgeting, financing, dividend policy, and valuation. Prerequisite or concurrent registration: BADM 3501 and FINA 3301 or FINA 3001.

FINA 4101. Applied Financial Securities Analysis. 3 Credits.

Practical security analysis techniques and investing approaches employed by professional investment managers. Prerequisite: BADM 3501.

FINA 4121W. Exploring Finance w/Simulation. 3 Credits.**FINA 4201. Real Estate Investment. 3 Credits.**

Principles of real estate investment, including valuation, appraisal, financing, and development, in addition to a discussion of the mortgage market and its institutions. Prerequisite: BADM 3501.

FINA 4301. Financial Derivatives. 3 Credits.

The defining properties of and uses for financial derivatives. Institutional features; forward and futures contracts, option contracts, and swap agreements; and valuation methodologies. The proper use of financial derivatives and the potential for unintended consequences. Prerequisites: BADM 3501. Recommended background: undergraduate students in finance with exposure to another discipline such as mathematics, physics, computer science, economics, or statistics.

FINA 4900. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods. Prerequisite: BADM 3501.

FINA 4900W. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods.

FINA 4995. Independent Study. 1-15 Credits.

Assigned topics. Admission by prior permission of advisor. May be repeated once for credit. Prerequisite: BADM 3501.

FINA 6220. Business Financial Management. 3 Credits.**FINA 6221. Financial Decision Making. 3 Credits.**

Theory and practice of business finance, emphasizing the impacts of long- and short-term uses and sources of funds on the firm's market value. Prerequisite: MBAD 6234 or MBAD 6235.

FINA 6222. Capital Formation. 3 Credits.

Determinants of saving and investment and resultant funds flow are evaluated. Special emphasis on the level and risk structure and term structure of interest rates. The role and management of financial institutions is stressed. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6223. Investment Analysis and Portfolio Management. 3 Credits.

Risk-reward analysis of security investments, including analysis of national economy, industry, company, and market; introduction to portfolio management; emphasis on theory and computer methods. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6224. Financial Management. 3 Credits.

Advanced case studies in domestic and international financial management; working capital policy, capital budgeting, financing with debt and equity, dividend policy, valuation, project finance, venture capital, and mergers and acquisitions. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6230. Urban Development Economics. 3 Credits.**FINA 6231. Sem:Investment & Portfolio Mgt. 3 Credits.****FINA 6234. New Venture Financing: Due Diligence and Valuation Issues. 3 Credits.**

Fundamentals and practice of due diligence and screening of early-stage investment opportunities. Prerequisites: MBAD 6234 or MBAD 6235. (Same as MGT 6293).

FINA 6235. Futures Markets: Trading and Hedging. 3 Credits.

Organization and regulation of futures markets. Alternative strategies for trading of futures contracts for possible hedging uses. High risk-high return investment alternatives. The use of futures markets to manage risks. Recommended: FINA 6221. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6236. Options. 3 Credits.

Pricing of options on financial instruments. Role of options in risk management, trading strategies, hedging implications for national and international investors, financial engineering, and structure and regulation of option markets. Recommended: FINA 6221. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6237. Private Wealth Management and Personal Financial Advising. 3 Credits.

Income and estate taxation, retirement plans and pensions, life and disability insurance, investment portfolio management, and personal finances. Prerequisites: MBAD 6234 or MBAD 6235. Recommended background: ACCY 6401 and knowledge of Excel.

FINA 6238. Financial Engineering. 3 Credits.

Valuation and risk management theory for bonds, forward contracts, swaps, options, exotic options, and interest rate options. Development of financial software, including Monte Carlo simulation modeling. Case studies of innovative solutions to investment, corporate finance, and financial institution management problems. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6239. Applied Portfolio Management. 3 Credits.

Synthesis of the theoretical concepts of securities analysis and portfolio management with the application of analyzing securities and building an actual portfolio. Prerequisites: (MBAD 6234 or MBAD 6235) and permission of instructor.

FINA 6240. Real Estate Development. 3 Credits.

Examination of the forces that shape real estate development; market analysis methods and techniques to evaluate project feasibility; the institutional and legal framework within which real estate development occurs and that influences controls, land value, and development potential. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6241. Financing Real Estate. 3 Credits.

Principles of real estate finance; evaluating different methods of financing real estate; sources of real estate funding with emphasis on securitization. Incentives provided by governments. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6242. Real Estate Valuation and Investment. 3 Credits.

Understanding the valuation of different types of real estate from different viewpoints. Analysis of the risks and opportunities of investing. Solid theoretical framework is augmented with practical examples and applications. Prerequisites: MBAD 6234 or MBAD 6235.

FINA 6245. Land Development Law. 3 Credits.**FINA 6247. Urban Development Economics. 3 Credits.****FINA 6248. Real Estate Development Cases. 3 Credits.**

Case study analysis of large-scale commercial real estate developments to gain comprehension of financial, political, legal, and technical complexities and constraints inherent in the real estate development process. Prerequisite: FINA 6221 or permission of instructor.

FINA 6250. Securities Regulation and Financial Scandals. 3 Credits.

Philosophy and framework of laws governing the sale of securities, including stocks, bonds, and investment contracts; financial scandals and the role that changes in securities law and housing policy has played in such events.

FINA 6271. Financial Modeling and Econometrics. 4 Credits.

Applied statistical and econometric analysis and modeling in finance. Methodologies include descriptive and inferential statistics, multivariate regression, and time series analysis. Empirical studies are reviewed, and a series of research projects are undertaken. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6272. Global Financial Markets. 4 Credits.

Theories explaining domestic and international interest rate and exchange rate structures. Roles of financial institutions and markets are investigated and forecasting methodologies are applied. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6273. Cases in Financial Management and Investment Banking. 4 Credits.

Computer modeling for analysis and forecasting of a firm's financial statements to reflect possible future performance. Application and integration of financial accounting and financial analysis, using a different case study each week. Financial issues faced by companies and their commercial and investment bankers as tactical and strategic decisions are made about organic growth, growth through merger and acquisition, and corporate reorganization. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6274. Corporate Financial Management and Modeling. 4 Credits.

Causal connections between decisions made by business firms, their expected performance, and the resulting current valuation of the firm's common stock. Factors affecting the level and structure of interest rates, which are incorporated by many financial models, theories, and decisions. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6275. Investment Analysis and Global Portfolio Management. 4 Credits.

Financial markets and instruments viewed from the investor's perspective. Analysis of the value of equity and fixed-income securities and the construction of efficient portfolios in a global financial market. Issues of market efficiency, tax structures, and investment funds; computer-based models. Prerequisite: Master of Science in Finance degree candidacy.

FINA 6276. Financial Engineering and Derivative Securities. 4 Credits.

Mathematical and theoretical foundations to value-derivative securities, including options, futures, and swaps; hedging and trading applications of these contracts. Arbitrage trading across cash and derivative markets and its role in maintaining equilibrium prices. Prerequisite: Master of Science in Finance degree candidacy.

FINA 6277. Comparative Financial Market Regulation and Development. 4 Credits.

Theory and current status of comparative regulation of domestic and international financial institutions and markets. Effects on country economic development and international trade. Prerequisite: Master of Science in Finance degree candidacy.

FINA 6278. Financial Theory and Research. 4 Credits.

Theoretical constructs of business investment and financing decisions and of financial asset pricing structures in domestic and international environments. Analytical and numerical models are developed, and empirical studies are evaluated. Prerequisite: Master of Science in Finance degree candidacy.

FINA 6279. Real Estate Finance and Fixed-Income Security Valuation. 4 Credits.

Application of financial theory to real estate investment: the housing market, mortgage valuation and securitization, commercial properties, CMBS, and REITs. Fixed-income security valuation with focus on theory and data applications on interest rate movements, fixed-income security and derivative pricing, and credit risk. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6280. Financial Institution Management and Modeling. 4 Credits.

Analysis of the financial performance and condition of a bank, toward understanding of the financial environment in which banks operate and regulation of the banking system. Application of asset/liability management principles and statistical and mathematical models employed in bank risk management. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6281. Cases in Financial Modeling and Engineering. 4 Credits.

Through the use of real-world examples from various aspects of finance, students are exposed to the modeling of complex financial instruments and techniques used in market and credit risk management. Underlying mathematics and theoretical constructs are explored and solidified through modeling exercises that make use of analytical solutions and numerical methods. As a practical course, students are asked to implement models. Examples may be motivated by corporate finance, corporate and investment banking, asset management, or other activities. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6282. Advanced Financial Econometrics and Modeling. 0-4 Credits.

Testing of several types of applied financial econometric models typically used in practice. Advanced quantitative techniques applied to aspects of financial markets, the behavior of agents, and market and credit risk management. Various software packages used to implement and program models. Prerequisites: Master of Science in Finance degree candidacy.

FINA 6290. Special Topics. 0-3 Credits.

Experimental offering; new course topics and teaching methods. May be repeated once for credit.

FINA 6297. International Management Experience. 3 Credits.

Same as IBUS 6297/ MGT 6297/ MKTG 6297/ SMPP 6297. May be repeated for credit.

FINA 6298. Directed Readings and Research. 2-4 Credits.

FINA 6299. Thesis Seminar. 3 Credits.

FINA 6999. Thesis Research. 3 Credits.

FINA 8311. Seminar: Public/Private Sector Institutions and Relationships. 3 Credits.

An analysis and critique of alternative theoretical frameworks for describing, understanding, and predicting the nature, values, and actions of American public and private institutions. Problems, potentials, and alternatives for structuring public and private institutional arrangements to meet the needs of society. Same as SMPP 8311.

FINA 8321. Seminar: Financial Markets Research. 3 Credits.

Market efficiency, utility testing, the capital asset pricing model, the arbitrage pricing theory, the option pricing model, and aggregate market volatility.

FINA 8322. Seminar: Corporate Finance Research. 3 Credits.

Capital budgeting, capital structure issues, dividend policy, microeconomic foundations, mergers, and agency theory.

FINA 8323. Seminar: Continuous-Time Finance. 3 Credits.

Review of the stochastic calculus methods needed for continuous-time pricing models. The most important continuous-time models, including pricing of derivative securities, consumption-portfolio selection models, continuous-time capital asset pricing models, consumption-based capital asset pricing models, continuous-time arbitrage pricing theory, and different yield curve models.

FINA 8324. Seminar: Financial Markets and Institutions. 3 Credits.

Multi-period asset pricing, term structure of interest rates, market imperfections and institutional factors, auctions, manipulation, derivative markets, market microstructure, and financial institutions.

FINA 8397. Doctoral Seminar. 1-3 Credits.

FINA 8998. Advanced Reading and Research. 1-12 Credits.

Limited to doctoral candidates preparing for the general examination. May be repeated for credit.

FINA 8999. Dissertation Research. 1-12 Credits.

Limited to doctoral candidates. May be repeated for credit.

INFORMATION SYSTEMS AND TECHNOLOGY MANAGEMENT

UNDERGRADUATE

Bachelor's programs

- Bachelor of Business Administration with a concentration in information systems and technology management (p. 599)
- Combined Bachelor of Business Administration and Master of Science in Information Systems Technology (p. 647)

GRADUATE

Master's program

- Master of Science in Information Systems Technology (p. 647)

FACULTY

Professors E.G. Carayannis, M.J. Granger

Associate Professors J. Artz, S. Dasgupta, R.G. Donnelly (Chair), W. Duan, R.A. Lumley

Assistant Professors Y.C. Ho, Y. Park

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Note: M.S.I.S.T. candidacy or departmental approval is prerequisite to ISTM 6201 Information Systems Development and Applications-ISTM 6225 Enterprise Architecture.

ISTM 6401 -ISTM 6490 are available only to students enrolled in the Executive Master of Science in Information Systems Technology.

ISTM 3119. Introduction to Programming. 3 Credits.

For students already familiar with basic computer concepts, who will learn a programming language, such as Visual Basic, useful for business applications. Emphasis on computer applications in accounting and management information systems through hands-on programming. Prerequisite: BADM 2301.

ISTM 4120. Business Systems Development. 3 Credits.

Analysis, design, and implementation of management information systems (MIS). Structured methodologies and techniques for various stages of the MIS development process. Computer-aided software engineering tools. May be taken for graduate credit with permission of program director and instructor. Prerequisites: CS 1111 or ISTM 3119 or permission of instructor.

ISTM 4121. Database Design and Applications. 3 Credits.

Theory, architecture, and implementation of database management systems in corporate and organization information systems. Fundamental concepts of database management and processing. Hands-on experience with database management packages. Prerequisites: CS 1111 or ISTM 3119 or permission of instructor.

ISTM 4123. Business Data Communications. 3 Credits.

A technical overview of data communication concepts that are useful in the design and management of local and wide area networks. Internet technologies and their business applications are emphasized. Prerequisite: BADM 2301.

ISTM 4123W. Business Data Communications. 3 Credits.

A technical overview of data communication concepts that are useful in the design and management of local and wide area networks. Internet technologies and their business applications are emphasized. Prerequisite: BADM 2301.

ISTM 4130W. Writing On The Ethics of Technology. 3 Credits.

Complex ethical dilemmas inherent in the introduction of new technologies and the influence human behavior asserts on these problems. Students write stories to explore and evaluate specific ethical problems relative to technology from various perspectives.

ISTM 4215. Human-Computer Interaction. 3 Credits.

An introduction to and overview of the field of human-computer interaction (HCI), an interdisciplinary field that integrates theories and methodologies from computer science, cognitive psychology, design, and other areas. Readings cover current theory and practice in interface specification, design, and evaluation, and include current and classic research papers in the field.

ISTM 4900. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods. May be repeated once for credit.

ISTM 4900W. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods. May be repeated once for credit.

ISTM 4995. Independent Study. 3 Credits.

Assigned topics. Admission by prior permission of advisor. May be repeated once for credit.

ISTM 6201. Information Systems Development and Applications. 3 Credits.

The information systems life cycle evaluated in terms of technologies, impact, and management. Structured and object-oriented analysis, prototyping, software reuse, testing, life-cycle costs, software development environments, and organizational and behavioral aspects of development projects. Prerequisite: ISTM 4120 and M.S.I.S.T. candidacy or departmental approval.

ISTM 6202. Relational Databases. 3 Credits.

Introduces the theory of relational databases and commences an in-depth discussion of Relational database theory and design at the conceptual, logical, and physical levels. Structured query language (SQL) is covered in depth. Prerequisite: ISTM 4121 and M.S.I.S.T. candidacy or departmental approval.

ISTM 6203. Telecommunications and Enterprise Networks. 3 Credits.

The technologies and applications of telecommunication systems in the commercial and public sectors with emphasis on wireless, mobile, and Internet communication protocols. Systems technology and configurations to support business application requirements are evaluated. Functional characteristics of network technologies. Prerequisite: M.S.I.S.T. candidacy or departmental approval.

ISTM 6204. Information Technology Project Management. 3 Credits.

Project and program management practices with an emphasis on information technology projects. The basic tools of project management: work breakdown structure, cost, schedule and performance goal setting, and risk analysis. Prerequisite: M.S.I.S.T. candidacy or departmental approval.

ISTM 6205. Internet Computing. 3 Credits.

Concepts, architectures, frameworks, and technology of web application development. The Internet as hardware and software architecture for creating business applications. Web and web application servers, system development methods and techniques, client-side and server-side scripting. Prerequisite: ISTM 3119 and M.S.I.S.T. candidacy or departmental approval.

ISTM 6206. Information Systems Security. 3 Credits.

Comprehensive examination of computer security issues from the design, management, and business information system ownership perspectives. System security concepts, methods, and policies from the design and planning stages to multi-level system implementation. Design of risk assessment strategies to achieve security goals. Prerequisite: M.S.I.S.T. candidacy or departmental approval.

ISTM 6207. Information Resources Management. 3 Credits.

Information resources management strategically assesses and exploits information technology assets for competitive advantage. The CIO role in information resources management, planning, security, information integration, enterprise model development, and data administration. Prerequisite: M.S.I.S.T. candidacy or departmental approval.

ISTM 6210. Integrated Information Systems Capstone. 3 Credits.

Capstone project course in which students apply conceptual and technical knowledge in analyzing, planning, and designing an on-line information system. Culminates with system proposal/design presentations. Restricted to eligible students in their final semester. Prerequisite: ISTM 6201–ISTM 6207 and M.S.I.S.T. candidacy or departmental approval.

ISTM 6211. Data Warehousing and Online Analytical Processing. 3 Credits.

Introduction to the theory of data warehousing, dimensional data modeling, and online analytical processing (OLAP) through case studies, technology, and a design project. Prerequisite: ISTM 6202 and M.S.I.S.T. candidacy or departmental approval.

ISTM 6212. Data Management for Analytics. 3 Credits.**ISTM 6213. Enterprise Web and Database Applications. 3 Credits.**

Enterprise applications concepts, architecture, and technologies for emerging technologies and IT frameworks. The Internet as a major resource for globally distributed applications using grid and utility computing. Web servers, development methods and techniques, data stores for massively distributed applications, and client/server side scripting. Prerequisite: ISTM 6202, ISTM 6205 and M.S.I.S.T. candidacy or departmental approval.

ISTM 6214. Advanced Programming and Business Applications. 3 Credits.

Advanced programming design, development, and analysis topics with an emphasis on business applications. Problem modeling and development of algorithm solutions. Basic data structures and algorithms, such as linked list, stack and tree, graph theory, sorting and searching. Prerequisite: M.S.I.S.T. candidacy or departmental approval.

ISTM 6215. Human-Computer Interaction. 3 Credits.

Human-computer interaction as an interdisciplinary endeavor integrating theories and methodologies from computer science, cognitive psychology, design, and many other areas. Theory and practice in interface specification design and evaluation, and research. Prerequisite: M.S.I.S.T. candidacy or departmental approval.

ISTM 6221. Management Perspectives in Electronic Commerce. 3 Credits.

The tools, skills, and business concepts surrounding the emergence of E-commerce and its information technologies from operational and strategic perspectives. E-commerce security, privacy, content selection and rating, authentication, encryption, acceptable use policies, intellectual property rights, and legal liabilities. Prerequisite: M.S.I.S.T. candidacy or departmental approval.

ISTM 6222. IS/IT Strategy and Implementation. 3 Credits.

The development and implementation of information systems and technology strategies designed to align with and maximize business strategy applications and approaches in a challenging and increasingly global business environment. Prerequisite: M.S.I.S.T. candidacy or departmental approval.

ISTM 6223. Technology Entrepreneurship. 3 Credits.

Case studies on the innovation-entrepreneurship processes used to launch and build new ventures based on information technology and on technology more broadly. Organizing for innovation, raising venture capital, managing the small technology-based venture, marketing technology products and services, intellectual property considerations, and new venture proposal development. Prerequisite: M.S.I.S.T. candidacy or departmental approval.

ISTM 6224. Management of Technology and Innovation. 3 Credits.

Business, technological, economic, and political factors that influence the development and deployment of new technology products, processes, and services. Concepts and practices useful in managing technology and enhancing corporate innovation, corporate organizational alternatives, new approaches, and sources of competitive advantages. Prerequisite: M.S.I.S.T. candidacy or departmental approval.

ISTM 6225. Enterprise Architecture. 3 Credits.

Concepts of enterprise architecture as a management tool for organizations to align their information technology assets, people, operations, and projects with operational characteristics. Service-oriented architectures, performance reference models, configuration management, system development life cycles, and tiered application architectures. Prerequisite: M.S.I.S.T. candidacy or departmental approval.

ISTM 6226. Principles of Information Systems. 3 Credits.

Overview of all information systems, including integration of management, information, and systems concepts into a unified framework. Management information systems development, design, implementation, evaluation strategies.

ISTM 6232. ISTM6242201303. 3 Credits.

Technology transfer among advanced countries and LDCs. Comparative science and technology policies and capabilities of countries. Technology basis for international trade, licensing, patenting, and joint ventures. Global transfer of military technologies and export controls. Technology in economic development.

ISTM 6233. Emerging Technologies. 3 Credits.

Exploration of new developments in scientific and technological innovation, including automation, energy, medicine, bioengineering, social science, information technology, and space. Emphasis on forecasting these technological advances and assessing their economic and social effects. The role of advancing technology in driving social change.

ISTM 6234. New Venture Financing. 3 Credits.

Fundamentals and practice of due diligence and screening of early-stage investment opportunities. Same as FINA 6234.

ISTM 6239. Sem:Competitiveness/Technology. 3 Credits.

Capstone course integrating the field of management of science, technology, and innovation. Commercialization of technology in the private sector and the impact on competitiveness. Implementation of technology in the public sector. Technology development, from new product concept to utilization. Prerequisite: ISTM 6224 or MBAD 6253; ISTM 6232 or ISTM 6233 or permission of instructor.

ISTM 6243. Human Factors in Information Systems. 3 Credits.

The user-computer interaction, human factors of on-line dialogues, interfacing, and various approaches to user-system interaction. Emphasis on the development and evaluation of user-computer interfaces using software such as Visual BASIC and Windows.

ISTM 6251. Info Systems Applications. 1.5 Credit.**ISTM 6290. Special Topics. 1-3 Credits.**

Experimental offering; new course topics and teaching methods. May be repeated once for credit.

ISTM 6298. Directed Readings and Research. 1-3 Credits.**ISTM 8300. Thesis Seminar. 3 Credits.****ISTM 8333. Seminar: Management of Science, Technology, and Innovation. 3 Credits.****ISTM 8340. Philosophical Issues in Information Systems. 3 Credits.**

Seminar for doctoral students interested in information systems. Various philosophical traditions and insights from those traditions applied to problems in information systems.

ISTM 8341. Advanced Topics in MIS Rsrch. 3 Credits.

For information systems doctoral students. Seminal papers and leading methods and instruments as applied to MIS research.

ISTM 8385. Special Topics in Research Methods. 3 Credits.

Research problems and issues related to student dissertations form topics for readings, group discussions, and assigned papers.

ISTM 8390. Philosophical Foundations of Administrative Research. 3 Credits.

Philosophy of science as applied to research in administration. Topics include the nature and current problems of epistemology, the development and role of theories, and the relationship between theory, methodology, and empirical data.

ISTM 8391. Advanced Problems in Research Methodology. 3 Credits.

Use of models and theoretical frameworks in research; formulation of research questions, hypotheses, operational definitions, research designs, sampling and data analysis approaches. For doctoral candidates who have completed the general examination and all courses and are preparing for their dissertation.

ISTM 8397. Doctoral Seminar. 1-3 Credits.

Current research and scholarly issues in management science.

ISTM 8398. Advanced Rdgs and Research. 1-12 Credits.

Limited to doctoral candidates preparing for the general examination. May be repeated for credit.

ISTM 8399. Dissertation Research. 1-12 Credits.

Limited to doctoral candidates. May be repeated for credit.

COMBINED BACHELOR OF BUSINESS ADMINISTRATION AND MASTER OF SCIENCE IN INFORMATION SYSTEMS TECHNOLOGY

REQUIREMENTS

See the School of Business for programs of study leading to the combined degree program leading to the Bachelor of Business Administration and Master of Science in Information Systems Technology.

MASTER OF SCIENCE IN INFORMATION SYSTEMS TECHNOLOGY

Established in 1980, Master of Science in Information Systems Technology (MSIST) program blends business knowledge and information systems management with core technology fundamentals. Courses are taught by full-time faculty who are experts in their fields, imparting real-world experience and insight into our challenging, innovative curriculum. The MSIST program is designed for working professionals and offers the traditional program on-campus or students may choose the distance learning format. Students may complete the master's degree in 18-24 months while studying part-time or full-time. Faculty advisors help students design a program plan that suits their personal and professional needs.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits, including 24 credits in core courses and 9 credits in courses selected from one area of specialization. Applicants with deficiencies in preparation may be required to take up to 9 credits in prescribed foundation courses before beginning course work in the program.

Core

ISTM 6201	Information Systems Development and Applications
-----------	--

ISTM 6202	Relational Databases
-----------	----------------------

ISTM 6203	Telecommunications and Enterprise Networks
-----------	--

ISTM 6204	Information Technology Project Management
-----------	---

ISTM 6205	Internet Computing
-----------	--------------------

ISTM 6206	Information Systems Security
-----------	------------------------------

ISTM 6207	Information Resources Management
-----------	----------------------------------

ISTM 6210	Integrated Information Systems Capstone
-----------	---

Three courses from one area of specialization**Management**

ISTM 6221	Management Perspectives in Electronic Commerce
-----------	--

ISTM 6222	IS/IT Strategy and Implementation
-----------	-----------------------------------

ISTM 6223	Technology Entrepreneurship
-----------	-----------------------------

ISTM 6224	Management of Technology and Innovation
-----------	---

ISTM 6225	Enterprise Architecture
-----------	-------------------------

Technical

ISTM 6211	Data Warehousing and Online Analytical Processing
-----------	---

ISTM 6213	Enterprise Web and Database Applications
-----------	--

ISTM 6214	Advanced Programming and Business Applications
-----------	--

ISTM 6215	Human-Computer Interaction

INTERNATIONAL BUSINESS

UNDERGRADUATE

Bachelor's program

- Bachelor of Business Administration with a concentration in international business (p. 599)

FACULTY

Professors H.G. Askari, D. Leipziger, Y.S. Park, A. Phene, S.S. Rehman, F. Robles, J.W. Spencer, R. Weiner (*Chair*), J. Yang

Associate Professors M. Ayyagari, H. Berry, R.W. Click, N. Jensen, N. Maurer, L.A. Riddle

Assistant Professors W. Chen, A. Helm, R. Lucea

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Departmental prerequisite: MBAD 6242 Microeconomics for the World Economy and MBAD 6243 Macroeconomics for the World Economy or ECON 6283 Survey of International Trade Theory and Policy or ECON 6284 Survey of International Macroeconomics and Finance Theory and Policy are prerequisite to all courses in the International Business Department. Additional prerequisites appear with some IBUS courses below.

IBUS 3001. Introduction to International Business. 3 Credits.

The international business environment, including social, cultural, political, technological, and institutional domains. Multinational corporation strategic imperatives and organizational challenges, including financial, marketing, human resources, and other aspects of management. Prerequisite: ECON 1011 and ECON 1012.

IBUS 3001W. Intro-International Business. 3 Credits.

The international business environment, including social, cultural, political, technological, and institutional domains. Multinational corporation strategic imperatives and organizational challenges, including financial, marketing, human resources, and other aspects of management.

IBUS 3101. Global Financial Environment. 3 Credits.

The international economic, trade, and financial environment in which global business operates and how developments in these areas affect business activity. Prerequisites: ECON 1011 and ECON 1012.

IBUS 3201. International Marketing Management. 3 Credits.

Introduction to international marketing analysis and strategy, and the dynamic nature of international markets. Analysis of different types of international markets and formulation of strategies at the entry and global stages. Prerequisites: IBUS 3001 or IBUS 3002, except by permission of instructor.

IBUS 3301. International Business Finance. 3 Credits.

Analysis of the international economic environment and its influence on corporate financial management of international operations. Prerequisite: IBUS 3001, except by permission of instructor, and BADM 3501.

IBUS 4202. Regional Strategy for Multinationals. 3 Credits.

The business, economic, investment, and market environments in different world regions. A regional strategy framework for responding to business opportunities in regional markets. Prerequisites: IBUS 3001 or IBUS 3002, except by permission of instructor.

IBUS 4203. Foreign Market Analysis. 3 Credits.

Project course involving market research for target market selection, market entry strategy, in-country marketing plan, and recommendations for strategy implementation in the target country. Focus on consulting process as ancillary component. Prerequisite: IBUS 3001, except by permission of instructor, and IBUS 3201.

IBUS 4302. International Banking. 3 Credits.

Theory and practice of international banking; analysis of international commercial and investment banking from a management perspective; subjects include current international monetary and financial environment, money and capital markets, and topical problems of international banking from a management perspective. Prerequisite: IBUS 3001, except by permission of instructor, and IBUS 3301.

IBUS 4303. International Monetary and Financial Issues. 3 Credits.

Theory and practice of international banking; analysis of international commercial and investment banking from a management perspective; subjects include current international monetary and financial environment, money and capital markets, and topical problems of international banking from a management perspective. Prerequisite: IBUS 3001, except by permission of instructor, and IBUS 3301.

IBUS 4401. Managing the Multinational Enterprise. 3 Credits.

The changing nature of the international environment and the resulting effects on strategy of U.S. and foreign multinational corporations. Prerequisite: IBUS 3001, except by permission of instructor.

IBUS 4402. Managing in Developing Countries. 3 Credits.

Challenges of operating in developing countries. Cross-country experience and case studies exploring issues of institutions, corruption, infrastructure, private-public partnerships, competition, regulation, and global standards. Prerequisite: IBUS 3001, except by permission of instructor.

IBUS 4402W. Managing-Developing Countries. 3 Credits.

Challenges of operating in developing countries. Cross-country experience and case studies exploring issues of institutions, corruption, infrastructure, private-public partnerships, competition, regulation, and global standards. Prerequisites: IBUS 3001 or IBUS 3002, or permission of instructor.

IBUS 4900. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods. Prerequisite: IBUS 3001, except by permission of instructor.

IBUS 4900W. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods. Prerequisite: IBUS 3001, except by permission of instructor.

IBUS 4995. Independent Study. 1-12 Credits.

Assigned topics. Admission by prior permission of advisor. May be repeated once for credit. Prerequisite: IBUS 3001, except by permission of instructor.

IBUS 6201. International Marketing. 3 Credits.

International marketing strategy formulation, including market entry, local market development, and global market integration; strategic challenge of global marketing formulation and local market adaptation, with attention to market conditions in mature, new growth, and emerging market environments; emerging trends. Prerequisites: MBAD 6242 and MBAD 6243; or ECON 6283; or ECON 6284.

IBUS 6202. Regional Strategy for Multinationals. 0-3 Credits.

Development of a framework to understand dynamic business, cultural, and economic environments in Asia and Latin America. Regional business strategies of multinational companies from outside and within Asia and Latin America that respond to business opportunities and challenges in these regions.

IBUS 6290. Special Topics. 0-3 Credits.

Experimental offering; new course topics and teaching methods. May be repeated once for credit. Prerequisite: MBAD 6242 and MBAD 6243 or ECON 6283 or ECON 6284.

IBUS 6297. International Management Experience. 1-6 Credits.

Same as FINA 6297/ MGT 6297/ MKTG 6297/ SMPP 6297. Prerequisite: MBAD 6242 and MBAD 6243 or ECON 6283 or ECON 6284. May be repeated for credit.

IBUS 6301. International Business Finance. 3 Credits.

Analysis of major issues and developments in the international financial environment and their impact on multinational corporations and financial institutions. Prerequisite: MBAD 6234 and MBAD 6242 and MBAD 6243 or ECON 6283 or ECON 6284.

IBUS 6302. Seminar: International Banking. 3 Credits.

Evolution in international banking and other international financial institutions. Functioning of international banking operations, public policy issues and regulatory issues in international banking, and the effect of international banks on national monetary policies. Prerequisite: MBAD 6242 and MBAD 6243 or ECON 6283 or ECON 6284.

IBUS 6303. External Development Financing. 3 Credits.

Institutions, instruments, and theory of external development financing; financial flows to developing countries; development finance and the role of international and regional development banks; policies, methods, and practices of the World Bank, the IMF, and others; technical assistance, training, capacity building, and role of institutions in sustained development. Prerequisite: MBAD 6242 and MBAD 6243 or ECON 6283 or ECON 6284.

IBUS 6304. Currency and Banking Crises in Emerging Markets. 3 Credits.

Public policy issues surrounding financial crises in emerging market economies. Comparison of the economic reasons for the crises as well as the responses of various governments and international financial institutions. Prerequisite: MBAD 6242 and MBAD 6243 or ECON 6283 or ECON 6284.

IBUS 6305. Global Investment Banking. 3 Credits.

Examination of investment banking as practiced in a global context from a strategic perspective using case studies and readings. Topics covered include securities underwriting and derivatives instruments, risk management, and business development strategies. Prerequisite: MBAD 6242 and MBAD 6243 or ECON 6283 or ECON 6284.

IBUS 6306. Seminar: International Financial Markets. 3 Credits.

Survey of international financial markets, focusing on structure, operations, and pricing. Primary emphasis on markets for foreign exchange, Eurocurrency, international bonds, and commodities. Derivatives markets, especially swaps and options embedded in international securities issues. Prerequisite: IBUS 6301 and MBAD 6242 and MBAD 6243 or ECON 6283 or ECON 6284.

IBUS 6307. International Portfolio Management. 3 Credits.

Theory and practice of international investment. Portfolio construction and optimization. Effects of exchange rate changes on portfolio risk and return. International asset pricing models and trading institutions. Prerequisite: MBAD 6234; either MBAD 6243 or ECON 6284.

IBUS 6308. Intl Reporting and Contrl. 1.5 Credit.**IBUS 6309. International Accounting. 1.5 Credit.****IBUS 6310. Intl Fin. Reporting Standards. 1.5 Credit.****IBUS 6400. Oil: Industry, Economy, and Society. 3 Credits.**

Multidisciplinary approach to the study of oil and its effects on business, nation-states, and the world economy, based primarily on political economy and management perspectives. Topics include the oil industry, the global oil environment, and the potential effects of oil on a society. (Same as IAFF 6378).

IBUS 6401. International Business Strategy. 3 Credits.

Discussion of the changing nature of the international environment and the resulting impact on strategy of both U.S. and foreign multinational corporations. Various aspects of strategy are considered, including marketing, production, and financial strategy. The focus of discussion is at the company level. Prerequisite: MBAD 6242 and MBAD 6243 or ECON 6283 or ECON 6284.

IBUS 6402. Managing in Developing Countries. 3 Credits.

Challenges of operating in developing countries. Cross-country experience and case studies exploring issues of institutions, corruption, infrastructure, private-public partnerships, competition, regulation, and global standards. Prerequisite: MBAD 6242 and MBAD 6243 or ECON 6283 or ECON 6284.

IBUS 6403. International Business Negotiations. 3 Credits.

Theories and application in International Business Negotiations (IBN). Formulation of concepts and frameworks; development of systematic approaches to planning for and conducting IBN. Integration of functional, environmental, and institutional contexts facing negotiators internationally. Prerequisite: MBAD 6242 and MBAD 6243 or ECON 6283 or ECON 6284.

IBUS 6404. New Global Competitive Framework. 3 Credits.

How industries develop sustained competitive advantages within the global framework. The European Union's "single market" and the Economic-Monetary Union; the transformation of formerly centrally planned economies; the changing Japanese economy and emerging Pacific Basin, with implications for the U.S. economy, industries, and firms. Prerequisite: MBAD 6242 and MBAD 6243 or ECON 6283 or ECON 6284.

IBUS 6405. Legal Aspects of International and Multinational Business. 3 Credits.

Legal environment of international and multinational business including legal systems, antitrust laws, regulation of direct investment, international arbitration and expropriation; topics of current interest. Prerequisite: MBAD 6242 and MBAD 6243 or ECON 6283 or ECON 6284.

IBUS 6995. Directed Readings and Research. 3 Credits.

Supervised readings or research in selected fields within business administration. Admission by prior permission of instructor. May be repeated once for credit. Prerequisite: MBAD 6242 and MBAD 6243 or ECON 6283 or ECON 6284.

IBUS 6999. Thesis Seminar. 3 Credits.

Prerequisite: MBAD 6242 and MBAD 6243 or ECON 6283 or ECON 6284.

IBUS 8311. Seminar: Public-Private Sector Institutions and Relationships. 3 Credits.

An analysis and critique of alternative theoretical frameworks for describing, understanding, and predicting the nature, values, and actions of American public and private institutions. Problems, potentials, and alternatives for structuring public and private institutional arrangements to meet the needs of society. Same as SMPP 8311.

IBUS 8361. Colloquium on International Business. 3 Credits.

Examination of selected topics in international business, with emphasis on major new theoretical and empirical developments. Prerequisite: MBAD 6242 and MBAD 6243 or ECON 6283 or ECON 6284.

IBUS 8397. Doctoral Seminar. 1-3 Credits.

Prerequisite: MBAD 6242 and MBAD 6243 or ECON 6283 or ECON 6284.

IBUS 8900. Thesis Research. 3 Credits.

Prerequisite: MBAD 6242 and MBAD 6243 or ECON 6283 or ECON 6284.

IBUS 8998. Advanced Readings and Research. 1-12 Credits.

Limited to doctoral candidates preparing for the general examination. May be repeated for credit. Prerequisite: MBAD 6242 and MBAD 6243 or ECON 6283 or ECON 6284.

IBUS 8999. Dissertation Research. 1-12 Credits.

Limited to doctoral candidates. May be repeated for credit. Prerequisite: MBAD 6242 and MBAD 6243 or ECON 6283 or ECON 6284.

MANAGEMENT

FACULTY

Professors J. Bailey, D. Hawkins, D.C. Kayes (*Chair*), P.M. Swiercz, L. Yu

Associate Professors L. Delpy Neirotti, N.S. Hill, S. Levy (*Teaching*), P. McHugh, G.T. Solomon, A. El Tarabishy (*Teaching*)

Assistant Professors N.A. Cohen, M. Hyman (*Teaching*), S. Singh

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

MGT 3201. Leadership in Action. 3 Credits.

Leadership in organizations and society. Consideration of whether leadership is a personal trait or a structured behavior and whether it is universal across domains or situation-specific. Modern and historical examples; issues of leadership in popular contexts.

MGT 3202. Managerial Negotiations. 3 Credits.

Negotiation concepts, strategies, and tactics as applied to managerial situations. The nature of interdependencies; competitive and collaborative negotiations; negotiations involving third-party dynamics, such as mediation and arbitration. Employee relations, including employee rights; the impact of unions and collective bargaining on management practices.

MGT 3203. Advanced Human Resource Management. 3 Credits.

The labor force and labor markets. The legal environment of human resource management. Human resource planning; employee recruiting, selection, training, development, compensation, motivation, discipline, health and safety. Prerequisite: BADM 3101.

MGT 3204. Contemporary Topics in Management. 3 Credits.

Contemporary practice in human resource planning, recruitment and selection, training and development, performance management, compensation and benefits, employee relations, and international human resource management. Interaction with practitioners through actual situations, case analyses, and presentations. Prerequisite: BADM 3101.

MGT 3300. Entrepreneurship. 3 Credits.

Students develop the knowledge and ability to launch their own venture. The entrepreneur and the process of entrepreneurship; key aspects of entrepreneurial success, from idea generation and development to launching a firm. Practical skills applicable to real-world scenarios.

MGT 3300W. Entrepreneurship. 3 Credits.

Students develop the knowledge and ability to launch their own venture. The entrepreneur and the process of entrepreneurship; key aspects of entrepreneurial success, from idea generation and development to launching a firm. Practical skills applicable to real-world scenarios.

MGT 3301. Small Business Management. 3 Credits.

Theory and practice of entrepreneurship. How to start or acquire a new business; effective management, including the essentials of planning, organizing, financing, marketing, and controlling the smaller enterprise. Students consult with a small D.C.-area company as part of a team research project. Prerequisite: MGT 3300W or permission of instructor.

MGT 3302. e-Entrepreneurship. 3 Credits.

The process of turning a web, mobile, or wearable business idea into a validated, repeatable, and scalable business model using lean startup methodologies. Topics include testing and user feedback, technology basics, promotions, and tracking core metrics.

MGT 3303. Women's Entrepreneurial Leadership. 3 Credits.

Students create and execute a business plan while developing essential skills, mentoring relationships, and self-confidence and self-insight.

MGT 3305. Human Capital Sustainability. 3 Credits.

Managerial challenges associated with employment, economic efficiency, employee equity, and employee voice. How market forces, public policy, negotiations, and globalization affect sustainable employment relationships.

MGT 4002. Product Development and Venturing. 3 Credits.

Students form entrepreneur teams to develop new products. Prerequisite: MGT 4101 or permission of instructor.

MGT 4003. Management of the Growing Entrepreneurial Venture. 3 Credits.

Examination of the data, dilemmas, and decisions that can confront leaders of post-startup entrepreneurial ventures.

MGT 4102. Entrepreneurship. 3 Credits.

Key aspects of entrepreneurial success, from idea to development to launch, including opportunity identification, feasibility analysis, industry analysis, business models, venture funding, and mentor relationships.

MGT 4102W. Entrepreneurship. 3 Credits.**MGT 4900. Special Topics. 3 Credits.**

Experimental offering; new course topics and teaching methods. May be repeated once for credit.

MGT 4900W. Special Topics. 3 Credits.**MGT 4995. Independent Research. 1-6 Credits.**

Assigned topics. Admission by prior permission of advisor. May be repeated once for credit.

MGT 6210. Leading Teams. 3 Credits.

Knowledge and skills for effectively leading teams, including setting teams up for success, promoting effective team dynamics, and other leadership issues for contemporary teams that operate in a global, digital environment.

MGT 6213. Orgnztnl Factors/Pro of Change. 3 Credits.

Behavioral and organizational components of individual, team, and firm-wide change. The dynamics that often accompany the change process.

MGT 6214. Consultative Processes. 3 Credits.

Theories and methods of planning, introducing, and coping with change in management through the helping process. Intended both for managers seeking an understanding of the consultative approach to planned change and for persons in staff or consultative roles seeking understanding of the consultative process. Same as SMPP 6214/ TSTD 6214.

MGT 6215. Conflict Management and Negotiations. 3 Credits.

The nature and sources of conflict and interdependence in social and organizational dynamics. Various means of resolving conflict, including the use of competitive and collaborative negotiations and mediation. Case discussion, exercises, role-playing, and simulation. Managers as mediators and negotiators.

MGT 6216. Cross-Cultural Management. 3 Credits.

The cultural foundations of organizations and institutions, with an emphasis on managerial behavior. Cross-cultural differences as they affect work-related behaviors, such as communication, attitude, teamwork, negotiation, and decision making.

MGT 6252. Global Human Resource Management. 3 Credits.

International applications of human resource management functions. Selection, preparation, and compensation of U.S. managers and executives for service abroad. Adaptation of human resource management policies to conform to specific cultural environments.

MGT 6253. Leadership and Executive Development. 3 Credits.

The required skills, knowledge, and abilities for effective executive leadership in organizations. Contemporary and classical leadership theories and research approaches.

MGT 6254. Negotiations and Labor Relations. 3 Credits.

Negotiation theory and practice in the context of labor-management relations in both union and nonunion settings. Emphasis on negotiation and conflict resolution skills, arbitration and grievance procedures, public-sector labor relations, labor laws and public policy, and global labor relations issues.

MGT 6257. Performance Management and Development. 3 Credits.

Comprehensive review of performance appraisal and training and development. Students learn to develop customized training programs that relate to the performance appraisal process.

MGT 6258. Applied Organization Leadership. 3 Credits.

In-depth studies of theories of leadership. Legal and ethical obligations of leadership. The leader in the process of assuming responsibility. Experiential exercises designed to develop the students' interpersonal abilities and leadership capacities.

MGT 6259. Employment Law and Ethics. 3 Credits.

An examination of the interaction of legal requirements and personal ethics and their influence on managerial decisions affecting the employment exchange. Special emphasis on equal employment opportunity and civil rights, workers' compensation, occupational health and safety, collective bargaining, and wrongful discharge.

MGT 6280. Entrepreneurship. 3 Credits.

In exploring the "entrepreneur as a phenomenon," students will be exposed to the theory and experiences associated with entrepreneurs, entrepreneurial acts, and entrepreneurship in all organizational settings—large, small, public, and private.

MGT 6281. Small Business Management. 3 Credits.

The start-up process and management of small firms. Field projects involve student teams as consultants to local businesses. Case studies. Emphasis on total customer service, international opportunities, and minority and women's issues.

MGT 6282. New Venture Initiation. 3 Credits.

Essentials of planning a new business venture. Sources of financing, evaluation of alternative new business ventures, and analysis of business functions. Creating and analyzing the business plan.

MGT 6283. Strategic Entrepreneurship. 3 Credits.

Capstone course for the small business/entrepreneurship concentration. Student teams assist companies in upgrading strategies. Prerequisites: MBAD 6265, MGT 6281, MGT 6282 and/or permission of instructor.

MGT 6284. Family Business Management. 3 Credits.

Challenges of managing a family business: risk strategies; successor development and succession planning; stages of family business growth; family motivations and goals. Field projects provide hands-on experience.

MGT 6285. Social Entrepreneurship. 3 Credits.

Theory and practice of social entrepreneurship. The power and limits of social entrepreneurship as a tool for creating sustainable and scalable social impact.

MGT 6286. Creativity and Innovation. 3 Credits.

How organizational culture encourages or discourages creativity in individuals and teams and how organizational policies support or undercut innovation. Methods for developing and strengthening creative ideas and innovative action. Factors such as breakthrough design that encourage creativity and support innovation. Students examine and assess, on both personal and organizational levels, the bases of and propensity for creativity and innovation.

MGT 6290. Special Topics. 0-3 Credits.

Experimental offering; new course topics and teaching methods. May be repeated once for credit.

MGT 6297. International Mgt Experience. 3 Credits.

Same as FINA 6297/ IBUS 6297/ MKTG 6297/ SMPP 6297. May be repeated for credit.

MGT 6298. Directed Readings & Research. 1-6 Credits.**MGT 6299. Thesis Seminar. 3 Credits.****MGT 6999. Thesis Research. 3 Credits.****MGT 8382. Fndtns/OrgnztlnBehavr&Devlpmnt. 3 Credits.**

The individuals and institutions central to the field of organizational behavior and development. Students read about, meet with, and discuss the work of persons central to the development of the field. Prerequisite: Doctoral candidate status with organizational behavior and development as a major or supporting field, or consent of instructor.

MGT 8383. Field Research in Organizational Settings. 3 Credits.

Applications of field research techniques in formal organizational settings. Examination of the logic of inquiry and techniques of qualitative data collection. Intensive interviewing and participant observation in field settings are emphasized.

MGT 8385. Special Topics in Research Methods. 3 Credits.

Research problems and issues related to student dissertations form topics for readings, group discussions, and assigned papers.

MGT 8386. Management Ideas in Progress. 3 Credits.

Doctoral students work with a variety of faculty members as they develop new ideas, research projects, and engage in seminal inquiry. The content and structure of the course will depend upon the instructor. Prerequisites: Doctoral candidate status with organizational behavior and development as a major or supporting field, or consent of instructor.

MGT 8390. Philosophy Foundations-Admin Research. 3 Credits.

Philosophy of science as applied to research in administration. Topics include the nature and current problems of epistemology, the development and role of theories, and the relationship between theory, methodology, and empirical data.

MGT 8391. Adv Prob-Research Methodology. 3 Credits.

Use of models and theoretical frameworks in research; formulation of research questions, hypotheses, operational definitions, research designs, sampling and data analysis approaches. For doctoral candidates who have completed the general examination and all courses and are preparing for their dissertation.

MGT 8397. Advanced Special Topics. 1-3 Credits.

Current research and scholarly issues in management science.

MGT 8998. Advanced Reading and Research. 1-12 Credits.

Limited to doctoral candidates preparing for the general examination. May be repeated for credit.

MGT 8999. Dissertation Research. 1-12 Credits.

Limited to doctoral candidates. May be repeated for credit.

MARKETING

FACULTY

Professors R.S. Achrol, S.S. Hassan, D. Hoffman, L.M. Maddox, T. Novak, P.A. Rau (*Chair*)

Associate Professors S. Elliott, M.L. Liebrecht-Himes, V. Perry

Assistant Professor S. Ham

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

Departmental prerequisite: BADM 3401 Basic Marketing Management is prerequisite to all courses in the Marketing Department; additional prerequisites are listed with the courses.

MKTG 3142. Consumer Behavior. 3 Credits.

Social, cultural, and psychological factors influencing the behavior of consumers. Models of buyer behavior, consumption patterns, market segmentation, attitude formation and change, brand loyalty, adoption of innovations, and store choice decisions. Marketing management and public policy implications of consumer research. Prerequisite: BADM 3401.

MKTG 3143. Marketing Research. 3 Credits.

Basic methods and techniques of market research. Designing a marketing research project: research questions, secondary and syndicated data, primary data collection approaches, data analysis and report presentation. Focus group interviews, questionnaire construction, statistical software packages. Prerequisite: BADM 3401 and STAT 2112 or STAT 2118.

MKTG 4148. Advertising and Marketing Communications. 3 Credits.

Planning an advertising campaign. Consumer and market information, message appeals, media selection and scheduling, measuring effectiveness. Current criticism and regulation of the advertising function. Other major marketing communication tools, including personal selling and sales promotion. Prerequisite: BADM 3401, MKTG 3142, and MKTG 3143.

MKTG 4149. Advanced Advertising Campaigns. 3 Credits.

Participation in the National Student Advertising Competition. Research, media planning, copywriting, layout/design. Travel to competition site. Prerequisite: BADM 3401 and MKTG 4148 and permission of instructor; corequisite: MKTG 4151.

MKTG 4149W. Advanced Advertising Campaigns. 3 Credits.

Experiential learning prepares students to execute an advertising campaign for entry in the American Advertising Federation's National Student Advertising Competition. Research, media planning, copywriting, and layout and design. Students travel to the competition site. Prerequisites: BADM 3401 and MKTG 4148 and permission of the instructor.

MKTG 4150. Salesmanship and Sales Management. 3 Credits.

Development of personal selling and presentation skills; examination of types of selling situations. Organization of sales department, sales planning and forecasting, quotas, territories, performance standards, and analysis and control of distribution costs. Prerequisite: BADM 3401; MKTG 3142.

MKTG 4151. Marketing Communications Planning. 3 Credits.

Components of a marketing communications plan. Writing a professional proposal, plans book, executive summary, and speech. Prerequisite: BADM 3401 and MKTG 4148; corequisite: MKTG 4149.

MKTG 4151W. Mktg Communications Planning. 3 Credits.

Components of a marketing communications plan. Writing a professional proposal, plans book, executive summary, and speech. Restricted to Permission of instructor required. Prerequisites: BADM 3401; MKTG 4148.

MKTG 4152. Retailing Management. 3 Credits.

A study of retailing management and strategy covering the current environment of retailing, retail market and financial analysis, store location and design, inventory management, and non-store and service retailing. Industry executive and student presentations; case analyses. Prerequisites: BADM 3401; MKTG 3142; MKTG 3143.

MKTG 4154. Digital Marketing. 3 Credits.**MKTG 4156. Integrated Marketing Communications. 3 Credits.****MKTG 4159. Marketing Strategy. 3 Credits.**

The capstone course for marketing majors. Analytical integration of material covered in previous marketing courses. Marketing strategy literature, financial dimensions of marketing decisions, and comprehensive cases. Prerequisites: BADM 3401 or BADM 3401W; MKTG 3142; MKTG 3143.

MKTG 4900. Special Topics. 0-3 Credits.

Experimental offering; new course topics and teaching methods. Prerequisites: BADM 3401; MKTG 3142; MKTG 3143.

MKTG 4900W. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods. Prerequisites: BADM 3401; MKTG 3142; MKTG 3143.

MKTG 4995. Independent Study. 1-12 Credits.

Assigned topics. Admission by prior permission of advisor. May be repeated once for credit. Prerequisite: BADM 3401.

MKTG 6241. Advanced Marketing Management. 3 Credits.**MKTG 6242. Buyer Behavior. 3 Credits.****MKTG 6243. Marketing Research. 3 Credits.**

The marketing research process: designing, conducting, and using market research studies. Managing the market research project; qualitative research; survey and experimental designs; data analysis with statistical software packages. Prerequisite: MBAD 6221.

MKTG 6246. Marketing of Services. 3 Credits.**MKTG 6248. Advertising and Sales Promotion. 3 Credits.****MKTG 6250. Selling/Sales Management. 3 Credits.****MKTG 6251. Product Management. 3 Credits.****MKTG 6252. Digital Marketing. 3 Credits.**

The impact of technology on sales and marketing strategy. Areas explored include e-branding, customer relationship management, permission e-mail, sales force technology enhancement, mobile commerce, online marketing research, and electronic channels of distributions.

MKTG 6255. Strategic Brand Management. 3 Credits.**MKTG 6259. Marketing Strategy. 3 Credits.**

Required capstone course for marketing students. Analysis of complex marketing problems involving policy and operational decisions; emphasis on creative marketing strategy.

MKTG 6290. Special Topics. 0-3 Credits.**MKTG 6297. International Management Experience. 3 Credits.**

Same as FINA 6297/ IBUS 6297/ MGT 6297/ SMPP 6297. May be repeated for credit.

MKTG 6298. Directed Readings and Research. 1-3 Credits.**MKTG 6299. Thesis Seminar. 3 Credits.****MKTG 6999. Thesis Research. 3 Credits.****MKTG 8341. Seminar: Marketing. 3 Credits.****MKTG 8397. Doctoral Seminar. 0-3 Credits.****MKTG 8998. Advanced Reading/Research. 1-12 Credits.**

Limited to doctoral candidates preparing for the general examination. May be repeated for credit.

MKTG 8999. Dissertation Research. 1-12 Credits.

Limited to doctoral candidates. May be repeated for credit.

STRATEGIC MANAGEMENT AND PUBLIC POLICY

FACULTY

Professors J.H. Beales III (*Chair*), H.J. Davis, J.J. Griffin, D.J. Lenn, J. Rivera

Associate Professors J.W. Cook, E.J. Englander, J. Forrer (*Research*), J.B. Thurman, J. Walter

Assistant Professors E.H. Kim, K. Martin, S. Patnaik, T. Radin (*Teaching*), G. de los Reyes

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

SMPP 4900. Special Topics. 1-3 Credits.

Experimental offering; new course topics and teaching methods.

SMPP 4900W. Corporate Social Responsibility (CSR). 0-3 Credits.

Why, how, and under what conditions businesses innovate to address changing stakeholder expectations of a corporation's responsibilities in a global economy.

SMPP 4995. Independent Study. 1-12 Credits.

Assigned topics. Admission by prior permission of advisor. May be repeated once for credit.

SMPP 6201. Business and Public Policy. 3 Credits.

SMPP 6202. Business-Government Relations. 3 Credits.

Historical and philosophical foundations of the business-government relationship. Regulation, international trade, and corporate political activities. Public policy issues facing business and the business community's political response. Prerequisite: MBAD 6284 .

SMPP 6203. Fed Gov't Regulation-Society. 3 Credits.

SMPP 6205. Business Representation and Lobbying. 3 Credits.

Strategies, tactics, and techniques used by business in representing itself to the legislative and executive branches and regulatory agencies of the federal government. Legal and practical constraints. Ethical considerations.

SMPP 6206. Applied Microeconomics. 3 Credits.

Applications of economic theory to public and private decisions with emphasis on public policy analysis. Focus on market structure and its implications. Imperfect information, common property, public goods and externalities. Economic analysis of government behavior and legal institutions. Prerequisite: ECON 6217 or ECON 6219 and MBAD 6222 .

SMPP 6207. Environment, Energy, Technology, and Society. 3 Credits.

The identification, examination, and evaluation of how environment, energy, and technology are interrelated and how these interactions influence policy formulation and implementation at the international, national, regional, industrial, and organizational levels. Same as PPPA 6067.

SMPP 6208. Macroeconomic Policy and Business. 3 Credits.

Determination of national income, employment, inflation, and interest rates. The role of expectations in the economy. Impact of government purchases, tax policy, and deficits. Monetary policy institutions. The global economy and exchange rates. Prerequisite: ECON 6218 or 6219 and MBAD 6222.

SMPP 6209. Seminar: Business Economics and Public Policy. 3 Credits.

Analysis and discussion of selected issues by students and representatives of government and business. Prerequisite: SMPP 6202 or MBAD 6284.

SMPP 6210. Strategic Environmental Management. 3 Credits.

Examination and analysis of the orientation and actions of private, public, and nonprofit sectors in relation to their natural environments. Emphasis on organizational interaction and effectiveness, particularly regarding business firms and industry, on issues of environmental quality and sustainability.

SMPP 6211. Corp. Env. Mg. in Dev. Nations. 3 Credits.

SMPP 6212. Business Law: Enterprise Org. 3 Credits.

SMPP 6213. Management of Strategic Issues. 3 Credits.

The body of management theory and practice that has evolved to identify, analyze, and resolve strategic organizational issues. Methodology of the field; applications to critical issues in labor relations, energy and pollution, marketing and consumerism, business-government relations, and the global economy.

SMPP 6214. Consultative Processes. 3 Credits.

Theories and methods of planning, introducing, and coping with change in management through the helping process. Intended both for managers seeking an understanding of the consultative approach to planned change and for persons in staff or consultative roles seeking understanding of the consultative process. Same as MGT 6214/ TSTD 6214.

SMPP 6215. Corporate Governance and Ethics. 3 Credits.

The theory, practice, and public policy environment of corporate governance. Purpose, functioning, and responsibilities of boards of directors. Power, control, and compensation of corporate management. Shareholders and stakeholders. Corporate governance in comparative national settings. Same as ACCY 6801.

SMPP 6216. Public Policy, Governance, and the Global Market. 3 Credits.

The socioeconomic foundations of government regulation and public policy cooperation for the governance of firms, markets and globalization. The evolution of national, transatlantic and multilateral frameworks for market and civil society governance, international competition policy cooperation, regulatory harmonization and industry standards. (Same as PPPA 6018).

SMPP 6241. GlobalCorporateResponsibility. 3 Credits.

SMPP 6271. Corporate Envir Mgmt & Policy. 1.5 Credit.

SMPP 6290. Special Topics. 1-3 Credits.

Experimental offering; new course topics and teaching methods. May be repeated once for credit.

SMPP 6291. Ethics and Business. 3 Credits.

An in-depth, comprehensive exploration, analysis, and evaluation of specific for profit and non-profit organization values, approaches, and outcomes related to multiple ethical ideals, systems, and practices.

SMPP 6292. Co-Curricular Activities in Responsible Management. 0 Credits.

This 0-credit course is required for students taking the Graduate Certificate in Responsible Management. The three components include completing a project or case study with an organization or faculty member related to the CRM mission; attending a series of seminars, panel discussions, or other pre-approved events relating to responsible management and submitting written reports; and completing designated community service hours. Restricted to GWSB Graduate Students Admitted to the Graduate Certificate in Responsible Management.

SMPP 6293. American Business History. 3 Credits.

The history of American business institutions in manufacturing, distribution, transportation, and finance. Particular attention will be given to the period since industrialization, with consideration of business institutions in their economic, legal, governmental, and social contexts. Same as HIST 6322.

SMPP 6295. Intern Qual&Quant Analysis. 3 Credits.

SMPP 6297. International Management Experience. 3-6 Credits.

Same as FINA 6297/ IBUS6297/ MGT 6297/ MKTG 6297. May be repeated for credit.

SMPP 6298. Directed Readings and Research. 1-6 Credits.

Supervised readings or research. Admission by prior permission of instructor. May be repeated once for credit.

SMPP 6299. Thesis Seminar. 3 Credits.

SMPP 6999. Thesis Research. 3 Credits.

SMPP 8311. Seminar: Public/Private Sector Institutions and Relationships. 3 Credits.

An analysis and critique of alternative theoretical frameworks for describing, understanding, and predicting the nature, values, and actions of American public and private institutions. Problems, potentials, and alternatives for structuring public and private institutional arrangements to meet the needs of society. Same as PPPA 8111. Prerequisite: doctoral degree candidate status.

SMPP 8321. Seminar in Strategic Management. 3 Credits.

Develops understanding of the major research streams in strategic management; exposure to theoretical research frameworks and methodological issues and approaches.

SMPP 8331. Seminar in Business and Public Policy. 3 Credits.

Develops understanding of the major research streams in business and public policy; exposure to theoretical research frameworks and methodological issues and approaches.

SMPP 8391. Seminar: Business Management. 3 Credits.

Examination of major current issues, both theoretical and empirical, affecting the development of the business enterprise. Topics to be announced. Emphasis on policy and strategic issues affecting the total enterprise. (Offered as the demand warrants).

SMPP 8998. Advanced Readings and Research. 1-12 Credits.

Limited to doctoral candidates preparing for the general examination. May be repeated for credit.

SMPP 8999. Dissertation Research. 1-12 Credits.

Limited to doctoral candidates. May be repeated for credit.

ELLIOTT SCHOOL OF INTERNATIONAL AFFAIRS

Dean R. E. Brigety II (effective October 2015), H. Agnew (Interim)

Associate Deans H. Agnew, L. Stephenson, H. Harrison

The Elliott School of International Affairs offers undergraduate and graduate programs to prepare individuals to understand and work in an increasingly globalized world. The historical roots of the Elliott School extend back to the establishment of the School of Comparative Jurisprudence and Diplomacy in 1898. In 1966, the School separated from the School of Government, Business, and International Affairs to become an independent unit, the School of Public and International Affairs. In 1987, the name was changed to the School of International Affairs, and in 1988 the School was renamed in honor of Evelyn E. and Lloyd H. Elliott. Lloyd Elliott was the president of George Washington University from 1965 to 1988.

The Elliott School offers the Bachelor of Arts degree in international affairs, Asian studies, Latin American and hemispheric studies, and Middle East studies. The School offers the Master of Arts degree in the fields of international affairs, Asian studies, European and Eurasian studies, global communication, international development studies, international science and technology policy, international trade and investment policy, Latin American and hemispheric studies, Middle East studies, and security policy studies; the Master of International Policy and Practice degree for mid-career professionals; and the Master of International Studies degree for students enrolled in master's degree programs at international universities with which the Elliott School has a special partnership.

These programs provide advanced academic and professional training in international affairs as preparation for employment in public, private, and nonprofit sectors. Focusing on major historical and contemporary issues in international affairs, the programs are both interdisciplinary and multidisciplinary, combining courses offered through the School with courses offered by other schools and departments of the University.

REGULATIONS

- Undergraduate Degree Requirements (p. 657)
- Graduate Degree Requirements (p. 658)

Undergraduate Degree Requirements and Policies

Academic Standing – To earn a bachelor's degree, students must complete 120 credits, meet the University General Education Requirement, and have a cumulative grade point average of at least 2.0. Courses in lifestyle, sport, and physical activity do not count toward the degree; some ROTC classes

are also excluded. Rules governing Academic Standing are applicable to students enrolled for a full-time program (12 credits or more) during the fall or spring semester.

Scholarship Performance in the Major – All courses indicated as requirements for the major, including courses taken to fulfill the third-year language proficiency requirement, must be completed with a minimum grade of C–. If a student receives a grade of D+, D, or D– in any of these courses, the credit will count toward the degree, but the student must either repeat the course or, with approval of the academic advisor, substitute another course; in either case, the student must earn a minimum grade of C–. If the student must repeat the course, credit for the repetition does not count toward the degree, and grades for both the initial course and the repeated course are used to compute the GPA. If the Office of Academic Advising and Student Services (<http://elliott.gwu.edu/undergraduate-advising>) allows another course to be substituted, the initial course is considered to be an elective. Students are expected to consult the Office of Academic Advising and Student Services in all matters affecting the program of study, such as changes, substitutions, withdrawals, or transfer of credit from other institutions.

Incompletes – Conditions under which the symbol I (Incomplete) may be assigned are described under University Regulations. Incomplete course work must be completed no later than one calendar year from the last day of the examination period of the semester or summer session in which the indication of I was assigned. When work for the course is complete, the I will be replaced by the grade earned. An indication of I that is not changed within this period automatically becomes an IF. The I cannot be changed by reregistering for the course at GW or by taking its equivalent elsewhere. In cases of well-documented extenuating circumstances, the instructor and student may jointly petition the Office of Academic Advising for additional time in which to complete the work of the course. Such petitions should be submitted within a year of the assignment of the I. Students are not permitted to register for any additional course work if they have more than two Incompletes on their record.

Pass/No Pass Option – A student who has a cumulative grade-point average of 2.5 or better may, with the approval of the Office of Academic Advising, take one course per semester and receive a grade of Pass, P, or No Pass, NP, which will be recorded on the student's transcript but will not be reflected in the cumulative grade average. A student must sign up for such an option at the Office of Academic Advising within the first eight weeks of classes. Under no circumstances may a student change from P/NP status to graded status, or vice versa, after the end of the eighth week of the semester. Foreign language courses and required courses in the student's degree program (except those in which the grade of P or NP is normally assigned) may not be taken on a P/NP basis. Freshmen may not elect to take a course on a P/NP basis. A transfer student may not elect to take a course on a P/NP basis until the second semester of enrollment in the University. No more than six

courses in which the grade of *P* or *NP* is assigned will apply toward the degree, including courses in which the grade of *P* or *NP* is normally given.

Study Abroad – Students are encouraged to study abroad. Those wishing to study abroad must consult their academic advisor and the University's Office for Study Abroad. A maximum of 34 credits may be transferred in from other institutions' study abroad programs. Credits for courses taken abroad through GW Study Centers and GW Summer Abroad do not apply to this maximum. Students must secure prior approval from the Office of Academic Advising for any plan of study abroad in order for the credit to apply toward the student's degree requirements. Students must apply to a program from the University's list of approved study abroad programs. A catalogue or other description of the study abroad program must be presented for consideration together with detailed descriptions of the courses to be taken. Visit the Office for Study Abroad website (<http://studyabroad.gwu.edu>) for more information.

Internships – Internships offer students the opportunity to make practical use of the knowledge they acquire in the classroom. Undergraduates who have completed at least 30 credits and have a cumulative grade-point average of at least 2.5 are eligible to arrange internships for credit, to a total maximum of 6 credits toward the degree. Transfer students are not eligible to arrange internships for credit until their second semester at GW. Academic work in the field of the internship is required. A zero-credit internship, which requires no additional academic work outside of the internship itself, is also available. Internships are available in the private, nonprofit, and public sectors. Students must register for internships (even if for zero credit) through the Office of Academic Advising but are responsible for locating their own internships; listings are posted at [gwired.gwu.edu/career](http://www.gwu.edu/career) (<http://www.gwu.edu/career>).

Double Majors – Students who complete the requirements of two majors in the Elliott School (such as international affairs and Asian studies) may graduate with a double major. Consult the Office of Academic Advising to officially declare both majors on the appropriate form.

Students in the Elliott School may take a second major offered by Columbian College of Arts and Sciences (majors in communication, English and creative writing are excluded), or the School of Engineering and Applied Science or School of Business (finance major only). Permission for the second major must be obtained from the appropriate administrative office of the other school.

Students in Columbian College of Arts and Sciences and the School of Engineering and Applied Science may take a second major in the Elliott School. Students wishing to pursue these options must request approval through the Elliott School Office of Academic Advising. Students must complete all degree

requirements for their major in their home school in order to graduate with a second major from the other school.

In all cases, double majors do not result in two degrees. See Double Majors and Double Degrees under University Regulations.

Special Honors – Students who complete a senior thesis or research seminar with a grade of A- or higher, earn a cumulative GPA of 3.7, and complete 60 credit hours in residence at GW will be awarded Special Honors.

Graduate Degree Requirements

Scholarship Requirements

Information on grades and computing the grade-point average is under University Regulations. Courses taken to satisfy degree requirements cannot be taken on a *CR/NC* basis, with the exception of some capstone courses.

Graduate students are required to maintain a minimum cumulative grade-point average of 3.0. A student whose grade-point average falls below 3.0 or who receives a grade of F in a course at any point after completing 9 credits is placed on academic probation. This probation extends through the period in which the student next attempts up to 12 credits of work, including prescribed courses. The student's academic advisor will meet with the program director and/or academic dean to review the student's record. The student's account will be put on hold until the student has met with the program director and/or academic dean to discuss the terms of probation. A student's program may be restricted by the program director if deemed necessary.

During the probation period, the student's performance will be monitored to determine suitability for continued study. The Office of Academic Advising and Student Services will inform the program director and/or academic dean if the student is no longer on probation or is eligible for dismissal. Incomplete grades are not allowed during the probation period and are grounds for dismissal. A student who fails to raise the cumulative grade-point average to 3.0 or above by the end of the period of probation or who is subject to probation for a second time at any point during the academic program is eligible for dismissal. If a student is eligible for dismissal, the academic dean in consultation with the program director will decide whether the student is to be dismissed from the Elliott School.

Readmission

A graduate student who has not been continuously enrolled or on approved leave of absence must file an application for readmission the semester before planning to return to school.

General Requirements for Master of Arts Degree Programs

Programs leading to the Master of Arts degree require a minimum of 40 credits of graduate course work and include a thesis option. Candidates for the degree of Master of Arts are required to submit a plan of study (fields, supporting course work, etc., as endorsed by the program director) to the Office of Academic Advising and Student Services for final approval by the end of the first semester in residence. Master's degrees are awarded after the student has completed the required course work and an acceptable thesis (if one is elected) and has satisfied the foreign language requirement (if required).

Students with sufficient academic background may waive a core course with approval of a designated faculty member from the department concerned. A course waiver does not reduce the number of credits required for the degree. Under special circumstances, upper-level undergraduate courses may be counted toward the master's degree when registration for graduate credit has been approved at the beginning of the course by the program director, the instructor, and the Office of Academic Advising and Student Services. The student who takes an undergraduate course for graduate credit is expected, by arrangement with the instructor, to do work at the graduate level in addition to the regular work of the course. Normally, no more than 9 credits of approved undergraduate course work may be taken for credit toward a graduate degree. Academic credit counted toward a previous degree may not be counted toward the master's degree.

All master's degree candidates must complete degree requirements within five years of their admission to the program. Students who are unable temporarily to continue their studies may request a leave of absence not to exceed one year. Extensions beyond the five-year period may be granted in exceptional circumstances, but the student will be required to register for Leave of Absence each semester.

Students are encouraged (and in some cases required) to take professional skills-based courses (IAFF 6502 Professional Skills I-IAFF 6503 Professional Skills II) and should consult their program guidelines for limits on the number of credits in these courses that can count toward their degree program. The maximum allowed by the Elliott School is 4 credits.

No more than a combined total of 6 graduate credits may be transferred from other accredited institutions or from non-degree status; these may be accepted only under limited conditions of time, grades, and relevance to the student's program. Foreign language course credit is not eligible for transfer.

Foreign Language Requirements

In most degree programs, a candidate for the degree of Master of Arts must demonstrate reading and speaking proficiency in a modern foreign language. All students in regional programs (including those who are not native speakers of English) must

demonstrate proficiency in a language appropriate to the study of the specific region. Students should consult their program guidelines for specific requirements, academic credit, and options for fulfilling the language requirement.

Capstone/Thesis Option

Every student must successfully complete a capstone or, with approval of the program director, a thesis near the conclusion of the master's program. For the capstone, the student must have a 3.0 grade-point average and must have completed or registered for 30 credits. If there is a lapse of time between completion of other course work and the capstone, the student must be continuously enrolled during this period. A student who fails to complete successfully the capstone may repeat it with the permission of the dean. If the student fails a second time, no further opportunity to complete the capstone will be permitted and the degree will not be conferred. Details concerning the capstone course vary across programs; students should consult their program guidelines for details.

For most programs, exceptional students may write a thesis if they qualify by having a minimum 3.5 grade-point average for at least 20 credits of course work in their program and developing a formal thesis proposal approved by their prospective thesis advisor and the program director.

The thesis subject should be selected as early as possible so as to permit effective integration with the student's course work. A student will not be permitted to register for (IAFF 6998 Thesis-IAFF 6999 Thesis) until the thesis subject has been formally submitted to the Office of Academic Advising. The subject must be approved by the member of the full-time faculty under whom the thesis is to be written, a second member of the faculty who will serve as a reader, and the student's program director. The thesis in its final form must have the approval of the thesis director and one other reader. All theses must be submitted electronically by May 1 prior to the student's final academic year and meet the formatting and other requirements set forth at GW's Electronic Theses and Dissertations Submission website (<http://library.gwu.edu/etds>).

Payment of tuition for thesis research entitles the candidate, during the period of registration, to the advice and direction of the thesis director and the other reader. In case a thesis is unfinished, the student must maintain continuous enrollment and is allowed one calendar year to complete it. If the preparation of the thesis extends beyond the additional calendar year, the student must register for the entire 6 credits of thesis again and pay tuition as for a repeated course.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Arts with a major in Asian studies (p. 665)
- Bachelor of Arts with a major in international affairs (p. 666)

- Bachelor of Arts with a major in Latin American and hemispheric studies (p. 667)
- Bachelor of Arts with a major in Middle East studies (p. 668)

Minors

- Minors (p. 669)

GRADUATE

Master's programs

- Master of Arts in the field of Asian studies (p. 673)
- Master of Arts in the field of European and Eurasian studies (p. 679)
- Master of Arts in the field of global communication (p. 683)
- Master of Arts in the field of international affairs (p. 692)
- Master of Arts in the field of international development studies (p. 693)
- Master of Arts in the field of international science and technology policy (p. 695)
- Master of Arts in the field of international trade and investment policy (p. 696)
- Master of Arts in the field of Latin American and hemispheric studies (p. 697)
- Master of Arts in the field of Middle East studies (p. 698)
- Master of Arts in the field of security policy studies (p. 699)
- Master of International Policy and Practice (p. 701)
- Master of International Studies (p. 701)

Combined programs

- Joint Master of Arts and Juris Doctor (p. 702)
- Joint Master of Arts and Master of Business Administration (p. 702)
- Dual Master of Arts and Master of Public Health (p. 701)

CERTIFICATES

The Elliott School of International Affairs offers a series of graduate certificates covering topics of specialized interest. The certificate programs are open to all graduate students presently enrolled in the Elliott School, Columbian College of Arts and Sciences, Graduate School of Education and Human Development, School of Business, and Milken Institute School of Public Health. The programs are also open to graduate students from other universities, individuals who have already earned a graduate degree, and individuals with a bachelor's degree and a minimum of eight years of relevant professional work experience. Applicants who have less than eight years of work experience are eligible to apply but must submit the same application materials required of other M.A. degree programs. Transfer credit from non-GW institutions is not accepted into any graduate certificate program. No more

than 6 credits of graduate course work taken in any degree or non-degree status within the University, including the Elliott School, may be included in any graduate certificate program. Additional information is available in the Elliott School Graduate Admissions office (<http://elliott.gwu.edu/graduate-admissions>).

Graduate certificate programs

- Global gender policy (p. 702)
- International science and technology policy (p. 703)
- Nuclear Policy (p. 704)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

IAFF 1005. Introduction to International Affairs: A Washington Perspective. 4 Credits.

Open only to first-year students in the Elliott School. An introduction to the study of international affairs, integrating material designed to orient students to the Elliott School, the University, and the city of Washington. Students who have transferred into the Elliott School should take PSC 1003 instead of this course. Credit may not be earned for both IAFF 1005 and PSC 1003.

IAFF 2040. Basic Topics in International Affairs. 0-3 Credits.

Topics announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Primarily for Elliott School freshmen and sophomores.

IAFF 2090. Latin America: Problems and Promise. 3 Credits.

An interdisciplinary course in Latin American studies designed to introduce undergraduates to the diverse, rich, and complex history, politics, economy, culture, and society of Latin America.

IAFF 2091. East Asia-Past and Present. 3 Credits.

An interdisciplinary course offering a comprehensive and integrated introduction to the civilizations and present problems of East Asia.

IAFF 2092. Russia and Eastern Europe: An Introduction. 3 Credits.

A multidisciplinary introduction to the lands and cultures of the former Soviet Union and Central and Eastern Europe. The main emphasis is on history and politics, with attention also given to economics, trade, geography, military matters, literature, and the media.

IAFF 2093. Africa: Problems and Prospects. 3 Credits.

Aspects of the environment, culture, and politics as they affect the present and anticipated future of Africa.

IAFF 2094. Europe: International and Domestic Interactions. 3 Credits.

A multidisciplinary view of contemporary Europe, including the E.U. states, other states of Eastern Europe, and Turkey. The widening processes of political, judicial, economic, cultural, and security integration. Prerequisite: IAFF 1005, PSC 1001.

IAFF 2190. Special Topics. 3 Credits.

IAFF 2190W. Special Topics. 3 Credits.

IAFF 3155. Spain in the Modern World. 3 Credits.

IAFF 3171. U.S. Foreign Policy Summer Program. 3-4 Credits.

The institutions and ideas that shape U.S. foreign policy, including the U.S. Congress and administration, foreign embassies, international organizations, think tanks, interest groups, and media outlets. A separate section of the course covers issues of reporting on foreign policy issues. The program has special admission criteria.

IAFF 3179. Special Topics in Science and Technology Policy. 0-3 Credits.

The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3180. Special Topics in Security Policy. 0-3 Credits.

The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3180W. Spec Topics in Security Policy. 0-3 Credits.

The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3181. Special Topics in Conflict Resolution. 0-3 Credits.

The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3182. Special Topics in Foreign Policy. 0-3 Credits.

The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3183. Special Topics in Development Policy. 0-3 Credits.

The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3184. Special Topics in Trade and International Economic Policy. 0-3 Credits.

The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3185. Special Topics in European and Eurasian Studies. 0-3 Credits.

The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3186. Special Topics in Asian Studies. 0-3 Credits.

The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3186W. SpecialTopics in Asian Studies. 0-3 Credits.**IAFF 3187. Special Topics in Latin American and Hemispheric Studies. 0-3 Credits.**

The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3188. Special Topics in Middle East Studies. 0-3 Credits.

The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3189. Special Topics in African Studies. 0-3 Credits.

The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3190. Special Topics in International Affairs. 0-3 Credits.

The course may be repeated for credit provided the topic differs. Prerequisite: IAFF 1005 or PSC 1003; junior or senior standing.

IAFF 3190W. Special Topics. 0-3 Credits.**IAFF 3192. ESIA Undergraduate Scholars Workshop. 1 Credit.**

For Elliott School juniors and seniors who have applied to and been accepted into the ESIA Undergraduate Scholars Program. Students fine-tune their research questions, conduct the bulk of their research, draft abstracts, and outline their papers. See <http://elliott.gwu.edu/academics/ugrad/scholars/index.cfm> for more information.

IAFF 3193W. ESIA UG Scholars Course. 3 Credits.**IAFF 3195. Internship. 0-3 Credits.**

Internships in public, private, and nonprofit organizations concerned with international affairs. Students must meet selection criteria, find a sponsoring faculty member, and receive approval from the Elliott School Office of Academic Advising and Student Services. May be repeated for up to 6 credits with permission.

IAFF 3198. Independent Study and Research. 1-3 Credits.

For juniors and seniors with a minimum grade-point average of 3.0. Students must find a sponsoring faculty member and receive approval from the Elliott School Office of Academic Advising and Student Services. May be repeated for credit with permission of the dean.

IAFF 4191. Research Seminar. 3 Credits.

Intensive readings, discussion, research, and writing. Students must meet selection criteria and receive advisor approval. For Elliott School juniors and seniors only. Restricted to For Elliott School juniors and seniors only.

IAFF 4191W. Research Seminar. 3 Credits.

Intensive readings, discussion, research, and writing. Students must meet selection criteria and receive advisor approval. For Elliott School juniors and seniors only.

IAFF 4199. Senior Thesis. 3 Credits.

For Elliott School seniors only. Students must meet selection criteria, find a sponsoring faculty member, and receive approval from the Elliott School Office of Academic Advising and Student Services.

IAFF 5700. Special Topics. 3 Credits.**IAFF 6101. IA Cornerstone. 3 Credits.**

Political, economic, and social theories of international relations and their applications to practice.

IAFF 6102. Global Gender Policy. 3 Credits.

An interdisciplinary and comparative approach to examination of policies targeted at achieving gender equality and of the costs of policies that are not gender-specific. Topics include poverty reduction, environmental sustainability, social justice, global and personal security, and prevention of and responses to extreme calamities and crises. How global gender policies are rationalized, adopted, implemented, and assessed. Focus on "what works" and why it works; gaps that remain in achieving global gender equality.

IAFF 6106. Nuclear Weapons. 3 Credits.

The technology and politics associated with nuclear weapons. Strategy and deterrence, force planning and operations, and the prospect of nuclear terrorism.

IAFF 6118. Special Topics in International Affairs. 3 Credits.

Topics announced in the Schedule of Classes.

IAFF 6121. International Development Studies Cornerstone. 3 Credits.

Introduction to the concepts and methods of international development. Open only to M.A. candidates in international development studies.

IAFF 6122. Development Policy and Practice. 3 Credits.

An overview of economic development in developing countries; key challenges of economic growth, poverty alleviation, and development.

IAFF 6136. Gender and Development. 3 Credits.

Theoretical approaches to gender and development and debates over how to promote gender equity and rights across the gender spectrum. Key issues in gender and development and the range of actors who are involved in promoting gender equality. General patterns, lessons with broader applications, and challenges and differences within and between societies.

IAFF 6137. Development Studies Pre-Capstone Workshop. 1 Credit.

Students work in teams to find a suitable client and negotiate a project, with detailed terms of reference and a work plan to be carried out in the spring semester. Open only to M.A. candidates in international development studies.

IAFF 6138. Special Topics in International Development Studies. 0-3 Credits.

Topics announced in the Schedule of Classes.

IAFF 6139. International Development Studies Capstone. 3 Credits.

A project-oriented development course abroad, designed to synthesize the skills and knowledge that students have acquired in their graduate study. Open only to M.A. candidates in international development studies.

IAFF 6141. International Science and Technology Policy Cornerstone. 3 Credits.

Introduction to the study of international science and technology policy; focus on policy issues that arise from interactions between scientific and technological developments and government activity.

IAFF 6142. Technology Creation/Diffusion. 3 Credits.

Examination of the relationship between invention (inception), innovation (first application), and dissemination (diffusion) of technological knowledge; focus on the technological environment prevailing in the major developed market economies.

IAFF 6145. U.S. Space Policy. 3 Credits.

Origins, evolution, current status, and future prospects of U.S. space policies and programs. U.S. civilian, military, and national security space programs and space activities of the U.S. private sector.

IAFF 6146. Space Law. 3 Credits.

The underlying principles of international space law, with emphasis on issues of particular concern as the uses of space increase for exploration, commerce, and security.

IAFF 6148. Special Topics in Space Policy. 3 Credits.

Topic announced in the Schedule of Classes.

IAFF 6151. Environmental Policy. 3 Credits.

Examination of public policies designed to protect the human and physical environment; focus on the ways science and technology can simultaneously create new environmental problems and contribute to their mitigation and prevention.

IAFF 6153. Science, Technology, and National Security. 3 Credits.

The contributions of science and technology to U.S. security in military, intelligence, and homeland security activities.

IAFF 6158. Special Topics in International Science and Technology Policy. 0-3 Credits.

Topics announced in the Schedule of Classes.

IAFF 6159. ISTP Capstone Project. 3 Credits.

A seminar designed to synthesize the skills and knowledge that students have acquired in their graduate study. Open only to M.A. candidates in science and technology policy.

IAFF 6160. Defense Policy and Program Analysis. 3 Credits.

Examination of how national security policy is formulated and translated into a defense budget, program priorities, and force structure. Focus on nuclear forces.

IAFF 6163. Transnational Security. 3 Credits.

Overview of security concerns that transcend state borders, including terrorism, drug trafficking, organized crime, weapons proliferation, migration, and environmental degradation.

IAFF 6165. Fundamentals of Intelligence. 3 Credits.

The institutional structure of the intelligence community; the intelligence production cycle, including tasking, collection, analysis, covert action, and counterintelligence; and relations between the intelligence and policy communities.

IAFF 6167. Defense Policy and Program Analysis II. 3 Credits.

Analysis of the development of national security policy and analytic techniques to derive a defense program and force structure from it. Special attention to general-purpose forces.

IAFF 6169. Homeland Security. 3 Credits.

The central missions of a homeland security agency: domestic security, emergency preparedness, technology policy, timely intelligence, counterintelligence, and preemptive actions. How the U.S. has dealt historically with internal security matters; contemporary approaches to security problems.

IAFF 6171. Introduction to Conflict Resolution. 3 Credits.

Interstate disputes, contemporary civil wars, complex political emergencies, and other forms of organized violence.

IAFF 6173. Security and Development. 3 Credits.

Consideration of the relationship between security and development reflecting the growing interest from the security field in issues that have traditionally been the purview of development, and vice versa.

IAFF 6186. Special Topics in Security Policy Studies. 3 Credits.

Topics announced in the Schedule of Classes.

IAFF 6189. Security Policy Studies Capstone. 3 Credits.

A project-oriented course, designed to synthesize the skills and knowledge that students have acquired in their graduate study. Open only to M.A. candidates in security policy studies.

IAFF 6198. Special Topics in International Trade and Investment Policy. 0-3 Credits.

Topics announced in the Schedule of Classes.

IAFF 6199. International Trade and Investment Policy Capstone. 1 Credit.

A project-oriented course, designed to synthesize the skills and knowledge that students have acquired in their graduate study. Open only to M.A. candidates in international trade and investment policy.

IAFF 6208. Special Topics in Global Communication. 0-3 Credits.

Topics announced in the Schedule of Classes.

IAFF 6209. Global Communication Capstone. 3 Credits.

A project-oriented course, designed to synthesize the skills and knowledge that students have acquired in their graduate study. Open only to M.A. candidates in global communication.

IAFF 6211. MIPP Practicum. 3 Credits.

For Master of International Policy and Practice degree candidates only.

IAFF 6302. Taiwan: Internal Development and Foreign Policy. 3 Credits.

The social, political, and economic development in Taiwan since World War II; Taiwan's foreign affairs.

IAFF 6305. U.S.-South Asia Relations. 3 Credits.

The nature of challenges and opportunities facing the South Asia region and the U.S. policy response. The rise of India as a global actor; relations between India and Pakistan; political transformation in the countries of the region, including Nepal and Sri Lanka.

IAFF 6308. Intl Relations of South Asia. 3 Credits.

IAFF 6318. Special Topics in Asian Studies. 0-3 Credits.

Topics announced in Schedule of Classes.

IAFF 6321. European and Eurasian Studies Cornerstone. 3 Credits.

Survey of current research on Europe and Eurasia. Research paper required. Required of M.A. candidates in European and Eurasian studies; open to others with permission of the instructor.

IAFF 6338. Special Topics in European and Eurasian Studies. 0-3 Credits.

Topics announced in the Schedule of Classes.

IAFF 6339. European and Eurasian Studies Capstone. 3 Credits.

Survey of current research on Europe and Eurasia. Research paper required. Required of M.A. candidates in European and Eurasian studies; open to others with permission of the instructor.

IAFF 6341. Latin American and Hemispheric Studies Cornerstone. 3 Credits.

Multidisciplinary foundation course for the Latin American and hemispheric studies program.

IAFF 6342. Drug Trafficking in the Americas. 3 Credits.

A historical, comparative, and contemporary picture of drug trafficking in the Americas and the anti-narcotics policies to combat this trade.

IAFF 6343. Indigenous Social Movements. 3 Credits.

IAFF 6357. Pre-Capstone Workshop. 1 Credit.

IAFF 6358. Special Topics in Latin American and Hemispheric Studies. 0-3 Credits.

Topics announced in the Schedule of Classes.

IAFF 6359. Latin American and Hemispheric Studies Capstone. 3 Credits.

A project-oriented course, designed to apply the skills and synthesize the knowledge that students have acquired in their graduate study. Open only to M.A. candidates in Latin American and hemispheric studies.

IAFF 6361. Middle East Studies Cornerstone. 1 Credit.

Multidisciplinary foundation course for the Middle East studies program. Introduction to key issues.

IAFF 6362. Regional Security in Middle East. 3 Credits.

The nature, elements, and future of security in the Middle East region. Various analytical frameworks are examined to consider the interplay of national interests, ideology, and regionalism. Issues in regional security.

IAFF 6363. Political Economy/Middle East. 3 Credits.

Current political economy of the Middle East, including an overview of Islamic economic concepts and political organizations.

IAFF 6364. Religion and Society in the Modern Middle East. 3 Credits.

Comparative overview, both historical and current, of religious and social trends in the Middle East.

IAFF 6378. Special Topics in Middle East Studies. 0-3 Credits.

Topics announced in the Schedule of Classes.

IAFF 6379. Middle East Studies Capstone. 3 Credits.

A project-oriented course, designed to synthesize the skills and knowledge that students have acquired in their graduate study. Open only to M.A. candidates in Middle East studies.

IAFF 6501. Quant Analysis Int'l Aff Prac. 3 Credits.

Overview of quantitative measurement, data summary, statistical inference, and elementary modeling such as linear regression.

IAFF 6502. Professional Skills I. 1 Credit.

Short courses that focus on developing specialized skills for international affairs professionals. Topics announced in the Schedule of Classes.

IAFF 6503. Professional Skills II. 1 Credit.

Continuation of IAFF 6502. Short courses that focus on developing specialized skills for international affairs professionals. Topics announced in the Schedule of Classes.

IAFF 6504. Intermediate Conversation. 1 Credit.

Short courses designed to develop professional language skills for international affairs students. Specific languages announced in the Schedule of Classes.

IAFF 6505. Elliott School Seminars. 0-3 Credits.

Topics announced in the Schedule of Classes.

IAFF 6515. Graduate Internship in International Affairs. 0 Credits.

Limited to Elliott School M.A. degree candidates. Internship and research paper involving experience at an international organization or with international issues.

IAFF 6516. Independent Study and Research. 1-3 Credits.

Limited to Elliott School M.A. degree candidates. Written permission of instructor required.

IAFF 6517. Independent Study and Research. 1-3 Credits.

IAFF 6521. U.S. Foreign Policy Summer Program. 3-4 Credits.

The institutions and ideas that shape U.S. foreign policy, including the U.S. Congress and administration, foreign embassies, international organizations, think tanks, interest groups, and media outlets. A separate section of the course covers issues of reporting on foreign policy issues.

IAFF 6898. Capstone Workshop. 1 Credit.

The first part of a two-semester project that addresses a concrete policy problem or issue in international affairs. In small teams, students refine the policy question of the capstone project, develop a research strategy, select appropriate research methods, and begin research.

IAFF 6899. Capstone Course. 3 Credits.

Completion of the capstone sequence by conduct of the group's research, completion of the capstone report, and oral presentation of research findings and recommendations. Prerequisites: IAFF 6898.

IAFF 6998. Thesis. 3 Credits.

Open to Elliott School M.A. candidates who have selected the thesis option.

IAFF 6999. Thesis. 3 Credits.

Open to Elliott School M.A. candidates who have selected the thesis option.

UNDERGRADUATE PROGRAMS

Bachelor's programs

- Bachelor of Arts with a major in Asian studies (p. 665)
- Bachelor of Arts with a major in international affairs (p. 666)
- Bachelor of Arts with a major in Latin American and hemispheric studies (p. 667)
- Bachelor of Arts with a major in Middle East studies (p. 668)

Minors

- Minors (p. 669)

BACHELOR OF ARTS WITH A MAJOR IN ASIAN STUDIES

GENERAL REQUIREMENTS

Curriculum Requirements for the First Two Years

Curriculum requirements that Elliott School students should try to address in their freshman and sophomore years are listed below. Consult the Elliott School Undergraduate General Requirements (<http://elliott.gwu.edu/undergraduate-programs/requirements>) before choosing courses to fulfill these requirements. Information on credit by examination or

waiving curriculum requirements is available from academic advisors in the Elliott School.

As a basis for all Elliott School Bachelor of Arts programs, students take:

IAFF 1005	Introduction to International Affairs: A Washington Perspective
ECON 1011	Principles of Economics I *
ECON 1012	Principles of Economics II *
PSC 1001	Introduction to Comparative Politics *
HIST 1011	World History, 1500-Present **
ANTH 1002 or GEOG 1001	Sociocultural Anthropology * Introduction to Human Geography
UW 1020	University Writing *
One course in mathematics ***	
One course in science (lab required) ***	
Humanities/Creative Arts (9 credits of humanities or 6 credits of humanities plus 3 credits of creative arts courses) ***	
Third year proficiency in a modern foreign language ***	

*These courses satisfy many of the university general education requirement (p. 29).

** While HIST 1011 satisfies the university general education requirement in humanities, it does not meet the Elliott School's school-specific requirement for humanities/creative arts. A list of courses that fulfill the humanities and creative arts requirements (<http://bulletin.gwu.edu/international-affairs/undergraduate-programs/ba-asian-studies/undergraduate-programs/supporting-courses/#humanities>) can be found online.

***Additional university- and school-specific general education courses are required for all Elliott School undergraduates. A list of the courses that fulfill the math, science, and the humanities and/or creative arts humanities and creative arts requirements can be found on the Elliott School Undergraduate Programs website (<http://elliott.gwu.edu/undergraduate-programs/supporting-courses>).

MAJOR REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Elliott School of International Affairs.

A list of designated courses that fulfill major requirements can be found on the Asian Studies major webpage (<http://>

elliott.gwu.edu/asian-studies-major). With approval of the advisor or program director, pertinent special topics or other courses may be taken in place of those listed.

Required courses for the major:

IAFF 2091	East Asia-Past and Present
ECON 2151	Economic Development
ECON 2169	Introduction to the Economy of China
ECON 2170	Intro to the Economy of Japan
Three courses from a list of approved history and culture courses	
Two approved courses from the following:	
PSC 2369	Comparative Politics of South Asia
PSC 2370	Comparative Politics of China and Northeast Asia
PSC 2371	Politics and Foreign Policy of China
PSC 2373	Comparative Politics of Southeast Asia
PSC 2374	Politics and Foreign Policy of Japan
PSC 2377	Comparative Politics of the Middle East
PSC 2377W	Comparative Politics of the Middle East
PSC 2379	Politics and Foreign Policy of Israel
PSC 2381	Comparative Politics of Middle and Southern Africa
PSC 2383	Comparative Politics of Latin America
PSC 2439	International Political Economy
PSC 2440	Theories of International Politics
PSC 2442	International Organizations
PSC 2442W	International Organizations
PSC 2444	Public International Law
PSC 2446	U.S. Foreign Policy
PSC 2449	International Security Politics
PSC 2449W	International Security Politics
PSC 2461	European-Atlantic Relations
PSC 2468	Post-Soviet Foreign Policy
PSC 2475	International Relations of East Asia

GEOG 3165 Geography of South Asia

One course in Asian literature

Three upper-division Asia-related courses selected in consultation with the program director

The program must include a research methods course and a regional foundation course on a region other than the student's major

Completion of third-year-level language proficiency in an approved Asian language is required

BACHELOR OF ARTS WITH A MAJOR IN INTERNATIONAL AFFAIRS

GENERAL REQUIREMENTS

Curriculum Requirements for the First Two Years

Curriculum requirements that Elliott School students should try to address in their freshman and sophomore years are listed below. Consult the Elliott School Undergraduate General Requirements (<http://elliott.gwu.edu/undergraduate-programs/requirements>) before choosing courses to fulfill these requirements. Information on credit by examination or waiving curriculum requirements is available from academic advisors in the Elliott School.

As a basis for all Elliott School Bachelor of Arts programs, students take:

IAFF 1005 Introduction to International Affairs: A Washington Perspective

ECON 1011 Principles of Economics I *

ECON 1012 Principles of Economics II *

PSC 1001 Introduction to Comparative Politics *

HIST 1011 World History, 1500-Present **

ANTH 1002 Sociocultural Anthropology *

or GEOG 1001 Introduction to Human Geography

UW 1020 University Writing *

One course in mathematics ***

One course in science (lab required) ***

Humanities/Creative Arts (9 credits of humanities or 6 credits of humanities plus 3 credits of creative arts courses) ***

Third year proficiency in a modern foreign language ***

*These courses satisfy many of the university general education requirement (p. 29).

** While HIST 1011 satisfies the university general education requirement in humanities, it does not meet the Elliott School's school-specific requirement for humanities/creative arts. A list of courses that fulfill the humanities and creative arts requirements (<http://bulletin.gwu.edu/international-affairs/undergraduate-programs/ba-international-affairs/undergraduate-programs/supporting-courses/#humanities>) can be found online.

***Additional university- and school-specific general education courses are required for all Elliott School undergraduates. A list of the courses that fulfill the math, science, and the humanities and/or creative arts humanities and creative arts requirements can be found on the Elliott School Undergraduate Programs website (<http://elliott.gwu.edu/undergraduate-programs/supporting-courses>).

MAJOR REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Elliott School of International Affairs.

A list of designated courses that fulfill major requirements is at the International Affairs major webpage (<http://elliott.gwu.edu/international-affairs-major/fundamentals>). With approval of the advisor or program director, pertinent special topics or other courses may be taken in place of those listed.

Requirements for the major:

ECON 2180	Survey of International Economics
or ECON 2181	International Trade Theory and Policy
ECON 2182	International Macroeconomic Theory and Policy

One upper-division course from designated lists for each of the following:

Research methods (from ANTH, ECON, GEOG, IAFF, PSC, PSYC, PUBH, SOC, STAT)

International and comparative politics (from PSC or IAFF)

Historical analysis: U.S. foreign policy (from HIST)

An ANTH or GEOG course

Demonstrate third-year proficiency in an appropriate modern foreign language by course work or examination

Two regional foundational courses covering different regions

15 credits of additional course work in either a functional or regional concentration:

Functional concentrations are international politics; international economics; comparative political, economic, and social systems; international development; contemporary cultures and societies; conflict resolution; security policy; global public health; international environmental studies

Regional concentrations are Africa, Asia, Europe and Eurasia, Latin America, Middle East

BACHELOR OF ARTS WITH A MAJOR IN LATIN AMERICAN AND HEMISPHERIC STUDIES

GENERAL REQUIREMENTS

Curriculum Requirements for the First Two Years

Curriculum requirements that Elliott School students should try to address in their freshman and sophomore years are listed below. Consult the Elliott School Undergraduate General Requirements (<http://elliott.gwu.edu/undergraduate-programs/requirements>) before choosing courses to fulfill these requirements. Information on credit by examination or waiving curriculum requirements is available from academic advisors in the Elliott School.

As a basis for all Elliott School Bachelor of Arts programs, students take:

IAFF 1005 Introduction to International Affairs: A Washington Perspective

ECON 1011 Principles of Economics I *

ECON 1012 Principles of Economics II *

PSC 1001 Introduction to Comparative Politics *

HIST 1011 World History, 1500-Present **

ANTH 1002 Sociocultural Anthropology *

or GEOG 1001 Introduction to Human Geography

UW 1020 University Writing *

One course in mathematics ***

One course in science (lab required) ***

Humanities/Creative Arts (9 credits of humanities or 6 credits of humanities plus 3 credits of creative arts courses) ***

A list of the courses that fulfill the math, science, and the humanities and/or creative arts humanities and creative arts requirements can be found on the Elliott School Undergraduate Programs website (<http://elliott.gwu.edu/undergraduate-programs/supporting-courses>).

MAJOR REQUIREMENTS

The following requirements must be fulfilled:

The general requirements stated under Elliott School of International Affairs.

A list of designated courses that fulfill major requirements is at the Middle East Studies major webpage (<http://elliott.gwu.edu/middle-east-studies-major>). With approval of the advisor or program director, pertinent Special Topics or other courses may be taken in place of those listed.

Required courses for the major:

IAFF 2040	Basic Topics in International Affairs (Middle East) (as a foundation course)
-----------	--

Two of the following:

HIST 2803	The Ancient Near East and Egypt to 322 B.C.
HIST 2804	History of Ancient Israel
HIST 3060	Modern Jewish History
HIST 3801	Topics in Middle Eastern History
HIST 3810	History of the Middle East to 1800
HIST 3811	The Middle East in the 20th Century

Two of the following:

PSC 2377	Comparative Politics of the Middle East
PSC 2379	Politics and Foreign Policy of Israel
PSC 2476	The Arab-Israeli Conflict
PSC 2478	International Relations of the Middle East

Two of the following:

REL 1009	The Hebrew Scriptures
----------	-----------------------

REL 2211	Rabbinic Thought
REL 2401	Islam
REL 3414	Islamic Philosophy and Theology
REL 3431	Sufism (Islamic Mysticism)
REL 3475	Islamic Religion and Art
REL 3481	Women in Islam

One of the following:

ECON 2136	Environmental and Natural Resource Economics
ECON 2151	Economic Development
ECON 2180	Survey of International Economics
ECON 2181 & ECON 2182	International Trade Theory and Policy and International Macroeconomic Theory and Policy

One of the following literature courses:

ARAB 3501	Arabic and Arab Identity
ARAB 4001	Genres in Modern Arabic Literature
ARAB 4002	Arabic Narratives Through the Ages
HEBR 4001 & HEBR 4002	Advanced Hebrew Literature I and Advanced Hebrew Literature II

Two additional courses related to the Middle East from any discipline, selected in consultation with the program director

A research methods course and a regional foundation course on a region other than the student's major

Completion of third-year-level language proficiency in one of the following:

ARAB 3301	Modern Arabic Literature
ARAB 3302	Media Arabic
ARAB 3311	Business Arabic
HEBR 3301	Modern Hebrew Fiction
or HEBR 3302	The Israeli Media
PERS 3002	Media Persian

MINORS

Elliott School students may take a minor, such as business, economics, or languages, in other schools of the University.

Students from other schools of the University may take a minor in international affairs in the Elliott School. Contact the Office of Academic Advising (<http://elliott.gwu.edu/undergraduate-advising>) in the Elliott School.

The minor is 18-21 credits, plus 0-8 credits of foreign language, and consists of the requirements listed below.

Foreign Language Requirement

First-year Foreign Language Requirement (0-8 Credits)

Students must prove first year proficiency in a modern foreign language by course work or examination.

If you feel you are beyond the first year of a modern foreign language, but cannot demonstrate this by course work at GW, contact your Elliott School academic advisor (<http://elliott.gwu.edu/academics/ugrad/advising/advisors.cfm>).

ITAL 1001	Basic Italian I
ITAL 1002	Basic Italian 2
JAPN 1001	Beginning Japanese I
JAPN 1002	Beginning Japanese II
KOR 1001	Beginning Korean I
KOR 1002	Beginning Korean II
PERS 1001	Beginning Persian I
PERS 1002	Beginning Persian II
SLAV 1001	First-Year Russian I
SLAV 1002	First-Year Russian II

Advanced Fundamentals and Regional Foundations

- Anthropology or Geography (<https://elliott.gwu.edu/international-affairs-minor/#anthro>) (3 credits)
- Historical Analysis: US Foreign Policy (<https://elliott.gwu.edu/international-affairs-minor/#hist>) (3 credits)
- International and Comparative Politics (<https://elliott.gwu.edu/international-affairs-minor/#poli>) (3 credits)
- International Economics (<https://elliott.gwu.edu/international-affairs-minor/#econ>) (3 or 6 credits)
- Regional Foundations (<https://elliott.gwu.edu/international-affairs-minor/#regional>) (6 credits)

Anthropology or Geography (3 Credits)

Students must complete one course from anthropology or geography that is relevant to international affairs.

ANTH 1002: Sociocultural Anthropology is a prerequisite to most of these ANTH courses. GEOG 1001: Human Geography is a prerequisite to many of these GEOG courses. Please consult the Bulletin for details.

Select one:

ANTH 2506	Religion, Myth, and Magic
ANTH 3501	Anthropology of Development
ANTH 3502	Cultural Ecology
ANTH 3503	Psychological Anthropology
ANTH 3504	Illness, Healing, and Culture
ANTH 3506	Politics, Ethnicity, and Nationalism
ANTH 3507	Kinship, Family, and Community
ANTH 3508	Art and Culture
ANTH 3513	Anthropology of Human Rights
ANTH 3601	Language, Culture, and Cognition
GEOG 2110	Climate and Human Ecology
GEOG 2125	Transportation Systems and Networks
GEOG 2127	Population Geography
GEOG 2133	People, Land, and Food
GEOG 2134	Energy Resources
GEOG 2137	Environmental Hazards

GEOG 2141	Cities in the Developing World
GEOG 2145	The Cultural Landscape
GEOG 2146	Political Geography
GEOG 2147	Military Geography
GEOG 2148	Economic Geography
GEOG 3120	
GEOG 3132	Environmental Quality and Management
GEOG 3143	Urban Sustainability
GEOG 3810	Planning Cities

Historical Analysis: US Foreign Policy (3 Credits)

Students must complete one course pertaining to the history of the US approach to contemporary international affairs.

Select one:

HIST 2340	US Diplomatic History
HIST 2710	The United States in Global Context, 1898–Present
AMST 2710	The United States in Global Context, 1898–Present
HIST 3035	The United States and the Wars in Indochina, 1945–1975
HIST 3332	History of American Foreign Policy Since World War II
HIST 3333	History of American Foreign Policy Since World War II

International and Comparative Politics (3 Credits)

Students must complete one course pertaining to international political issues and theories from either an international relations or comparative politics perspective.

PSC 1001: Introduction to Comparative Politics or PSC 1003: Introduction to International Relations is a prerequisite to these courses. Please consult the Bulletin for details.

Select one:

IAFF 3190	Special Topics in International Affairs (International Law)
IAFF 4191	Research Seminar (International Politics and Security Policy)
PSC 2334	Global Perspectives on Democracy
PSC 2337	Development Politics

PSC 2338	Nationalism
PSC 2439	International Political Economy
PSC 2440	Theories of International Politics
PSC 2442	International Organizations
PSC 2444	Public International Law
PSC 2446	U.S. Foreign Policy
PSC 2449	International Security Politics
PSC 2990	Selected Topics (Ethics in International Affairs)
IAFF 2040	Basic Topics in International Affairs (Ethics in International Affairs)

International Economics (3 or 6 credits)

Students must complete one or two courses pertaining to the theory of international economics.

ECON 1011	Principles of Economics I
ECON 1012	Principles of Economics II
ECON 2180	Survey of International Economics

- OR -

ECON 2181	International Trade Theory and Policy
AND	
ECON 2182	International Macroeconomic Theory and Policy

Regional Foundations (6 Credits)

Students must take two courses from the lists below to gain an understanding of two regions of the world outside of the United States. The courses must represent two different regions.

Select two regions:

Africa

ANTH 3708	Anthropology of Africa
GEOG 3164	The Geography of Africa
HIST 3501	Topics: Africa
HIST 3540	West Africa to Independence
IAFF 2093	Africa: Problems and Prospects
IAFF 2190W	Special Topics (North Africa and the World)

IAFF 3189 Special Topics in African Studies
(Transnational Justice in Africa)

PSC 2381 Comparative Politics of Middle and
Southern Africa

PSC 2482 African International Politics

** Academic advisor approval required for courses not listed here.*

Latin America

ANTH 3702 Anthropology of Latin America

ECON 2185 Economic History and Problems of Latin
America

GEOG 3161 Geography of Latin America

HIST 3701 Topics in Latin American History (Latin
America and the World since 1820)

HIST 3711 History of Latin America II

IAFF 2090 Latin America: Problems and Promise

IAFF 2190W Special Topics (Latin American
Populism)

IAFF 3187 Special Topics in Latin American and
Hemispheric Studies (Political Economy
of Latin America)

PSC 2383 Comparative Politics of Latin America

PSC 2484 International Relations of Latin America

** Academic advisor approval required for courses not listed here.*

Asia

ANTH 3704 Cultures of Southeast Asia

ANTH 3705 Anthropology of East Asia

GEOG 3165 Geography of South Asia

HIST 3601 Topics: Asian History (Modern Asia:
1750 to present)

HIST 3640 History of Southeast Asia

HIST 3840 History of Central Asia

IAFF 2091 East Asia-Past and Present

IAFF 3186 Special Topics in Asian Studies
(Development issues in Southeast
Asia; History and Politics of South Asia;
Politics and Conflict of South Asia)

IAFF 3190 Special Topics in International Affairs
(Human Rights and Democracy in
Southeast Asia)

PSC 2369 Comparative Politics of South Asia

PSC 2373 Comparative Politics of Southeast Asia

PSC 2475 International Relations of East Asia

** Academic advisor approval required for courses not listed here.*

Europe and Eurasia

IAFF 2092 Russia and Eastern Europe: An
Introduction

IAFF 2094 Europe: International and Domestic
Interactions

HIST 1121 The War of Ideas in European and
International History, 1750-Present

HIST 3126 European Integration: A History

HIST 3168 Divided and United Germany Since
1945

HIST 3178 The Making of the Modern Balkans

HIST 3601 Topics: Asian History

PSC 2330 Comparative Politics of Western Europe

PSC 2331 Comparative Politics of Central and
Eastern Europe

** Academic advisor approval required for courses not listed here.*

Middle East

ANTH 3703 Cultures of the Pacific

GEOG 3154 Geography of the Middle East and
North Africa

HIST 3801 Topics in Middle Eastern History

HIST 3811 The Middle East in the 20th Century

IAFF 2040 Basic Topics in International Affairs
(Middle East: An International Affairs
Survey)

IAFF 2190W Special Topics (Arab Politics;
Challenges and Change in the Middle
East; Politics and Culture in the Middle
East)

IAFF 3188 Special Topics in Middle East Studies
(Political Islam)

* Academic advisor approval required for courses not listed here.

GRADUATE PROGRAMS

Master's programs

- Master of Arts in the field of Asian studies (p. 673)
- Master of Arts in the field of European and Eurasian studies (p. 679)
- Master of Arts in the field of global communication (p. 683)
- Master of Arts in the field of international affairs (p. 692)
- Master of Arts in the field of international development studies (p. 693)
- Master of Arts in the field of international science and technology policy (p. 695)
- Master of Arts in the field of international trade and investment policy (p. 696)
- Master of Arts in the field of Latin American and hemispheric studies (p. 697)
- Master of Arts in the field of Middle East studies (p. 698)
- Master of Arts in the field of security policy studies (p. 699)
- Master of International Policy and Practice (p. 701)
- Master of International Studies (p. 701)

Combined programs

- Joint Master of Arts and Juris Doctor (p. 702)
- Joint Master of Arts and Master of Business Administration (p. 702)
- Dual Master of Arts and Master of Public Health (p. 701)

MASTER OF ARTS IN THE FIELD OF ASIAN STUDIES

The Elliott School's Asian Studies program trains students to navigate the dynamic environment that is Asia, a continent whose diverse populations drive its changing needs and roles in the global arena. The curriculum prepares students to keep pace with a region on the path to sustained economic development as urban migration and international trade are exploding. Graduates of the program are equipped to address complex diplomatic, economic, security, and cultural issues coupled with an unprecedented rate of growth.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: a bachelor's degree in a related field and at least two years of study of an appropriate Asian language

The multidisciplinary program requires 40 credits including:

9 credits in core courses

9 credits in regional specialization

9 credits in thematic or professional specialization

9 credits in electives

4 credits in capstone course sequence

Foreign language proficiency (<http://elliott.gwu.edu/asian-studies/foreign-language>)

A thesis option is available for students seeking to enhance professional research and writing skills.

As part of the degree requirements, students must select a regional specialization from the following:

- East Asia;
- South Asia; or
- Southeast Asia

Students must select a thematic or professional specialization from the following:

- Thematic specialization includes:
 - History of Modern Asia;
 - Politics and Policy in Asia;
 - International Relations of Asia;
 - Asian Business and Development; or
 - Culture, Art, and Religions of Asia
- Professional specialization includes:
 - Conflict and Conflict Resolution;
 - International Development;
 - International Economics;
 - Political Economy and Business;
 - International Health Policy;
 - International Organization, Diplomacy, and Globalization;
 - International Security Policy
 - Research Methods; or
 - Science, Technology, and International Affairs

Note: Courses selected for the regional specialization cannot overlap with those taken for thematic or professional specializations.

Courses fulfilling requirements

9 credits in core courses

Two of the following:

HIST 6601 Topics: Asian History

PSC 6388 Topics in Comparative Politics

IAFF 6318 Special Topics in Asian Studies (Asian Business and Development)

One of the following:

PSC 6475 International Politics of East Asia

IAFF 6318 Special Topics in Asian Studies (International Relations of South Asia)

9 credits in regional specialization chosen from one of the regional specializations

Courses selected for the regional specialization cannot overlap with those taken for thematic or professional specializations.

East Asia

At least three of the following:

ECON 6269 Economy of China I

ECON 6271 Economy of Japan

HIST 6611 Readings Seminar: 20th-Century China

HIST 6621 Readings Seminar: Modern Japanese History

HIST 6630 Spec Topics in Korean History (Modern Korea)

IAFF 6186 Special Topics in Security Policy Studies (The Chinese Military)

IAFF 6302 Taiwan: Internal Development and Foreign Policy

LAW 6536 Law of Japan *

LAW 6543 Law of the People's Repub/Chin *

PSC 6368 Japanese Politics and Foreign Policy

PSC 6370 Politics of China I

PSC 6371 Politics of the PRC 2

PSC 6372 Foreign Policy of the PRC

PSC 6373 Political Economy of Industrializing Asia

PSC 6374 Korean Politics

PSC 6489 Topics in International Relations (U.S. China Relations)

South Asia

At least three of the following:

AH 6270 Special Topics in Art History (Modern Contemporary South Asian Art)

AH 6270 Special Topics in Art History (Textiles and Politics in South Asia)

ENGL 6560 Postcolonialism

HIST 6001 Special Topics (Geography and Politics of Afghanistan and South & Central Asia)

IAFF 6118 Special Topics in International Affairs (Pakistan and the Radical Islamic Threat)

IAFF 6318 Special Topics in Asian Studies (International Relations of South Asia)

IAFF 6318 Special Topics in Asian Studies (Politics of Finance in India and China)

IAFF 6318 Special Topics in Asian Studies (Society, Culture and Politics of South Asia)

IAFF 6305 U.S.-South Asia Relations

PSC 6373 Political Economy of Industrializing Asia

PSC 6388 Topics in Comparative Politics (Stability and Conflict in South Asia)

PSC 6388 Topics in Comparative Politics (Politics of Development in South Asia)

REL 6557 India's Great Epics (The Mahabharata)

REL 6557 India's Great Epics (The Ramayana)

Southeast Asia

At least three of the following:

IAFF 6138 Special Topics in International Development Studies (Development Issues in Southeast Asia)

HIST 3035 The United States and the Wars in Indochina, 1945-1975

HIST 6641 Modern Southeast Asia

PSC 6373 Political Economy of Industrializing Asia

9 credits in thematic or professional specialization

Courses taken for the thematic specialization cannot overlap with those taken for the required regional specialization.

Thematic specialization

History of Modern Asia

At least three of the following:

HIST 6001 Special Topics (Gender and Subjectivity in East Asia)

HIST 6001 Special Topics (Japan's Empire and Its Legacies)

HIST 6611 Readings Seminar: 20th-Century China

HIST 6621 Readings Seminar: Modern Japanese History

HIST 6630 Spec Topics in Korean History (Modern Korea)

HIST 6641 Modern Southeast Asia (Geography and Politics of Afghanistan and South & Central Asia)

Politics and Policy in Asia

At least three of the following:

A. Domestic Politics, Foreign Policy and Law

AH 6270 Special Topics in Art History

ENGL 6560 Postcolonialism

IAFF 6302 Taiwan: Internal Development and Foreign Policy

IAFF 6318 Special Topics in Asian Studies (ociety, Culture and Politics of South Asia)

LAW 6536 Law of Japan *

LAW 6543 Law of the People's Repub/Chin *

PSC 6368 Japanese Politics and Foreign Policy

PSC 6370 Politics of China I

PSC 6371 Politics of the PRC 2

PSC 6374 Korean Politics

B. Security and Military Policy

IAFF 6118 Special Topics in International Affairs (Pakistan and the Radical Islamic Threat)

IAFF 6186 Special Topics in Security Policy Studies (The Chinese Military)

PSC 6388 Topics in Comparative Politics (Stability and Conflict in South Asia)

PSC 6467 Asian Security

International Relations of Asia

At least three of the following:

IAFF 6302 Taiwan: Internal Development and Foreign Policy

IAFF 6305 U.S.-South Asia Relations

IAFF 6308 Intl Relations of South Asia

PSC 6467 Asian Security

PSC 6372 Foreign Policy of the PRC

PSC 6475 International Politics of East Asia

PSC 6489 Topics in International Relations (U.S. China Relations)

Asian Business and Development

At least three of the following:

ECON 6269 Economy of China I

ECON 6271 Economy of Japan

IAFF 6318 Special Topics in Asian Studies (Politics of Finance in India and China)

PSC 6373 Political Economy of Industrializing Asia

PSC 6388 Topics in Comparative Politics (Politics of Development in South Asia)

Culture, Art, and Religions of Asia

At least three of the following:

AH 6270 Special Topics in Art History (Modern Contemp South Asian Art)

AH 6270 Special Topics in Art History (Textiles and Politics in South Asia)

REL 6557 India's Great Epics (The Mahabharata)

REL 6557 India's Great Epics (The Ramayana)

ENGL 6560 Postcolonialism

Professional specialization

At least three courses in one of the following professional specialization fields:

Conflict and Conflict Resolution

IAFF 6171 Introduction to Conflict Resolution

and at least two of the following:

ANTH 6507	Nationalism and Ethnicity
GEOG 6224	Seminar: Political Geography
HIST 6822	Nationalism in the Middle East

9 credits in electives	
Students may use additional credits for foreign language or background coursework or one-credit skills courses. The Elliott School's skills courses are designed to supplement substantive graduate coursework with practical skills and knowledge that students need to perform effectively in the workplace. A maximum of three one-credit skills courses may be taken in this M.A. program.	
4 credits in capstone course sequence	
IAFF 6898	Capstone Workshop
IAFF 6899	Capstone Course

Foreign Language Proficiency

Students in the M.A. regional studies programs are required to fulfill their foreign-language requirement by passing a reading and speaking proficiency examination administered by the Elliott School at the currently required level of proficiency. All M.A. regional studies students are required to pass both the reading and speaking parts of the language examination; advanced-level language coursework during or prior to enrollment at GW cannot substitute. Foreign-language proficiency examinations will continue to be offered during the fall and spring semesters. Students may take the examination at any point during their enrollment. Effective immediately, students in all programs (including regional studies) no longer have to wait until the completion of 20 credits to take the proficiency examination. Students will have three opportunities to pass the proficiency examination administered by the Elliott School. Failure to pass the exam for a third time will result in dismissal from the program.

Independent Study

If a core course is not offered during a student's time at GW, or if a student wishes to study a topic on which no course are offered at GW, that student may confer with the director of Asian Studies regarding the possibility of pursuing an independent study with a member of GW's faculty.

*Law School courses – Students may, with permission of their advisor, include courses in the GW Law School (<http://www.law.gwu.edu>) in their major field. Enrolling in a Law School course also requires permission of the Law School dean of students. Students should consult the Elliott School Academic Advising & Student Services (<http://elliott.gwu.edu/graduate-advising>) office before enrolling in Law School courses.

**Special/Selected Topics courses change often; check the schedule of classes (<http://my.gwu.edu/mod/pws>) for each semester's offerings. Other "Topics" courses not listed here may, with permission of the program director, be used to fulfill program requirements.

For more information, visit the program website (<http://elliott.gwu.edu/academics/graduate/asian-studies>).

MASTER OF ARTS IN THE FIELD OF EUROPEAN AND EURASIAN STUDIES

In the vast geopolitical realm that stretches from the British Isles to Siberia and from the Nordic regions to the Mediterranean, powerful forces are pushing for political, social, and economic change. The European Union (EU) faces the continuing imperative of balancing supranationalism and national sovereignty, while simultaneously deepening its integrative activities and widening its membership.

EU member states and their neighbors confront a host of domestic challenges ranging from economic reform and social diversity to terrorism and separatism. Russia and other members of the Commonwealth of Independent States stand at different points along the path of transition from communism to new political institutions. At the same time, a web of political, economic, security, and societal connections increasingly links the various parts of Europe and Eurasia with one another, as well as with the United States, the Islamic World, China, and other parts of the global community. In view of these dynamic interactions, it is essential to study Europe and Eurasia together.

The European and Eurasian Studies (EES) master of arts program at the Elliott School of International Affairs provides an interdisciplinary approach to understanding these important regions. The EES curriculum combines several required courses with a wide variety of additional courses and optional fields that can be selected to suit an individual student's professional goals and intellectual interests. This multifaceted program encompasses academic approaches to European and Eurasian affairs and develops practical analytical skills that are essential in the professional world of international affairs.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

Prerequisite: a bachelor's degree in a related field, including a strong background in European history and political systems and at least two years of an appropriate European or Eurasian language.

The multidisciplinary program requires 40 credits including:

3 credits of cornerstone courses

3 credits of international economics courses

15 credits of core courses

9 credits of professional specialization

1 credit skills workshop

6 credits of electives

3 credits of capstone course sequence

Foreign language proficiency

A thesis option is available for students seeking to enhance professional research and writing skills.

As part of the degree requirements, students must select a professional specialization from the following:

- Academics
- European & Eurasian Cultures
- International Economics, Political Economy & Business
- International Education
- International Health Policy & Programs
- International Organization, Diplomacy & Globalization
- International Security Policy

- Science, Technology & International Affairs

Courses fulfilling requirements

3 credits of cornerstone courses

IAFF 6321	European and Eurasian Studies Cornerstone
-----------	---

3 credits of international economics courses

One of the following:

ECON 6280	Survey of International Economics
ECON 6283	Survey of International Trade Theory and Policy
ECON 6284	Survey of International Macroeconomics and Finance Theory and Policy

15 credits of core courses

At least two courses from each section:

Section A: Western, Central, Southeastern and Eastern Europe

HIST 6001	Special Topics (British Atlantic World)
-----------	---

HIST 6001	Special Topics (Atlantic History)
-----------	-----------------------------------

HIST 6042	Seminar: World War II
-----------	-----------------------

HIST 6050	Modernization, Imperialism, Globalization
-----------	---

HIST 6101	Topics: Europe
-----------	----------------

HIST 6120	Sem:Early Modern European Hist
-----------	--------------------------------

HIST 6121	Rdg/Rsch Sem:Mod European Hist
-----------	--------------------------------

HIST 6128	Europe and the World, 1500-Present
-----------	------------------------------------

HIST 6133	English People and Institutions
-----------	---------------------------------

HIST 6135	British Imperialism
-----------	---------------------

HIST 6170	Eastern European History I
-----------	----------------------------

HIST 6171	Eastern European History II
-----------	-----------------------------

IAFF 6338	Special Topics in European and Eurasian Studies (The European Union)
-----------	--

IAFF 6338	Special Topics in European and Eurasian Studies (Turkey's Place in Europe)
-----------	--

IAFF 6378	Special Topics in Middle East Studies (Turkish Politics and Society)
-----------	--

IAFF 6505	Elliott School Seminars
-----------	-------------------------

PSC 6360	Western European Politics
----------	---------------------------

PSC 6362	Nation-Building in the Balkans
----------	--------------------------------

PSC 6361	Politics of European Integration
----------	----------------------------------

PSC 6364	Comparative Governments and Politics of Central And Eastern Europe
----------	--

PSC 6465	The International Politics of Central and Eastern Europe
----------	--

Section B: Post-Soviet/Post-communist Countries

EDUC 6602	Regional Studies in International Education
-----------	---

HIST 6001	Special Topics (Central Asian History)
-----------	--

HIST 6001	Special Topics (History of the Russian and Soviet Empires)
-----------	--

HIST 6030	History and Its Uses in International Affairs (only section reserved for EES)
-----------	---

HIST 6180	History of Modern Russia and the Soviet Union
-----------	---

HIST 6185	Sem: Russian & Soviet Thought
-----------	-------------------------------

HIST 6188	The Soviet Union and the World, 1917-1991
-----------	---

IAFF 6338	Special Topics in European and Eurasian Studies (Nationalism in Russia and Eurasia)
-----------	---

IAFF 6338	Special Topics in European and Eurasian Studies (Ukraine and Georgia: Between Russia and the West)
-----------	--

IAFF 6338	Special Topics in European and Eurasian Studies (Central Asia: Security Politics, Society)
-----------	--

IAFF 6338	Special Topics in European and Eurasian Studies (Politics of Post-Soviet Eurasia)
-----------	---

IAFF 6338	Special Topics in European and Eurasian Studies (History and Politics of the Caucasus)
-----------	--

IAFF 6338	Special Topics in European and Eurasian Studies (Security in Russia and Eurasia)
-----------	--

PSC 6333	Comparative Politics of Russia and Eurasia
----------	--

PSC 6366	Government and Politics of Russia
----------	-----------------------------------

9 credits of professional specialization

Three courses selected from one professional specialization field.

Students may design their own field with the approval of the Program Director, or select one of the following fields:

Academics

This field is designed for students who plan to pursue a doctoral degree in Economics, History, Political Science or some other discipline. With the advice of the Program Director and other faculty members, students choose three courses that will enhance their qualifications for admission into a Ph.D. program.

European & Eurasian Cultures

At least three of the following:

At least two courses must be foreign-language based, not "in English." All courses listed below are undergraduate courses and will require extra work for graduate credit, to be arranged with the instructor and the Program Director.

FREN 3550	Studies in 20th-Century French Literature
FREN 3600	Special Topics in French Literature
FREN 4600	Special Topics in French Literature
FREN 3700	History of French Cinema
GER 2161	German Culture—in English I
GER 2162	German Culture—in English II
GER 3181	History of German Cinema—in English
GER 3183	Berlin Before & After the Wall
GER 3184	German Thought - in English
GER 3186	German Women Writers of the 19th and 20th Centuries
GER 4175	Literature of two Germanies
ITAL 4560	Modern Italian Novel
SLAV 2015	Readings in the Russian Press I
SLAV 2365	20th-Century Russian Literature to World War II
SLAV 2366	Russian Literature from World War II to the Present
SLAV 2473	20th-Century Russian Prose
SLAV 2474	20th-Century Russian Poetry
SLAV 2785	Introduction to Russian Cinema I

SLAV 2786	Introduction to Russian Cinema II
SPAN 3400	Theatre of Spain and Latin America
SPAN 3560	

SPAN 3600	Special Topics
SPAN 3700	Cinema of Spain and Latin America
SPAN 4540	The Myth of the Two Spains

International Economics Political Economy & Business

At least three of the following:

ECON 6217	Survey of Economics I
ECON 6283	Survey of International Trade Theory and Policy
ECON 6284	Survey of International Macroeconomics and Finance Theory and Policy
ECON 6295	Special Topics
IBUS 6201	International Marketing
IBUS 6202	Regional Strategy for Multinationals
IBUS 6301	International Business Finance
IBUS 6302	Seminar: International Banking
IBUS 6303	External Development Financing
IBUS 6305	Global Investment Banking
IBUS 6306	Seminar: International Financial Markets
IBUS 6307	International Portfolio Management
IBUS 6401	International Business Strategy
IBUS 6403	International Business Negotiations
IBUS 6404	New Global Competitive Framework
IBUS 6405	Legal Aspects of International and Multinational Business
PSC 6439	International Political Economy

International Education

At least three of the following:

EDUC 6601	International and Comparative Education
EDUC 6602	Regional Studies in International Education

EDUC 6610	Programs and Policies in International Education
EDUC 6630	International Experiences
EDUC 6631	Internship: International Education
EDUC 6640	Selected Topics in International Education
EDUC 6650	Education and National Development
International Health Policy & Programs	
At least three of the following:	
PUBH 6264	Quantitative Methods
PUBH 6400	Global Health Frameworks
PUBH 6435	Global Health Program Development and Implementation
PUBH 6441	Global Health Organizations and Regulations
PUBH 6442	Comparative Global Health Systems
International Organization, Diplomacy & Globalization	
At least three of the following:	
ANTH 6505	Medical Anthropology
LAW 6534	Law of the European Union
PSC 6442	Politics and Practice of International Institutions
PSC 6444	Politics of International Law
PSC 6345	Comparative Foreign Policy
PSC 6346	The Politics of U.S. Foreign Policy
PSC 6347	U.S. Foreign Policy Traditions
PSC 8388	Selected Topics in Comparative Politics (Theories of Nationalism) *
PSC 8388	Selected Topics in Comparative Politics (Comparative Social Policy) *
International Security Policy	
At least three of the following:	
IAFF 6160 and IAFF 6167 are strongly recommended.	
IAFF 6160	Defense Policy and Program Analysis
IAFF 6163	Transnational Security

IAFF 6167	DefensePolicy&ProgAnalysis II
IAFF 6186	Special Topics in Security Policy Studies (National Security Resources)
IAFF 6186	Special Topics in Security Policy Studies (Terrorism and U.S. Foreign Policy)
IAFF 6186	Special Topics in Security Policy Studies (Globalization and National Security)
IAFF 6186	Special Topics in Security Policy Studies (Space and National Security)
IAFF 6186	Special Topics in Security Policy Studies (Weapons Proliferation and Nonproliferation)
IAFF 6186	Special Topics in Security Policy Studies (Covert Action and National Security)
IAFF 6338	Special Topics in European and Eurasian Studies (Transatlantic Security Issues in the 21st Century)
IAFF 6338	Special Topics in European and Eurasian Studies (NATO and European Security)
IAFF 6501	Quant Analysis Int'l Aff Prac
PSC 6348	Politics of U.S. National Security Policy
PSC 6349	International Security Politics
PSC 6351	Civil-Military Relations
PSC 6457	Arms Control & Disarmament
Science, Technology & International Affairs	
At least three of the following:	
ECON 6255	Economics of Technological Change
IAFF 6121	International Development Studies Cornerstone
IAFF 6122	Development Policy and Practice
IAFF 6145	U.S. Space Policy
IAFF 6151	Environmental Policy
IAFF 6153	Science, Technology, and National Security
IAFF 6158	Special Topics in International Science and Technology Policy
IAFF 6343	Indigenous Social Movements

1 credit skills workshop

6 credits of electives**3 credits of capstone course sequence**

IAFF 6339 European and Eurasian Studies
Capstone

Foreign Language Proficiency

Students in the regional studies M.A. programs are required to be proficient in a modern foreign language that is used in their region of study to receive the degree. They must fulfill this foreign-language requirement by passing both the reading and the speaking proficiency examinations administered by the Elliott School at a level required by the academic program. Advanced-level language coursework during or prior to enrollment at GW cannot substitute. Foreign-language proficiency examinations will be offered during the fall and spring semesters. Students may take the examination at any point during their enrollment and will have three opportunities to pass the proficiency examination administered by the Elliott School. Failure to pass the exam for a third time will result in dismissal from the program.

NOTE: When a student's native language is not English, and is not a language used in their region of study (for example a student who is a native speaker of Chinese in the Middle East Studies program), that student must still demonstrate proficiency in a modern language used in their region of study by passing the Elliott School language proficiency examination. Students in the European and Eurasian Studies M.A. program may take any major European language other than English.

For more information including the thesis option (<http://elliott.gwu.edu/european-and-eurasian-studies/thesis-option>), visit the program website. (<http://elliott.gwu.edu/european-and-eurasian-studies>)

MASTER OF ARTS IN THE FIELD OF GLOBAL COMMUNICATION

Offered jointly by GW's Elliott School of International Affairs and the Columbian College of Arts and Sciences' School of Media and Public Affairs (<http://www.gwu.edu/~smpa>) (SMPA), the M.A. in the field of global communication combines the Elliott School's academic excellence in international affairs with SMPA's strengths as a school of communication and journalism. The graduate program trains students to understand the complex global information environment; its implications for governance, security, and business; and how to communicate effectively to global audiences.

A core curriculum focuses on communication, international politics, international economics, and research methods. Required skills courses cover topics such as developing communication strategies, cross-cultural communication, public speaking, and editing. Students also choose one of

twelve specializations to build expertise on a major world region or global issue. In the final year, a capstone course tests students' ability to address a real-world problem using the skills and knowledge acquired during their course of study. The rigorous academic program prepares students both intellectually and professionally for exciting careers in the public, private, and nonprofit sectors.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

Prerequisite: a bachelor's degree in a related field, with introductory macro- and microeconomics and at least two years of a modern foreign language

The program requires 40 credits including:

15 credits in core courses
9 credits in specialization
3 credits in skills courses
9 credits in electives
4 credits in capstone course sequence
Foreign language proficiency

A thesis option is available for students seeking to enhance professional research and writing skills.

Courses fulfilling requirements

15 credits in core courses

SMPA 6210	Media & Foreign Policy
SMPA 6241	Research Design
IAFF 6101	IA Cornerstone
ECON 6280	Survey of International Economics
or ECON 6250	Survey of Economic Development
One of the following:	
SMPA 6202	Media Effects, Public Opinion, and Persuasion
SMPA 6204	Strategic Political Communication
HIST 6030	History and Its Uses in International Affairs

9 credits in specialization

Specialization determined in consultation with director within either the global issues specialization or the regional focus specialization, all 9 credits must taken in one subtopic; the exception is the international development (see below).

Global Issues:

Communication and information technology in international affairs subtopic

ECON 6255	Economics of Technological Change
IAFF 6142	Technology Creation/Diffusion
IAFF 6151	Environmental Policy
IAFF 6153	Science, Technology, and National Security
IAFF 6158	Special Topics in International Science and Technology Policy

3 credits in skills courses

IAFF 6502	Professional Skills I
or IAFF 6503	Professional Skills II

In one of the following topics:

Cross Cultural Communication

Developing Communication Strategies

Formal Briefing

Introduction to Editing

Negotiating Skills

Op-Ed Writing Skills

Public Speaking

Writing for International Affairs Professionals

9 credits in electives

Courses relating to international affairs or communication, with approval of the program director.

4 credits in capstone course sequence

IAFF 6898 Capstone Workshop

IAFF 6899 Capstone Course

Alternative capstone option

The traditional capstone model specifically designed for Global Communication student is completed over one semester through the development of a strategic communication plan for an external client. Students must take an additional professional skills course (total of 4 skills courses) to complete their degree through this option.

Thesis option

A 6-credit thesis option is available for students seeking to enhance professional research and writing skills

Three credits of electives may be used to pursue a thesis

Foreign Language Proficiency

Completion of the M.A. in Global Communication requires a demonstrated oral and reading proficiency in a modern foreign language (<http://elliott.gwu.edu/global-communication/foreign-language>).

For more information on areas of specialization in global issues (<http://elliott.gwu.edu/global-communication/global-issues>) or regional fields (<http://elliott.gwu.edu/global-communication/regional-fields>), skills courses (<http://elliott.gwu.edu/graduate-course-descriptions/professional-skills>), or capstone options (<http://elliott.gwu.edu/global-communication/capstone>).

communication/capstone) visit the program website (<http://elliott.gwu.edu/global-communication>).

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL AFFAIRS

The Elliott School's Master of Arts program in International Affairs is designed to provide students with a broad understanding of the contemporary issues in international affairs as they develop in-depth knowledge of at least one or more areas of specialization. For their concentration, students may choose from among several fields of global issues or one of the regions of the world. Graduates of the program have pursued exciting careers in diplomacy and public service, business, security, conflict resolution, development, and public health.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: a bachelor's degree in a related field, including introductory micro- and macroeconomics and at least two years of undergraduate study of a modern foreign language.

The multidisciplinary program requires 40 credits including:

- 9-12 credits in core field
- 12 credits in major field
- 9-12 credits in electives
- 3 credits in skills courses
- 4 credits in capstone course sequence
- Foreign language proficiency (<http://elliott.gwu.edu/international-affairs-masters/foreign-language>)

A thesis option is available for students seeking to enhance professional research and writing skills.

Courses fulfilling requirements

Course List

Core Field (9-12 credits):

IAFF 6101	IA Cornerstone
HIST 6030	History and Its Uses in International Affairs
Must take either	
ECON 6280	Survey of International Economics
or both of the following depending on economics background.	

ECON 6283 & ECON 6284	Survey of International Trade Theory and Policy and Survey of International Macroeconomics and Finance Theory and Policy
-----------------------	--

Major Field (12 credits):

A major field with a global issues or regional focus

Global Issues:

Conflict and Conflict Resolution

Global Gender Policy

Global Health

International Affairs and Development

International Economic Affairs

International Law and Organizations

International Security Studies

Nuclear Policy

Technology and International Affairs

U.S. Foreign Policy

Regional Fields:

Asia

Europe, Eurasia, and Russia

Middle East

Latin America

Elective courses (9-12 credits):

May include up to 6 credits of foreign language study, a second field of expertise, or other relevant course work

Students are strongly encouraged to take IAFF 6501 (or its equivalent)

Skills Courses (3 credits):

Skill-based professional workshops (1 credit each)

Capstone (4 credits):

IAFF 6898 Capstone Workshop

IAFF 6899 Capstone Course

Thesis Option (6 credits):

Three credits of electives may be used to pursue a thesis. To propose a thesis, a student must have a GPA of at least a 3.5 after completing 20 credit hours in the M.A. program. The thesis subject must be approved in advance by a faculty member who has agreed to direct the thesis, a second faculty member who will serve as an additional reader, and the Program Director. Thesis requirements are outlined in full in the Graduate Bulletin. Students must take an additional professional skills course (total of 4 skills courses) to complete their degree through this option.

Language Proficiency

Students must demonstrate proficiency in a modern foreign language (<http://elliott.gwu.edu/international-affairs-masters/foreign-language>). The ability to communicate across cultures in more than one language is both a distinguishing and expected skill of the international affairs professional. Therefore, completion of the M.A. in International Affairs requires a demonstrated oral and reading proficiency in a modern foreign language.

Course lists for the global issues (<http://elliott.gwu.edu/major-fields-global-issues>) or regional focus (<http://elliott.gwu.edu/international-affairs-masters/regional-focus>) major fields and additional information are available on the program website (<http://elliott.gwu.edu/international-affairs-masters>).

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL DEVELOPMENT STUDIES

The Master of Arts in the field of international development studies (IDS) program prepare students for professional careers in the field of international development through interdisciplinary course work that includes the study of economics, research methods, policy analysis, and management. Students focus their studies by creating their own area of specialization in coordination with their faculty mentor.

The IDS program culminates in a capstone project where students work on a real-world consulting experience with a development organization. In past years, capstone projects have addressed a broad range of topics, including private sector development, rural education, microfinance, HIV/AIDS, environmental conservation, gender-based violence, municipal planning, and many others. Teams have pursued these projects and conducted fieldwork in Africa, Asia, Latin America, and Eastern Europe. Previous capstone reports can be found on the program's capstone website (<http://elliott.gwu.edu/international-development-studies/capstone-reports>).

In addition to their regular course work, most graduate students in the IDS program are employed full- or part-time in a job or internship directly related to their studies. Employers include USAID, World Bank, Organization of American States, Peace Corps, IREX, Ashoka, Management

Systems International, the Woodrow Wilson Center, Chemonics International, and many others.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://elliott.gwu.edu/international-development-studies>) for additional information.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: a bachelor's degree including introductory microeconomics, a course in statistics, and at least two years of study of a modern foreign language

The multidisciplinary program requires 40 credits including:

- 10 credits in core courses**
- 12 credits in analytical courses**
- 18 credits in an area of specialization**
- Foreign language proficiency** (<http://elliott.gwu.edu/international-development-studies/foreign-language>)

The following requirements must be fulfilled:

International Development Studies

Core Courses (10 credits):

IAFF 6121	International Development Studies Cornerstone
IAFF 6122	Development Policy and Practice
IAFF 6137	Development Studies Pre-Capstone Workshop
IAFF 6139	International Development Studies Capstone

Analytical Courses (12 credits):

ECON 6250	Survey of Economic Development
A management course selected from the following:	
EDUC 6381	Program Evaluation: Theory and Practice
EDUC 6620	Strategies and Analysis in International Education (Managing International Education Development Projects)
EMSE 6220	Environmental Management
EMSE 6260	Energy Management
EMSE 6285	Analytical Tools for Energy Management

EMSE 6305	Crisis and Emergency Management
EMSE 6310	Information Technology in Crisis and Emergency Management
EMSE 6320	International Disaster Management
EMSE 6325	Medical and Public Health Emergency Management
EMSE 6820	Program and Project Management
GEOG 6293	Special Topics (Water Resources Policy & Management)
IAFF 6138	Special Topics in International Development Studies
IBUS 6297	International Management Experience
IBUS 6402	Managing in Developing Countries
MGT 4101	
MGT 6216	Cross-Cultural Management
PPPA 6031	Governing and Managing Nonprofit Organizations
PPPA 6032	Managing Fund Raising and Philanthropy
PPPA 6057	International Development Administration
PPPA 6058	International Development NGO Management
PPPA 6059	International Development Management Processes and Tools
PPPA 6077	Case Studies in Public Policy
PUBH 6006	Management and Policy Approaches to Public Health
PUBH 6435	Global Health Program Development and Implementation
PUBH 6436	Global Health Program Management and Leadership
PUBH 6437	Case Study Methods for Global Health Evaluation
PUBH 6513	Community Health Management
SMPP 6210	Strategic Environmental Management

A research methods course selected from the following:

ANTH 6331	Research Methods in Development Anthropology
-----------	--

ANTH 6591	Topics in Sociocultural Anthropology
EDUC 6114	Introduction to Quantitative Research
EDUC 6116	Introduction to Educational Statistics
EDUC 8130	Survey Research Methods
EDUC 8131	Case Study Research Methods
EDUC 8140	Ethnographic Research Methods
EDUC 8142	Phenomenological Research Methods
EDUC 8170	Educational Measurement
EDUC 8171	Predictive Designs and Analyses
IAFF 6138	Special Topics in International Development Studies
IAFF 6501	Quant Analysis Int'l Aff Prac
PPPA 6002	Research Methods and Applied Statistics
PUBH 6247	Design of Health Studies
PPPA 6013	Econometrics--Policy Research I
PPPA 6016	Public and Nonprofit Program Evaluation
PUBH 6249	StatPackages/DataMgt&DataAnlys
PUBH 6260	Adv DataAnalysis-Public Health
PUBH 6264	Quantitative Methods
PUBH 6266	Biostatistical Methods
PUBH 6410	Global Health Study Design
PUBH 6411	Global Health Qualitative Research Methods
PUBH 6412	Global Health Quantitative Research Methods
PUBH 6533	Design of Comm Health Surveys
SOC 6230	Sociological Research Methods
SOC 6231	Data Analysis
SOC 6232	Qualitative Methodology: Doing Field Research
SOC 6240	Field Research in Organizational Settings

A policy analysis course selected from the following*:

*in lieu of a policy analysis course, students can select a second research methods course.

EDUC 6100	Experimental Courses (Policy Design: Accountability)
EDUC 6371	Education Policy
EDUC 6388	Analysis of Education Policy Issues
EDUC 6610	Programs and Policies in International Education
EDUC 8322	Education Policy Implementation
EDUC 8340	Methods of Policy Analysis in Education
IAFF 6378	Special Topics in Middle East Studies
PPPA 6006	Policy Analysis
PPPA 6014	Economics in Policy Analysis
PPPA 6085	Special Topics in Public Policy
PSC 6346	The Politics of U.S. Foreign Policy
PSC 6349	International Security Politics
PUBH 6305	Fundamentals for Health Policy: Public Health and Health Care
PUBH 6310	Statistical Analysis in Health Policy
PUBH 6315	Intro-Health Policy Analysis
PUBH 6320	Advanced Health Policy Analysis
PUBH 6325	Federal Policymaking and Policy Advocacy
WSTU 6240	Women and Public Policy

Area of Specialization (18 credits):

18 credits from a self-designed area of specialization, developed in coordination with a faculty advisor

Language Proficiency

Students must demonstrate proficiency in a modern foreign language (<http://elliott.gwu.edu/international-development-studies/foreign-language>). The ability to communicate across cultures in more than one language is a distinguishing and expected skill of the international development professional. For that reason, completion of the M.A. in International Development Studies requires demonstrated oral and reading proficiency in a modern foreign language.

Professional Skills Courses

The Elliott School offers a series of one-credit workshops (<http://elliott.gwu.edu/graduate-course-descriptions/>

professional-skills) on a variety of topics and students are encouraged to explore the possibility of taking up to three of these. Offered throughout the academic year, the skills covered provide students with practical skills and knowledge they will need to perform effectively in a variety of work settings.

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL SCIENCE AND TECHNOLOGY POLICY

Scientific and technological advances provide the basis of international competitiveness and account for the bulk of national growth and the improvement of the quality of life around the world. The ability to create, adapt, and adopt new technologies defines modern societies. In today's global environment, the need for innovation is essential for solving societal problems and staying ahead of competition. Developments in information technology, space exploration, genetic modification, and advances in material science are governed and shaped by institutions that set science and technology policy.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: a bachelor's degree in a social, life, or physical science, or in engineering

The following requirements must be fulfilled:

Core Field (9 credits):

IAFF 6141 International Science and Technology Policy Cornerstone

IAFF 6159 ISTP Capstone Project

IAFF 6516 Independent Study and Research

Concentration Field (15 credits):

At least two of the following:

IAFF 6142 Technology Creation/Diffusion

IAFF 6145 U.S. Space Policy

IAFF 6146 Space Law

IAFF 6148 Special Topics in Space Policy

IAFF 6151 Environmental Policy

IAFF 6153 Science, Technology, and National Security

IAFF 6158 Special Topics in International Science and Technology Policy

ECON 6255 Economics of Technological Change

Remaining courses selected from existing Elliott School concentration fields or designed by the student with approval of the program director

Analytical competency requirement (6 credits):

One or more course from sections A, B, or C

Section A. Policy Analysis and Public Administration

PPPA 6051 Governmental Budgeting

PPPA 6053 Financial Management for Public and Nonprofit Organizations

PPPA 6016 Public and Nonprofit Program Evaluation

PPPA 6002 Research Methods and Applied Statistics

Section B. Economic Theory and Concepts

ECON 6217 Survey of Economics I

ECON 6218 Survey of Economics II

Other relevant courses offered by the Economics Department (e.g. microeconomics, industrial organization, environmental economics, regional economics)

Section C. Research Methods

STAT 1053 Introduction to Statistics in Social Science

STAT 1111 Business and Economic Statistics I

STAT 2112 Business and Economic Statistics II

STAT 2118 Regression Analysis

STAT 2183 Intermediate Stat Lab/Packages

PPPA 6013 Econometrics–Policy Research I

PPPA 6014 Economics in Policy Analysis

PSC 6103 Approaches to Public Policy Analysis

In instances where proficiency in a foreign language can be shown to be integral to a student's program of study, it may be used to meet the analytical competency requirement. Students must petition for approval from the Program Director. Courses taken to demonstrate language proficiency may not be included in the 40 credit-hours required for the degree.

Skills course (1 credit):

IAFF 6502 Professional Skills I

IAFF 6503 Professional Skills II

Elective field (9 credits):

9 credit hours selected to complement the background and interests of the individual student

Courses composing the elective field may be offered through a different Elliott School program, a department in another college within the University, or a combination of the two.

Up to 3 credits may be taken as skills courses (IAFF 6502 and IAFF 6503)

For more information visit the program website (<http://elliott.gwu.edu/international-science-and-technology-policy>).

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL TRADE AND INVESTMENT POLICY

The M.A. program in International Trade and Investment Policy (ITIP) trains students in critical areas of the economics, politics, and history of international trade as well as econometrics. The program provides additional specialized training in international economics or international business. Coursework in these fields focuses on U.S. trade policy, the effects of international trade on developing countries, emerging market financial crises, and managing firms in developing countries. The program culminates in a one-semester capstone project (<http://elliott.gwu.edu/international-trade-and-investment-policy/capstone>) in which students work in small teams on a contemporary policy problem.

The faculty conducts research on international trade, finance, and macroeconomic issues, as well as the politics and history of international economics. These scholars and practitioners bring to the classroom intimate knowledge of international economic affairs garnered from their work as consultants and advisors at renowned financial, trade, policymaking, and government institutions.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

Prerequisite: a bachelor's degree including one semester each of introductory micro- and macroeconomic principles and at least two years of a modern foreign language. Applicants are strongly advised to take an introductory statistics course and an intermediate micro- and macroeconomics sequence before beginning the program.

The following requirements must be fulfilled:

Core field (12 credits):

Required courses:

ECON 6283 Survey of International Trade Theory and Policy

ECON 6284 Survey of International Macroeconomics and Finance Theory and Policy

PSC 6439 International Political Economy

Quantitative methods requirement

One of the following:

IAFF 6198 Special Topics in International Trade and Investment Policy

PPPA 6013 Econometrics–Policy Research I

ECON 2123 Introduction to Econometrics

DNSC 6274 Statistical Modeling and Analysis

DNSC 6277 Applied Forecasting and Time-Series Analysis for Managers

Major field (12 credits):

At least four (4) courses from one of the following areas of study:

Development Economics

Finance

International Business

International Economic Policy Analysis

Elective course work (15 credits):

In accounting and finance, economic analysis, history and political science courses focused on a region, foreign language study (up to 6 credits) or special one-credit skills courses (up to 3 credits)

Capstone course (1 credit):

IAFF 6199 International Trade and Investment Policy Capstone

A language proficiency requirement (<http://elliott.gwu.edu/international-trade-and-investment-policy/foreign-language>) in a modern foreign language. The ability to communicate across cultures in more than one language is a distinguishing and expected skill of the international affairs professional. Therefore, completion of the M.A. in International Trade and Investment Policy requires a demonstrated oral and reading proficiency in a modern foreign language.

Students must have completed intermediate micro- and macroeconomics (<http://elliott.gwu.edu/international-trade->

and-investment-policy/economic-theory) theory courses prior to receiving the International Trade and Investment Policy degree.

For more information including major fields (<http://elliott.gwu.edu/international-trade-investment-policy/major-field>), visit the program website (<http://elliott.gwu.edu/international-trade-investment-policy>).

MASTER OF ARTS IN THE FIELD OF LATIN AMERICAN AND HEMISPHERIC STUDIES

The Master of Arts in Latin American and Hemispheric Studies (LAHS) offers an interdisciplinary program designed to provide a broad and deep knowledge of context and place based on sound theory and practice. The program prepares students to develop innovative approaches to the enduring problems and emerging challenges of the hemisphere. This training will allow graduates to grapple with an often contradictory blend of political and economic successes and failures throughout the region.

The internationally recognized faculty, drawn primarily from the Washington, D.C. policy community, provides an insider's perspective on key institutions and policies. The program coordinates a series of events that brings leading policymakers from Washington and the world over to engage with students and faculty on issues facing the hemisphere.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

Prerequisite: a bachelor's degree with background course work related to Latin America and at least two years of study of Spanish or another relevant hemispheric language

The following requirements must be fulfilled:

Interdisciplinary cornerstone (3 credits):

IAFF 6341 Latin American and Hemispheric Studies Cornerstone

Core Field (9 credits):

Three of the following:

ANTH 6702 Issues in Latin American Anthropology

Or another 6000-level anthropology course approved by the advisor

ECON 6285 Economic Development of Latin America

GEOG 6261	Geographical Perspectives on Latin America
GEOG 6293	Special Topics (Migration and Development)
IAFF 6342	Drug Trafficking in the Americas
IAFF 6358	Special Topics in Latin American and Hemispheric Studies (Indigenous Social Movements)
HIST 6701	Topics in Latin American History
PSC 6383	Comparative Politics of Latin America
PSC 6484	International Relations of Latin America

Any Spanish course numbered in the 3400s, 3500s, 4400s, or 4500s that focuses on the literature of Latin America

Specialized fields (12 credits):

At least two courses in two of the following fields:

Anthropology

Art History, Literature, and Culture

Economic Development

Geography

Global Public Health

History

International Business

Migration

Political Science

Security

Sociology

Courses taken in the Core Field may not be double-counted in a specialized field. Students must receive permission from the Program Director to apply other courses towards a field.

Electives (12 credits):

Approved in advance by the Program Director. May include up to six credits of language course work in Spanish (other foreign languages spoken in Latin America will be considered on a case-by-case basis). They may also include up to 4 credits of one-credit skills courses. Additional courses may also be taken from any of the specialized fields, or in other areas or disciplines where such course would contribute to the student's professional knowledge and development.

Interdisciplinary capstone (4 credits) :

IAFF 6359 Latin American and Hemispheric Studies Capstone (1 credit fall, 3 credits spring)

A language proficiency requirement (<http://elliott.gwu.edu/latin-american-studies/foreign-language>). The ability to communicate across cultures in more than one language is a distinguishing and expected skill of the international affairs professional. Therefore, completion of the M.A. in Latin American Studies requires a demonstrated oral and reading proficiency in Spanish or Portuguese.

A graduate-level research methods (<http://elliott.gwu.edu/latin-american-studies/research-methods>) course applicable to the student's area of specialization. We strongly encourage this course be taken within the first three semesters to help prepare students for their capstone in their fourth and final semester.

A thesis option (<http://elliott.gwu.edu/latin-american-studies/thesis-option>) for exceptional students seeking to enhance professional research and writing skills. Students who select the thesis option must still take the capstone course.

Please note: before exercising thesis option, a course in research methods is required. Students are encouraged to take this course during their first three semesters. Students may choose one course from a list of more than 10 courses in different disciplines.

For more information including the specialized field course (<http://elliott.gwu.edu/latin-american-studies/specialized-fields>) list visit the program website (<http://elliott.gwu.edu/latin-american-studies>).

MASTER OF ARTS IN THE FIELD OF MIDDLE EAST STUDIES

The Master of Arts in Middle East Studies program combines a rigorous academic foundation with a strong professional orientation. Bridging the theory and practice of international affairs, the program prepares students for careers in government, the private sector, and international and nongovernmental organizations.

The curriculum includes a range of courses covering the history, politics, economics, international relations, and cultures of the societies and nations of the Middle East. In consultation with the program director, each student will develop a program of study that, through a set of core courses, combines a broad overview of the region along with a more specialized field based on the student's specific academic and career interests. In addition, completion of the M.A. in Middle East Studies requires demonstrated oral and reading proficiency in a language of the Middle East region.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Prerequisite: a bachelor's degree in a related field with at least two years of study of an appropriate language of the region

The following requirements must be fulfilled:

Cornerstone (1 credit):

IAFF 6361	Middle East Studies Cornerstone
-----------	---------------------------------

Core Courses (12 credits):

Choose four of the following:

PSC 6377	Comparative Politics of the Middle East
----------	---

PSC 6478	International Relations of the Middle East
----------	--

IAFF 6363	PoliticalEconomy/Middle East
-----------	------------------------------

IAFF 6364	Religion and Society in the Modern Middle East
-----------	--

HIST 6001	Special Topics (History of Modern Middle East)
-----------	--

or HIST 6801	Topics in Middle Eastern History
--------------	----------------------------------

ANTH 6707	Issues in Middle East Anthropology
-----------	------------------------------------

GEOG 6262	Geographical Perspectives on the Middle East
-----------	--

Professional specialization field (12 credits):

Available fields include:

Conflict and Conflict Resolution

Global Health

International Affairs and Development

International Business

International Economic Affairs

International Law and Organizations

International Security Studies

Management

Technology Policy and International Affairs

U.S. Foreign Policy

Middle East electives (9 credits):

Three courses related to the Middle East, selected in consultation with the program director. At least three (3) credits must have a language or humanities aspect. May include only three (3) credits of language study, which must be an advanced, content-based course.

Capstone (3 credits):

IAFF 6379	Middle East Studies Capstone
-----------	------------------------------

Skills courses (3 credits):

IAFF 6502	Professional Skills I
-----------	-----------------------

or IAFF 6503	Professional Skills II
--------------	------------------------

Foreign Language Proficiency

Students must pass a proficiency examination in a major modern Middle Eastern language. No substitutions are permitted.

- Arabic [Modern Standard Arabic] (taught at GW)
- Persian
- Hebrew (taught at GW)
- Kurdish, or
- Turkish

MASTER OF ARTS IN THE FIELD OF SECURITY POLICY STUDIES

Security Policy Studies (SPS) is a policy-oriented master's degree program focusing on international security issues, with a particular emphasis on the security challenges for the 21st century and how to respond to them. These challenges include but are not limited to weapons of mass destruction proliferation, transnational threats, terrorism, changing regional power dynamics, weak and failing states, international crime, effectively linking security and development, and ensuring U.S. national security.

The curriculum provides strong grounding in the national security and defense policymaking process. Students choose two specific concentrations which can range from transnational security issues to conflict resolution to defense analysis. Students also have the option of emphasizing a particular region, such as East Asia, the Middle East, or Latin America, by selecting a regional field as one of their two concentrations.

The program's faculty includes recognized authorities in international security, defense policy, foreign policy, the

national security policy process, and regional and transnational security issues. Through its academic and professional skills development courses, this program can open doors to employment in the security policy institutions of the federal government as well as those in the private sector and in international organizations such as NATO; and in the many think tanks and non-profit institutions engaged in security policy work.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

Prerequisite: a bachelor's degree with coursework in international affairs or other relevant social sciences, including introductory micro- and macroeconomic principles; study of a modern foreign language is preferred.

The following requirements must be fulfilled:

Core Field (9 credits):

PSC 6349 International Security Politics

IAFF 6160 Defense Policy and Program Analysis

HIST 6032 Rdg/Rsch Sem:Strategy & Policy

Specialized Field I (9 credits):

Available fields include:

Conflict and Conflict Resolution

Defense Analysis

Energy Security

Homeland Security Policy

Intelligence

Political Psychology

Regional Security

Science, Technology, and National Security Policy

Security and Development

Strategic Concepts and Military History

Transnational Security Issues

U.S. National Security Policy and Process

Weapons of Mass Destruction

Specialized Field II (9 credits): Choose from list above

Economics Requirement (3 credits):

One of the following:

ECON 6280 Survey of International Economics

ECON 6283 Survey of International Trade Theory and Policy

ECON 6284 Survey of International Macroeconomics and Finance Theory and Policy

Students are required to have undergraduate-level background coursework in microeconomics and macroeconomics before enrolling in a graduate course. Undergraduate courses will not count toward the master's degree. If you do not have prior coursework, consult with the Program Director on available options.

Tool Requirement (3 credits):

Language Option

If the language option is selected, the student can test out either through coursework or by taking a diagnostic exam prior to their first semester. Students who test out in a language have three extra credits to apply to their concentrations.

Statistics Option

This option may be fulfilled by demonstrating proficiency, by a grade of B or better, in one of the following graduate-level statistics courses.

IAFF 6501 Quant Analysis Int'l Aff Prac

IAFF 6198 Special Topics in International Trade and Investment Policy

Skills courses (3 credits):

IAFF 6502 Professional Skills I

or IAFF 6503 Professional Skills II

Capstone sequence (4 credits):

IAFF 6898 Capstone Workshop

IAFF 6899 Capstone Course

For more information on specializations (<http://elliott.gwu.edu/security-policy-studies/specialized-fields>), economics requirements (<http://elliott.gwu.edu/security-policy-studies/economics>), or tool requirements (<http://elliott.gwu.edu/security-policy-studies/tool-requirement>) visit the program website (<http://elliott.gwu.edu/academics/graduate/sps>).

MASTER OF INTERNATIONAL POLICY AND PRACTICE

The Elliott School's Master of International Policy and Practice (MIPP) program helps international professionals develop highly marketable analytical and management skills. These capabilities are necessary to formulate and advocate policies on key international issues, and to negotiate and work effectively in cross-cultural settings. The program also enhances their knowledge of international economic, political, and social trends. This flexible degree program prepares mid-career professionals for the challenges of globalization by combining the development of valuable skills with rigorous academic training. The program covers relevant national and international policies and provides insight into a wide range of international issues.

The interdisciplinary curriculum combines three core courses with a wide variety of course options that are selected to suit the student's professional goals and intellectual interests. Most courses are offered in the late afternoon and early evening to accommodate student work schedules, making it ideal for working professionals. Cohort events throughout the year provide additional venues for professional networking with other students, faculty, and guest speakers.

Students in the MIPP program also benefit from the events and programs sponsored by the Elliott School's research centers and institutes. The Elliott School's active calendar of lectures, conferences, and workshops features leading scholars and practitioners from the national and international policy communities.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

The following requirements must be fulfilled:

27 credits including:	
Core courses (6 credits):	
ECON 6280	Survey of International Economics *
One of the following:	
IAFF 6101	IA Cornerstone (International Relations Theory and Policy)
PSC 6330	Comparative Government and Politics
Core seminar (3 credits):	
IAFF 6211	MIPP Practicum
Elective courses (18 credits):	

Courses are selected in consultation with an advisor and the Program Director and are tailored to individual needs. May include up to three credits of one-credit skills-based workshops.

*Requires students to have successfully completed courses in introductory micro- and macroeconomics theory before entering the course. Introductory micro- and macro- theory courses will not be counted toward the MIPP degree.

Candidates must complete degree requirements within three years of their admission to the program. Students who are temporarily unable to continue their studies may request a leave of absence not to exceed one year. Extensions beyond the three-year period may be granted in exceptional circumstances, but the student will be required to register and pay for Continuous Enrollment.

No transfer credit is accepted into the MIPP program. No more than 6 hours of graduate credit taken in any degree or nondegree status within The George Washington University, including the Elliott School, may be included in the MIPP program.

Visit the MIPP program page (<http://elliott.gwu.edu/international-policy-and-practice>) for a complete list of elective courses (<http://elliott.gwu.edu/international-policy-and-practice/electives>).

MASTER OF INTERNATIONAL STUDIES

The Master of International Studies is a special program open only to students who have completed or are currently enrolled in an approved master's degree program at one of the Elliott School's international partner schools. Master of International Studies students take core courses in economics, history, and political science, plus three courses in an elective field designed with the approval of the program director and a capstone course. All students must meet the Elliott School language requirement.

DUAL MASTER OF ARTS AND MASTER OF PUBLIC HEALTH

The Elliott School of International Affairs cooperates with the Milken Institute School of Public Health in offering a dual degree program leading toward the Master of Arts and the Master of Public Health in global health. The dual degree program is offered in all Elliott School fields. The student must be accepted for admission by both the Elliott School and the Milken Institute School of Public Health. Applications should be made separately to each school, with a notice of interest in the combined program. Students may also apply for the dual degree program after they have begun either program.

As part of this program, the Elliott School accepts up to 12 credit hours of course work from the Milken Institute School of Public Health in fulfillment of its degree requirements. The program takes approximately three years of full-time study for completion. Dual degree students may complete the requirements for each degree and receive a diploma for each degree after applying for graduation from each school separately. However, all work on each degree must be completed within five years from the student's entry into that program, unless an extension of time is granted by the respective deans.

JOINT MASTER OF ARTS AND JURIS DOCTOR

The Elliott School of International Affairs cooperates with the Law School in offering a program of study leading to the degrees of Master of Arts and Juris Doctor. A student must be accepted for admission by both the Elliott School and the Law School. Applications should be made separately to each school, with a notice of interest in the combined program. The Law School stipulates that the first year of course work for the Juris Doctor degree must be taken as a unit; students should consult with the Law School's Associate Dean for Student Affairs.

As part of this program, each school accepts up to 12 credit hours of course work from the other school in fulfillment of its degree requirements. The Elliott School M.A. portion of the program may not include a thesis. The joint program takes approximately four years of full-time study for completion. Joint degree students must meet all requirements for both programs and apply for graduation from both schools prior to receiving either diploma. All work for this combined degree program must be completed in five years, unless an extension of time is granted by the respective deans.

JOINT MASTER OF ARTS AND MASTER OF BUSINESS ADMINISTRATION DEGREE PROGRAM

The Elliott School of International Affairs cooperates with the School of Business in offering a program of study leading to the degrees of Master of Arts and Master of Business Administration with a field of study in international business. The joint degree program is offered in all Elliott School M.A. fields, and the M.B.A. is taken with a focus on international business. The student must be accepted for admission by both the Elliott School and the School of Business. Applications should be made separately to each school, with a notice of interest in the combined program. Students may also apply for the joint degree program after they have begun either program.

As part of this program, each school accepts up to 12 credit hours of course work from the other school in fulfillment of its degree requirements. The joint program takes approximately three years of full-time study for completion. Joint degree students must meet all requirements for each program and apply for graduation from both schools prior to receiving either diploma. All work for this combined degree program must be completed in six years, unless an extension of time is granted by the respective deans.

CERTIFICATE PROGRAMS

The Elliott School of International Affairs offers a series of graduate certificates covering topics of specialized interest. The certificate programs are open to all graduate students presently enrolled in the Elliott School, Columbian College of Arts and Sciences, Graduate School of Education and Human Development, School of Business, and Milken Institute School of Public Health. The programs are also open to graduate students from other universities, individuals who have already earned a graduate degree, and individuals with a bachelor's degree and a minimum of eight years of relevant professional work experience. Applicants who have less than eight years of work experience are eligible to apply but must submit the same application materials required of other M.A. degree programs. Transfer credit from non-GW institutions is not accepted into any graduate certificate program. No more than 6 credits of graduate course work taken in any degree or non-degree status within the University, including the Elliott School, may be included in any graduate certificate program. Additional information is available in the Elliott School Graduate Admissions office (<http://elliott.gwu.edu/graduate-admissions>).

Graduate certificate programs

- Global gender policy (p. 702)
- International science and technology policy (p. 703)
- Nuclear Policy (p. 704)

GRADUATE CERTIFICATE IN GLOBAL GENDER POLICY

This certificate program offers a 15-credit curriculum in Global Gender Policy designed to provide substantive coursework in global gender issues, policy, and skills training.

REQUIREMENTS

Required (15 credits):

Core (6 credits):

IAFF 6102 Global Gender Policy

One of the following:

IAFF 6118 Special Topics in International Affairs
(Research Methods in Global Gender
Issues)

IAFF 6502/6503 Professional Skills I (taken for a total of
three credits) *

*see program website for list of eligible professional skills
courses

Elective (9 credits):

IAFF 6118 Special Topics in International Affairs
(Research Methods in Global Gender
Issues) **

**Can only be used as an elective course if not selected as
part of core requirement

IAFF 6136 Gender and Development

IAFF 6138 Special Topics in International
Development Studies (Gender,
Tourism, and Development)

IAFF 6138 Special Topics in International
Development Studies (Gender, Disaster
& Policy)

IAFF 6138 Special Topics in International
Development Studies (Human
Trafficking)

IAFF 6138 Special Topics in International
Development Studies (Violence,
Gender & Humanitarian Assistance)

ANTH 6501 Gender and Sexuality

PHIL 6238 Feminist Ethics and Policy Implications

PSYC 8275 Women and Health

SOC 6271 Gender and Society

SOC 6273 The Sex Industry

WSTU 6230 Global Feminisms

Students may take one of the following undergraduate
classes for graduate credit with instructor's permission and
extra work as an elective course:

IAFF 2190W Special Topics (Women in Global
Politics)

IAFF 3183 Special Topics in Development Policy
(Human Trafficking)

Students may substitute other GW and consortium courses
with the approval of the Certificate advisor.

No more than a total of four skills courses can be applied to a
graduate certificate.

For more information, visit the program website (<http://elliott.gwu.edu/graduate-certificates/global-gender-policy>).

GRADUATE CERTIFICATE IN INTERNATIONAL SCIENCE AND TECHNOLOGY POLICY

Scientific and technological advances provide the basis of
international competitiveness and account for the bulk of
national growth and the improvement of the quality of life
around the world. The ability to create, adapt, and adopt
new technologies defines modern societies. In today's
global environment, the need for innovation is essential for
solving societal problems and staying ahead of competition.
Institutions that set science and technology policy govern
and shape developments in information technology, space
exploration, and genetic modification, as well as advances in
material science.

REQUIREMENTS

The following requirements must be fulfilled: a minimum of 15
credits, including a 3-credit required course and 12 credits in
pre-approved elective courses.

Required

IAFF 6141 International Science and Technology
Policy Cornerstone

At least two science and technology policy courses:

IAFF 6142 Technology Creation/Diffusion

IAFF 6145 U.S. Space Policy

IAFF 6158 Special Topics in International Science
and Technology Policy *

IAFF 6151 Environmental Policy

ECON 6255 Economics of Technological Change

At least one analytical competency course:

ECON 6217 Survey of Economics I

ECON 6218 Survey of Economics II

PPPA 6002 Research Methods and Applied
Statistics

PPPA 6003 Economics for Public Decision Making

PPPA 6006 Policy Analysis

PPPA 6010	Politics & The Policy Process
PPPA 6014	Economics in Policy Analysis
PPPA 6016	Public and Nonprofit Program Evaluation
PPPA 6060	Policy Formulation and Administration

IAFF 6118	Special Topics in International Affairs (Nuclear Safeguards and Forensics)
IAFF 6118	Special Topics in International Affairs (Nuclear Security Policy)

*Other relevant courses under the listing IAFF 6158 may be offered in particular years. Consult the Center for International Science and Technology Policy for current listings. Students may take other courses not on the list of suggested courses with the approval of the Office of Student Services. Some of the analytical competency courses have prerequisites that do not count toward the certificate requirements.

Consult the Center for International Science and Technology Policy (<http://www.gwu.edu/~cistp>) (CISTP) for current listings and for additional information.

GRADUATE CERTIFICATE IN NUCLEAR POLICY

The 15-credit Graduate Certificate in Nuclear Policy provides a foundation of knowledge and analytical skills relevant to contemporary challenges related to nuclear security, deterrence, arms control, nonproliferation, and nuclear energy to students preparing to contribute to these pursuits as practitioners and analysts.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

REQUIREMENTS

The following requirements must be fulfilled: 15 credits, including a 3-credit core course and 12 credits in elective courses.

Required core

One of the following:

IAFF 6106	Nuclear Weapons
IAFF 6118	Special Topics in International Affairs (Science of Nuclear Materials)

Electives

Three of the following:

IAFF 6118	Special Topics in International Affairs (Nuclear Proliferation and Nonproliferation)
IAFF 6118	Special Topics in International Affairs (Nuclear Energy)

Students are encouraged to consider relevant courses, such as courses on regional security topics, which may be counted toward required supporting courses with the approval of the certificate advisor.

MILKEN INSTITUTE SCHOOL OF PUBLIC HEALTH

Dean L.R. Goldman

Senior Associate Dean G. Paulson (*Interim*)

Associate Deans J. DeLoia, K. Horn, P. Vigilance

Assistant Dean H. Klepac

Established in July 1997 as the School of Public Health and Health Services, the school brought together three longstanding university programs in the schools of medicine, business, and education. In 2014, the school was renamed Milken Institute School of Public Health (Milken Institute SPH) after receiving three gifts totaling \$80 million from the Milken Institute, the Sumner M. Redstone Charitable Foundation, and the Milken Family Foundation, the largest ever received by The George Washington University. The only school of public health in the nation's capital, Milken Institute SPH enrolls more than 1,700 students, who come from nearly every U.S. state and more than 39 nations to pursue undergraduate, graduate, and doctoral-level degrees in public health. The student body is one of the most ethnically diverse among the nation's private schools of public health. Six departments form the school: Environmental and Occupational Health, Epidemiology and Biostatistics, Exercise and Nutrition Sciences, Global Health, Health Policy and Management, and Prevention and Community Health.

Degrees Programs

The Milken Institute School of Public Health offers the following degree programs:

- Bachelor of Science with majors in exercise science and public health
- Master of Public Health in the fields of biostatistics; community oriented primary care; environmental health science and policy; epidemiology; global environmental health; global health; global health program design, monitoring, and evaluation; global health policy; global health epidemiology; health policy; health promotion; maternal and child health; physical activity in public health; public health communication and marketing; and public health nutrition
- Master of Public Health: MPH@GW (online)
- Master of Science in the fields of biostatistics; epidemiology; exercise science with a concentration in strength and conditioning; health policy; and public health microbiology and emerging infectious diseases
- Master of Health Administration; Master of Health Administration: online/executive program
- Health Services Administration Specialist
- Special Programs: Doctor of Medicine and Master of Public Health; Juris Doctor/Master of Laws in the field of law and Master of Public Health; Master of Arts in the field of international affairs and Master of Public Health; Master

of Health Administration with a certificate in healthcare corporate compliance; Master of Public Health in the field of health policy with certificate in healthcare corporate compliance; Master of Science in Health Policy with a certificate in healthcare corporate compliance; Master of Science in Health Sciences in the field of physicians assistant and Master of Public Health; Peace Corp Master's International Program and Master of Public Health

- Doctor of Public Health in the fields of environmental and occupational health; global health; health behavior; health policy; biostatistics; and epidemiology. Columbian College confers the Doctor of Philosophy in biostatistics and public policy and public policy and administration (health policy track)

Mission

The Milken Institute School of Public Health is committed to excellence in scholarship that contributes to the betterment of local, national, and global community health. The School is dedicated to providing the highest quality public health educational experience that incorporates the core values of scholarship and leadership, scientific rigor and policy analysis, and training. Through its efforts, the School fosters the next generation of thought leaders, practitioners, policy makers, and scientists who will transform public health worldwide, especially for underserved and poor populations.

Vision

As complex global health challenges continue to threaten the world population's health and future, the Milken Institute School of Public Health will be preeminent in training leaders who will contribute to improving the public's health, conducting translational research and convening the world's top public health leaders and thinkers.

Accreditation

The public health programs of the Milken Institute SPH are fully accredited by the Council on Education for Public Health. In 2008, Milken Institute SPH was awarded a seven-year accreditation through 2015. The program in health administration is fully accredited by the Commission on Accreditation of Healthcare Management Education. Milken Institute SPH is a member of the Association of Schools and Programs of Public Health.

REGULATIONS

- Undergraduate Regulations (p. 705)
- Graduate Regulations (p. 707)

Undergraduate Regulations

Graduation Requirements

Depending on the Milken Institute SPH degree program, students must complete 120 to 124 credits. Students in the B.S.

in exercise science degree programs must have a minimum cumulative GPA of 2.5 in courses in the major; those in the B.S. in public health program must have a minimum overall cumulative GPA of 2.5. The University General Education Requirement and major and other curriculum requirements are listed under each program's regulations tab in this Bulletin.

While degrees are awarded at the end of each semester, formal commencement ceremonies occur only in May. Students are eligible to graduate only after they have completed all degree requirements and have no financial obligations to the University. Students may include degree designations (B.S., M.S., M.P.H., M.H.A., Dr.PH., or Ph.D.) after their name only when they have completed all degree requirements.

Enrollment Status

Once entered in an undergraduate degree program, students are expected to be registered continuously for at least 1 credit during all fall and spring semesters and to be engaged actively in fulfilling the requirements for their degree.

- In the fall and spring semesters, students must register for 1 or more credits to maintain enrollment status.
- During the summer session, students do not have to be enrolled unless they are graduating during the summer; in this case, they should register for Continuous Enrollment.
- Some additional activities, such as study abroad programs, qualify as continuous enrollment.

Degree students who need to interrupt active pursuit of the degree may petition to take a leave of absence for a period of no more than one calendar year during their program. Students who discontinue active enrollment in degree studies without being granted a leave of absence, or students who are granted a leave but do not return to active study at the close of the period of approved absence, are no longer in status and must apply for readmission and be subject to the regulations and program requirements then in effect. Readmission to any program is a competitive process and not guaranteed.

Advising

Students are responsible for building a support system to help ensure their own academic success. Each student is assigned a faculty advisor who may assist not only with academic counseling, but also in areas ranging from understanding University requirements to finding campus resources to help individual students connect with the GW the community. Other members of the faculty, professional advisors, tutors, and/or counselors also should be part of the support system. The University Career Center and The Writing Center offer walk-in and by-appointment assistance. Personal counseling is available through the office of the Dean of Student Affairs, Mental Health Services, Disability Support Services, Multicultural Student Services Center, and International Services Office.

Timely Progress Toward the Degree

Students who fail to make adequate and timely progress toward the degree, through repeated leaves of absence or repeated failure to complete an appropriate number of credits per semester, may be dismissed from the University (see Right to Dismiss Students under University Regulations). Students dismissed on these grounds may apply for readmission after supplying sufficient evidence of academic promise. Additionally, students must attain grades no lower than C- in required major field courses. If a student receives a grade of D+, D, or D- in a course specifically required for the major, the student will be required to repeat the course until a satisfactory grade (C- or better) is earned. Once the student has completed the course with a satisfactory grade, credits earned the first time the course was taken will count toward the minimum number of credits required for the major. Credits earned toward the repetition do not count toward the degree.

Incompletes

Conditions under which the symbol *I*, Incomplete, may be assigned are described under University Regulations (<http://bulletin.gwu.edu/university-regulations>). In the Milken Institute SPH, the conditions for granting a notation of *I* are documented with a written contract (http://publichealth.gwu.edu/pdf/gwsph_incomplete_contract.pdf) between the faculty member and the student.

The Incomplete work must be completed as specified in the contract but no later than one calendar year from the end of the semester in which the course was taken. In cases of well-documented extenuating circumstances, an instructor and a student may jointly petition the dean for additional time in which to complete the work of the course. Such petitions should be submitted within one year of the assignment of the symbol *I*.

Pass/No Pass Option

Junior or senior students in good standing may, with the approval of the instructor and program director, take one course each semester for a grade of *P*, Pass, or *NP*, No Pass. No student will be allowed to take more than a total of four courses on a P/NP basis under this regulation. Students may, however, also receive grades of P/NP in courses that are graded only on that basis. Courses required for the University General Education Requirement or in the student's major or minor field (including those courses required for the major that are offered by other departments) may not be taken on the P/NP basis. A transfer student may not choose this option until the second semester of enrollment in the University. Under no circumstances may a student change from P/NP status to graded status, or vice versa, after the end of the eighth week of class. The Milken Institute SPH does not allow LSPA courses to be counted toward the degree.

Academic Workload

To encourage academic performance of high quality, the Milken Institute SPH places limits on the number of credits a

student may take. After freshman year, a full-time student who is not on probation may take a course load of up to 19 credits. The 18th and all subsequent credits require additional tuition charges. A full-time student who, during the immediately preceding semester, has received no grades below B– and has earned grades of A or A– in three courses totaling at least 9 credits may take up to 21 credits. Students may not register for more than 21 credits without the approval of the dean.

Applying for Readmission to a Program

Students Who Have Taken Classes Within the Past Year:

Milken Institute SPH graduate degree or certificate students who were previously registered in the university but did not register during the immediate preceding semester/module (excluding summer sessions) are out of status and must apply for readmission by completing an admissions petition. (<http://publichealth.gwu.edu/academics/forms>)

Students Who Have Not Taken Classes in More Than a Year:

Students who have not taken any courses at GW in more than one year must apply for readmission using SOPHAS Express (<https://sophasexpress.liaisoncas.com>).

Students Who Have Been Suspended:

Students who were suspended from the Milken Institute SPH must apply for readmission through SOPHAS Express (<https://sophasexpress.liaisoncas.com>). Students may only apply for readmission after at least one academic year has passed. Students should consult with the advisor concerning readmission requirements.

International Students---Less than Full-Time Status

International students on an F-1 or J-1 Visa are responsible for enrolling as a full-time student (minimum 12 credits for undergraduate students) for spring and fall semesters according to U.S. Immigration and Naturalization rules governing registration requirements. In certain circumstances, a reduced course load may be allowed; students should contact the International Services Office (<http://internationalservices.gwu.edu>) to request approval for this exception.

Special Honors

In addition to meeting the general requirements stated under University Regulations, a candidate for graduation with Special Honors in exercise science must have a minimum GPA of 3.5 in required courses in the major and a minimum overall GPA of 3.25. The candidate must submit an honors paper; the student will be recommended for graduation with special honors only if a committee of at least two faculty members approves the paper.

Independent Study Course Requirements

Independent study is designed to provide the student with an opportunity to gain or enhance public health knowledge and to explore an area of interest related to public health research or the delivery and/or administration of health

services. Forms and instructions for registration are available online (<http://publichealth.gwu.edu/academics/forms>). Independent study projects may not be used as a substitute for an available required or elective course and may not cover substantially the same subject matter that is available in a required or elective course.

Preparation for Medical School

A student who plans to apply to medical school fulfills the general requirements of their program. The health professions advisors in the Columbian College Office of Undergraduate Studies provide advice about academic preparation for medical school. For admission to most medical schools, the student must earn a bachelor's degree that includes the following course work: Biology—8 credits of introductory biology, including laboratory. Students who receive credit for AP biology must complete 8 credits of upper-level biology course work, including laboratory; chemistry—8 credits of general inorganic chemistry, including laboratory; organic Chemistry—8 credits, including laboratory; biochemistry—3 credits; physics—8 credits, including laboratory; and English—6 credits in introductory English composition courses (fulfilled by the University Writing Program). Many medical schools have additional entrance requirements, which may include courses in biochemistry, genetics, and mathematics; even when such courses are not required, they are strongly recommended. With the exception of the specified requirements, applicants are urged to follow their personal interests in developing their course of study.

Preparation for Law School

A broad liberal arts education is the best undergraduate preparation for law school. Students are encouraged to use elective credit to increase the breadth of their program of study. Advice about academic preparation for law school is provided by the pre-law advisor in the Columbian College Office of Undergraduate Studies (<http://columbian.gwu.edu/undergraduate/advising>).

Other Regulations

Other regulations applicable to undergraduate students of the University can be found under University Regulations (<http://bulletin.gwu.edu/university-regulations>).

Graduate Regulations

The Milken Institute SPH provides an online Graduate Student Handbook (<http://publichealth.gwu.edu/pdf/Handbook.pdf>), which contains additional updated information on policies, regulations, and other matters of concern to enrolled or admitted students. It is the responsibility of the student to be aware of the information contained in both this Bulletin and the Handbook. Students should also consult departmental handbooks and guidelines.

Enrollment Status

Once entered in a graduate degree program, students are expected to be registered continuously for at least one credit during all fall and spring semesters and engaged actively in fulfilling the requirements for the degree.

- In the fall and spring semester, students must register for 1 or more credits to maintain enrollment status.
- During the summer session, students do not have to be enrolled unless they are graduating during the summer; in this case, they should register for Continuous Enrollment.
- Some additional activities, such as Master's International, qualify as continuous enrollment.

Degree students who need to interrupt active pursuit of the degree may petition to take a Leave of Absence for a period of no more than one calendar year during the their program. Students who discontinue active enrollment in degree studies without being granted a leave of absence, or students who granted a leave but does not return to active study at the close of the period of approved absence, are no longer in status and must apply for readmission and be subject to the regulations and program requirements then in effect. Readmission to any program is a competitive process and not guaranteed.

Advising

Students are responsible for building a support system to help ensure their own academic success. Each student is assigned a faculty advisor who may assist not only with academic counseling, but also in areas ranging from understanding University requirements to finding campus resources to help individual students connect with the GW the community. Other members of the faculty, professional advisors, tutors, and/or counselors also should be part of the support system. The University Career Center (<http://publichealth.gwu.edu/services/career-center>) and Writing Center (<http://www.gwu.edu/%7Egwriter>) offer walk-in and by-appointment assistance. Personal counseling is available through the office of the Dean of Student Affairs (<http://students.gwu.edu>), Mental Health Services (<http://counselingcenter.gwu.edu>), Disability Support Services (<http://gwired.gwu.edu/dss>), the Multicultural Student Services Center (<http://gwired.gwu.edu/mssc/?url=mssc>), and the International Services Office (<http://internationalservices.gwu.edu>).

Academic Standing

Graduate students who are not suspended, on academic probation, or under extended provisional admission status are considered to be in good standing. Maintenance of a minimum GPA of 3.0 is required for the degree. All courses taken for graduate credit after matriculation as a degree candidate—including those the Milken Institute SPH transferred in from non-degree status, but excluding those audited or taken for the grade of CR/NC—will be used to calculate the GPA.

Provisional Admission

Graduate program applicants with credentials that are weaker than expected for graduate study, but who nonetheless show promise of successful graduate work, occasionally are granted provisional admission by the Milken Institute SPH Admissions Committee. While on provisional admission status, students are required to see their advisors each semester prior to registration. Provisionally admitted graduate students must demonstrate their ability to maintain a minimum GPA of 3.0 in the first 9 credits of coursework attempted, and during this time are not allowed to receive an Incomplete or a grade lower than a 3.0; provisionally admitted students who meet these requirements are granted good standing. Provisionally admitted students who do not meet these requirements are subject to suspension.

Semester Warning

Graduate students whose cumulative GPA is below 3.0 after attempting a minimum of 1 credit and a maximum of 8 credits will be issued a warning at the end of the semester and will be required to take corrective measures, such as meeting with their academic advisor to outline steps to raise the GPA.

Probation

Graduate students whose GPA falls below 3.0 at any point after completing 9 credits will be placed on probation. This probation extends through the period in which the student next attempts up to 12 credits of work, including prescribed courses. A student's program may be restricted by the program director if deemed necessary. During this period, the student's performance will be monitored to determine suitability for continued study. A student who fails to raise the cumulative GPA to 3.0 or above during the period of probation is subject to suspension. Incompletes and grades of B- or below are not permitted during the probationary period and are grounds for automatic suspension. A student who is subject to probation for a second time at any point during their degree program may be suspended automatically.

Grade of F

Graduate student who receive a grade of *F* are subject to suspension. If such students wish to remain enrolled, they must present cause, for consideration by the dean and the director of his/her degree program, as to why continued study should be permitted. Once a grade of *F* is earned in a core, required, or elective course, it remains a part of the student's permanent record and is calculated into the GPA. A graduate student who receives the grade of *F* in a core or other required course and is permitted to continue in graduate studies must repeat the course and achieve a minimum grade of 3.0. The repetition does now, however, expunge the grade of *F*, which remains part of the student's record. If the student receives a grade below 3.0 in the repeated course, he or she will be suspended from the degree program.

Suspension

Graduate student who receive an *F* or do not meet the conditions of probation are subject to suspension. Suspended students may not register for or complete any courses at The George Washington Dean's Office, in consultation with the student's academic advisor, may continue a student on probation (in lieu of suspension) if satisfactory progress is demonstrated during the probationary period, and sufficient evidence of academic promise, by way of a statement of appeal, is offered by the student. A student who is suspended or withdraws under these conditions may apply for readmission after one semester. To be readmitted, the student must submit evidence that suggests the probability of academic success. A student who is readmitted will continue on academic probation and must achieve a minimum GPA of 3.5 in the next 12 credits of graduate study. Should the student fail to achieve this GPA, he or she will be suspended and will not be readmitted.

Timely Progress Toward the Degree

A graduate student who fails to make adequate and timely progress toward the degree, through repeated leaves of absence or repeated failure to complete an appropriate number of credits per semester, may be suspended. Students suspended on these grounds may apply for readmission after supplying sufficient evidence of academic promise.

Summary of Academic Standing Policies for Graduate Students

- **Provisional Admission**—A student who receives a grade of *I* or of *B-* or lower while on provisional admission status is subject to suspension.
- **Semester Warning**—A student with a cumulative GPA below 3.0 (with fewer than 9 credits completed) must take corrective action.
- **Academic Probation**—A student with a cumulative GPA below 3.0 (with 9 or more credits completed) is placed on academic probation. A student on academic probation who receives an unacceptable grade (*B-, C, F, I, Z*) or fails to raise the cumulative GPA to 3.0 within the next 12 credits taken is subject to suspension.
- **Grade of F**—A student who receives a grade of *F* is subject to suspension. If a student wishes to remain enrolled he or she must present cause as to why continued study should be permitted. If permitted to continue in graduate studies, the student must repeat the course (if core or required) and achieve at least the grade of *B*.
- **Suspension**—A student who is suspended may not register for or complete any courses at GW. A student who is suspended or withdraws under these conditions may apply for readmission after one semester.

Incompletes

Conditions under which the symbol *I*, Incomplete, may be assigned are described under University Regulations (<http://bulletin.gwu.edu/university-regulations>). In the Milken Institute

SPH, the conditions for granting a notation of *I* are documented with a written contract (http://publichealth.gwu.edu/pdf/gwsph_incomplete_contract.pdf) between the faculty member and the student.

Changing an Incomplete (I)

Conditions under which the symbol *I*, Incomplete, may be changed to a letter grade are described under University Regulations (<http://bulletin.gwu.edu/university-regulations>). In the Milken Institute SPH, incomplete work must be completed as specified in the contract but no later than six months from the end of the semester in which the course was taken. In cases of well-documented extenuating circumstances, an instructor and a student may jointly petition the dean for additional time in which to complete the work of the course. Such petitions should be submitted within six months of the assignment of the symbol *I*.

In Progress (IP)

The notation In Progress (*IPG*) is assigned for all thesis, residency, advanced reading, independent study, culminating experience, practicum, and dissertation research courses until the coursework is completed. Upon the satisfactory completion, the grade replaces the notation *IPG* on the transcript. An *IPG* may not be assigned to regular, semester-length courses.

Applying for Readmission to a Program

Milken Institute SPH graduate degree or certificate students who previously were registered in the University but who did not register during the immediately preceding semester (summer sessions excluded) are out of status and must apply for readmission by completing an admissions petition. Filing the petition does not guarantee that the student will be readmitted. Milken Institute SPH departments are responsible for readmitting students and can do so only if the student is not in violation of other Milken Institute SPH or University policies. Students who have attended one or more academic institutions while absent from this University must have complete official transcripts from each institution sent directly to the Milken Institute SPH Office of Admissions. Applicants for readmission are considered on the basis of policies and program requirements currently in effect and if readmitted, will be subject to the policies and program requirements then in effect.

International Students---Less than Full-Time Status

International students on an F-1 or J-1 Visa are responsible for enrolling as full-time student (minimum 9 credits for graduate students) for the spring and fall semesters according to the U.S. Immigration and Naturalization rules governing registration requirements. Under certain circumstances, a reduced course load may be allowed. To request approval for a course reduction, students should submit the F-1/J-1 Request for Reduced Course Load Form (<http://bulletin.gwu.edu/>

public-health/%20http://gwired.gwu.edu/iso/CurrentStudents/formscopy). More information is available by calling the ISO at (202) 994-4477.

Independent Study Course Requirements

Independent study is designed to provide students with an opportunity to gain or enhance public health knowledge and to explore an area of interest related to public health research or the delivery and/or administration of health services. Instructions and forms required for registration (<http://publichealth.gwu.edu/academics/forms>) are available. Independent study projects may not be used as a substitute for an available required or elective course and may not cover substantially the same subject matter that is available in a required or elective course.

Graduation

While degrees are awarded at the end of each semester, formal commencement ceremonies occur only in May. Students are eligible to graduate only after they have completed all degree requirements and have no financial obligations to the University. Students may include degree designation (B.S., M.S., M.P.H., M.H.A., Dr.PH., or Ph.D.) after their name only when they have completed all degree requirements.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Science with a major in exercise science (p. 711)
- Bachelor of Science with a major in exercise science, pre-athletic training/sports medicine concentration (p. 712)
- Bachelor of Science with a major in exercise science, pre-medical professional concentration (p. 713)
- Bachelor of Science with a major in exercise science, pre-physical therapy concentration (p. 714)
- Bachelor of Science with a major in public health (p. 715)
- Combined Bachelor of Science in public health and Master of Public Health

Minors

- Minor in exercise science (p. 720)
- Minor in nutrition
- Minor in public health

GRADUATE

Master of Public Health

- Master of Public Health in the field of biostatistics (p. 745)
- Master of Public Health in the field of community oriented primary care (p. 815)
- Master of Public Health in the field of environmental health science and policy (p. 734)
- Master of Public Health in the field of epidemiology

- Master of Public Health in the field of global environmental health (p. 737)
- Master of Public Health in the field of global health communication (p. 783)
- Master of Public Health in the field of global health program design, monitoring, and evaluation (p. 789)
- Master of Public Health in the field of global health policy (p. 791)
- Master of Public Health in the field of global health epidemiology (p. 750)
- Master of Public Health in the field of health policy (p. 800)
- Master of Public Health in the field of health promotion (p. 819)
- Master of Public Health in the field of maternal and child health (p. 821)
- Master of Public Health in the field of physical activity in public health (p. 770)
- Master of Public Health in the field of public health communication and marketing (p. 822)
- Master of Public Health in the field of public health nutrition (p. 773)
- Master of Public Health: MPH@GW (p. 722)

Master of Science

- Master of Science in the field of biostatistics (p. 753)
- Master of Science in the field of epidemiology
- Master of Science in the field of exercise science with a concentration in strength and conditioning (p. 776)
- Master of Science in the field of health policy (p. 806)
- Master of Science in the field of public health microbiology and emerging infectious diseases (p. 757)

Master of Health Administration

- Master of Health Administration (p. 796)
- Master of Health Administration - online/executive program (p. 799)

Specialist program

- Health Services Administration Specialist (p. 807)

Joint/Dual programs

- Doctor of Medicine and Master of Public Health (p. 730)
- Juris Doctor/Master of Laws in the field of law and Master of Public Health (p. 731)
- Master of Arts in the field of international affairs and Master of Public Health (p. 721)
- Master of Health Administration with a certificate in healthcare corporate compliance (p. 724)
- Master of Public Health in the field of health policy with certificate in healthcare corporate compliance (p. 729)

- Master of Science in Health Policy with a certificate in healthcare corporate compliance (p. 725)
- Master of Science in Health Sciences in the field of physicians assistant and Master of Public Health (p. 725)
- Peace Corp Masters International Program and Master of Public Health

Doctoral programs

- Doctor of Public Health in the field of environmental and occupational health (p. 741)
- Doctor of Public Health in the field of global health (p. 794)
- Doctor of Public Health in the field of health behavior (p. 825)
- Doctor of Public Health in the field of health policy (p. 808)
- Doctor of Philosophy in the field of biostatistics (p. 758)
- Doctor of Philosophy in the field of epidemiology (p. 760)
- Doctor of Philosophy in the field of public policy and administration (health policy track) (p. 808)

CERTIFICATES

- Graduate certificate in health administration generalist (p. 809)
- Graduate certificate in long-term care
- Graduate certificate in (p. 810)health policy
- Graduate certificate in public health (<http://bulletin.gwu.edu/public-health/public-health-certificate>)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

The letters and range of numbers below indicate the department in which the course is offered.

PUBH 6000 - 6099: MPH Core & MPH@GW Program-Specific Courses

PUBH 6100 - 6199: Environmental and Occupational Health Courses

PUBH 6200 - 6299: Epidemiology and Biostatistics Courses

PUBH 6300 - 6399: Health Policy Courses

PUBH 6400 - 6499: Global Health Courses

PUBH 6500 - 6599: Prevention and Community Health Courses

PUBH 6600 - 6699: Public Health Nutrition and Miscellaneous Courses

PUBH 8000 - 9000: Doctoral Level Courses

EXSC 6000 - 7000: Exercise Science Courses

HSML 6200 - 6300: Health Services Management and Leadership Courses

- Exercise and Nutrition Sciences (EXNS) (p. 1073)
- Health and Wellness (HLWL) (p. 1107)
- Lifestyle, Sports, and Physical Activity (LSPA) (p. 1181)
- Public Health (PUBH) (p. 1265)
- Health Services Management and Leadership (HSML) (p. 1104)

UNDERGRADUATE PROGRAMS

Bachelor's programs

- Bachelor of Science with a major in exercise science (p. 711)
- Bachelor of Science with a major in exercise science, pre-athletic training/sports medicine concentration (p. 712)
- Bachelor of Science with a major in exercise science, pre-medical professional concentration (p. 713)
- Bachelor of Science with a major in exercise science, pre-physical therapy concentration (p. 714)
- Bachelor of Science with a major in public health (p. 715)
- Combined Bachelor of Science in public health and Master of Public Health

Minors

- Minor in exercise science (p. 720)
- Minor in nutrition
- Minor in public health

BACHELOR OF SCIENCE WITH A MAJOR IN EXERCISE SCIENCE

Program Advisor and Director B. Westerman

The Bachelor of Science with a major in exercise science prepares individuals for careers in medicine and other health related professions including athletic training/sports medicine, physical therapy, physician's assistant or nursing, exercise physiology and rehabilitation, sport psychology as well as fitness and health promotion.

Students in the exercise science major may select the pre-medical professional concentration (for those planning to enter a medical, physician assistant, or nursing program upon graduation), the pre-physical therapy concentration, or the pre-athletic training/sports medicine concentration. The exercise science major may also be taken without a concentration.

REQUIREMENTS

All students accepted to the Bachelor of Science with a major in the field of exercise science must complete 124 credits and maintain a minimum grade point average of 2.5.

The following requirements must be fulfilled:

General education:

UW 1020	University Writing
or HONR 1015	Honors Proseminar: UW 1020: Origins and Evolution of Modern Thought
STAT 1051	Introduction to Business and Economic Statistics
or STAT 1053	Introduction to Statistics in Social Science
BISC 1111	Introductory Biology: Cells and Molecules
BISC 1112	Introductory Biology: The Biology of Organisms

One humanities course selected from approved list*

Two social science courses selected from approved list*

Two writing-in-the-discipline (WID) courses**

Core requirements:

Students must earn a grade of C- or better in all core exercise science required courses.

EXNS 1103	Professional Foundations in Exercise Science
EXNS 1110	Applied Anatomy and Physiology I
EXNS 1111	Applied Anatomy and Physiology II
EXNS 2110	Prevention and Care of Injury
EXNS 2111	Exercise Physiology I
EXNS 2112	Exercise Physiology II
EXNS 2113	Kinesiology
EXNS 2114	Nutrition Sciences I
EXNS 2115	Nutrition Sciences II
EXNS 2116	Exercise and Health Psychology
EXNS 3110	Field Experience- Exercise & Nutrition Sciences
EXNS 4110	Current Issues in Exercise Science

PSYC 1001 General Psychology

PUBH 1102 History of Public Health

PUBH 2110 Public Health Biology

Electives:

18 credits selected from EXNS, HLWL, and/or PUBH

30 credits of electives

*A list of approved courses can be found on the General Education Requirement page (p. 29).

**WID courses may fulfill other requirements

Note: LSPA courses do not count towards the academic requirements for the Bachelor of Science with a major in exercise science.

BACHELOR OF SCIENCE WITH A MAJOR IN EXERCISE SCIENCE, PRE-ATHLETIC TRAINING/SPORTS MEDICINE

Program Advisor and Director B. Westerman

The Bachelor of Science with a major in exercise science prepares individuals for careers in medicine and other health related professions including athletic training/sports medicine, physical therapy, physician's assistant or nursing, exercise physiology and rehabilitation, sport psychology as well as fitness and health promotion.

Students in the exercise science major may select the pre-medical professional concentration (for those planning to enter a medical, physician assistant, or nursing program upon graduation), the pre-physical therapy concentration, or the pre-athletic training/sports medicine concentration. The exercise science major may also be taken without a concentration.

REQUIREMENTS

Students must complete 124 credits with a grade point average of 2.5 or above.

The following requirements must be fulfilled:

General education:

UW 1020	University Writing
or HONR 1015	Honors Proseminar: UW 1020: Origins and Evolution of Modern Thought
STAT 1051	Introduction to Business and Economic Statistics
or STAT 1053	Introduction to Statistics in Social Science

BISC 1111	Introductory Biology: Cells and Molecules
BISC 1112	Introductory Biology: The Biology of Organisms
One humanities course selected from approved list*	
Two social science courses selected from approved list*	
Two writing-in-the-discipline (WID) courses**	
Core requirements:	
Students must earn a grade of C- or better in all core exercise science required courses.	
EXNS 1103	Professional Foundations in Exercise Science
EXNS 1110	Applied Anatomy and Physiology I
EXNS 1111	Applied Anatomy and Physiology II
EXNS 2110	Prevention and Care of Injury
EXNS 2111	Exercise Physiology I
EXNS 2112	Exercise Physiology II
EXNS 2113	Kinesiology
EXNS 2114	Nutrition Sciences I
EXNS 2115	Nutrition Sciences II
EXNS 2116	Exercise and Health Psychology
EXNS 3110	Field Experience- Exercise & Nutrition Sciences
EXNS 4110	Current Issues in Exercise Science
PSYC 1001	General Psychology
PUBH 1102	History of Public Health
PUBH 2110	Public Health Biology
Pre-athletic training/sports management concentration:	
EXNS 2121	Orthopaedic Taping and Bracing
EXNS 3117	Injury Assessment
EXNS 3118	Therapeutic Modalities in Sports Medicine
EXNS 3119	Therapeutic Exercise in Sports Medicine
EXNS 3121	Medical Issues in Sports Medicine
EXNS 3123W	Psychology of Injury and Rehabilitation

EXNS 3125 Athletic Training Practicum

Electives:

26 credits of electives

*A list of approved courses can be found on the General Education Requirement page (p. 29).

**WID courses may fulfill other requirements.

Note: LSPA courses do not count towards the academic requirements for the Bachelor of Science with a major in exercise science, pre-athletic training/sports medicine concentration.

BACHELOR OF SCIENCE WITH A MAJOR IN EXERCISE SCIENCE, PRE-MEDICAL PROFESSIONAL CONCENTRATION

Program Advisor and Director B. Westerman

The Bachelor of Science with a major in exercise science prepares individuals for careers in medicine and other health related professions including athletic training/sports medicine, physical therapy, physician's assistant or nursing, exercise physiology and rehabilitation, sport psychology as well as fitness and health promotion.

Students in the exercise science major may select the pre-medical professional concentration (for those planning to enter a medical, physician assistant, or nursing program upon graduation), the pre-physical therapy concentration, or the pre-athletic training/sports medicine concentration. The exercise science major may also be taken without a concentration.

REQUIREMENTS

Students must complete 124 credits with a grade point average of at least 2.5.

The following requirements must be fulfilled:

General education:

UW 1020	University Writing
or HONR 1015	Honors Proseminar: UW 1020: Origins and Evolution of Modern Thought
STAT 1051	Introduction to Business and Economic Statistics
or STAT 1053	Introduction to Statistics in Social Science
BISC 1111	Introductory Biology: Cells and Molecules

BISC 1112 Introductory Biology: The Biology of Organisms

One humanities course selected from approved list*

Two social science courses selected from approved list*

Two writing-in-the-discipline (WID) courses**

Core requirements:

Students must earn a grade of C- or better in all core exercise science required courses.

EXNS 1103 Professional Foundations in Exercise Science

EXNS 1110 Applied Anatomy and Physiology I

EXNS 1111 Applied Anatomy and Physiology II

EXNS 2110 Prevention and Care of Injury

EXNS 2111 Exercise Physiology I

EXNS 2112 Exercise Physiology II

EXNS 2113 Kinesiology

EXNS 2114 Nutrition Sciences I

EXNS 2115 Nutrition Sciences II

EXNS 2116 Exercise and Health Psychology

EXNS 3110 Field Experience- Exercise & Nutrition Sciences

EXNS 4110 Current Issues in Exercise Science

PSYC 1001 General Psychology

PUBH 1102 History of Public Health

PUBH 2110 Public Health Biology

Pre-medical professional concentration:

CHEM 1111 General Chemistry I

CHEM 1112 General Chemistry II

CHEM 2151 Organic Chemistry I
& CHEM 2153 and Organic Chemistry Laboratory I

CHEM 2152 Organic Chemistry II
& CHEM 2154 and Organic Chemistry Laboratory II

MATH 1221 Calculus with Precalculus II

or MATH 1231 Single-Variable Calculus I

or MATH 1051 Finite Mathematics for the Social and Management Sciences

PHYS 1011 General Physics I

PHYS 1012 General Physics II

Electives:

17 credits of electives. Suggested electives include:

BISC 2202 Cell Biology

BISC 2207 Genetics
& BISC 2208 and Genetics Laboratory

BISC 2337 Introductory Microbiology

BIOC 3261 Introductory Medical Biochemistry
& BIOC 3262 and Biochemistry Laboratory

EXNS 3121 Medical Issues in Sports Medicine

EXNS 3123W Psychology of Injury and Rehabilitation

*A list of approved courses can be found on the General Education Requirement page (p. 29).

**WID courses may fulfill other requirements.

Note: LSPA courses do not count towards the academic requirements for the Bachelor of Science with a major in exercise science, pre-medical professional concentration.

BACHELOR OF SCIENCE WITH A MAJOR IN EXERCISE SCIENCE, PRE-PHYSICAL THERAPY CONCENTRATION

Program Advisor and Director B. Westerman

The Bachelor of Science with a major in exercise science prepares individuals for careers in medicine and other health related professions including athletic training/sports medicine, physical therapy, physician's assistant or nursing, exercise physiology and rehabilitation, sport psychology as well as fitness and health promotion.

Students in the exercise science major may select the pre-medical professional concentration (for those planning to enter a medical, physician assistant, or nursing program upon graduation), the pre-physical therapy concentration, or the pre-athletic training/sports medicine concentration. The exercise science major may also be taken without a concentration.

REQUIREMENTS

Students must complete 124 credits with a grade point average of 2.5 or above.

The following requirements must be fulfilled:

General education:

UW 1020	University Writing
or HONR 1015	Honors Proseminar: UW 1020: Origins and Evolution of Modern Thought
STAT 1051	Introduction to Business and Economic Statistics
or STAT 1053	Introduction to Statistics in Social Science
BISC 1111	Introductory Biology: Cells and Molecules
BISC 1112	Introductory Biology: The Biology of Organisms
One humanities course selected from approved list*	

Two social science courses selected from the approved list*

Two writing-in-the-discipline (WID) courses**

Core requirements:

Students must earn a grade of C- or better in all core exercise science required courses.

EXNS 1103	Professional Foundations in Exercise Science
EXNS 1110	Applied Anatomy and Physiology I
EXNS 1111	Applied Anatomy and Physiology II
EXNS 2110	Prevention and Care of Injury
EXNS 2111	Exercise Physiology I
EXNS 2112	Exercise Physiology II
EXNS 2113	Kinesiology
EXNS 2114	Nutrition Sciences I
EXNS 2115	Nutrition Sciences II
EXNS 2116	Exercise and Health Psychology
EXNS 3110	Field Experience- Exercise & Nutrition Sciences
EXNS 4110	Current Issues in Exercise Science
PSYC 1001	General Psychology
PUBH 1102	History of Public Health
PUBH 2110	Public Health Biology

Pre-physical therapy concentration:

CHEM 1111	General Chemistry I
CHEM 1112	General Chemistry II
EXNS 3117	Injury Assessment
EXNS 3118	Therapeutic Modalities in Sports Medicine
EXNS 3119	Therapeutic Exercise in Sports Medicine
EXNS 3123W	Psychology of Injury and Rehabilitation
MATH 1221	Calculus with Precalculus II
or MATH 1231	Single-Variable Calculus I
or MATH 1051	Finite Mathematics for the Social and Management Sciences
PHYS 1011	General Physics I
PHYS 1012	General Physics II
PSYC 2011	Abnormal Psychology
or PSYC 2013	Developmental Psychology

Electives:

11 credits of electives

*A list of approved courses can be found on the General Education Requirement page (p. 29).

**WID courses may fulfill other requirements.

Note: LSPA courses do not count towards the academic requirements for the Bachelor of Science with a major in exercise science, pre-physical therapy concentration.

BACHELOR OF SCIENCE WITH A MAJOR IN PUBLIC HEALTH

The Bachelor of Science with a Major in Public Health is intended to convey technical detail and analytic skills with a liberal arts philosophical base. It also has the educational objectives of nurturing critical thinking, analysis, and synthesis of information, and recognizing the historical and societal associations of current trends in public health and health care delivery. While nurturing students' capacity to think analytically and creatively, the program strives to deepen students' commitment to improving the public's health.

Visit the program website (<http://publichealth.gwu.edu/programs/public-health-bs>) for additional information.

COMPETENCIES

The following competencies are designed to be achieved by all public health majors through the indicated courses:

Upon completion of the Bachelor of Science with a major in Public Health, students will be able to:

- Assess the impact of historical, cultural, political, environmental, behavioral, and socioeconomic factors on population/community health and health status

Relevant courses:

PUBH 1101	Introduction to Public Health & Health Svcs
PUBH 1102	History of Public Health
PUBH 2110	Public Health Biology
PUBH 2112	Principles of Health Education and Health Promotion
PUBH 3132	Health and Environment
PUBH 3133	Global Health & Development
PUBH 3135W	Health Policy
PUBH 4140W	Senior Seminar

- Describe the organization, financing, and delivery of health services and public health systems

Relevant courses:

PUBH 1101	Introduction to Public Health & Health Svcs
PUBH 3130	Health Services Management and Economics
PUBH 3133	Global Health & Development
PUBH 3135W	Health Policy

- Describe the underlying biological factors relating to prominent public health and health care issues and discuss how these factors inform interventions to improve individual and population health

Relevant courses:

PUBH 1101	Introduction to Public Health & Health Svcs
PUBH 2112	Principles of Health Education and Health Promotion
PUBH 2110	Public Health Biology

PUBH 3131 Epidemiology: Measuring Health and Disease

PUBH 3132 Health and Environment

PUBH 3133 Global Health & Development

PUBH 4140W Senior Seminar

- Critically review multiple types of research, develop an understanding of data and research, and develop and evaluate public health interventions based on available evidence

Relevant courses:

PUBH 1101	Introduction to Public Health & Health Svcs
PUBH 2110	Public Health Biology
PUBH 3131	Epidemiology: Measuring Health and Disease
PUBH 3132	Health and Environment
PUBH 3133	Global Health & Development
PUBH 4140W	Senior Seminar

- Evaluate policy, behavioral, environmental, and systems options for addressing current public health and health care concerns

Relevant courses:

PUBH 1101	Introduction to Public Health & Health Svcs
PUBH 2110	Public Health Biology
PUBH 2112	Principles of Health Education and Health Promotion
PUBH 3130	Health Services Management and Economics
PUBH 3132	Health and Environment
PUBH 3133	Global Health & Development
PUBH 3135W	Health Policy
PUBH 4140W	Senior Seminar

- Prepare written and oral communication to convey public health concepts and analysis clearly and persuasively (all courses relevant).
- Use an interdisciplinary integrative approach to address public-health research issues

Relevant courses:

PUBH 1101	Introduction to Public Health & Health Svcs
PUBH 2110	Public Health Biology
PUBH 3131	Epidemiology: Measuring Health and Disease
PUBH 3132	Health and Environment
PUBH 3133	Global Health & Development
PUBH 3135W	Health Policy
PUBH 4140W	Senior Seminar

REQUIREMENTS

Students may apply to enter the 120-credit public health major during the semester prior to completing 60 credits. Applicants should have a minimum grade point average of 3.0.

The following requirements must be fulfilled:

Requirements in other areas:

One of the following as a prerequisite to PUBH 2110

BISC 1005 The Biology of Nutrition and Health

BISC 1111 Introductory Biology: Cells and Molecules

or equivalent course with approval from the PUBH 2110 instructor

As a prerequisite to PUBH 3131

One semester of statistics (STAT 1127 preferred)

As a prerequisite to PUBH 3130

ECON 1011 Principles of Economics I

or equivalent course with approval from the PUBH 3130 instructor

Requirements for the major:

30 credits of public health core courses

PUBH 1101 Introduction to Public Health & Health Svcs

PUBH 1102 History of Public Health

PUBH 2110 Public Health Biology

PUBH 2112 Principles of Health Education and Health Promotion

PUBH 3130 Health Services Management and Economics

PUBH 3131 Epidemiology: Measuring Health and Disease

PUBH 3132 Health and Environment

PUBH 3133 Global Health & Development

PUBH 3135W Health Policy

PUBH 4140W Senior Seminar

12 credits of approved elective courses from the following.
Note: no more than 9 credits may be taken through study-abroad programs.

HLWL 1106 Drug Awareness

HLWL 1109 Human Sexuality

HLWL 1110 Issues in Alternative Medicine

EXNS 1114 Community Nutrition

EXNS 2119 Basic Nutrition

Students may not take required courses outside of GW except with permission from the Director of the Undergraduate Program in Public Health. Permission will only be granted if there are strong extenuating circumstances that call for an exception to this policy.

Comply with policies and procedures as outlined in the University and SPH requirements. Pay particular attention to the SPH requirements to complete human research training, to complete 8 hours of professional enhancement activities, and to pass the Academic Integrity Quiz

COMBINED BACHELOR OF SCIENCE IN PUBLIC HEALTH AND MASTER OF PUBLIC HEALTH

Program Director S. Wilensky

Program Advisor C. Leake

The Milken Institute School of Public Health (SPH) accepts a small number of outstanding students who demonstrate academic excellence and a strong commitment to public health into its dual Bachelor of Science in Public Health/Master of Public Health program each year. The program is designed to help students become public health leaders who are committed to lifelong learning and to improving the health and well-being of local, national, and international communities.

The B.S./M.P.H. program allows students to take a specified number of graduate credits as part of their undergraduate degree, thereby decreasing the number of credits normally required for the master's degree. The program is appropriate for pre-professional students who are interested in public health issues. Interested students may apply to any of the M.P.H. programs, with the exception of Public Health Management.

Specific master's program admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program website (<http://publichealth.gwu.edu/programs/public-health-bsmph>) for additional information.

REQUIREMENTS

Credit Distribution Chart

Category	Non Premed Credits	Premedical Credits
BS general curriculum requirements	28-34	52-71
BS Public health core course requirements (BS Program = 21) (Includes 9 graduate crossover credits)	27	30
BS SPH electives	12	12
BS additional electives	47-54	10-29
BS total credits	120	120
MPH total credits (Includes 9 graduate crossover credits)	45	45
Total remaining MPH credits (45 credits minus 9 credits = 36 credits)	36	36
BS/MPH total credits (120 credits plus 36 credits = 156 total credits)	156	156

Public health core requirements and graduate substitutions

Undergraduate core courses:

PUBH 1101	Introduction to Public Health & Health Svcs
PUBH 1102	History of Public Health
PUBH 3130	Health Services Management and Economics
PUBH 3133	Global Health & Development
PUBH 3135W	Health Policy
PUBH 4140W	Senior Seminar

Graduate crossover credits

PUBH 6007	Social&BehaviorAppr-Pub.Hlth (Replaces PubH 2112 Principles of Health Education and Health Promotion [3 credits] in the BS Public Health Program)
-----------	---

PUBH 6003	Prin & Practice/Epidemiology (Replaces PubH 3131 Epidemiology: Measuring Health and Disease [3 credits] in the BS Public Health Program)
PUBH 6004	Environmental and Occupational Health in a Sustainable World (Replaces PubH 3132 Health and Environment [3 credits] in the BS Public Health Program)
PUBH 6001	Biological Concepts/Public Hlth (Replaces PubH 2110 Public Health Biology [3 credits] in the BS Public Health Program)

Public health elective courses

HLWL 1106	Drug Awareness
HLWL 1109	Human Sexuality
HLWL 1110	Issues in Alternative Medicine
EXNS 1114	Community Nutrition
EXNS 2119	Basic Nutrition
EXNS 2122	Food Systems in Public Health

PUBH 3151 Current Issues in Bioethics

PUBH 3190 Topics in Public Health

Master of Public Health required core course

PUBH 6001 Biological Concepts/Public Hlth (Replaces PubH 2110 Public Health Biology (3 credits).) (Summer, Fall, Spring)

PUBH 6002 Biostatistical Applic for PubH (Summer, Fall, Spring)

PUBH 6003 Prin & Practice/Epidemiology (Replaces PubH 3131 Epidemiology: Measuring Health and Disease (3 credits) in the BS Public Health Program.) (Summer, Fall, Spring)

PUBH 6004 Environmental and Occupational Health in a Sustainable World (Replaces PubH 3132 Health and Environment (3 credits) in the BS Public Health Program.) (Summer, Fall, Spring)

PUBH 6006 Mgt & Policy Approaches to PH (Summer, Fall, Spring)

PUBH 6007 Social & Behavior Appr-Pub. Hlth (Replaces PubH 2112 Principles of Health Education and Health Promotion (3 credits) in the BS Public Health Program). (Fall, Spring, Summer)

Refer to the relevant MPH program for your program-specific graduate requirements.

Graduation Requirements:

1. Graduate credit requirement: 156 undergraduate and graduate credits
2. Course requirements: Successful completion of the undergraduate degree, graduate core courses, and program-specific courses
3. Grade point average requirement: A 3.0 (B average) overall grade point average is required for graduate course
4. Time limit requirement: Degrees must be completed within six years of the date accepted to the program

5. Transfer credit policy: In concordance with undergraduate and graduate established policies
6. Comply with policies and procedures as outlined in the University and SPH requirements. Pay particular attention to the SPH requirements to complete human research training, to complete 8 hours of professional enhancement activities, and to pass the Academic Integrity Quiz

MINOR IN EXERCISE SCIENCE REQUIREMENTS

Required

EXNS 1103	Professional Foundations in Exercise Science
EXNS 1110	Applied Anatomy and Physiology I
EXNS 1111	Applied Anatomy and Physiology II
EXNS 2111	Exercise Physiology I

Electives

3-4 credits from the following:

EXNS 1118	Sport and Nutrition
EXNS 2110	Prevention and Care of Injury
EXNS 2112	Exercise Physiology II
EXNS 2113	Kinesiology
EXNS 2114	Nutrition Sciences I
EXNS 2116	Exercise and Health Psychology
EXNS 2119	Basic Nutrition

MINOR IN NUTRITION REQUIREMENTS

The following requirements must be fulfilled: 15 credits in required courses

Required

EXNS 1114	Community Nutrition
EXNS 1118	Sport and Nutrition
EXNS 2114	Nutrition Sciences I
EXNS 2115	Nutrition Sciences II
EXNS 2122	Food Systems in Public Health

MINOR IN PUBLIC HEALTH

Program Director S. Wilensky

Advisor C. Leake

Required

PUBH 1101	Introduction to Public Health & Health Svcs
PUBH 3131	Epidemiology: Measuring Health and Disease
PUBH 3133	Global Health & Development *

Electives

Nine credits from the following:

ANTH 3504	Illness, Healing, and Culture
ANTH 3513	Anthropology of Human Rights
ANTH 6302	Issues in Development
BIOC 3560	Diet, Health, and Longevity
EXNS 1114	Community Nutrition
EXNS 2119	Basic Nutrition
EXNS 2122	Food Systems in Public Health
GEOG 2137	Environmental Hazards
HIST 3363	Race, Medicine & Public Health
HLWL 1106	Drug Awareness
HLWL 1109	Human Sexuality
HLWL 1110	Issues in Alternative Medicine
HSCI 2101	Psychosocial Aspects of Health and Illness
ORSC 4161	Research Methods in Organizational Sciences
PSC 2101	Scope and Methods of Political Science
PSYC 2101	Research Methods-Psychology
PUBH 2113	Impact of Culture upon Health
PUBH 2114	Environment, Health, and Development
PUBH 2115	Health, Human Rights, and Displaced Persons
PUBH 2116	Global Delivery of Health Systems

PUBH 2117	Service Learning in Public Health
PUBH 3136	Health Law
PUBH 3137	Global Public Health Nutrition
PUBH 3150	Sustainable Energy & Env Hlth
PUBH 3151	Current Issues in Bioethics
PUBH 3190	Topics in Public Health

Study abroad courses may not be used to fulfill the elective requirements for this minor.

GRADUATE PROGRAMS

Master of Public Health

- Master of Public Health in the field of biostatistics (p. 745)
- Master of Public Health in the field of community oriented primary care (p. 815)
- Master of Public Health in the field of environmental health science and policy (p. 734)
- Master of Public Health in the field of epidemiology
- Master of Public Health in the field of global environmental health (p. 737)
- Master of Public Health in the field of global health communication (p. 783)
- Master of Public Health in the field of global health program design, monitoring, and evaluation (p. 789)
- Master of Public Health in the field of global health policy (p. 791)
- Master of Public Health in the field of global health epidemiology (p. 750)
- Master of Public Health in the field of health policy (p. 800)
- Master of Public Health in the field of health promotion (p. 819)
- Master of Public Health in the field of maternal and child health (p. 821)
- Master of Public Health in the field of physical activity in public health (p. 770)
- Master of Public Health in the field of public health communication and marketing (p. 822)
- Master of Public Health in the field of public health nutrition (p. 773)
- Master of Public Health: MPH@GW (p. 722)

Master of Science

- Master of Science in the field of biostatistics (p. 753)
- Master of Science in the field of epidemiology
- Master of Science in the field of exercise science with a concentration in strength and conditioning (p. 776)
- Master of Science in the field of health policy (p. 806)

- Master of Science in the field of public health microbiology and emerging infectious diseases (p. 757)

Master of Health Administration

- Master of Health Administration (p. 796)
- Master of Health Administration – online/executive program (p. 799)

Specialist program

- Health Services Administration Specialist (p. 807)

Joint/Dual programs

- Doctor of Medicine and Master of Public Health (p. 730)
- Juris Doctor/Master of Laws in the field of law and Master of Public Health (p. 731)
- Master of Arts in the field of international affairs and Master of Public Health (p. 721)
- Master of Health Administration with a certificate in healthcare corporate compliance (p. 724)
- Master of Public Health in the field of health policy with certificate in healthcare corporate compliance (p. 729)
- Master of Science in Health Policy with a certificate in healthcare corporate compliance (p. 725)
- Master of Science in Health Sciences in the field of physicians assistant and Master of Public Health (p. 725)
- Peace Corp Masters International Program and Master of Public Health

Doctoral programs

- Doctor of Public Health in the field of environmental and occupational health (p. 741)
- Doctor of Public Health in the field of global health (p. 794)
- Doctor of Public Health in the field of health behavior (p. 825)
- Doctor of Public Health in the field of health policy (p. 808)
- Doctor of Philosophy in the field of biostatistics (p. 758)
- Doctor of Philosophy in the field of epidemiology (p. 760)
- Doctor of Philosophy in the field of public policy and administration (health policy track) (p. 808)

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL AFFAIRS AND MASTER OF PUBLIC HEALTH

SPH Program Coordinator E. Uretsky

The Elliott School of International Affairs and Milken Institute School of Public Health collaborate in offering a dual degree program leading to a Master of Public Health (MPH) and the Master of Arts (MA) for the following academic programs:

MA/MPH Area of Combined Study

- Milken Institute School of Public Health
Master of Public Health (MPH)
 - Global Health Communication
 - Global Health Program Design, Monitoring and Evaluation
 - Global Health Policy
- Elliott School of International Affairs
Master of Arts (MA)
 - Asian Studies
 - European and Eurasian Studies
 - International Affairs
 - International Development Studies
 - Latin American & Hemispheric Studies

The dual MA/MPH degree requires a total of 67 credits to be completed. Students electing Global Health as their Elliott School Master of Arts major field can use the 12 major field credits (taken in the Department of Global Health) to fulfill both the MA and MPH requirements. Six additional credits of course work in the Elliott School may also be applied toward the MPH as electives.

Students applying to the MA/MPH program must submit application materials to both the Elliott School of International Affairs and the Milken Institute School of Public Health and be accepted by both schools. A full-time student (taking an average of 10 credits per semester) may be able to complete both degrees within three years by attending summer sessions. Students accepted into the dual degree program may complete each degree separately.

REQUIREMENTS

Curriculum

The requirements for each program are found in the program information on the Milken Institute SPH (<http://publichealth.gwu.edu/academics>) website and Elliott School of International Affairs (<http://elliott.gwu.edu/graduate-programs>) website.

Dual Degree Rules and Regulations

Students in the dual degree program must fulfill the requirements of both degrees. Students are expected to work with program directors or advisors in each School to insure that all requirements are completed. Approval by program directors or advisors in both Schools is required for any overlap courses designated as meeting the requirements of both degree programs.

Graduation

Students completing the requirements of one degree program may apply to graduate with that degree prior to completing the second degree. Students may also formally request withdrawal from either program at any time to pursue a single degree

in the other program. All work on each degree must be completed within five years from the student’s entry into that degree program.

MASTER OF PUBLIC HEALTH: MPH@GW

Program Director W. D. Evans

Program Description

This distance education track for the Master of Public Health degree emphasizes local, national, and global health practice. The program emphasizes interdisciplinary teaching, and focuses on core competencies/skills and uses cases/other materials from both the U.S. and abroad. The pedagogy allows students to tailor their education to community level, national, or global interests in the U.S. and countries around the world, emphasizing interdisciplinary public health competencies, including biostatistics and epidemiology; cultural competency; health communication; leadership; professionalism; planning, implementation and evaluation methods; public health biology; and systems thinking.

Mission

Provide a practice-oriented MPH curriculum that enables graduates to be leaders in the design of population and community health programs in the US and globally.

Please refer to the website (<http://publichealthonline.gwu.edu>) for more information.

COMPETENCIES

Program-Specific Competencies

Upon completion of the program, students should possess the following functional competencies.

- Describe biological mechanisms of major diseases causing death and disability in the US and globally from a public health perspective.

Relevant course:

PUBH 6001	Biological Concepts in Public Health
-----------	--------------------------------------

- Define communities and identify and assess relevant population health needs.

Relevant courses:

PUBH 6007	Social and Behavioral Approaches to Public Health
PUBH 6500	Planning and Implementing Health Promotion Programs

- Assess the functions, capacities, management and governance of governmental, international and non-state

organizations that comprise health systems. Translate scientific and program evidence to inform the development of public health programs and policies within the context of health systems.

Relevant courses:

PUBH 6006	Management and Policy Approaches to Public Health
-----------	---

PUBH 6442	Comparative Global Health Systems
-----------	-----------------------------------

- Apply public health theory and experiential evidence to develop and manage project, program and institutional strategies to reduce community and individual health risks to mitigate the impact of disease.

Relevant courses:

PUBH 6007	Social and Behavioral Approaches to Public Health
-----------	---

PUBH 6503	Introduction to Public Health Communication and Marketing
-----------	---

- Conduct core program evaluations and complete an assessment of program outcomes, achievements, impacts and shortcomings. Communicate findings to stakeholders.

Relevant courses:

PUBH 6501	Program Evaluation
-----------	--------------------

PUBH 6437	Case Study Methods for Global Health Evaluation
-----------	---

- Apply relevant qualitative and quantitative tools and concepts to inform policy analyses for different audiences and topics.

Relevant courses:

PUBH 6002	Biostatistical Applications for Public Health
-----------	---

PUBH 6003	Principles and Practices of Epidemiology
-----------	--

PUBH 6502	Practical Data Analysis: PCH
-----------	------------------------------

- Develop concise written and oral policy analyses for different audiences; identify the key strategies required to protect and advance health.

Relevant course:

PUBH 6006	Management and Policy Approaches to Public Health
-----------	---

- Describe how health systems performance is affected by various approaches to health care organization, health law, health workforce development and health care financing.

Relevant courses:

HSML 6202	Intro/Health Services Delivery
-----------	--------------------------------

PUBH 6442	Comparative Global Health Systems
-----------	-----------------------------------

- Develop knowledge and skills in fundamentals of environmental health including the connection between population health and exposures to chemical, physical, and biological agents in the environment.

Relevant course:

PUBH 6004	Environmental and Occupational Health in a Sustainable World
-----------	--

- Develop communication campaigns and strategies to disseminate health promotion information through media channels.

Relevant course:

PUBH 6503	Introduction to Public Health Communication and Marketing
-----------	---

REQUIREMENTS

Course Requirements

All MPH students who select the distance education track (MPH@GW) enroll in Core Courses (15 credits), Program-Specific Courses (16 credits), and Electives (10 credits). The total 45 credit degree program also includes a Practicum (2 credits) and a Culminating Experience (2 credits) where students apply their didactic education in a real world setting.

Note that the MPH@GW track will be taught in 10 week quarters across the calendar year (4 quarters per year). Each course will be designed to deliver the required credit hours within the 10 week quarter format, with existing courses being formatted to meet this requirement.

Please refer to the MPH@GW website (<http://publichealthonline.gwu.edu>) for more information.

Program Requirements

Students will begin by taking the core MPH courses.

Required core courses:

PUBH 6001	Biological Concepts/Public Health
-----------	-----------------------------------

PUBH 6002	Biostatistical Application for Public Health
-----------	--

PUBH 6003	Principles and Practice/Epidemiology
-----------	--------------------------------------

PUBH 6004 Environmental and Occupational Health in a Sustainable World

PUBH 6006 Mgt & Policy Approaches to PH

PUBH 6007 Social&BehaviorAppr-Pub.Hlth

Required program specific courses:

PUBH 6500 Planning and Implementing Health Promotion Programs

HSML 6202 Intro/Health Services Delivery

PUBH 6442 Comparative Global Health Systems

PUBH 6437 Case Study Methods for Global Health Evaluation

PUBH 6430 Theories for Global Health Communication Interventions

PUBH 6532 Commnty Org,Devlpmnt&Advocacy

PUBH 6412 Global Health Quantitative Research Methods

Elective credits:

SPH elective courses (10 credits)

Visit the MPH@GW website for an updated list of electives

Practicum and culminating experience courses:

PUBH 6014 Practicum (professionals already working in public health may substitute an elective)

PUBH 6015 Culminating Experience

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

MASTER OF HEALTH ADMINISTRATION WITH A CERTIFICATE IN HEALTHCARE CORPORATE COMPLIANCE

Program Director J. Thorpe

Given the dramatic changes in healthcare policy and regulation over the past decade, the position of corporate compliance officer has become increasingly important in the healthcare industry. No other position can have so profound an impact on your healthcare organization's success—or failure. Legislation such as the Health Insurance Portability and Accountability Act (HIPAA) and the federal Anti-Kickback and Stark Laws has created the need for university-based credentials for this increasingly specialized—and increasingly complicated—field.

GW's College of Professional Studies (CPS) offers a one-of-a-kind program providing a comprehensive corporate compliance education. Drawing from both GW's Department of Health Policy in the Milken Institute School of Public Health and a leading healthcare law firm in Washington, DC, the program offers education in healthcare laws and regulations as well as tools and strategies for creating effective corporate compliance programs.

REQUIREMENTS

Program Requirements

Designed for working professionals, the 12-credit Graduate Certificate in Healthcare Corporate Compliance (GW HCC Program or Program) provides students with a uniquely comprehensive education in healthcare corporate compliance. The Program is designed for current or aspiring corporate compliance officers and other working in compliance-related fields. The course of study, offered in just over seven months, is divided into three segments: Five-day, In-classroom Residency at GW's Graduate Education Center in Alexandria, VA (three credits); Six-month, Online Distance Learning segment (six credits); and Three-day, In-classroom Capstone back in Alexandria, VA (three credits).

The Graduate Certificate in Healthcare Corporate Compliance can be awarded in conjunction with a Master of Health Administration (MHA). The 12 credits earned through the Graduate Certificate in Healthcare Corporate Compliance may be applied as electives in this program.

All other degree requirements for the MHA Master's program must be fulfilled as noted on the MHA program page (p. 796).

College of Professional Studies

The Graduate Certificate in Healthcare Corporate Compliance is awarded through the GW College of Professional Studies. Visit the CPS website (<http://bulletin.gwu.edu/public-health/>

MASTER OF SCIENCE IN HEALTH POLICY WITH A CERTIFICATE IN HEALTHCARE CORPORATE COMPLIANCE

GW's College of Professional Studies (CPS) offers a one-of-a-kind program providing a comprehensive corporate compliance education. Drawing from both GW's Department of Health Policy in the Milken Institute School of Public Health and a leading healthcare law firm in Washington, DC, the program offers education in healthcare laws and regulations as well as tools and strategies for creating effective corporate compliance programs.

REQUIREMENTS

Program Requirements

Designed for working professionals, the 12-credit Graduate Certificate in Healthcare Corporate Compliance (GW HCC Program or Program) provides students with a uniquely comprehensive education in healthcare corporate compliance. The Program is designed for current or aspiring corporate compliance officers and other working in compliance-related fields. The course of study, offered in just over seven months, is divided into three segments: Five-day, In-classroom Residency at GW's Graduate Education Center in Alexandria, VA (three credits); Six-month, Online Distance Learning segment (six credits); and Three-day, In-classroom Capstone back in Alexandria, VA (three credits).

The Graduate Certificate in Healthcare Corporate Compliance can be awarded in conjunction with a Master of Science in the field of health policy. The 12 credits earned through the Graduate Certificate in Healthcare Corporate Compliance may be applied as electives in this program.

All other degree requirements for the Master of Science in the field of health policy program must be fulfilled as noted on the MS in the field of health policy program page (p. 806).

College of Professional Studies

The Graduate Certificate in Healthcare Corporate Compliance is awarded through the GW College of Professional Studies.

Visit the CPS website (<http://cps.gwu.edu/healthcare-compliance>) for more information.

DUAL MASTER OF SCIENCE IN HEALTH SCIENCES IN THE FIELD OF PHYSICIANS ASSISTANT AND MASTER OF PUBLIC HEALTH

Program Director J. Cawley

Mission Statement

As the U.S. health care system continues to evolve, market forces and changing personnel requirements create new and expanding roles for health care professionals. The joint Physician Assistant-Master of Science in Health Sciences/ Master of Public Health P.A.-M.S.H.S./M.P.H. program strives to fill the need for a new type of health care professional: one who has both the depth of medical knowledge and the range of leadership and policy skills to meet the challenges of future practice. Based in both the Milken Institute School of Public Health (SPH) Department of Prevention and Community Health, and the School of Medicine and Health Sciences (SMHS), the P.A.-M.S.H.S./M.P.H. program presents a graduate curriculum that blends two important traditional paradigms of health care – the biomedical and the preventive. Health care professionals in the future U.S. health system must be prepared as competent and caring clinicians, as well as bring a broad view of population health and prevention to their work. Graduates of the GWU PA/MPH Program will be leaders in clinical practice in primary care and preventive medicine and will have the preparation to assume high level positions in education, research, and policy.

Goals

The PA-MSHS /MPH, provides the opportunity for students to obtain the competencies necessary to succeed in the rapidly evolving American and global health systems.

The major goals of the GWU P.A.-M.S.H.S./M.P.H. program are to:

- Recruit diverse and intellectually curious students and develop in them a strong clinical medical and prevention knowledge base necessary to deliver the highest quality patient-centered healthcare in a variety of clinical settings worldwide;
- Educate future health care professionals who are competent clinicians who can bring a population health orientation to their practice setting;
- Develop practitioners for the future who integrate concepts of prevention, community-oriented primary care, and population health;
- Graduate collaborative clinicians who will serve the healthcare needs of a worldwide community with intelligence, compassion, and integrity;
- Foster analytic thinking skills such that graduates will be able to perform a wide range of clinical tasks working with

physicians, as well as assessing community health problems and addressing population health needs;

- Nurture a sensitivity and respect for the cultural and personal beliefs of all patients and an understanding of how social, economic, and other system forces can impact health and healthcare and how these impact patient morbidity and mortality;
- Encourage graduates to be responsive to the needs of patients and society and advocate for quality patient care regardless of patient population;
- Graduate practitioners who will have the information technology and research skills necessary to access and interpret the medical literature and support their ongoing professional development; and
- Expect graduates to practice collaboratively, professionally, legally, ethically, and with integrity.

The P.A.-M.S.H.S./M.P.H. program draws from a faculty in both the School of Medicine and Health Sciences and the Milken Institute SPH to provide instruction in a wide range of subjects in medicine, public health, and professional leadership.

The purpose of the P.A.-M.S.H.S./M.P.H. program is to provide future clinicians with a wide range of skills in leadership, policy development, and community and preventive medicine. Students in the program prepare as clinicians fulfilling all of the requirements for national certification as a physician assistant (PA) in the GW Physician Assistant Program. In addition, public health coursework provides an orientation to population and community health. For example, in the Community Oriented Primary Care (COPC) track, students acquire skills in community health assessment, community based interventions, and the application of COPC principles in community based practice settings. GW's SPH coursework in health care administration, management, and health care economics prepares students to be leaders in a wide variety of clinical settings, office practices, outpatient clinics, community-based health centers, and health care institutions. Students are also exposed to the formulation of health policy.

Set in the center of the health policy in the nation, the P.A.-M.S.H.S./M.P.H. program affords students the chance to interact with individuals in both the public and private sector who are involved in policy research, practice, and legislation.

Visit the M.P.H. program website for additional information.

Visit the P.A. program website (<http://smhs.gwu.edu/pas/pa-program>) for additional information.

Admissions Requirements

If you are interested in the joint P.A./M.P.H. Program you will be receiving correspondence from both the School of Medicine and Health Sciences (for the P.A.-M.S.H.S.) and the Milken Institute SPH and Health Services (for the M.P.H.) regarding the completion of your application and admissions decisions. Should you be accepted to one degree program and not the other, you may accept the admissions offer from the program

to which you were accepted, because decisions are made separately.

1. Submit the P.A. Application (CASPA and PA Secondary Application) according to the instructions on the website (<http://smhs.gwu.edu/pas/program/prospective-students/admissions>).
2. You should submit the P.A. Secondary Application within two weeks of submitting the CASPA.
3. October 1 is the deadline for complete applications to include GRE score receipt.

The PA School, to save you time and money, will copy your application materials and send them to the Admissions department in the Milken Institute SPH. Do not complete the SOPHAS application or the SPH secondary application, as this will delay the processing of your application and result in your accruing increased application fees.

COMMUNITY-ORIENTED PRIMARY CARE

The following requirements must be fulfilled: 136 credits, including 100 credits in physician assistant courses, 13 credits in MPH core, 10 credits in prevention and community health courses, and 13 credits in community oriented primary care track courses.

Public Health (Community-Oriented Primary Care) Curriculum

Required

MPH core

PUBH 6002 Biostatistical Applic for PubH

PUBH 6003 Prin & Practice/Epidemiology

PUBH 6004 Environmental and Occupational Health in a Sustainable World

PUBH 6006 Mgt & Policy Approaches to PH

PUBH 6007 Social&BehaviorAppr-Pub.Hlth

Prevention and community health

PUBH 6500 Planning and Implementing Health Promotion Programs

PUBH 6501 Program Evaluation

PUBH 6014 Practicum

PUBH 6015 Culminating Experience

Community-oriented primary care track

PUBH 6504	Social and Behavioral Science Research Methods
PUBH 6510	COPC Principles and Practice
PUBH 6512	Comm-Oriented Primry Care Pol&Iss
PUBH 6513	Community Health Management
PUBH 6516	Community Health InfoResources
PUBH 6591	PA/MPH Clin Leadership Seminar

Physician Assistant Curriculum

Required

MASTER OF PUBLIC HEALTH IN THE FIELD OF HEALTH POLICY WITH A CERTIFICATE IN CORPORATE COMPLIANCE

Program Director J.Thorpe

Given the dramatic changes in healthcare policy and regulation over the past decade, the position of corporate compliance officer has become increasingly important in the healthcare industry. No other position can have so profound an impact on your healthcare organization's success—or failure. Legislation such as the Health Insurance Portability and Accountability Act (HIPAA) and the federal Anti-Kickback and Stark Laws has created the need for university-based credentials for this increasingly specialized—and increasingly complicated—field.

GW's College of Professional Studies (CPS) offers a one-of-a-kind program providing a comprehensive corporate compliance education. Drawing from both GW's Department of Health Policy in the Milken Institute School of Public Health and a leading healthcare law firm in Washington, DC, the program offers education in healthcare laws and regulations as well as tools and strategies for creating effective corporate compliance programs.

REQUIREMENTS

Program Requirements

Designed for working professionals, the 12-credit Graduate Certificate in Healthcare Corporate Compliance (GW HCC Program or Program) provides students with a uniquely comprehensive education in healthcare corporate compliance. The Program is designed for current or aspiring corporate compliance officers and other working in compliance-related fields. The course of study, offered in just over seven months, is divided into three segments: Five-day, In-classroom Residency at GW's Graduate Education Center in Alexandria, VA (three credits); Six-month, Online Distance Learning segment (six credits); and Three-day, In-classroom Capstone back in Alexandria, VA (three credits).

The Graduate Certificate in Healthcare Corporate Compliance can be awarded in conjunction with a Master of Public Health in the field of health policy. The 12 credits earned through the Graduate Certificate in Healthcare Corporate Compliance may be applied toward this MPH. 3 credits earned in the Graduate Certificate can be applied to the Program-Specific courses and 9 credits to the electives.

All other degree requirements for the MPH program must be fulfilled as noted on the MPH in the field of health policy program page (p. 800).

College of Professional Studies

The Graduate Certificate in Healthcare Corporate Compliance is awarded through the GW College of Professional Studies.

Visit the CPS website (<http://cps.gwu.edu/healthcare-compliance>) for more information.

PEACE CORP MASTERS INTERNATIONAL PROGRAM AND MASTER OF PUBLIC HEALTH

Program Contacts Milken Institute School of Public Health, Office of Recruitment and Admissions (asksphhs@gwu.edu)

The Milken Institute School of Public Health (Milken Institute SPH) collaborates with the Peace Corps as one of 90 institutions in the United States participating in this prestigious academic partnership. The program is designed to help address the shortage of prepared public health professionals that the organization has identified. Students in the program earn a degree in any one of the Milken Institute SPH's M.P.H. programs, which provides the academic base and professional skills. They then have priority placement for the two-year public health service assignment with the Peace Corps in a developing country, which provides on-the-ground training.

Students in the program complete M.P.H. course work on the GW campus and then enter the Peace Corps and begin their service in the assigned country. As Peace Corps volunteers, M.P.H. students complete three months of intensive language, technical, and cross-cultural training followed by two years of service as public health workers. The Peace Corps experience serves as the practicum required for the M.P.H. degree, and generally provides the basis for the program's required culminating experience. Upon satisfactory completion of the two-year Peace Corps service and completion of the practicum, students return to GW and enroll in the culminating experience. The degree is awarded once all requirements for the M.P.H. have been fulfilled.

REQUIREMENTS

Admissions Requirements

To be eligible for this program, applicants must be accepted by both the Milken Institute School of Public Health and the Peace Corps through separate application processes. Prospective applicants should apply to both programs simultaneously to allow sufficient time for the Peace Corps' medical and suitability clearances to be processed. While it is best to apply simultaneously to both programs, it may be possible to apply and be accepted to the Peace Corps after having begun the M.P.H. degree program. The review of applications is independent and admission to one program does not guarantee admission to the other.

Peace Corps

To join the Peace Corps, applicants must be U.S. citizens, at least 18 years old, and in good physical health. Call or write for additional information regarding eligibility criteria and benefits package (including field practicum tuition waiver, language and cultural training, living/ housing expenses in the field, medical/dental coverage, deferment of student-loan repayment, transportation expenses to and from one's assigned country, vacation time and allowances, financial readjustment allowance, and employment assistance post-service). Master's International students should be willing to serve at any location assigned by the Peace Corps. Visit the Peace Corps website (<http://bulletin.gwu.edu/public-health/peace-corps/www.peacecorps.gov>) for more information.

Milken Institute School of Public Health

To join the SPH M.P.H. program follow the application process described on the SPH Admissions website (<http://publichealth.gwu.edu/admissions/graduate-admissions>). Applicants must have a baccalaureate degree and submit all relevant documents by the stated application deadlines. Special M.P.H. program requirements are detailed in the application.

Program Format

1. Apply to the Milken Institute SPH M.P.H. program and the Peace Corps simultaneously, and gain acceptance to both programs.
2. Successfully complete all on-campus course work for the M.P.H. (expect one and one-half to two years of study), with the exception of the practicum and culminating experience.
3. Begin Peace Corps in-service training program.
4. Deploy to service site.
5. Early in the deployment, submit a practicum proposal to the SPH practicum director for approval. (This step may be undertaken earlier in the process);
6. Complete the practicum and maintain communication with the SPH practicum director on at minimum a quarterly basis, or as directed by the director) while completing the Peace Corps assignment.
7. Complete the Peace Corps assignment and return to GW to complete the culminating experience and graduate.

Visit the Milken Institute School of Public Health website (<http://publichealth.gwu.edu/programs/master%E2%80%99s-international-program-peace-corps-mph>) for more information.

DOCTOR OF MEDICINE AND MASTER OF PUBLIC HEALTH

Program Director S. Schroth

George Washington University School of Medicine and Health Sciences (SMHS) applicants and students can apply to the

Milken Institute SPH to obtain a Master of Public Health (MPH) degree in one of the following programs:

- Biostatistics
- Community Oriented Primary Care
- Environmental Health Science & Policy
- Epidemiology
- Global Environmental Health
- Global Health
- Global Health Epidemiology
- Health Policy
- Health Promotion
- Maternal & Child Health
- Physical Activity in Public Health
- Public Health Communication & Marketing
- Public Health Management

REQUIREMENTS

While the MPH degree is 45 credits in length, joint students will enroll in 43 total MPH credits.

- Joint students do not take PUBH 6001 Biological Concepts/Public Hlth (2 credits).
- SMHS accepts PUBH 6014 Practicum (2 credits) and PUBH 6015 Culminating Experience (2 credits), upon approval, which may fulfill the special project requirement for certain courses.

Students in the five year joint MD/MPH degree program may begin the MPH portion of the program at any time prior to the beginning of their fourth year in the MD program. All joint students are granted a one year leave of absence from medical school during which between 18 and 27 credits of MPH work are completed. The remaining course work is completed during the summer semesters, coincident with parts of the medical school curriculum, and during the spring semester of the senior year of the MD curriculum when elective credit requirements for the MD degree are waived.

Visit the Milken Institute School of Public Health joint MD/MPH website (<http://publichealth.gwu.edu/programs/joint-mdmph>) for more information.

JURIS DOCTOR IN THE FIELD OF LAW AND MASTER OF PUBLIC HEALTH

Program Contact J. Teitelbaum

Hirsh Health Law and Policy Program

The Hirsh Health Law and Policy Program of The Milken Institute School of Public Health offers unique educational opportunities to law students, practicing lawyers, and health professions students. Endowed by Harold and Jane Hirsh and home to GW's joint degree programs in law and public health,

the program is designed to foster an interdisciplinary approach to the study of health policy, health law, public health, and health care. The Hirsh Program's overall goal is to advance a greater understanding regarding how the law influences and shapes all facets of health care and public health, as well as how the changing system affects traditional areas of the law. At the same time, the program seeks to achieve the pragmatic objectives of preparing law degree candidates and practicing lawyers for the broad range of health law-related careers that are available today.

Established in 1997, the Hirsh Program is structured to allow students to take maximum advantage of its location in Washington, DC, the center of the national health policy and law debate. The program is designed to provide a solid grounding in individual and population health, from the health care and public health systems themselves to extensive course work in advanced health policy and law. The program serves Juris Doctor (JD) and Master of Laws (LLM) candidates as well as lawyers pursuing health law careers and all manner of health profession students.

Joint Degree Admissions Information

Applicants to the joint law-public health degree/certificate program may apply for admission to GW's SPH at the time they apply to the GW Law School or after admission to the Law School. JD candidates who do not apply concurrently to the Law School and SPH are encouraged to file the MPH or Certificate application by the spring semester of their first year of law school. LLM candidates are encouraged to apply to SPH at the time they apply to the Law School or during their first semester on campus.

Applicants to the joint law-public health program must complete the application processes for both the Law School (JD or LLM) and for the Milken Institute School of Public Health (MPH or Certificate). Admission to the joint degree program requires admissions acceptances from both Schools. However, because admission to each School is separate and distinct, applicants who are accepted by one School but not the other are free to enroll in the School to which they have been accepted.

Applications for both programs are available on the Law School website (<http://www.law.gwu.edu/Admissions/Pages/Default.aspx>) and SPH website (<http://publichealth.gwu.edu/admissions>). Whether applying simultaneously to both Schools or as a current GW Law student, applicants must complete the SOPHAS application as indicated at the SPH website (<http://publichealth.gwu.edu/admissions/graduate-admissions>).

Internship/Research Opportunities

The Hirsh Program offers extensive assistance in arranging internships in congressional offices, federal agencies, and the hundreds of national health organizations located in and throughout the Washington, D.C. metropolitan area. Through its affiliation with the Department of Health Policy, the program also engages in extensive law-related health policy

research, offering Hirsh Program students paid and unpaid training opportunities during their period of study. Visit the Department's website (<http://www.gwhealthpolicy.org>) for a description of the types of research in which it engages.

REQUIREMENTS

MPH Requirements

The course of study for the MPH degree consists of 45 credits in one of several focus areas (<http://publichealth.gwu.edu/node/766>), including a supervised Practicum. Because eight of these credits may be cross-credited from the Law School (i.e., the Milken Institute SPH accepts eight Law School credits toward completion of the MPH degree), JD and LLM students need only complete 37 credits of coursework through the SPH to obtain an MPH degree.

Depending upon the focus area in which a JD student chooses to study, the joint degree can be earned, as a general rule, in 3-and-a-half or 4 years of full-time study, including summer enrollment. JD candidates selecting joint degree studies in one of the more science-oriented areas, such as epidemiology or biostatistics, should anticipate a 4-year course of study. Candidates selecting a less scientific area, such as health policy or health management, can expect to complete their joint degrees in 3-and-a-half years. Full-time LLM/MPH candidates should anticipate completing their joint degrees in approximately 2 years. Part-time JD and LLM candidates pursuing joint degrees will, of course, have longer courses of study.

Certificate Requirements

The course of study for the Graduate Certificate consists of 18 credits in one of several focus areas (<http://publichealth.gwu.edu/node/768>). However, because six credits may be cross-credited from the Law School (i.e., the Milken Institute SPH accepts six Law School credits toward completion of the certificate program), JD and LLM students need only complete 12 credits of coursework through the SPH to obtain a graduate certificate in public health. Upon an individual's subsequent acceptance to the MPH degree program, credits from the Graduate Certificate program may be transferred to the MPH degree program. Full-time JD candidates can complete a graduate certificate during their regular course of study in the Law School. Full-time LLM/certificate candidates typically complete the program in one and one-half years.

ENVIRONMENTAL AND OCCUPATIONAL HEALTH

The Department of Environmental and Occupational Health (EOH) works to further our understanding of how natural and human-made environments impact human health. We offer programs that challenge students to explore both the underlying science and policy remedies for topics including sustainable cities and food systems, climate change mitigation, workplace safety and risk management. With our Washington,

D.C. location and active alumni network, students gain practical work experience and make important connections in a variety of industries, nonprofit organizations and government agencies.

GRADUATE

Master's programs

- Master of Public Health in environmental health science and policy (p. 734)
- Master of Public Health in global environmental health (p. 737)

Doctoral program

- Doctor of Public Health in environmental and occupational health (p. 741)

FACULTY

Professors G. Gray, L. Goldman, D. Michaels (*Research*), M. J. Perry (*Chair*), L. B. Price

Associate Professors P.T. LaPuma, S. McCormick

Assistant Professors K.M. Applebaum, J. Graham, A.L. Northcross, A.R. Zota

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PUBH 2114. Environment, Health, and Development. 3 Credits.

Survey of the relationship between health and development and environmental trends. Topics include deforestation, urban contamination, and desertification.

PUBH 3150. Sustainable Energy & Env Hlth. 3 Credits.

Sustainability issues from the perspective of environmental health. Technical, social, and health implications of specific energy sources. Energy conservation and efficiency in the context of population growth, food and water resources, and maintenance of a healthy environment for future generations.

PUBH 6004. Environmental and Occupational Health in a Sustainable World. 2 Credits.

Examination of the connection between population health and exposures to chemical, physical, and biological agents in the environment. Problem-solving frameworks familiarize students with data sources, methodologies, and policy approaches being used to address the public health impacts of environmental and occupational health hazards, including the consequences of climate change, natural resource degradation, and industrial chemicals. Integration of key concepts of environmental health with principles of sustainability illustrate how public policies and practices on the local, national, and global level affect population health.

PUBH 6121. Environmental and Occupational Epidemiology. 3 Credits.

Demonstration and application of epidemiologic methods for the study of environmental and occupational health problems. Epidemiologic exposure assessment methods and methods relevant to cohort, case-control, cross-sectional, and case cross-over studies. Survey design and sources and evaluation of biases and confounding. Emphasis on written and oral communication skills. Prerequisites: PUBH 6002, PUBH 6003 and PUBH 6004.

PUBH 6122. Protecting Public Health and the Environment: Policies, Politics, and Programs. 3 Credits.

The legislative, regulatory, judicial, and political system in the United States developed to protect human health and the environment. National and global public and environmental health agencies, policy development, and current topics. Prerequisites: PUBH 6004 or permission of the instructor.

PUBH 6123. Toxicology: Applications for Public Health Policy. 3 Credits.

Toxicology as both a scientific discipline and a source of information for public health policy with respect to the regulation of foods, pesticides, drugs (pharmaceuticals), environmental chemical pollutants, and other chemicals that may affect human and environmental health. How chemicals interact with biological systems to produce adverse effects. The ways in which toxicologic information is developed and applied to regulatory decision making and the use of toxicology in regulatory risk assessment. Prerequisite: PUBH 6004.

PUBH 6124. Problem Solving in EOH. 3 Credits.

This culminating course uses problem-based learning methods to examine a variety of real-world EOH issues in depth. Cases stimulate students to integrate their cumulative knowledge across all required courses and demonstrate their professional competencies. Students to conduct activities characteristic of EOH practice: evaluating a variety of technical, public, and media, reports; integrating and interpreting environmental, exposure, and health information effectively; designing analytic and communication strategies; presenting in writing and orally relevant materials to address EOH issues; and, making appropriate policy and/or program decisions and recommendations. Prerequisites: PubH 6121, 6123, 6126.

PUBH 6125. Intro-Children's Health & Env. 2 Credits.

Describes the impact of environmental toxicants on children's health and reviews some of the major policy issues in the field of children's environmental health. Prerequisites: PubH 6004.

PUBH 6126. Assessment&Control/Env Hazards. 3 Credits.

Introduces the anticipation, recognition, assessment, and control of hazards in the workplace and the ambient environment. It emphasizes an understanding of the characteristic features of specific hazards, which may be chemical, biological, or physical/ergonomic.

PUBH 6127. Germs: An Introduction to Environmental Health Microbiology. 2 Credits.

Basics of public health microbiology as it relates to the environment, food, water, and bioterrorism. Examines from an environmental health perspective how the principles of microbiology are applied to current and emerging public health issues, whether from intentional or unintentional contamination of the environment. Specific topics will include: industrial animal production and increasing prevalence of antibiotic resistance; effectiveness of various point of use technologies for water purification; recent advances in quantitative microbial risk assessment; one medicine (where public and veterinary health meet); detection strategies for microorganisms (including bioterrorism agents); and current approaches in food defense and agroterrorism. Prerequisites: PUBH 6004.

PUBH 6128. Global Environmental and Occupational Health. 2 Credits.

Examination of the global environmental and occupational health factors that contribute significantly to the global burden of disease, focusing primarily on low- and middle-income countries. Principles from behavioral sciences, development economics, risk assessment, and epidemiology are included. Potential solutions to environmental health problems, metrics used to measure impacts, and areas for future research. Prerequisite: PUBH 6004.

PUBH 6130. Sustainable Energy and the Environment. 2 Credits.

The sustainability of various energy strategies, including energy conservation, green building principles, renewable energy, and mitigation and adaption policies for climate change. Emphasis on the life cycle framework. Topics include natural resource depletion, water and energy consumption, and air, water, and solid waste pollutant emissions. Prerequisite: PUBH 6004.

PUBH 6131. Applied Data Analysis in Environmental and Occupational Health. 3 Credits.

Application of biostatistical and epidemiologic concepts and methods to analysis of environmental and occupational health (EOH) data. Students manage datasets, conduct data analyses, present data graphically, and interpret data for relevance to EOH research, policy, and practice. Development and practice of skills needed for analyzing complex exposures and communicating environmental and occupational research findings. Prerequisites: PUBH 6002, PUBH 6003, and PUBH 6004.

PUBH 6132. Design, Implementation and Evaluation of Global Water, Sanitation and Hygiene (WASH) Programs. 1 Credit.

Course designed for students working in both disaster and development settings of developing countries where contaminated water, inadequate sanitation and poor hygiene (WASH) are the cause of serious health problems. Fundamental concepts will be taken from classroom to the field for first hand experience applying WASH methods. Prerequisite PubH 6004.

PUBH 6133. Social Dimensions in Climate Change and Health. 2 Credits.

The drivers of climate change and outcomes with particular focus on health dimensions. Drivers, obstacles, vulnerabilities, inequality, and adaptation as well as technical and social solutions.

PUBH 6134. Communicating Science for Public Health. 2 Credits.

Evaluating the primary scientific literature and communicating research findings in outlets ranging from peer-reviewed journals to 140 character Tweets. Identifying target audiences and shaping messages to maximize impact, while maintaining the integrity of the supporting evidence. Written and oral communication and critical evaluation are emphasized. Prerequisites: PUBH 6002 and PUBH 6003.

PUBH 6199. Topics in EOH. 0-3 Credits.

In-depth examination of a particular facet of public health. Topics and prerequisites vary.

MASTER OF PUBLIC HEALTH IN THE FIELD OF ENVIRONMENTAL HEALTH SCIENCE AND POLICY

Program Director K. Applebaum

Practicum Director P. LaPuma

Mission

The Mission of the Environmental Health Science and Policy MPH program is to educate individuals who are committed to public health protection to apply critical analytic skills to the development, implementation, and evaluation of practices and policies aimed at preventing or minimizing the adverse impact of environmental and occupational hazards on human health.

Goals

Our graduates will possess a multidisciplinary knowledge base and skill set that will provide them a framework for addressing environmental and occupational health (EOH) issues. They will understand three distinct scientific foundations of environmental health in order to:

- Assess and control environmental and occupational exposures;
- Understand the effects of these exposures on human health; and

- Interpret epidemiologic and other research findings related to environmental risks.

Furthermore, graduates will be prepared to build on this science base in order to:

- Analyze policy implications and participate in policy development, implementation, and evaluation; and
- Assess and manage environmental and occupational risks.

COMPETENCIES

Upon Completion of the Master of Public Health program in the field of environmental health science and policy, students should possess the following functional competencies.

Epidemiology & Biostatistics

Critically assess existing epidemiologic research.

- Summarize goals, design, methods, and results of published research.

PUBH 6121 Environmental and Occupational Epidemiology

- Identify biases and evaluate the extent to which they threaten study validity.

PUBH 6121 Environmental and Occupational Epidemiology

PUBH 6131 Applied Data Analysis in Environmental and Occupational Health

- Apply statistical principles to interpret epidemiologic data.

PUBH 6121 Environmental and Occupational Epidemiology

PUBH 6131 Applied Data Analysis in Environmental and Occupational Health

Design appropriate studies for investigating EOH problems.

- Identify appropriate resources and databases to plan and conduct studies.

PUBH 6015 Culminating Experience

PUBH 6121 Environmental and Occupational Epidemiology

PUBH 6124 Problem Solving in EOH

- Given a research question, identify appropriate study design, choose appropriate study populations, describe relevant exposure assessment methods, identify appropriate data collection instruments and processes, and describe procedures for protecting human subjects.

PUBH 6121 Environmental and Occupational Epidemiology

Conceptualize and carry out data analysis to address study goals.

- Conceptualize research questions.

PUBH 6015 Culminating Experience

PUBH 6121 Environmental and Occupational Epidemiology

PUBH 6131 Applied Data Analysis in Environmental and Occupational Health

- Utilize appropriate approaches to manage and analyze data.

PUBH 6015 Culminating Experience

PUBH 6131 Applied Data Analysis in Environmental and Occupational Health

Exposure Assessment and Control

Assess environmental and occupational exposures.

- Describe the principle of operation, capability, and limitations of assessment instrumentation.

PUBH 6126 Assessment&Control/Env Hazards

- Assess severity of potential hazards and select the appropriate instrument and measurement method.

PUBH 6126 Assessment&Control/Env Hazards

- Interpret exposure measurements to assess the severity of a chemical, physical, or biological hazard.

PUBH 6124 Problem Solving in EOH

PUBH 6126 Assessment&Control/Env Hazards

- Compare exposure data against established occupational & environmental health standards and guidelines.

PUBH 6124 Problem Solving in EOH

PUBH 6126 Assessment&Control/Env Hazards

- Evaluate the strengths and weaknesses of epidemiologic exposure assessments.

PUBH 6126 Assessment&Control/Env Hazards

Recommend strategies to prevent and control environmental and occupational exposures.

- Recommend appropriate control strategies, such as; environmental health interventions, protective equipment, behavior change campaigns, to mitigate health hazards.

PUBH 6124 Problem Solving in EOH

Toxicology

Identify the adverse effects of chemical, biological, and physical exposures on human health.

- Apply key concepts in toxicology including: dose-response relationships; absorption, distribution, metabolism and excretion of xenobiotics; acute and chronic effects.

PUBH 6123 Toxicology: Applications for Public Health Policy

- Describe the biological basis for the adverse effects of toxicants on specific organs and tissues and identify specific compounds that interact with specific organs.

PUBH 6123 Toxicology: Applications for Public Health Policy

- Describe biological basis for the systemic effects of toxicants (e.g., carcinogenicity, genotoxicity, developmental toxicity) and identify specific compounds that elicit these effects.

PUBH 6123 Toxicology: Applications for Public Health Policy

Interpret toxicological research findings in the context of human health risk assessment.

- Explain key aspects of toxicological tests as well as their strengths and weaknesses.

PUBH 6123 Toxicology: Applications for Public Health Policy

- Explain how risk assessment is used to translate toxicologic information for regulatory decisions including: evaluating a body of data and applying weight of evidence approaches; calculating and using the reference dose (RfD); calculating and using of cancer slope factors.

PUBH 6122 Protecting Public Health and the Environment: Policies, Politics, and Programs

PUBH 6123 Toxicology: Applications for Public Health Policy

Policy

Synthesize scientific evidence in order to inform EOH policy and reduce and prevent environmental and occupational disease and injury.

- Describe the authority and approaches of U.S. public and environmental health agencies.

PUBH 6122 Protecting Public Health and the Environment: Policies, Politics, and Programs

- Apply the risk assessment, risk management, and Source-to-Effect frameworks.

PUBH 6124 Problem Solving in EOH

- Explain the role of scientific, economic, ethical, and political interests in development and implementation of human health and environmental health policy.

PUBH 6122 Protecting Public Health and the Environment: Policies, Politics, and Programs

PUBH 6123 Toxicology: Applications for Public Health Policy

Conduct policy analysis relevant to EOH problems.

- Discuss the control of public health hazards on a global basis.

PUBH 6126 Assessment&Control/Env Hazards

- Analyze approaches to environmental or occupational health policy development.

PUBH 6122 Protecting Public Health and the Environment: Policies, Politics, and Programs

- Analyze the role of environmental and occupational health policies and politics in promoting sustainability.

PUBH 6122 Protecting Public Health and the Environment: Policies, Politics, and Programs

Risk Management

Synthesize relevant information in order to assess and manage environmental and occupational risks.

- Given a specific context, design a plan to collect relevant information to fully characterize EOH hazards and related human health effects.

PUBH 6124 Problem Solving in EOH

- Evaluate data and other information to characterize potential EOH hazards, sources of those hazards, potential for human exposure, and potential or actual health effects.

PUBH 6123 Toxicology: Applications for Public Health Policy

PUBH 6124 Problem Solving in EOH

- Recommend possible approaches to reduce the risk and/or impact of exposure to EOH hazards, and evaluate these approaches with regard to ethical issues, technical feasibility, resource requirements, and policy context.

PUBH 6124 Problem Solving in EOH

PUBH 6126 Assessment&Control/Env Hazards

- Communicate with relevant stakeholder groups about environmental and occupational health issues and recommendations, using appropriate terminology and data.

PUBH 6122 Protecting Public Health and the Environment: Policies, Politics, and Programs

PUBH 6123 Toxicology: Applications for Public Health Policy

PUBH 6124 Problem Solving in EOH

Identify ethical issues in environmental health policy and practice.

- Discuss how scientific principles and societal values such as equity and environmental justice influence decision-making about environmental and occupational health problems in research, public health practice, policy, and management contexts.

REQUIREMENTS

The following requirements must be fulfilled: 45 credits, including 15 credits in core courses, 18 credits in program specific courses, 8 credits in elective courses, and 4 credits in practicum/culminating experience.

Required core courses (15 credits):

PUBH 6001 Biological Concepts/Public Hlth

PUBH 6002 Biostatistical Applic for PubH

PUBH 6003 Prin & Practice/Epidemiology

PUBH 6004 Environmental and Occupational Health in a Sustainable World

PUBH 6006 Mgt & Policy Approaches to PH

PUBH 6007 Social&BehaviorAppr-Pub.Hlth

Required program-specific courses (18 credits):

PUBH 6121 Environmental and Occupational Epidemiology

PUBH 6122 Protecting Public Health and the Environment: Policies, Politics, and Programs

PUBH 6123 Toxicology: Applications for Public Health Policy

PUBH 6124 Problem Solving in EOH

PUBH 6126 Assessment&Control/Env Hazards

PUBH 6131	Applied Data Analysis in Environmental and Occupational Health
-----------	--

Program-specific electives (4 credits):

Two of the following

PUBH 6127	Germs: An Introduction to Environmental Health Microbiology
-----------	---

PUBH 6128	Global Environmental and Occupational Health
-----------	--

PUBH 6130	Sustainable Energy and the Environment
-----------	--

PUBH 6133	Social Dimen Clim Chnge & Hlth
-----------	--------------------------------

PUBH 6134	Communicating Science for Public Health
-----------	---

Electives (4 credits):

Any SPH graduate course

Practicum and culminating experience:

PUBH 6014	Practicum
-----------	-----------

PUBH 6015	Culminating Experience
-----------	------------------------

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

MASTER OF PUBLIC HEALTH IN THE FIELD OF GLOBAL ENVIRONMENTAL HEALTH

Program Director J. Graham

Practicum Director S. McCormick

Mission

The Mission of the Global Environmental Health MPH program – a joint program between the Departments of Global Health and Environmental and Occupational Health – is to educate

individuals who are committed to working in resource-poor settings and applying analytic skills to prevent or mitigate the adverse impact of environmental hazards on human health. The program has a particular focus on traditional environmental health hazards—that is, health risks that are a consequence of a lack of access to clean water, inadequate sanitation, poor hygiene, household air pollution, solid waste disposal, and vector-borne diseases such as malaria.

Goals

Our graduates will hold a multidisciplinary knowledge base and skill set that will provide them with a framework for addressing environmental health issues from environmentally mediated disease in the poorest performing regions of the world. They will understand the scientific and cultural foundations of environmental health in order to:

- Assess environmental exposures and understand the effects of these exposures on human health;
- Interpret epidemiologic and other research findings related to global environmental health risks; and
- Assume leadership roles in designing, implementing and evaluating programs that focus on modification of environmental health-related behaviors at local, regional, national and/or global levels.

COMPETENCIES

Upon completion of the MPH program in global environmental health, students should possess the following functional competencies:

Epidemiology & Biostatistics

Critically assess existing epidemiologic research.

- Summarize goals, design, methods, and results of published research.

PUBH 6015	Culminating Experience
-----------	------------------------

PUBH 6121	Environmental and Occupational Epidemiology
-----------	---

PUBH 6131	Applied Data Analysis in Environmental and Occupational Health
-----------	--

PUBH 6400	Global Health Frameworks
-----------	--------------------------

PUBH 6411	Global Health Qualitative Research Methods
-----------	--

- Identify biases and evaluate the extent to which they threaten study validity.

PUBH 6121	Environmental and Occupational Epidemiology
-----------	---

PUBH 6131	Applied Data Analysis in Environmental and Occupational Health
-----------	--

PUBH 6411 Global Health Qualitative Research Methods

- Apply statistical principles to interpret epidemiologic data.

PUBH 6121 Environmental and Occupational Epidemiology

PUBH 6131 Applied Data Analysis in Environmental and Occupational Health

Design appropriate studies for investigating EOH problems.

- Identify appropriate resources and databases to plan and conduct studies.

PUBH 6015 Culminating Experience

PUBH 6121 Environmental and Occupational Epidemiology

PUBH 6128 Global Environmental and Occupational Health

PUBH 6400 Global Health Frameworks

PUBH 6411 Global Health Qualitative Research Methods

- Given a research question, identify appropriate study design, choose appropriate study populations, describe relevant exposure assessment methods, identify appropriate data collection instruments and processes, and describe procedures for protecting human subjects.

PUBH 6015 Culminating Experience

PUBH 6121 Environmental and Occupational Epidemiology

PUBH 6126 Assessment&Control/Env Hazards

PUBH 6131 Applied Data Analysis in Environmental and Occupational Health

PUBH 6411 Global Health Qualitative Research Methods

Conceptualize and carry out data analysis to address study goals.

- Conceptualize research questions

PUBH 6015 Culminating Experience

PUBH 6121 Environmental and Occupational Epidemiology

PUBH 6128 Global Environmental and Occupational Health

PUBH 6411 Global Health Qualitative Research Methods

- Utilize appropriate approaches to manage and analyze data

PUBH 6015 Culminating Experience

PUBH 6131 Applied Data Analysis in Environmental and Occupational Health

PUBH 6411 Global Health Qualitative Research Methods

Assess Global Environmental and Occupational Risks

Assess environmental and occupational exposures.

- Describe the principle of operation, capability, and limitations of assessment instrumentation.

PUBH 6126 Assessment&Control/Env Hazards

- Assess severity of potential hazards and select the appropriate instrument and measurement method.

PUBH 6126 Assessment&Control/Env Hazards

- Interpret exposure measurements to assess the severity of a chemical, physical, or biological hazard.

PUBH 6126 Assessment&Control/Env Hazards

PUBH 6435 Global Health Program Development and Implementation

- Compare exposure data against established occupational & environmental health standards and guidelines.

PUBH 6126 Assessment&Control/Env Hazards

PUBH 6128 Global Environmental and Occupational Health

- Evaluate the strengths and weaknesses of epidemiologic exposure assessments.

PUBH 6121 Environmental and Occupational Epidemiology

PUBH 6128 Global Environmental and Occupational Health

Recommend strategies to prevent and control environmental and occupational exposures.

- Recommend appropriate control strategies, such as; environmental health interventions, protective equipment, behavior change campaigns, to mitigate health hazards.

PUBH 6126 Assessment&Control/Env Hazards

PUBH 6128 Global Environmental and Occupational Health

PUBH 6400 Global Health Frameworks

Global Environmental Health Policy Analysis

Synthesize scientific evidence in order to inform global environmental health policy and reduce and prevent environmental health related disease and injury.

- Describe the authority and approaches of global environmental health agencies.

PUBH 6128 Global Environmental and Occupational Health

PUBH 6435 Global Health Program Development and Implementation

- Apply the risk assessment, risk management, and Source-to-Effect frameworks.

PUBH 6126 Assessment&Control/Env Hazards

PUBH 6128 Global Environmental and Occupational Health

- Explain the role of scientific, economic, ethical, and political interests in development and implementation of global environmental health policy.

PUBH 6126 Assessment&Control/Env Hazards

PUBH 6128 Global Environmental and Occupational Health

PUBH 6400 Global Health Frameworks

PUBH 6435 Global Health Program Development and Implementation

Conduct policy analysis relevant to global environmental health problems.

- Discuss interventions used in global environmental health.

PUBH 6126 Assessment&Control/Env Hazards

PUBH 6128 Global Environmental and Occupational Health

PUBH 6400 Global Health Frameworks

PUBH 6435 Global Health Program Development and Implementation

- Analyze approaches used in global environmental health policy development.

PUBH 6128 Global Environmental and Occupational Health

PUBH 6400 Global Health Frameworks

PUBH 6435 Global Health Program Development and Implementation

- Analyze the role of global environmental health policies and politics in promoting sustainability.

PUBH 6128 Global Environmental and Occupational Health

PUBH 6435 Global Health Program Development and Implementation

Design, Implement, Monitor and Evaluate Global Environmental Health Programs

Synthesize relevant information in order to assess and manage environmental and occupational risks.

- Characterize political, social, cultural, religious and economic context to determine feasible interventions.

PUBH 6128 Global Environmental and Occupational Health

PUBH 6400 Global Health Frameworks

PUBH 6435 Global Health Program Development and Implementation

- Given a specific context, design a plan to collect relevant information to fully characterize global environmental health hazards and related human health effects.

PUBH 6121 Environmental and Occupational Epidemiology

PUBH 6128 Global Environmental and Occupational Health

PUBH 6435 Global Health Program Development and Implementation

- Evaluate data to characterize potential global environmental health hazards, potential for human exposure and health effects.

PUBH 6121 Environmental and Occupational Epidemiology

PUBH 6128 Global Environmental and Occupational Health

PUBH 6400 Global Health Frameworks

PUBH 6411 Global Health Qualitative Research Methods

PUBH 6435 Global Health Program Development and Implementation

- Recommend possible approaches to reduce the risk and/or impact of exposure to global environmental health hazards, and evaluate these approaches with regard to ethical issues, technical feasibility, resource requirements, and policy context.

PUBH 6126 Assessment&Control/Env Hazards

PUBH 6128	Global Environmental and Occupational Health
PUBH 6400	Global Health Frameworks
PUBH 6435	Global Health Program Development and Implementation

- Communicate with relevant stakeholder groups about environmental and occupational health issues and recommendations, using appropriate terminology and data.

PUBH 6128	Global Environmental and Occupational Health
PUBH 6435	Global Health Program Development and Implementation

REQUIREMENTS

All students who select the global environmental health program enroll in core courses (15 credits), program-specific courses (17 credits), and electives (9 credits). The 45-credit degree program also includes a practicum (2 credits) and a culminating experience (2 credits) where students apply their didactic education in a real world setting.

Program Requirements

Required Core Courses

PUBH 6001	Biological Concepts/Public Hlth
PUBH 6002	Biostatistical Applic for PubH
PUBH 6003	Prin & Practice/Epidemiology
PUBH 6004	Environmental and Occupational Health in a Sustainable World
PUBH 6006	Mgt & Policy Approaches to PH
PUBH 6007	Social & Behavior Appr-Pub.Hlth

Required EOH Courses

PUBH 6121	Envrnmntl & Occptnl Epidemiology
PUBH 6126	Assessment & Control/Env Hazards
PUBH 6128	Global Envrnmntl & Occptnl Hlth
PUBH 6131	Applied Data Analysis in EOH

Required GH Courses

PUBH 6400	Global Health Frameworks
PUBH 6411	Global Health Qualitative Research Methods

PUBH 6435	Global Health Program Development and Implementation
-----------	--

Electives

9 credits from the following:

PUBH 6123	Toxicology: Applic for PH Pol
PUBH 6132	Design, Implementation and Evaluation of Global Water, Sanitation and Hygiene (WASH) Programs
PUBH 6125	Intro-Children's Health & Env
PUBH 6127	Germes: An Introduction to Environmental Health Microbiology
PUBH 6130	Sustainable Energy & Environmt
PUBH 6133	Social Dimen Clim Chnge & Hlth
PUBH 6134	Communication Science for PubH
PUBH 6262	Intro-Geog Information Systems
PUBH 6271	Disaster Epidemiology
PUBH 6435	Global Health Program Development and Implementation
PUBH 6437	Case Study Methods for Global Health Evaluation
PUBH 6480	Public Health in Complex Emergencies

Practicum and Culminating Experience

PUBH 6014	Practicum
PUBH 6015	Culminating Experience

Graduation Requirements

- Graduate credit requirement: 45 graduate credits
- Course requirements: Successful completion of core and program-specific courses
- Grade point requirement: 3.0 (B average) overall grade point average
- Time limit requirement: The degree must be completed within four years.
- Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

DOCTOR OF PUBLIC HEALTH IN THE FIELD OF ENVIRONMENTAL AND OCCUPATIONAL HEALTH

Program Director G. Gray

Mission

The mission of the Department of Environmental and Occupational Health (EOH) is to increase the body of knowledge that addresses the adverse health effects of environmental and occupational exposures; to disseminate knowledge through the education of students and health practitioners; and to apply that knowledge in the clinical, environmental, and workplace settings.

Goal

The goal of the EOH DrPH program is to prepare students for advanced level professional work in research, policy, and program design and administration in the field of Environmental and Occupational Health.

Admissions Requirements

The Doctor of Public Health Program is designed for mid-career professionals seeking to become public health leaders. Applicants who have completed an MPH degree from a Council of Education for Public Health (CEPH) accredited program are strongly preferred for admission to the DrPH Program. Alternatively, applicants with a master's degree in another field may indicate their relevant training, research experience, or educational background comparable to the MPH. Doctoral applicants admitted without an MPH will be required to take additional course work at the graduate level that does not apply toward the minimum 48 credits required for the DrPH. Qualified applicants with degrees from institutions in foreign countries are also eligible for admission. All applicants must submit scores from the Graduate Record Exam (GRE) taken within five years of the date of application. Because admission to this program is highly selective, successful applicants have competitive academic credentials and substantial prior public health professional work experience related to the specialty field to which they are applying.

Program Policies and Procedures

For program policies and procedures, please refer to the Doctor of Public Health Handbook and other resources on the DrPh in the field of Environmental and Occupational Health website. (<http://publichealth.gwu.edu/programs/environmental-occupational-health-drph>)

REQUIREMENTS

Program requirements

20 credits of required foundational and research methods courses

PUBH 8401	Found PH Leadership & Practice (Doctoral Seminar)
PUBH 8402	Ldrshp/PublicHlthPractc&Policy
PUBH 8416	Study Design & Evaluation Methods
PUBH 8417	Qual Research Methods&Analysis
PUBH 8418	Applied Statistical Analysis
PUBH 8419	Measrmnt/PublHlth&HlthSrvcsRes
PUBH 8420	Advanced Analysis & Dissemination
6 credits of required EOH specialty field courses	
PUBH 8411	AdvTpc-PrinEnvHlthRiskScience (Doctoral Seminar)
PUBH 8412	AdvTpc-Env&OccHlthRsrch&Practc
7-10 credits of elective specialty field courses (sample list)	
PUBH 6121	Envrnmntl&OccptnlEpidemiology
PUBH 6122	Envir Policy, Politics, Progs
PUBH 6123	Toxicology: Applic for PH Pol
PUBH 6124	Problem Solving in EOH
PUBH 6125	Intro-Children's Health & Env
PUBH 6126	Assessment&Control/Env Hazards
PUBH 6127	Germs: An Introduction to Environmental Health Microbiology
PUBH 6128	Global Envrnmntl & Occptnl Hlth
PUBH 6130	Sustainable Energy & Environmt
PUBH 6199	Topics in EOH (Microbial Risk Assessment)
PUBH 6199	Topics in EOH (Pesticide Exposures and Cancer)
PUBH 6199	Topics in EOH (Food and the Global Environment)
4 credits of professional leadership courses	
PUBH 8415	Instructional Leadership
PUBH 8413	Research Leadership
Comprehensive examination	
8-11 credits of dissertation preparation and dissertation	

Advanced Health Care and Public Health Research Design

Prerequisites: Pass Comprehensive Exam, Approval of Program Director, & one page abstract

Dissertation Research - DrPH Degree Dissertation Research

Graduation Requirements*

1. Graduate credit requirement: 60 graduate credits are required.
2. Course requirements: successful completion of the foundational and research methods courses. The program-specific specialty field courses and the professional leadership credits are required.
3. Comprehensive exam: Once the course of study is completed, students are required to pass the comprehensive exam to be officially admitted to the candidacy phase.
4. Dissertation: PUBH 8422 Advanced Health Care and Public Health Research Design 6-12 dissertation research credits are required. Once the proposal has been successfully defended and dissertation research credits have been met, the oral defense may be scheduled.
5. Grade point requirement: A 3.0 (B average) overall grade-point average is required.
6. Time limit requirement: The degree must be completed within eight (8) years.
7. Transfer credit policy: up to 12 graduate credits may be transferred to the DrPH degree, with program director approval. Credits must have been earned from an accredited institution in the last 3 years, with a grade point of 3.0 or better.

EPIDEMIOLOGY AND BIOSTATISTICS

The Department of Epidemiology and Biostatistics integrates diverse educational programs with a rapidly growing research portfolio. Graduate students have the opportunity to study and participate in faculty research projects in a variety of academic disciplines including infectious disease, cancer, nutritional and disaster epidemiology, applied biostatistical methods and public health laboratory science. In their Practicum, students work closely with scientists at local health departments, the NIH and other federal agencies, academic institutions, and international health organizations. By exploring the core quantitative sciences of public health and taking advantage of opportunities to "learn by doing," students are prepared to become the next generation of public health leaders and practitioners.

GRADUATE

Master's programs

- Master of Public Health in the field of biostatistics (p. 745)
- Master of Public Health in the field of epidemiology (p. 748)
- Master of Public Health in the field of global health epidemiology (p. 750)
- Master of Science in biostatistics (p. 753) (Jointly administered by the Department of Statistics in CCAS and the Department of Epidemiology and Biostatistics in SPH)
- Master of Science in epidemiology (p. 755)
- Master of Science in public health microbiology and emerging infectious diseases (p. 757)

Doctoral programs

- Doctor of Philosophy in biostatistics (p. 758) (Jointly administered by the Department of Statistics in CCAS and the Department of Epidemiology and Biostatistics in SPH)
- Doctor of Philosophy in epidemiology (p. 760)

FACULTY

Professors A. E. Greenberg (*Chair*), L. Guay (*Research*), M. Foulkes (*Research*), K. Hirst (*Research*), D. A. Hoffman, J. Jordan, J. M. Lachin, R. K. Riegelman, S. J. Simmens (*Research*), E. A. Thom (*Research*), D. A. Verme,

Associate Professors A. D. Castel, S. D. Cleary, K. L. Drews (*Research*), H. J. Hoffman, K. Jablonski (*Research*), I. Kuo (*Research*), M. Magnus, M. M. Rice (*Research*), K. Z. Robien, N. Younes, H. A. Young

Assistant Professors I. Bebu (*Research*), B. Braffett (*Research*), R. G. Clifton (*Research*), A. Elmi, M. Ghosh, S. Glick, Y. Ma (*Research*), J. Peterson (*Research*), M. Smurzynski (*Research*), M. Temporsa (*Research*)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PUBH 3131. Epidemiology: Measuring Health and Disease. 3 Credits.

Principles of epidemiology applied to disease surveillance, control of infectious and chronic diseases, and health services/health policy. Understanding the basic research designs and their relationship to establishing cause and effect and effectiveness of interventions to prevent and cure disease. Prerequisite: PUBH 1101, STAT 1127 .

PUBH 6002. Biostatistical Applications for Public Health. 3 Credits.

Application of biostatistical principles to critical analysis of retrospective studies, prospective studies, and controlled clinical trials, as well as studies in the health services literature. Selection, basic calculations, and interpretation of statistical methods for detection of significant associations and differences.

PUBH 6003. Principles and Practices of Epidemiology. 3 Credits.

General principles, methods, and applications of epidemiology. Outbreak investigations, measures of disease frequency, standardization of disease rates, study design, measures of association, hypothesis testing, bias, effect modification, causal inference, disease screening, and surveillance. Case studies apply these concepts to a variety of infectious, acute, and chronic health conditions affecting the population.

PUBH 6242. ClinicalEpid&Decision Analysis. 2,3 Credits.

Quantitative and qualitative approaches to decision making, including risk- benefit analysis, decision analysis, and cost-effective analysis. Applications to technology assessment; development of clinical guidelines. Note: MPH Health Policy, MS Health Policy and Doctoral Students concurrently take PubH 6299 topics course by the same name for 1 credit, thereby enrolling for three total credits (PubH 6242=2 credits plus PubH 6299.xx, same name =1 credit). Prerequisites: PUBH 6002, PUBH 6003.

PUBH 6243. Topics:ClinicalEpi&DecAnalysis. 1 Credit.

This class takes an evidence-based problem solving approach for Masters level students interested in the health policy focus of clinical epidemiology utilizing methods taught in PubH 6242. Prerequ: PubH 6003. Corequis: PubH 6242.

PUBH 6244. Cancer Epidemiology. 2 Credits.

Epidemiology of specific cancers, with an emphasis on molecular and genetic epidemiology. Current research in the field. Prerequisites: PubH 203.

PUBH 6245. InfectiousDisease Epidemiology. 2 Credits.

The role and conduct of laboratory and field investigations in the epidemiology of infectious diseases. Prerequisite: PubH 6003.

PUBH 6247. Design of Health Studies. 3 Credits.

Epidemiologic concepts and methods applied to specific research questions especially new types of public health problems. Recognition and development of the most appropriate study design for a specific health issue. Ecologic, cross-sectional, case-control, cohort studies and clinical trials. Sampling, measurement, questionnaire design, causality and causal criteria. Development of a research proposal. Co-requisite: PubH 6002. Prerequisite: PubH 6003.

PUBH 6249. StatPackages/DataMgt&DataAnlys. 3 Credits.

This course familiarizes the student with one of the most widely used database management systems and statistical analysis software packages, the SAS System, operating in a Windows environment. Throughout the course, several database management system techniques and data analytical strategies for the appropriate analysis of datasets obtained from a variety of studies will be presented. Statistical techniques covered include linear regression, analysis of variance, logistic regression, and survival analysis. Prerequisite: PubH 6002.

PUBH 6250. Epidemiology of HIV/AIDS. 2 Credits.

Methodological issues central to HIV/AIDS research. Biases peculiar to HIV/AIDS epidemiologic studies (both observational and experimental designs). The natural history of HIV, diagnosis, surveillance, vulnerable subpopulations, behavioral facets, and evaluation of epidemiologic studies with an emphasis on methodological considerations. Prerequisite: PubH 6003, Recommended PubH 6002.

PUBH 6252. Advanced Epidemiology Methods. 3 Credits.

Advanced quantitative epidemiologic methods, with a focus on basic data analytic techniques, identifying and evaluating bias and adjusting for confounding. Dose-response, trend analysis, and multiple linear and logistic regression models. Prerequisites: PubH 6002, 6003, 6247. Co- or prerequisite PubH 6249.

PUBH 6253. Issues in HIV Care & Treatment. 1 Credit.

This course will provide an overview and in depth consideration of some of the major issues in treatment of HIV disease, including the assessment of efficacy and effectiveness, drug resistance, monitoring of drug toxicity, special populations, the interrelationship between treatment and prevention, and quality of care. The course has been designed with an interdisciplinary audience in mind. In discussions and assignments, students will be able to emphasize their own area of interest and/or expertise (e.g. epidemiology, policy, etc).

PUBH 6255. Org Responses to HIV/Epidemic. 2 Credits.

This seminar focuses on the rapidly evolving responses of local, national and global governmental and non-governmental organizations to the HIV/AIDS epidemic. Inspirational leaders of selected HIV/AIDS organizations are invited to describe how their organizations contribute to fighting the epidemic; the leadership and management skills that they use in their daily work; and their strategic decision-making processes. Basic principles of epidemiology, leadership and organizational strategy and structure are addressed through didactic presentations and interactive faculty-student dialogue. Lessons learned through the lens of HIV/AIDS organizations are broadly applicable to other public health problems. Students will learn about the strengths and challenges of different types of public health organizations as they make career decisions about their own transition to the public health work force. Prerequisite: PubH 6003, HIV/AIDS experience, or permission of Instructor.

PUBH 6258. Adv Topics/Biostat Consulting. 1 Credit.

Principles and practice of biostatistical consulting in public health and medical research environments.

PUBH 6259. Epid Surveillance/PublicHealth. 2 Credits.

Focus on foundations of public health surveillance systems for communicable as well as chronic diseases. Outbreak investigation methods will be included, as well as surveillance data sources, data management, data analysis, ethical issues, surveillance system evaluation, and use of information for prevention. Surveillance systems for reportable diseases, nosocomial infections, bioterrorism events, cancer, environmental disease, vaccine-related adverse events, bovine spongiform encephalopathy, and military personnel will be discussed. Prerequisites: PubH 6003.

PUBH 6260. Adv DataAnalysis-Public Health. 3 Credits.

Advanced data analysis using the SAS System to expand on the analytic techniques gained in PubH 6002 and PubH 6249 and to provide students with the applied statistical skills required to analyze various types of public health datasets. Prerequisites: PubH 6002, 6249.

PUBH 6261. Epi-Bio Skills Bldg Seminar. 1 Credit.

Assists students in developing the skills needed to complete degree requirements and to provide them with practical applied public health training. By the end of the course, students will be able to describe essential skills needed for preparation, implementation, presentation and communication of public health data.

PUBH 6262. Intro-Geog Information Systems. 1 Credit.

Geographic information systems (GIS) for mapping and display of health data. The course makes use of ArcGIS 8.3. The use of spatial statistics for the detection of clusters and patterns in the spread of diseases. Working with geodatabases, shape files, layers, query information from attribute tables, geocode addresses and customizing GIS applications.

PUBH 6263. Advanced GIS. 1 Credit.

Provides mid to advanced level training in GIS for display and analysis of health data. Use software ArcGIS 9.3 and additional extensions such as Spatial Analyst and Geostatistical Analyst. Also uses GeoDa software. Emphasizes benefits of using GIS to do more than simply manage and map data. GIS supports a range of spatial analysis functions that enable researchers to extract additional meaning from manipulating geographic data. Learn to work with raster datasets and geodatabases to build spatial models for analyzing health data and evaluating spatial patterns of health events based on notion of distance. Prerequisite: PubH 6262.

PUBH 6264. Quantitative Methods. 3 Credits.

Introduces basic concepts in mathematical statistics. Topics will include probabilities (unconditional and conditional), density and distribution functions of continuous and discrete random variables, including expected values. Specific distribution functions discussed will be Binomial, Poisson, Hypergeometric, and Gaussian distributions. Additional topics include bivariable distributions, variance-covariance matrix, limiting theory, asymptotic results, and maximum likelihood estimation. Prerequisites: Math 1231, 1232 and PubH 6002, 6249.

PUBH 6265. Design of Medical Studies. 3 Credits.

Design of medical investigations, including the randomized clinical trial, observational cohort study, and the retrospective case-control study. Specific methods regarding sample size, power and precision and statistical procedures for randomization and sa.

PUBH 6266. Biostatistical Methods. 3 Credits.

Biostatistical methods for asymptotically efficient tests and estimates of relative risks and odds ratios from prospective and retrospective matched and unmatched studies. Fixed and random effects models. Logistic regression, conditional logistic regression. Poisson regression. Maximum likelihood and efficient scores. Prerequisites: STAT 6201-6202, PubH 6264.

PUBH 6267. Time Series:Applications in PH. 2 Credits.

Introduce basic concepts for the identification and modeling of time series in the time domain approach. Learn a new set of terminology standards and a different way to analyze these type of data and to forecast future values of a time series and its accuracy. Software used is SAS/ETS and 3 procedures: ARIMA, AUTOREG, FORECAST. New mathematical notation will be used. Prerequisite: PubH 6249.

PUBH 6268. Advanced SAS. 1 Credit.

Intensive in advanced programming using SAS. Expand technical skills to provide advanced SAS tools for data management and graphics. Topics to include Interactive Matrix Language (IML), SAS Macro facility language, and drill-down graphs using SAS/GRAPH. Prerequisites: PubH 6002, 6249 or Instructor's permission.

PUBH 6269. Reproductive Epidemiology. 1 Credit.

Current research, controversial issues and methodological problems in epidemiology of reproductive and perinatal health. Present reproductive health issues such as conception and infertility; perinatal issues such as complications of pregnancy, infections in pregnancy, adverse pregnancy outcomes, and birth defects. Prerequisite: PubH 6003.

PUBH 6270. HIV/AIDS Surveillance. 1 Credit.

Overview of surveillance methods used domestically and internationally to monitor HIV/AIDS epidemic. Surveillance systems including sentinel, population based, behavioral, and incidence surveillance will be presented and discussed. Strengths and weaknesses of these various systems will be discussed in addition to how data from these systems impact and inform HIV/AIDS related policies and programs. Prerequisite: PubH 6003.

PUBH 6271. Disaster Epidemiology. 1 Credit.

Introduction to disaster epidemiology that elucidates the important role epidemiologists play in assessing the health and psychological effects of natural and man-made disasters and in identifying factors that contribute to these effects. Focus will be on applications of epidemiologic methods to the study of public health consequences of disasters, case studies from actual disasters used to illustrate various roles of epidemiologist in responding to these events and lessons learned. Highlight key skills that epidemiologists need to be part of a response and recovery. Identify methodological issues for future work. Prerequisites: PubH 6002, 6003.

PUBH 6272. Infectious Agents- Cancer. 1 Credit.

Describes the role of infectious agents in the etiology of human cancer. Emphasis on differences between specific oncogenic viruses. Other oncogenic agents, bacterial and parasitic, will also be discussed. Discuss laboratory approaches to the documentation of their pathogenicity, how behavior affects mode of transmission, and which types of data provide strongest support for documenting oncogenic potential for humans. Prerequisite: PubH 6003.

PUBH 6273. Ethnographic Methods. 1 Credit.

Use ethnographic field methods in conjunction with epidemiological research. Introduction to specific methods used to examine health phenomena and determinants of disease. Learn specific applied skills that can be modified with socio-cultural modifications to evaluate urban sites and other settings. Basic skills in application of ethnographic methods, including recursive observations, participant observations, and variety of approaches to interviewing such as in-depth, structured and non-structured as well as conversational interviewing. Discuss use of multiple approaches in conjunction with ethnography, including focus groups, archival, document, statistical and secondary data analysis, and survey research methods. Course emphasizes use of ethnographic research methods in community-based health settings and evaluates issues in cultural competency and how to garner stakeholder support to conduct epidemiologic studies. Prerequisite: PubH 6003.

PUBH 6274. Emerging ID for PH Pro's. 2 Credits.

Focus on epidemiology of emerging infectious diseases of public health importance, including factors leading to their development, management of emerging infectious diseases from a public health and laboratory standpoint, including biosafety, and strategies for emergency preparedness from a national and international perspective. Course emphasizes the context of emerging infectious diseases and strategic approaches to their containment. Prerequisites: PubH 6003 or Micr 6292 or Instructor permission.

PUBH 6275. Essential PH Lab Skills. 2 Credits.

This course will provide public health students with practical laboratory experience Prerequ: Micr 6239 or Micr 6212 or permission of instructor.

PUBH 6276. Health Microbiology. 3 Credits.

Gain in-depth understanding of important non-viral pathogens pertinent to PH Microbiology. Learn how to isolate & identify pathogens using critical thinking & problem solving skills.

PUBH 6277. Public Health Genomics. 2 Credits.

Learn about molecular technology and how it is impacting public health practice & discourse in the post genomic era. Explore ways in which genomics is being used to solve or help alleviate PH problems through case-focused discussions. Prerequisite: genetics or molecular biology within 6 years or permission of course instructor.

PUBH 6278. Public Health Virology. 3 Credits.

In-depth understanding of viral pathogenesis by focusing on current research, controversial issues and PH relevance. Survey of family of viruses most relevant to today's public health efforts, concentrating on virus-host interactions & therapeutic strategies.

PUBH 6280. MEID Final Project. 2 Credits.

Focus on the synthesis and summary of data acquired through epidemiologic and/or public health laboratory research. Prerequisites: PubH 6002, 6003, 6292, 6245; Biosafety training, CITI training, HIPAA training, permission of instructor.

PUBH 6299. Topics in Epi/Bio. 1-3 Credits.

In-depth examination of a particular facet of public health. Topics and prerequisites vary.

MASTER OF PUBLIC HEALTH IN THE FIELD OF BIOSTATISTICS

Program Director H. Hoffman

Mission

The mission of the Biostatistics Program is to educate graduate students in developing the necessary methodological and quantitative skills to successfully apply statistical methods to the biological, biomedical, and health services sciences. In addition to enhancing students' capacity to think critically and creatively, the Program should deepen their commitment to improving the public's health, to engaging in and promoting public

service – qualities that are essential for future biostatisticians and public health practitioners.

Goals

The goals of the Biostatistics Program are to ensure that graduates:

- Understand and adhere to high scientific standards for research;
- Understand how to apply statistical methods to biological/ biomedical sciences and health services;
- Understand and follow guidelines for ethical treatment of research participants;
- Communicate research findings to a lay audience; and
- Respect cultural diversity throughout all of the above.

COMPETENCIES

The specialization in biostatistics focuses on developing students’ skills in the statistical analysis and interpretation of health research data. The following competencies were developed in concert with professors of biostatistics courses (at GW as well as from other CEPH-accredited MPH programs), biostatistics textbooks, conversations with prospective employers likely to hire MPH-biostatistics graduates, and with experience teaching biostatistics courses to MPH students. ASPH Education Committee competencies were also consulted.

Upon completion of the Master of Public Health in the field of biostatistics, students will demonstrate functional competence to:

- Manipulate various databases from large scale epidemiological studies and clinical trials studies using statistical software, e.g. SAS®.

REQUIREMENTS

Program Prerequisites

All applicants to the MPH Biostatistics degree program must have completed two semesters of college level calculus through calculus II with a grade of B or better to be considered for admission.

Course Requirements

The MPH degree program in biostatistics consists of 45 credits. These credits are based on a series of core courses (15 credits) and program-specific courses (20 credits), and electives (6 credits). The total 45-credit program also includes a practicum (2 credits) and a culminating experience (2 credits) where students apply their didactic education in a real-world setting.

Begin planning your practicum during Year 1.

Program Requirements

Required core courses

PUBH 6001	BiologicalConcepts/PublicHlth
PUBH 6002	Biostatistical Applic for PubH
PUBH 6003	Prin & Practice/Epidemiology
PUBH 6004	Environmental and Occupational Health in a Sustainable World
PUBH 6006	Mgt & Policy Approaches to PH
PUBH 6007	Social&BehaviorAppr-Pub.Hlth

Required program-specific courses

PUBH 6247	Design of Health Studies
PUBH 6249	StatPackages/DataMgt&DataAnlys
PUBH 6252	Advanced Epidemiology Methods

PUBH 6258	Adv Topics/Biostat Consulting
PUBH 6260	Adv DataAnalysis-Public Health
PUBH 6261	Epi-Bio Skills Bldg Seminar
PUBH 6264	Quantitative Methods
PUBH 6266	Biostatistical Methods

Electives

Select epi-biostatistics courses with advisor's approval

Practicum and culminating experience

PUBH 6014	Practicum
PUBH 6015	Culminating Experience

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

MASTER OF PUBLIC HEALTH IN THE FIELD OF EPIDEMIOLOGY

Program Co-Directors S. Glick, M. Magnus, H. Young

Mission

The mission of the Epidemiology program is to educate graduate students by developing the necessary methodological and quantitative skills to work successfully in the field. While nurturing students' capacity to think critically and creatively, we strive to deepen their commitment to improving the public's health and to engaging in and promoting public service qualities we believe are essential for future epidemiologists and public health practitioners.

Goals

The goals of the Epidemiology program are to ensure that graduates:

- Understand and adhere to high scientific standards for research;

- Understand and follow guidelines for ethical treatment of research participants;
- Can communicate research findings to a lay audience; and
- Respect cultural diversity throughout all of the above.

COMPETENCIES

The epidemiology specialization prepares students for epidemiological research and evaluation in academic, governmental, private-sector, and community health care sites. The curriculum prepares students to design and conduct studies, manage health data, and make leadership decisions in public health and clinical epidemiology. The following competencies were developed in concert with professors of epidemiology courses (at GW as well as other CEPH-accredited MPH programs), epidemiology textbooks, conversations with prospective employers likely to hire MPH-epidemiology graduates, and experience teaching epidemiology courses to MPH students. ASPH Education Committee competencies were also consulted.

Upon completion of the MPH in Epidemiology, students will demonstrate functional competence to:

- Apply epidemiological and biomedical concepts in identifying and describing the determinants and the distribution of disease in human populations.

Relevant Courses

PUBH 6014	Practicum
PUBH 6015	Culminating Experience
PUBH 6247	Design of Health Studies
PUBH 6252	Advanced Epidemiology Methods

- Identify and assess patterns of emerging diseases to postulate hypotheses and to identify appropriate strategies in order to evaluate the impact of health problems.

Relevant Courses

PUBH 6014	Practicum
PUBH 6015	Culminating Experience
PUBH 6247	Design of Health Studies
PUBH 6252	Advanced Epidemiology Methods

- Enumerate and apply underlying principles and methods to design, plan, and conduct epidemiologic studies including observational and experimental designs, screening programs, public health surveillance, and other epidemiologic designs.

Relevant Courses

PUBH 6014	Practicum
-----------	-----------

PUBH 6015	Culminating Experience
PUBH 6247	Design of Health Studies
PUBH 6252	Advanced Epidemiology Methods

- Identify the appropriate data analysis methods, conduct data analysis using a computerized software program, and interpret the results from epidemiological studies.

Relevant Courses

PUBH 6014	Practicum
PUBH 6015	Culminating Experience
PUBH 6249	StatPackages/DataMgt&DataAnlys
PUBH 6252	Advanced Epidemiology Methods
PUBH 6260	Adv DataAnalysis-Public Health
PUBH 6261	Epi-Bio Skills Bldg Seminar

- Demonstrate proficiency in constructing and managing databases from epidemiological studies using statistical software, e.g. The SAS® System.

Relevant Courses

PUBH 6014	Practicum
PUBH 6015	Culminating Experience
PUBH 6249	StatPackages/DataMgt&DataAnlys
PUBH 6252	Advanced Epidemiology Methods
PUBH 6260	Adv DataAnalysis-Public Health

- Synthesize data and relevant literature to interpret findings in a causal framework, write manuscripts, and make oral presentations.

Relevant Courses

PUBH 6014	Practicum
PUBH 6015	Culminating Experience
PUBH 6247	Design of Health Studies
PUBH 6249	StatPackages/DataMgt&DataAnlys
PUBH 6252	Advanced Epidemiology Methods
PUBH 6260	Adv DataAnalysis-Public Health
PUBH 6261	Epi-Bio Skills Bldg Seminar

- Work in a multidisciplinary research team and recognize and appropriately respond to ethical and legal issues that arise in research.

Relevant Courses

MASTER OF PUBLIC HEALTH IN THE FIELD OF GLOBAL HEALTH EPIDEMIOLOGY

This program is not accepting students in the 2015-16 Academic Year

Program Co-Directors H. Young, M. Magnus, L. Simonsen

Practicum Director L. Simonsen

Mission

The mission of the Global Health Epidemiology Program is to educate graduate students by developing the necessary

methodological and quantitative skills to conduct research in an international setting and successfully improve the health and well-being of people around the world. While nurturing students' capacity to think critically and creatively, we strive to deepen their commitment to improving the public's health and to engaging in and promoting public service—qualities we believe are essential for future epidemiologists and public health practitioners.

Goals

The goals of the Global Health Epidemiology Program are to ensure that graduates:

- Identify determinants of health problems including sociocultural factors;
- Understand and adhere to high scientific standards for research;
- Understand and follow guidelines for ethical treatment of research participants;
- Communicate research findings to a lay audience;
- Assume leadership roles in designing and conducting epidemiologic and intervention research at both national and global levels; and
- Respect cultural diversity throughout all of the above.

COMPETENCIES

Program-Specific Competencies

The Global Health Epidemiology specialization prepares students for epidemiological research and evaluation in a variety of local, national, and international organizations. The curriculum prepares students to design and conduct studies, manage health data, and make leadership decisions in the context of international public health. The following competencies were developed in concert with professors of epidemiology and global health courses, epidemiology textbooks, conversations with prospective employers, and experience in the field.

Upon completion of the MPH in Global Health Epidemiology, students will demonstrate functional competence to:

- Apply the theories and principles of epidemiology, biostatistics, economics and social development to the identification, classification and elaboration of the determinants and distribution of disease and global health threats and opportunities at the community, national and international levels.

Relevant courses:

PUBH 6247	Design of Health Studies
PUBH 6249	StatPackages/DataMgt&DataAnlys
PUBH 6252	Advanced Epidemiology Methods
PUBH 6400	Global Health Frameworks

PUBH 6440	Global Health Economics and Finance
-----------	-------------------------------------

- Assess the functions, capacities, management and governance of governmental, international and non-state organizations in the translation of scientific and program evidence to inform public health policy making and strategy development.

Relevant courses:

PUBH 6400	Global Health Frameworks
PUBH 6401	Comp Regional Determinants
PUBH 6402	Washington Seminar

- Critically analyze global health trends and assess patterns of emerging diseases to postulate hypotheses and to differentiate determinants in order to evaluate the impact of health problems and prioritize approaches based on economic affordability and political feasibility.

Relevant courses:

PUBH 6247	Design of Health Studies
PUBH 6249	StatPackages/DataMgt&DataAnlys
PUBH 6252	Advanced Epidemiology Methods
PUBH 6400	Global Health Frameworks
PUBH 6401	Comp Regional Determinants
PUBH 6440	Global Health Economics and Finance

- Apply underlying principles and methods including ethical issues involved in the design, planning, and conduct of epidemiologic studies including observational and experimental designs, screening programs, public health surveillance, and other epidemiologic designs in a global health setting.

Relevant courses:

PUBH 6247	Design of Health Studies
PUBH 6249	StatPackages/DataMgt&DataAnlys
PUBH 6252	Advanced Epidemiology Methods
PUBH 6400	Global Health Frameworks

- Identify the appropriate data analysis methods, conduct data management and data analysis using a computerized software program, and interpret the results from epidemiological studies.

Relevant courses:

PUBH 6249	StatPackages/DataMgt&DataAnlys
-----------	--------------------------------

PUBH 6252	Advanced Epidemiology Methods
-----------	-------------------------------

- Successfully apply public health theory and experiential evidence in the development and management of project, program and institutional strategies capable of reducing health risks, addressing underlying vulnerabilities, and mitigating the impact disease.

Relevant courses:

PUBH 6400	Global Health Frameworks
-----------	--------------------------

PUBH 6401	Comp Regional Determinants
-----------	----------------------------

- Effectively synthesize data and relevant literature with economic and social arguments to formulate communication strategies in global health action in various professional, institutional, political and cultural settings as well as facilitate the distribution of scientific findings through manuscripts and scientific presentations.

Relevant courses:

PUBH 6247	Design of Health Studies
-----------	--------------------------

PUBH 6249	StatPackages/DataMgt&DataAnlys
-----------	--------------------------------

PUBH 6252	Advanced Epidemiology Methods
-----------	-------------------------------

PUBH 6400	Global Health Frameworks
-----------	--------------------------

PUBH 6401	Comp Regional Determinants
-----------	----------------------------

- Evaluate the benefits, costs and effectiveness of global health project, program and policy approaches and interventions through the appropriate choice and application of qualitative and quantitative survey and analysis methods.

Relevant courses:

PUBH 6247	Design of Health Studies
-----------	--------------------------

PUBH 6400	Global Health Frameworks
-----------	--------------------------

PUBH 6401	Comp Regional Determinants
-----------	----------------------------

- Demonstrate their understanding of the fundamental concepts related to the theory of the consumer and production decisions by health care organizations; be able to critically evaluate research findings related to various healthcare markets; and use economic analysis and statistical tools for evaluating problems faced by health care organizations.

Relevant course:

PUBH 6440	Global Health Economics and Finance
-----------	-------------------------------------

- Critically assess issues in at least one of the following specialty areas in global health epidemiology:
 - Clinical epidemiology such as decision analysis, cost-effectiveness to clinical and public health problems.
 - Major topics in infectious disease epidemiology
 - Methods and issues of cancer epidemiology
 - Methods and issues of surveillance systems in public health.
 - Qualitative research methods
 - Program design and implementation
 - Major topics in food, water and vector borne diseases and control
 - Advanced quantitative methods

REQUIREMENTS

Course Requirements

Students may not be admitted directly into the Global Health Epidemiology program. Students in either the Epidemiology program or the Global Health program may apply to the Global Health Epidemiology program after they have completed PUBH 6002 Biostatistical Applic for PubH, PUBH 6003 Prin & Practice/Epidemiology, and PUBH 6400 Global Health Frameworks (usually after their first semester). Successful applicants are expected to have earned a minimum of A- in each of these three courses.

Students who are interested in this program and intend to complete the MPH in two years will need to register for the above mentioned three courses in their first semester. Students not admitted into the Global Health Epidemiology program will continue in their original program.

All GW School of Public Health and Health Services (SPH) MPH students who are admitted into the MPH Global Health Epidemiology Program enroll in Core Courses (15 credits), Epidemiology Program-Specific Required Courses (9 credits), Global Health Program-Specific Required Courses (9 credits) and Concentration electives (8 credits). The total 45 credit degree program also includes a Practicum (2 credits) and a Culminating Experience (2 credits) where students apply their didactic education in a real world setting.

Program Requirements

Required core courses:

PUBH 6014 Practicum

PUBH 6015 Culminating Experience

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

MASTER OF SCIENCE IN THE FIELD OF BIOSTATISTICS

Program co-Directors and Academic Advisors: A. F. Elmi, D. A. Verme

The Master of Science (MS) degree program in Biostatistics is a 33 credit degree program jointly administered by the Department of Statistics in the Columbian College of Arts and Sciences (CCAS) and the Department of Epidemiology and Biostatistics in the Milken Institute School of Public Health (SPH), and its associated research facility, The Biostatistics Center. This degree program is accredited by the Middle States Council on Higher Education through the CCAS and by

the Council on Education for Public Health through the SPH Regulations, and requirements for this graduate degree have been designed to be compatible with policies and scholarship requirements of both CCAS and SPH. The degree is conferred by Columbian College.

Admissions Requirements

Applicants must hold an undergraduate degree from an accredited institution of higher learning. Applicants should have academic backgrounds of excellence, usually with majors, or equivalent, in the fields in which they intend to study for advanced degrees. Normally, a B average (or equivalent) from an accredited college is required. With evidence of special promise, such as high Graduate Record Examination scores, an applicant whose academic record falls short of a B average may be accepted on a conditional basis. Meeting the minimum requirements does not assure acceptance. The departments may, and often do, set higher admission standards. Moreover, the number of spaces available for new graduate students limits the number who can be accepted. Students who apply in their senior year must provide evidence of the completion of their baccalaureate work before registration in Columbian College is permitted. Applicants should be aware that graduate courses taken prior to admission while in non-degree status are not used in assessing admissibility to degree programs and may not be transferable into these programs.

If desired, a student may complete the M.S. program prior to admission to the Ph.D. degree program, in which case no more than 24 credits from the M.S. degree may be applied to the Ph.D. course work requirements. In this instance the student will be required to take a minimum of 27 additional credits of course work. The distribution of these courses between statistics and public health will depend on the nature of the Master's degree and whether the transferred credits will be used to defray statistics or public health course work. Full information is available in the online Graduate Admissions Application. (<http://graduate.admissions.gwu.edu>)

COMPETENCIES

At the completion of the MS program in Biostatistics students will be able to:

- Understand and the theory and principles behind statistical methods most commonly used in biomedical research (contingency tables, survival analysis, mixed models, and missing data).
- Understand and apply the underlying principles and methods to design, plan, and conduct biomedical studies.
- Provide biostatistical advice as a member of a team engaged in a biomedical research project. Includes manipulation and analysis of data.

REQUIREMENTS

Minimum Prerequisite Courses for Admission Consideration (or equivalents to these GW courses)

The courses listed below (or equivalents) are prerequisites for admission consideration, and **MUST** appear on your transcript. Submit your MS Biostatistics program admission application only after you have completed all of the following courses:

MATH 1231	Single-Variable Calculus I
MATH 1232	Single-Variable Calculus II
STAT 2118	Regression Analysis

Additional Course Requirements

The courses listed below are "Additional Course Requirements." Applicants lacking these courses (or equivalents to these GW courses) will be considered for admission, but, if admissible, will be admitted conditionally with the expectation that these courses will be satisfactorily completed within two semesters following matriculation in the program. These credits do not count as credit toward the 33 credit graduation requirement, nor are grades earned in these additional courses reflected in the overall grade point average.

MATH 2184	Linear Algebra I
MATH 2233	Multivariable Calculus
One of the following:	
STAT 1129	Introduction to Computing
STAT 2183	Intermediate Stat Lab/Packages
PUBH 6249	StatPackages/DataMgt&DataAnlys

Program Requirements

Required core courses:

Required statistics core courses:	
STAT 6201	Mathematical Statistics I
STAT 6202	Mathematical Statistics II
STAT 6210	Data Analysis
STAT 6227	Survival Analysis
PUBH 6265	Design of Medical Studies
PUBH 6266	Biostatistical Methods (Basis for Master's Comprehensive Examination)

Required public health core courses:

PUBH 6001	Biological Concepts/Public Hlth
PUBH 6003	Prin & Practice/Epidemiology
PUBH 6299	Topics in Epi/Bio

Approved elective courses:

6 credits from the following:

Approved statistics elective courses:

STAT 3187	Introduction to Sampling
STAT 4181	Applied Time Series Analysis
STAT 4188	Nonparametric Stat Inference
STAT 6215	Applied Multivariate Analysis I
STAT 6216	Applied Multivariate Analysis II
STAT 6217	Design of Experiments
STAT 6223	Bayesian Statistics: Theory and Applications
STAT 6231	Contingency Table Analysis
STAT 6242	Regression Graphics/Nonparametric Regression
STAT 6287	Modern Theory of Sample Surveys
STAT 8226	Advanced Biostatistical Methods
STAT 8265	Multivariate Analysis
STAT 8273	Stochastic Processes I
STAT 8281	Advanced Time Series Analysis
STAT 8288	Modern Theory/Sample Surveys

Approved public health elective courses:

PUBH 6004	Environmental and Occupational Health in a Sustainable World
PUBH 6006	Mgt & Policy Approaches to PH
PUBH 6121	Environmental and Occupational Epidemiology
PUBH 6242	Clinical Epid&Decision Analysis
PUBH 6244	Cancer Epidemiology
PUBH 6245	Infectious Disease Epidemiology
PUBH 6246	Injury Epidemiology&Prevention
PUBH 6248	Epid Methods/Older Populations

PUBH 6250	Epidemiology of HIV/AIDS
-----------	--------------------------

Consulting

PUBH 6258	Adv Topics/Biostat Consulting
PUBH 6283	Biostatistics Consulting Practicum

The Master's Comprehensive Examination

The Master's Comprehensive Examination is a written comprehensive examination in the field of Biostatistics and is based on the course content PUBH 6266 Biostatistical Methods. It is administered by the faculty from the Department of Epidemiology and Biostatistics in the Milken Institute School of Public Health.

MASTER OF SCIENCE IN THE FIELD OF EPIDEMIOLOGY

Program Director S.D. Cleary

The Department of Epidemiology and Biostatistics offers the degree of Master of Science in Epidemiology. The goals of the M.S. degree are to prepare students for careers in industry or academia and for continued study in a doctoral program. The program includes course work that focuses on theoretical and applied epidemiological and statistical methods. Comprehensive examinations are required.

If desired, a student may apply for admission to the Ph.D. degree program prior to completing the M.S. degree, in which case no more than 24 credits from the M.S. degree may be applied to the Ph.D. course work requirements. In this instance, the student will be required to take a minimum of 27 additional credits of course work. The distribution of these courses between epidemiology and statistics will depend on the nature of the Master's degree and whether the transferred credits will be used to defray epidemiology and statistics course work.

COMPETENCIES

At the completion of the MS program in Epidemiology students will be able to:

- Demonstrate proficiency in basic epidemiology concepts, e.g., formulate hypotheses and research aims, select appropriate study design, identify risk and/or protective factors that contribute to disease outcomes, develop analytic plans, and identify bias.
- Demonstrate competence using standard statistical software packages to manage and analyze primary data or conduct secondary data analyses to address research questions
- Demonstrate proficiency in data analysis and interpretation of results, including discussion of threats to internal validity, and compose a formal presentation or report

- Describe and apply methods to conduct sound ethical research

REQUIREMENTS

Prerequisite Requirements

(or equivalents to these GW courses)

The courses listed below (or equivalents) are prerequisites for admission consideration, and **MUST** appear on your transcript. Submit your MS Epidemiology program admission application only after you have completed all of the following courses:

BISC 1111 Introductory Biology: Cells and Molecules

BISC 1112 Introductory Biology: The Biology of Organisms

MATH 1231 Single-Variable Calculus I

MATH 1232 Single-Variable Calculus II

Additional Course Requirements

The courses listed below are "Additional Course Requirements." Applicants lacking these courses (or equivalents to these GW courses) will be considered for admission, but, if admissible, will be admitted conditionally with the expectation that these courses will be satisfactorily completed within two semesters following matriculation in the program.

STAT 2183 Intermediate Stat Lab/Packages

or PUBH 6249 StatPackages/DataMgt&DataAnlys

Course Requirements

MS students who select the Epidemiology program enroll in Core Courses (22 credits) of which 16 credits are in Public Health and 6 credits are in Statistics as well as Electives (8 credits). Requirements also include three (3) consulting and thesis credits.

Program Requirements

Required public health core courses:

PUBH 6001 BiologicalConcepts/PublicHlth

PUBH 6002 Biostatistical Applic for PubH

PUBH 6003 Prin & Practice/Epidemiology (basis for MS general comprehensive)

PUBH 6247 Design of Health Studies (basis for MS general comprehensive)

PUBH 6252 Advanced Epidemiology Methods (basis for MS general comprehensive)

PUBH 6299

Topics in Epi/Bio (credits vary per course- may take 1 or 2 courses)

Required statistics core courses:

One of the following:

STAT 4157 & STAT 4158 Introduction to Mathematical Statistics I and Introduction to Mathematical Statistics I

STAT 6201 & STAT 6202 Mathematical Statistics I and Mathematical Statistics II (students interested in applying to the PhD program in epidemiology may register in STAT 6201 & STAT 6202 with advisor's approval)

Approved elective courses:

8 credits from the following:

Approved public health courses:

PUBH 6004 Environmental and Occupational Health in a Sustainable World

PUBH 6007 Social&BehaviorAppr-Pub.Hlth

PUBH 6121 Environmental and Occupational Epidemiology

PUBH 6123 Toxicology: Applications for Public Health Policy

PUBH 6124 Problem Solving in EOH

PUBH 6242 ClinicalEpid&Decision Analysis

PUBH 6244 Cancer Epidemiology

PUBH 6243 Topics:ClinicalEpi&DecAnalysis

PUBH 6245 InfectiousDisease Epidemiology

PUBH 6250 Epidemiology of HIV/AIDS

PUBH 6260 Adv DataAnalysis-Public Health

PUBH 6262 Intro-Geog Information Systems

PUBH 6283 Biostatistics Consulting Practicum

PUBH 6299 Topics in Epi/Bio

Approved statistics elective courses:

STAT 2118 Regression Analysis

STAT 4181 Applied Time Series Analysis

STAT 3187 Introduction to Sampling

Consulting and Thesis:

PUBH 6258	Adv Topics/Biostat Consulting
PUBH 6999	Master of Science Epidemiology Thesis

Graduation Requirements

1. Graduate Credit Requirement: 33 graduate credits are required
2. Comprehensive Exam: A written comprehensive exam will be administered based on the course content of PUBH 6003 Prin & Practice/ Epidemiology, PUBH 6247 Design of Health Studies, and PUBH 6252 Advanced Epidemiology Methods. The exam is administered upon completion of all courses.
3. Grade Point Requirements: A 3.0 (B average) overall grade point average is required.
4. Time Limit Requirement: The MS must be completed within 4 years

M.S. IN PUBLIC HEALTH MICROBIOLOGY AND EMERGING INFECTIOUS DISEASES

Program Co-Directors A. Castel, J. Jordan

Mission

The mission of the MS degree in Public Health Microbiology and Emerging Infectious Diseases is to provide training to a new generation of public health professionals to expand knowledge and expertise in the areas of disease mechanisms, with an emphasis on microbial pathogens, the use and application of modern biotechnologies, and in epidemiologic skills relevant to the prevention and control of problems in the community arising from infectious diseases.

Graduates of the MS program will have an in-depth understanding of the major laboratory, clinical, and public health aspects of humankind's microbial pathogens, and acquire epidemiologic skills relevant to the prevention and control of problems arising from infectious diseases and modern biotechnologies. Areas of emphasis will include: the design and analysis of epidemiologic data; emerging infections; tropical diseases; and applications of genomics, proteomics, and bioinformatics. MS graduates will be employed in academic and industrial research laboratories, international health agencies, NGOs, and private consulting groups. In addition, they may work in federal, state, and local public health agencies or state and local public health laboratories where their technical expertise and population-based perspective will be extremely useful. Students earning this degree will help meet a national demand that has reached critical proportions for a trained workforce in biodefense and emerging infections, and an international demand for training in diseases that affect the developing countries.

Goals

The goals of the MS Program in Public Health Microbiology and Emerging Infectious Diseases are to ensure that graduates:

- Understand the biological complexities of microbial pathogens and the diseases they cause
- Recognize the major epidemiologic and clinical features of microbial disease
- Understand how new biotechnologies (including genomics, proteomics, and bioinformatics) can be applied to the study and control of microbial pathogens
- Develop an in-depth understanding of epidemiologic principles and practice
- Apply the principles of epidemiology, microbiology, and public health practice toward the detection, surveillance, investigation, and control of microbial diseases

REQUIREMENTS

Prerequisite requirements

- Bachelor's degree in the life sciences or at least 12 credits in the biological sciences other than botany
- Chemistry ≥ 3 credits
- 1 semester of calculus

Course requirements

Most students will be able to complete the 45 credit degree in approximately two to three years, depending on the course load taken each semester.

Foundation courses (10 credits)

PUBH 6002	Biostatistical Applic for PubH
PUBH 6003	Prin & Practice/Epidemiology
PUBH 6004	Environmental and Occupational Health in a Sustainable World
PUBH 6275	Essential PH Lab Skills

Required program specific courses (22 credits)

PUBH 6245	InfectiousDisease Epidemiology
PUBH 6247	Design of Health Studies
PUBH 6249	StatPackages/DataMgt&DataAnlys
PUBH 6259	Epid Surveillance/PublicHealth
PUBH 6262	Intro-Geog Information Systems
PUBH 6276	Health Microbiology
PUBH 6277	Public Health Genomics
PUBH 6278	Public Health Virology

MICR 8210 Infection and Immunity

Program-specific elective courses

9 credits from the following:

PUBH 6127 Germs: An Introduction to Environmental Health Microbiology

PUBH 6132 Design, Implementation and Evaluation of Global Water, Sanitation and Hygiene (WASH) Programs

PUBH 6239 Epidemiology of Foodborne and Waterborne Diseases

PUBH 6242 ClinicalEpid&Decision Analysis

PUBH 6243 Topics:ClinicalEpi&DecAnalysis

PUBH 6250 Epidemiology of HIV/AIDS

PUBH 6252 Advanced Epidemiology Methods

PUBH 6253 Issues in HIV Care & Treatment

PUBH 6261 Epi-Bio Skills Bldg Seminar

PUBH 6263 Advanced GIS

PUBH 6270 HIV/AIDS Surveillance

PUBH 6271 Disaster Epidemiology

PUBH 6299 Topics in Epi/Bio

PUBH 6358 Vaccine Policy

PUBH 6399 Topics in Health Policy (i.e.- Homeland Security and Public Health)

PUBH 6484 Prevention and Control of Vector Borne Diseases

PUBH 6487 Emerging Zoonotic Diseases & Global Food Production

MICR 6292 Tropical Infectious Diseases

Field/laboratory experience and final project (4 credits)

PUBH 6016 Field/Laboratory Experience

PUBH 6280 MEID Final Project

Graduation requirements

1. Graduate Credit Requirement: 45 graduate credits required.
2. Course Requirements: Successful completion of the required courses.
3. Grade Point Requirements: An overall GPA of 3.0 (B average).

4. Time Limit Requirement: The degree must be completed within four years.
5. Transfer Credit Policy: Up to 12 credits that have not been applied to a previous graduate degree may qualify to be transferred to the MS program. Credits must have been earned from an accredited institution in the last 3 years with a grade point average of 3.0 or better.

Students will also be expected to participate in a poster presentation at GW Research Day.

DOCTOR OF PHILOSOPHY IN THE FIELD OF BIOSTATISTICS

Program Director and Academic co-Advisor E. Bura (CCAS)

Academic co-Advisor D.A. Verme (Milken Institute SPH)

The PhD degree program in Biostatistics provides doctoral training in the theory of probability, statistics focusing on biostatistical methodology. This 72 credit degree program is jointly administered by the Department of Statistics in the Columbian College of Arts and Sciences (CCAS) and the Department of Epidemiology and Biostatistics in the Milken Institute School of Public Health (SPH) and its associated research facility, The Biostatistics Center. The program is accredited by the Middle States Council on Higher Education through the CCAS and by the Council on Education for Public Health through the Milken Institute SPH. Regulations and requirements for the graduate degree are compatible with policies and scholarship requirements of both CCAS and SPH. The degree is conferred by CCAS.

COMPETENCIES

At the completion of the PhD degree program in Biostatistics students will be able to:

- Conduct biostatistical methodology research.
- Have extensive knowledge of the theory and principles of probability, statistical inference, and biostatistical methods
- Apply and develop appropriate biostatistical methods for the design and analysis of biomedical studies.
- Provide biostatistical advice as a member of a team engaged in a biomedical research project
- Serve as biostatistics experts on collaborative teams of investigators

REQUIREMENTS

Undergraduate course requirements (or equivalents to these GW courses) for admission consideration:

MATH 1231 Single-Variable Calculus I

MATH 1232 Single-Variable Calculus II

STAT 2118 Regression Analysis

MATH 2233 Multivariable Calculus

Additional course requirements* (or equivalents to these GW courses):

MATH 2184 Linear Algebra I

One of the following:

STAT 1129 Introduction to Computing

STAT 2183 Intermediate Stat Lab/Packages

PUBH 6249 StatPackages/DataMgt&DataAnlys

* Applicants lacking these courses (or equivalents to these GW courses) will be considered for admission, but, if admissible, will be admitted conditionally with the expectation that these courses will be satisfactorily completed within two semesters following matriculation in the program. These credits do not count as credit toward the 72-credit graduation requirement nor are grades earned in additional courses reflected in the overall grade-point average.

Ph.D. in the field of biostatistics degree requirements: 72 credits of coursework and research, with a minimum of 51 credits of courses and a minimum of 12 credits of dissertation research.

Required statistics and public health core courses:

Required statistics core courses: 27 credits

STAT 6201 Mathematical Statistics I

STAT 6202 Mathematical Statistics II (* Comprehensive Exam)

STAT 6210 Data Analysis

STAT 6213 Intermediate Probability and Stochastic Processes (* Comprehensive Exam)

PUBH 8365 Design of Medical Studies

PUBH 8366 Biostatistical Methods (* Comprehensive Exam)

STAT 8226 Advanced Biostatistical Methods

STAT 6227 Survival Analysis

STAT 8263 Advanced Statistical Theory I

Required public health core courses: 12 credits

PUBH 6001 BiologicalConcepts/PublicHlth

PUBH 6003 Prin & Practice/Epidemiology

PUBH 6121 Environmental and Occupational Epidemiology

One of the following:

PUBH 6299 Topics in Epi/Bio

PUBH 6007 Social&BehaviorAppr-Pub.Hlth

or PUBH 6006 Mgt & Policy Approaches to PH

PUBH 6006 Mgt & Policy Approaches to PH

9 credits from the following approved elective courses:

Approved statistics elective courses (at least 3 credits must be taken from among the first 3 courses noted below):

STAT 6214 Applied Linear Models

STAT 6231 Contingency Table Analysis

STAT 8262 Nonparametric Inference

STAT 6207 Methods of Statistical Computing I

STAT 6208 Methods of Statistical Computing II

STAT 6215 Applied Multivariate Analysis I

PUBH 8419	Measurement in Public Health & Health Services
-----------	--

Consulting:

Note: May be waived by the Biostatistics Program Director, based on written documentation of prior equivalent coursework or relevant work experience. Waiver of the consulting course increases the total number of electives by the number of consulting credits waived.

PUBH 6258	Adv Topics/Biostat Consulting
-----------	-------------------------------

PUBH 6283	Biostatistics Consulting Practicum
-----------	------------------------------------

Dissertation research:

12-24 credits of the following:

BIOS 8999	Dissertation Research
-----------	-----------------------

General and final examinations

The General Examination is given in two parts:

- Part I is a written comprehensive examination based on the course content of STAT 6202 Mathematical Statistics II, STAT 6213 Intermediate Probability and Stochastic Processes (administered by faculty of the Department of Statistics), and PUBH 6266 Biostatistical Methods (administered by the faculty of the Department of Epidemiology and Biostatistics). Students are expected to take the comprehensive examination within 24 months from the date of enrollment in the program. In addition, students are required to make up any deficiencies prior to taking the examination, e.g., by enrolling in appropriate master's-level courses as needed. A student who fails to pass the comprehensive examination may, with the approval of the faculty, repeat the examination the following year. Failure on the second attempt will result in termination from the Ph.D. program.
- Part II, the research proposal, consists of an oral examination based on a written dissertation research proposal. As soon as feasible after successful completion of the comprehensive exam, students are encouraged to identify a dissertation advisor and a topic of research. The written dissertation proposal is then submitted to the student's Dissertation Research Committee, and the student will make an oral presentation of his or her proposal to the Committee. The Committee will determine the

student's readiness to pursue and successfully complete the proposed research, in addition to the appropriateness of the specific problem for dissertation-level research.

Upon successful completion of the required coursework and both parts of the General Examination, the candidate will generally be recommended to the Associate Dean for Graduate Affairs of The Columbian College of Arts and Sciences (CCAS) for promotion to Ph.D. Candidacy: the dissertation research. A candidate must file an approved dissertation research plan with the CCAS before being admitted to Ph.D. Candidacy. Prior to completion of the General Examination, a student may register for at most 6 credits of BIOS 8999 Dissertation Research.

Consult with the biostatistics program director or academic advisor for the dissertation guidelines.

Professional enhancement requirement: 8 hours

Professional enhancement activities supplement the academic curriculum and help prepare students to participate actively in the professional community. They enhance practical knowledge and awareness of public health issues – either in general or in a student's specific area of study.

Students can fulfill this requirement by attending workshops, seminars, or other relevant professional meetings, which are often held at SPH and in the metropolitan Washington, DC area. Examples of conference sponsors include the National Academy for State Health Policy, the Pan American Health Organization, the American Public Health Association, the American College of Healthcare Executives, the Area Health Education Center, the American College of Sports Medicine, and the National Athletic Trainer's Association. Opportunities for professional enhancement are regularly publicized via the SPH Listserv and through the department or the biostatistics academic advisor.

Students must submit documentation of professional enhancement activities to the biostatistics academic advisor, which includes a **prior** approval, a description of the program agenda, and proof of attendance before applying for graduation.

DOCTOR OF PHILOSOPHY IN THE FIELD OF EPIDEMIOLOGY

Program Director S. Cleary

The purpose of the PhD program is to prepare students for a career in epidemiologic research in an academic or industry setting. The PhD graduate is expected to have knowledge across a wide range of epidemiologic theories and methods and specific knowledge of the epidemiology of

one of the following areas: chronic disease, infectious disease, environmental and occupational health.

Doctoral students are required to pass a written comprehensive examination and to complete a dissertation. For the comprehensive examination the student must demonstrate advanced knowledge of epidemiologic and biostatistical methods. For the dissertation, the student must design and execute an original research study that contributes new knowledge to the field and demonstrates proficiency using advanced analytic methods.

In addition to MS and MPH competencies, doctoral students in epidemiology must demonstrate competencies in the following areas: demonstrate understanding of general and specialized advanced epidemiologic concepts, develop a research protocol, conduct and analyze a research study, and disseminate research findings.

At the completion of the doctoral program in epidemiology students will be able to:

- Demonstrate understanding of general and specialized epidemiologic concepts: Demonstrate knowledge of advanced epidemiologic concepts with specialized knowledge in a specific area of epidemiology (e.g., methods, infectious diseases, chronic diseases, environmental, or occupational); apply knowledge of disease pathogenesis to a study protocol; discuss major public health problems; and exhibit knowledge of ethical issues in research;
- Develop a research protocol: Synthesize, identify gaps and/or limitations of published research and present appropriate hypotheses to address gaps; develop a research protocol including identification of data sources, evaluate appropriate instruments for data collection, the advantages and disadvantages of different epidemiologic study designs and sources of potential bias;
- Conducting and analyzing data from a research study: Demonstrate proficiency in data collection, data cleaning, primary or secondary data analysis, summarizing statistical analyses and results, and evaluating potential for bias; and
- Dissemination of research findings: Provide a structured proposal of a research study including the background, study hypotheses, design, methodology, and contribution to the field; communicate dissertation results to lay and scientific communities through presentations at conferences and publications in the peer-reviewed literature.

Admissions Requirements

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Applicants must hold an undergraduate degree from an accredited institution of higher learning. Applicants should have academic backgrounds of excellence, usually with majors, or equivalent, in the fields in which they intend to study for advanced degrees. Normally, a B average (or equivalent) from

an accredited college is required. With evidence of special promise, such as high Graduate Record Examination scores, an applicant whose academic record falls short of a B average may be accepted on a conditional basis. Meeting the minimum requirements does not assure acceptance. The departments may, and often do, set higher admission standards. Moreover, the number of spaces available for new graduate students limits the number who can be accepted. Students who apply in their senior year must provide evidence of the completion of their baccalaureate work before registration in SPH is permitted. Applicants should be aware that graduate courses taken prior to admission while in non-degree status are not used in assessing admissibility to degree programs and may not be transferable into those programs. The SPH-at-a-Glance (<http://sph.washington.edu/about/quickfacts.asp>) presents the Ph.D. curriculum for students admitted to the Ph.D. program with no intermediate Master's degree.

If desired, a student may complete the M.S. or M.P.H. program prior to admission to the Ph.D. degree program, in which case no more than 24 credits from the M.S. degree may be applied to the Ph.D. course work requirements. In this instance the student will be required to take a minimum of 27 additional credits of course work. The distribution of these courses between epidemiology and statistics will depend on the nature of the Master's degree and whether the transferred credits will be used to defray epidemiology or statistics course work. All applications are submitted through SOPHAS.org (<http://SOPHAS.org>).

For reporting GRE general test scores use the following institutional code: 5268.

COMPETENCIES

At the completion of the doctoral program in epidemiology students will be able to:

- Demonstrate understanding of general and specialized epidemiologic concepts.
- Demonstrate knowledge of advanced epidemiologic concepts with specialized knowledge in a specific area of epidemiology (e.g., methods, infectious diseases, chronic diseases, environmental, or occupational); apply knowledge of disease pathogenesis to a study protocol; discuss major public health problems; and exhibit knowledge of ethical issues in research.
- Develop a research protocol: Synthesize, identify gaps and/or limitations of published research and present appropriate hypotheses to address gaps; develop a research protocol including identification of data sources, evaluate appropriate instruments for data collection, the advantages and disadvantages of different epidemiologic study designs and sources of potential bias.
- Conducting and analyzing data from a research study: Demonstrate proficiency in data collection, data cleaning,

primary or secondary data analysis, summarizing statistical analyses and results, and evaluating potential for bias.

- Dissemination of research findings: Provide a structured proposal of a research study including the background, study hypotheses, design, methodology, and contribution to the field; communicate dissertation results to lay and scientific communities through presentations at conferences and publications in the peer-reviewed literature.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

The following requirements must be fulfilled:

The requirements for the Doctor of Philosophy Program (p. 71).

72 credits

Prerequisite courses for admissions:

BISC 1111	Introductory Biology: Cells and Molecules
BISC 1112	Introductory Biology: The Biology of Organisms
MATH 1231	Single-Variable Calculus I
MATH 1232	Single-Variable Calculus II
MATH 2233	Multivariable Calculus

These courses (or equivalents) MUST appear on your transcript.

Additional course requirements

MATH 2184	Linear Algebra I
STAT 2183	Statistical Computing Packages
or PUBH 6249	StatPackages/DataMgt&DataAnlys

Applicants lacking these courses (or equivalents) will be considered for admission, but, if admissible, will be admitted conditionally with the expectation that these courses will be satisfactorily completed within two semesters following matriculation in the program. These credits do not count as credit toward the 72-credit graduation requirement, nor are grades earned in these courses reflected in the overall grade point average.

Program Requirements (Plan A)

Required core courses:

18 credits of public health core courses:

PUBH 6001	BiologicalConcepts/PublicHlth
-----------	-------------------------------

PUBH 6003	Prin & Practice/Epidemiology
PUBH 6247	Design of Health Studies

Dissertation Research

12-21 credits of the following:

PUBH 8999	Dissertation Research (taken in units of 3 credits)
-----------	---

Graduation Requirements

1. Program options: Students may choose either curriculum Plan A or curriculum Plan B for the Doctor of Philosophy degree in the field of epidemiology.

2. Graduate credit requirement: 72 graduate credits are required.
3. Prerequisites: Review official program guide for minimum prerequisite requirements for admission.
4. Comprehensive (General) exam
 - a. A written comprehensive exam will be administered within 24 months from date of matriculation based on the course content of PUBH 6247 Design of Health Studies, PUBH 6252 Advanced Epidemiology Methods, and PUBH 8419 Measrmnt/PubHlth&HlthSrvcsRes. The exam is administered once per year in August.
 - b. An oral presentation of the proposal for dissertation is made to the students' Dissertation Research Committee. The Committee will determine the student's readiness to pursue and complete the proposed research.
5. Dissertation: 12-21 credits of dissertation research are required. Students may register for up to 6 credits of PUBH 8999 Dissertation Research prior to completion of the proposal defense.
6. Grade point requirements: An overall GPA of 3.0 (B average) is required.
7. Time limit requirement: The degree must be completed 8 years.
8. Transfer credit policy: Up to 24 credits from an applicable masters program may be approved to be transferred to the doctoral program. Credits must have been earned from an accredited institution with a grade point average of B or better.

The General Examinations

Part I is a written comprehensive examination consisting of one examination in the field of biostatistics and one in the field of epidemiology. The epidemiology examination is based on the course content of PUBH 6247 Design of Health Studies, PUBH 6252 Advanced Epidemiology Methods, and PUBH 8419 Measrmnt/PubHlth&HlthSrvcsRes as well as the biostatistics examination is based on the course content of PUBH 8366 Biostatistical Methods and is administered by the faculty of the Department of Epidemiology & Biostatistics. Students are expected to take the comprehensive examination within 24 months from the date of enrollment in the program. In addition, students are required to make up any deficiencies prior to taking the examination, e.g., by enrolling in appropriate master's-level courses as needed. The doctoral comprehensive examination is administered once per year in late August. A student who fails to pass the comprehensive examination may, with the approval of the faculty, repeat all or portions of the examination. Failure on the second attempt will result in termination from the Ph.D. program.

Part II, the research proposal, consists of an oral examination based on a written dissertation research proposal. As soon as feasible after successful completion of the comprehensive exam, students are encouraged to identify a dissertation advisor and a topic of research. The written dissertation proposal is then submitted to the student's Dissertation

Research Committee, and the student will make an oral presentation of his or her proposal to the Committee. The Committee will determine the student's readiness to pursue and successfully complete the proposed research, in addition to the appropriateness of the specific problem for dissertation level research.

Upon successful completion of the required course work and both parts of the General Examination, the candidate will generally be recommended for promotion to PhD Candidacy: the dissertation research. Prior to completion of the General examination, a student may register for at most 6 credit hours of PUBH 8999 Dissertation Research.

Professional Enhancement Requirement (Two Days)

Professional enhancement activities supplement the academic curriculum and help prepare students to participate actively in the professional community. They enhance practical knowledge and awareness of public health issues – either in general or in a student's specific area of study.

Students can fulfill this requirement by attending workshops, seminars, or other relevant professional meetings, which are often held at SPH and in the metropolitan Washington, DC area. Examples of conference sponsors include the National Academy for State Health Policy, the Pan American Health Organization, the American Public Health Association, the American College of Healthcare Executives, the Area Health Education Center, the American College of Sports Medicine, and the National Athletic Trainer's Association. Opportunities for professional enhancement are regularly publicized via the SPH Listserv and through your department or advisor. It is hoped that PhD students will fulfill one day of this two day requirement by participating in a poster presentation at GWUMC Research Day.

Students must submit documentation of Professional Enhancement activities to the Epidemiology Program Director, which includes a prior approval, a description of the program agenda, and proof of attendance before applying for graduation.

Graduation Requirements

1. Program options: Students may choose either curriculum Plan A or curriculum Plan B for the Doctor of Philosophy degree in the field of epidemiology.
2. Graduate credit requirement: 72 graduate credits are required.
3. Prerequisites: Review official program guide for minimum prerequisite requirements for admission.
4. Comprehensive (General) exam
 - a. A written comprehensive exam will be administered within 24 months from date of matriculation based on the course content of PUBH 6247 Design of Health Studies, PUBH 6252 Advanced Epidemiology Methods,

and PUBH 8419 Measrmnt/PubHlth&HlthSrvcsRes. The exam is administered once per year in August.

- b. An oral presentation of the proposal for dissertation is made to the students' Dissertation Research Committee. The Committee will determine the student's readiness to pursue and complete the proposed research.

It is hoped that PhD students will fulfill one day of this two day requirement by participating in a poster presentation at GWUMC Research Day.

Students must submit documentation of Professional Enhancement activities to the Epidemiology Program Director, which includes a prior approval, a description of the program agenda, and proof of attendance before applying for graduation.

EXERCISE AND NUTRITION SCIENCES

As the only school of public health with a Department of Exercise and Nutrition Sciences, we give students the opportunity to learn not only how exercise, physical activity, and nutrition affect the individual, but also how they impact the health and function of communities at large. We provide our students with research and practice opportunities in settings as diverse as the National Institutes of Health, professional sports team, the US Department of Agriculture, the Pentagon, and the DC public school system. Whether your career goal is to influence public health policy, to train elite athletes, or to become a health care provider, we can get you there.

UNDERGRADUATE

Bachelor's programs

- Bachelor of Science with a major in exercise science (p. 711)
- Bachelor of Science with a major in exercise science, pre-athletic training/sports medicine concentration (p. 712)

- Bachelor of Science with a major in exercise science, pre-medical professional concentration (p. 713)
- Bachelor of Science with a major in exercise science, pre-physical therapy concentration (p. 714)

Minors

- Minor in exercise science (p. 720)
- Minor in nutrition (p. 720)

GRADUATE

Master's programs

- Master of Public Health in the field of physical activity in public health (p. 770)
- Master of Public Health in the field of public health nutrition (p. 773)
- Master of Science in the field of exercise science with a concentration in strength and conditioning (p. 776)

FACULTY

Professors J.V. Danoff, J.A. DeLoia, L. DiPietro (*Chair*), L.F. Hamm

Associate Professors T. A. Miller, A. Visek, B.J. Westerman

Assistant Professors M. Barron, G.M. Hudson

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
- Exercise and Nutrition Sciences (EXNS) (p. 1073)
- Health and Wellness (HLWL) (p. 1107)
- Lifestyle, Sport, and Physical Activity (LSPA) (p. 1181)

BACHELOR OF SCIENCE WITH A MAJOR IN EXERCISE SCIENCE

Program Advisor and Director B. Westerman

The Bachelor of Science with a major in exercise science prepares individuals for careers in medicine and other health related professions including athletic training/sports medicine, physical therapy, physician's assistant or nursing, exercise

physiology and rehabilitation, sport psychology as well as fitness and health promotion.

Students in the exercise science major may select the pre-medical professional concentration (for those planning to enter a medical, physician assistant, or nursing program upon graduation), the pre-physical therapy concentration, or the pre-athletic training/sports medicine concentration. The exercise science major may also be taken without a concentration.

REQUIREMENTS

All students accepted to the Bachelor of Science with a major in the field of exercise science must complete 124 credits and maintain a minimum grade point average of 2.5.

The following requirements must be fulfilled:

General education:

UW 1020	University Writing
or HONR 1015	Honors Proseminar: UW 1020: Origins and Evolution of Modern Thought
STAT 1051	Introduction to Business and Economic Statistics
or STAT 1053	Introduction to Statistics in Social Science
BISC 1111	Introductory Biology: Cells and Molecules
BISC 1112	Introductory Biology: The Biology of Organisms

One humanities course selected from approved list*

Two social science courses selected from approved list*

Two writing-in-the-discipline (WID) courses**

Core requirements:

Students must earn a grade of C- or better in all core exercise science required courses.

EXNS 1103	Professional Foundations in Exercise Science
EXNS 1110	Applied Anatomy and Physiology I
EXNS 1111	Applied Anatomy and Physiology II
EXNS 2110	Prevention and Care of Injury
EXNS 2111	Exercise Physiology I
EXNS 2112	Exercise Physiology II
EXNS 2113	Kinesiology

EXNS 2114	Nutrition Sciences I
EXNS 2115	Nutrition Sciences II
EXNS 2116	Exercise and Health Psychology
EXNS 3110	Field Experience- Exercise & Nutrition Sciences
EXNS 4110	Current Issues in Exercise Science
PSYC 1001	General Psychology
PUBH 1102	History of Public Health
PUBH 2110	Public Health Biology

Electives:

18 credits selected from EXNS, HLWL, and/or PUBH

30 credits of electives

*A list of approved courses can be found on the General Education Requirement page (p. 29).

**WID courses may fulfill other requirements

Note: LSPA courses do not count towards the academic requirements for the Bachelor of Science with a major in exercise science.

BACHELOR OF SCIENCE WITH A MAJOR IN EXERCISE SCIENCE, PRE-ATHLETIC TRAINING/SPORTS MEDICINE

Program Advisor and Director B. Westerman

The Bachelor of Science with a major in exercise science prepares individuals for careers in medicine and other health related professions including athletic training/sports medicine, physical therapy, physician's assistant or nursing, exercise physiology and rehabilitation, sport psychology as well as fitness and health promotion.

Students in the exercise science major may select the pre-medical professional concentration (for those planning to enter a medical, physician assistant, or nursing program upon graduation), the pre-physical therapy concentration, or the pre-athletic training/sports medicine concentration. The exercise science major may also be taken without a concentration.

REQUIREMENTS

Students must complete 124 credits with a grade point average of 2.5 or above.

The following requirements must be fulfilled:

General education:

UW 1020 University Writing

or HONR 1015 Honors Proseminar: UW 1020: Origins and Evolution of Modern Thought

STAT 1051 Introduction to Business and Economic Statistics

or STAT 1053 Introduction to Statistics in Social Science

BISC 1111 Introductory Biology: Cells and Molecules

BISC 1112 Introductory Biology: The Biology of Organisms

One humanities course selected from approved list*

Two social science courses selected from approved list*

Two writing-in-the-discipline (WID) courses**

Core requirements:

Students must earn a grade of C- or better in all core exercise science required courses.

EXNS 1103 Professional Foundations in Exercise Science

EXNS 1110 Applied Anatomy and Physiology I

EXNS 1111 Applied Anatomy and Physiology II

EXNS 2110 Prevention and Care of Injury

EXNS 2111 Exercise Physiology I

EXNS 2112 Exercise Physiology II

EXNS 2113 Kinesiology

EXNS 2114 Nutrition Sciences I

EXNS 2115 Nutrition Sciences II

EXNS 2116 Exercise and Health Psychology

EXNS 3110 Field Experience- Exercise & Nutrition Sciences

EXNS 4110 Current Issues in Exercise Science

PSYC 1001 General Psychology

PUBH 1102 History of Public Health

PUBH 2110 Public Health Biology

Pre-athletic training/sports management concentration:

EXNS 2121 Orthopaedic Taping and Bracing

EXNS 3117 Injury Assessment

EXNS 3118 Therapeutic Modalities in Sports Medicine

EXNS 3119 Therapeutic Exercise in Sports Medicine

EXNS 3121 Medical Issues in Sports Medicine

EXNS 3123W Psychology of Injury and Rehabilitation

EXNS 3125 Athletic Training Practicum

Electives:

26 credits of electives

*A list of approved courses can be found on the General Education Requirement page (p. 29).

**WID courses may fulfill other requirements.

Note: LSPA courses do not count towards the academic requirements for the Bachelor of Science with a major in exercise science, pre-athletic training/sports medicine concentration.

BACHELOR OF SCIENCE WITH A MAJOR IN EXERCISE SCIENCE, PRE-MEDICAL PROFESSIONAL CONCENTRATION

Program Advisor and Director B. Westerman

The Bachelor of Science with a major in exercise science prepares individuals for careers in medicine and other health related professions including athletic training/sports medicine, physical therapy, physician's assistant or nursing, exercise physiology and rehabilitation, sport psychology as well as fitness and health promotion.

Students in the exercise science major may select the pre-medical professional concentration (for those planning to enter a medical, physician assistant, or nursing program upon graduation), the pre-physical therapy concentration, or the pre-athletic training/sports medicine concentration. The exercise science major may also be taken without a concentration.

REQUIREMENTS

Students must complete 124 credits with a grade point average of at least 2.5.

The following requirements must be fulfilled:

General education:

UW 1020 University Writing

or HONR 1015	Honors Proseminar: UW 1020: Origins and Evolution of Modern Thought
STAT 1051	Introduction to Business and Economic Statistics
or STAT 1053	Introduction to Statistics in Social Science
BISC 1111	Introductory Biology: Cells and Molecules
BISC 1112	Introductory Biology: The Biology of Organisms
One humanities course selected from approved list*	
Two social science courses selected from approved list*	
Two writing-in-the-discipline (WID) courses**	
Core requirements:	
Students must earn a grade of C- or better in all core exercise science required courses.	
EXNS 1103	Professional Foundations in Exercise Science
EXNS 1110	Applied Anatomy and Physiology I
EXNS 1111	Applied Anatomy and Physiology II
EXNS 2110	Prevention and Care of Injury
EXNS 2111	Exercise Physiology I
EXNS 2112	Exercise Physiology II
EXNS 2113	Kinesiology
EXNS 2114	Nutrition Sciences I
EXNS 2115	Nutrition Sciences II
EXNS 2116	Exercise and Health Psychology
EXNS 3110	Field Experience- Exercise & Nutrition Sciences
EXNS 4110	Current Issues in Exercise Science
PSYC 1001	General Psychology
PUBH 1102	History of Public Health
PUBH 2110	Public Health Biology
Pre-medical professional concentration:	
CHEM 1111	General Chemistry I
CHEM 1112	General Chemistry II

CHEM 2151 & CHEM 2153 Organic Chemistry I and Organic Chemistry Laboratory I

CHEM 2152 & CHEM 2154 Organic Chemistry II and Organic Chemistry Laboratory II

MATH 1221 Calculus with Precalculus II

or MATH 1231 Single-Variable Calculus I

or MATH 1051 Finite Mathematics for the Social and Management Sciences

PHYS 1011 General Physics I

PHYS 1012 General Physics II

Electives:

17 credits of electives. Suggested electives include:

BISC 2202 Cell Biology

BISC 2207 & BISC 2208 Genetics and Genetics Laboratory

BISC 2337 Introductory Microbiology

BIOC 3261 & BIOC 3262 Introductory Medical Biochemistry and Biochemistry Laboratory

EXNS 3121 Medical Issues in Sports Medicine

EXNS 3123W Psychology of Injury and Rehabilitation

*A list of approved courses can be found on the General Education Requirement page (p. 29).

**WID courses may fulfill other requirements.

Note: LSPA courses do not count towards the academic requirements for the Bachelor of Science with a major in exercise science, pre-medical professional concentration.

BACHELOR OF SCIENCE WITH A MAJOR IN EXERCISE SCIENCE, PRE-PHYSICAL THERAPY CONCENTRATION

Program Advisor and Director B. Westerman

The Bachelor of Science with a major in exercise science prepares individuals for careers in medicine and other health related professions including athletic training/sports medicine, physical therapy, physician's assistant or nursing, exercise physiology and rehabilitation, sport psychology as well as fitness and health promotion.

Students in the exercise science major may select the pre-medical professional concentration (for those planning to enter a medical, physician assistant, or nursing program upon

graduation), the pre-physical therapy concentration, or the pre-athletic training/sports medicine concentration. The exercise science major may also be taken without a concentration.

REQUIREMENTS

Students must complete 124 credits with a grade point average of 2.5 or above.

The following requirements must be fulfilled:

General education:

UW 1020	University Writing
or HONR 1015	Honors Proseminar: UW 1020: Origins and Evolution of Modern Thought
STAT 1051	Introduction to Business and Economic Statistics
or STAT 1053	Introduction to Statistics in Social Science

EXNS 2115 Nutrition Sciences II

EXNS 2122 Food Systems in Public Health

MASTER OF PUBLIC HEALTH IN THE FIELD OF PHYSICAL ACTIVITY IN PUBLIC HEALTH

Program Director L. DiPietro

Practicum Director A. Dickman

Mission Statement

The sedentary lifestyle and its consequent metabolic and cardiovascular complications now assumes a considerable public health burden in the United States. Indeed, the promotion of physical activity for people of all ages has become a top priority on public health agendas around the world. The mission of the Master of Public Health (MPH) degree in the Department of Exercise and Nutrition Sciences is to develop and train graduate students to integrate physical activity into the core of public health practice. The program encompasses an ecological perspective to the role of physical activity in the etiology, prevention, and treatment of chronic

diseases at the community, national, and global levels. The program is designed to train students as public health scientists and practitioners in order to assist public and private agencies with program development and evaluation with regard to physical activity, health promotion, and disease prevention.

Goals

The goals of this MPH program in the Department of Exercise and Nutrition Sciences are to ensure graduates:

- Understand the pathophysiology of selected chronic disease processes;
- Understand exercise physiology and the role of physical activity and exercise in health promotion and disease prevention;
- Develop skills in physical activity assessment using state-of-the-art technology;
- Utilize epidemiological methods to develop and test hypotheses pertaining to physical activity and health and disease outcomes at the population level;
- Develop skills in designing, implementing, and evaluating interventions for improving physical activity at the community level; and
- Appreciate the role of public health policy in altering physical activity patterns at the community level.

COMPETENCIES

Program Specific Competencies

Upon completion of the MPH in Physical Activity in Public Health, students will possess the following functional competencies:

Integrate evidence-based knowledge of the relation of physical activity to health and function across the life-span.

- Students will demonstrate knowledge and understanding of the pathophysiology of selected chronic disease processes. [Cognitive: levels 1 and 2].

EXNS 6202 Advanced Exercise Physiology I

EXNS 6203 Advanced Exercise Physiology II

EXNS 6208 Physical Activity: Physiology and Epidemiology

EXNS 6212 Exercise in Selected Chronic Diseases

- Students will demonstrate knowledge and understanding of the role of physical activity in the health and function of the general population. [Cognitive: levels 1 and 2].

EXNS 6202 Advanced Exercise Physiology I

EXNS 6203 Advanced Exercise Physiology II

EXNS 6208 Physical Activity: Physiology and Epidemiology

EXNS 6212	Exercise in Selected Chronic Diseases
<ul style="list-style-type: none"> Students will demonstrate knowledge and understanding of various physiological and psychosocial mechanisms that mediate the relation between physical inactivity and chronic disease morbidity and mortality. [Cognitive: levels 1 and 2]. 	
EXNS 6202	Advanced Exercise Physiology I
EXNS 6203	Advanced Exercise Physiology II
EXNS 6208	Physical Activity: Physiology and Epidemiology
EXNS 6212	Exercise in Selected Chronic Diseases

Utilize social and behavioral theories in designing physical activity and other health promotion programs.

- Students will apply various theories of social and behavioral change in patterns of physical activity adoption and maintenance. [Cognitive: level 3; Affective: levels 3 and 4].

EXNS 6208	Physical Activity: Physiology and Epidemiology
PUBH 6014	Practicum
PUBH 6015	Culminating Experience

Additional relevant courses for students in the Program Design and Evaluation option

PUBH 6500	Planning and Implementing Health Promotion Programs
PUBH 6501	Program Evaluation
PUBH 6502	Practical Data Analysis: PCH

- Students will demonstrate skills in the design of physical activity interventions that are consistent with these social and behavioral theories. [Cognitive: levels 3-5].

EXNS 6208	Physical Activity: Physiology and Epidemiology
EXNS 6212	Exercise in Selected Chronic Diseases
PUBH 6014	Practicum
PUBH 6015	Culminating Experience

Additional relevant courses for students in the Program Design and Evaluation option

PUBH 6500	Planning and Implementing Health Promotion Programs
PUBH 6501	Program Evaluation

Integrate physical activity within the core functions of public health.

- Students will demonstrate skills in physical activity assessment using state-of-the-art technology. [Cognitive: level 3; Affective: level 3; Psychomotor: level 4].

EXNS 6202	Advanced Exercise Physiology I
EXNS 6203	Advanced Exercise Physiology II
EXNS 6208	Physical Activity: Physiology and Epidemiology

- Students will apply epidemiological methods to develop and test hypotheses pertaining to physical activity and health and disease outcomes at the population level. [Cognitive: level 3].

EXNS 6208	Physical Activity: Physiology and Epidemiology
EXNS 6212	Exercise in Selected Chronic Diseases
PUBH 6015	Culminating Experience
PUBH 6015	Culminating Experience

Additional relevant courses for student in the Epidemiology option

PUBH 6247	Design of Health Studies
PUBH 6249	StatPackages/DataMgt&DataAnlys
PUBH 6252	Advanced Epidemiology Methods

- Students will design and evaluate interventions for improving physical activity at the community level. [Cognitive: levels 3-6].

EXNS 6208	Physical Activity: Physiology and Epidemiology
EXNS 6212	Exercise in Selected Chronic Diseases
PUBH 6014	Practicum
PUBH 6015	Culminating Experience

Additional relevant courses for student in the Epidemiology option

PUBH 6247	Design of Health Studies
PUBH 6252	Advanced Epidemiology Methods

- Students will appreciate the role of public health policy in altering physical activity patterns at the community level. [Affective: levels 3 and 4].

EXNS 6208	Physical Activity: Physiology and Epidemiology
-----------	--

PUBH 6014	Practicum
-----------	-----------

Work with other public health professionals in promoting physical activity research, practice, and policy at the community, state, and federal level.

- Students will integrate the science and practice of exercise science and public health in promoting an active lifestyle in the workplace, the school system, and within the community. [Cognitive: level 5; Affective: levels 3-6].

EXNS 6208	Physical Activity: Physiology and Epidemiology
-----------	--

PUBH 6014	Practicum
-----------	-----------

Additional relevant courses for student in the Program Design and Evaluation option

PUBH 6500	Planning and Implementing Health Promotion Programs
-----------	---

PUBH 6501	Program Evaluation
-----------	--------------------

PUBH 6503	Introduction to Public Health Communication and Marketing
-----------	---

- Students will appreciate the role of both traditional and non-traditional public health partners in physical activity promotion. [Cognitive: level 2; Affective; levels 3 and 4].

EXNS 6208	Physical Activity: Physiology and Epidemiology
-----------	--

PUBH 6014	Practicum
-----------	-----------

- Students will design public health policy that can alter physical activity patterns across multiple settings. [Cognitive: levels 3-5; Affective: levels 3 and 4].

EXNS 6208	Physical Activity: Physiology and Epidemiology
-----------	--

PUBH 6014	Practicum
-----------	-----------

REQUIREMENTS

Course Requirements

All GW SPH, MPH students who select the Physical Activity in Public Health program enroll in core courses (15 credits), program-specific courses (20 credits), and electives (6 credits). Program-specific courses include options to focus in epidemiology or program design and evaluation. The 45 credit degree program includes a practicum (2 credits) and a culminating experience (2 credits).

Program Requirements

Prerequisites:

EXNS 2111	Exercise Physiology I
-----------	-----------------------

Required core courses:

PUBH 6001	BiologicalConcepts/PublicHlth
-----------	-------------------------------

PUBH 6260	Adv DataAnalysis-Public Health
-----------	--------------------------------

PUBH 6262	Intro-Geog Information Systems
-----------	--------------------------------

PUBH 6536	Workplace Health Promotion
-----------	----------------------------

PUBH 6556	Maternal & Child Nutrition
-----------	----------------------------

Practicum and culminating experience courses:

PUBH 6014 Practicum

PUBH 6015 Culminating Experience

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

MASTER OF PUBLIC HEALTH IN THE FIELD OF PUBLIC HEALTH NUTRITION

Program Director K. Robien

Practicum Director K. Robien

Mission

The mission of the MPH program in Public Health Nutrition at the Milken Institute SPH is to develop and train graduate students to integrate nutrition into the core of public health practice. The program encompasses a social ecological perspective to the role of nutrition in the etiology, prevention, and treatment of both acute and chronic disease at the individual, community, national, and global levels. This program is designed to train students as public health scientists and practitioners in order to assist public and private agencies with program development, implementation, and evaluation with regard to nutrition in health promotion and disease prevention.

Goals

The goals of this MPH program in Public Health Nutrition are to ensure that graduates:

- Understand the pathophysiology of common acute and chronic disease processes and the role that nutrition may play in the development of these diseases;
- Understand the factors impacting the accessibility, availability, adequacy, and safety of the food and water

systems serving a community, and the relationship between community food and water systems and health outcomes;

- Develop skills in nutrition assessment of both individuals and communities;
- Utilize appropriate epidemiologic methods for developing and testing hypotheses relating to nutrition and health outcomes at the population level;
- Develop skills in designing, implementing, and evaluating nutrition interventions to improve the health of communities; and
- Appreciate the role of public health policy in altering the food environment at the community level.

COMPETENCIES

Program-Specific Competencies

Upon completion of the MPH in Public Health Nutrition, students will possess the following functional competencies:

- Integrate nutrition within the core functions of public health. Students will be able to translate nutrition research into public health practice through application of skills in nutrition assessment/surveillance, program planning and evaluation, management, education and health promotion, public policy, and health communication.

Relevant courses:

PUBH 6500 Planning and Implementing Health Promotion Programs

PUBH 6610 Public Health Nutrition Practice and Leadership

- Describe the international and US public health nutrition system. Students will identify the governmental structures and processes involved in the development of public policy, legislation, regulations and delivery of services that influence food intake, nutritional status, and health of populations. Students will identify with international, federal, state and local level nutrition surveillance and assistance programs. Students will identify the political, economic and social processes that influence food and nutrition policies and legislation.

Relevant courses:

PUBH 6014 Practicum

PUBH 6015 Culminating Experience

PUBH 6482 International Food and Nutrition Policy

PUBH 6610 Public Health Nutrition Practice and Leadership

PUBH 6613	US Food Policy and Politics
-----------	-----------------------------

- Assess the nutritional status of individuals and communities. Students will use appropriate and current methods to assess nutrition status and prioritize nutritional problems of target populations across the life span. Students will understand the process, rationale, and issues related to establishing nutrient requirements and dietary recommendations.

Relevant courses:

EXNS 6242	Nutrition Throughout the Life Cycle
-----------	-------------------------------------

PUBH 6014	Practicum
-----------	-----------

PUBH 6015	Culminating Experience
-----------	------------------------

PUBH 6241	Nutritional Epidemiology
-----------	--------------------------

PUBH 6610	Public Health Nutrition Practice and Leadership
-----------	---

PUBH 6611	Nutrition Assessment
-----------	----------------------

- Evaluate the accessibility, adequacy and safety of the food and water systems for a given community, and understand how these factors could affect the desired outcomes of health promotion and disease prevention activities. Students will identify potential environmental, economic, behavioral, political, cultural and historical factors that impact the food system (including the production, processing, distribution, and consumption of food) and water supply.

Relevant courses:

EXNS 6242	Nutrition Throughout the Life Cycle
-----------	-------------------------------------

PUBH 6014	Practicum
-----------	-----------

PUBH 6015	Culminating Experience
-----------	------------------------

PUBH 6610	Public Health Nutrition Practice and Leadership
-----------	---

PUBH 6612	Food Systems in Public Health
-----------	-------------------------------

PUBH 6613	US Food Policy and Politics
-----------	-----------------------------

- Apply evidence-based knowledge and understanding of the relationship between nutrition and health outcomes across the life-span. Students will describe the role of nutrition in the health of the general population. Students will identify the health consequences of both under- and over-nutrition. Students will identify and critically evaluate relevant nutrition research, and apply research findings to food and nutrition programs and policies.

Relevant courses:

EXNS 6242	Nutrition Throughout the Life Cycle
-----------	-------------------------------------

PUBH 6014	Practicum
-----------	-----------

PUBH 6015	Culminating Experience
-----------	------------------------

PUBH 6241	Nutritional Epidemiology
-----------	--------------------------

PUBH 6610	Public Health Nutrition Practice and Leadership
-----------	---

PUBH 6613	US Food Policy and Politics
-----------	-----------------------------

- Design, implement, and evaluate population-based nutrition interventions, policies, and programs. Students will apply the principles of community assessment, planning, marketing, implementation and evaluation in order to assure the success of food and nutrition interventions. Students will understand and apply theories of social and behavioral change when developing nutrition interventions.

Relevant courses:

PUBH 6014	Practicum
-----------	-----------

PUBH 6015	Culminating Experience
-----------	------------------------

- Demonstrate effective communication, management and leadership skills to ensure the success of public health nutrition programs and services. Students will communicate food and nutrition information appropriate for broad and diverse audiences, including individuals, families, communities, health professionals, media, policy and decision makers, food industries, and businesses. Students will interact sensitively, effectively and professionally with persons from diverse cultural, socioeconomic, educational, and professional backgrounds, and with persons of all ages and lifestyle preferences.

Relevant courses:

PUBH 6014	Practicum
-----------	-----------

PUBH 6015	Culminating Experience
-----------	------------------------

PUBH 6610	Public Health Nutrition Practice and Leadership
-----------	---

REQUIREMENTS

Requirements

Prerequisite to program requirements: Students who do not have an undergraduate degree in nutrition must complete

one introductory nutrition and one advanced nutrition or nutritional biochemistry course at the undergraduate level (or higher) with a minimum grade of C prior to matriculation. GW courses that can fulfill this requirement are EXNS 2114 Nutrition Sciences I, EXNS 2115 Nutrition Sciences II, and EXNS 2119 Basic Nutrition.

The following requirements must be met: 45 credits, including 15 credits in core courses, 14 credits in courses in the field, 4 credits in research courses, 8 credits in elective courses, and 4 credits in practicum and culminating experience courses.

Program Requirements

Core courses:

PUBH 6001	Biological Concepts/Public Hlth
PUBH 6002	Biostatistical Applic for PubH
PUBH 6003	Prin & Practice/Epidemiology
PUBH 6004	Environmental and Occupational Health in a Sustainable World
PUBH 6006	Mgt & Policy Approaches to PH
PUBH 6007	Social & Behavior Appr-Pub. Hlth

Courses in the field:

PUBH 6241	Nutritional Epidemiology
EXNS 6242	Nutrition Throughout the Life Cycle
PUBH 6500	Planning and Implementing Health Promotion Programs
PUBH 6610	Public Health Nutrition Practice and Leadership
PUBH 6611	Nutrition Assessment
PUBH 6612	Food and Water Systems in Public Health
PUBH 6613	US Food Policy and Politics
or PUBH 6482	International Food and Nutrition Policy

Research courses:

4 credits from the following:

PUBH 6247	Design of Health Studies
PUBH 6249	Stat Packages/Data Mgt & Data Anlys
PUBH 6260	Adv Data Analysis-Public Health
PUBH 6262	Intro-Geog Information Systems
PUBH 6263	Advanced GIS

PUBH 6273	Ethnographic Methods
PUBH 6410	Global Health Study Design
PUBH 6411	Global Health Qualitative Research Methods
PUBH 6412	Global Health Quantitative Research Methods
PUBH 6437	Case Study Methods for Global Health Evaluation
PUBH 6501	Program Evaluation
PUBH 6530	Qual Methods/Hlth Promotion
PUBH 6534	Comm-Based Participatory Res
PUBH 6572	Marketing Rsch for Publ Health

Elective courses:

8 credits. Suggested related courses below:

PUBH 6099	Topics in Public Health (Emerging Zoonotic Diseases and Global Food Production)
PUBH 6099	Topics in Public Health (Systematic Review of the Literature for Public Health)
PUBH 6099	Topics in Public Health (Chronic Disease Epidemiology)
PUBH 6127	Germs: An Introduction to Environmental Health Microbiology
PUBH 6305	Fundamentals for Health Policy: Public Health and Health Care
PUBH 6400	Global Health Frameworks
PUBH 6440	Global Health Economics and Finance
PUBH 6485	Prevention and Control of Water and Sanitation Diseases
PUBH 6503	Introduction to Public Health Communication & Marketing
PUBH 6514	Preventing Health Disparities
PUBH 6515	High Risk & Special Populations
PUBH 6550	Maternal & Child Health I
PUBH 6551	Maternal & Child Health II
PUBH 6552	Women's Health
PUBH 6553	Adolescent Health

PUBH 6556	Maternal & Child Nutrition
PUBH 6599	Topics in PCH
EXNS 6202	Advanced Exercise Physiology I
EXNS 6203	Advanced Exercise Physiology II
EXNS 6208	Physical Activity: Physiology and Epidemiology
EXNS 6209	Advanced Concepts in Nutrition Science

Practicum and culminating experience courses:

PUBH 6014	Practicum
PUBH 6015	Culminating Experience

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

MASTER OF SCIENCE IN THE FIELD OF EXERCISE SCIENCE WITH A CONCENTRATION IN STRENGTH AND CONDITIONING

Program Director T.A. Miller

Mission Statement

The mission of the program is to provide formal graduate level academic instruction in the science and theory of resistance training, as well as to promote student production of research that directly relates to the neuromuscular adaptations involved with resistance training.

Goals

The goals of this program in the Department of Exercise and Nutrition Sciences are to:

- Establish scientific basis for the value of anaerobic exercise, and to provide internal and external programs that promote health behaviors across the lifespan;
- Meet an increasing demand for well-educated professional capable of delivering a broad range of exercise-based preventive, technical, educational, and rehabilitative services;
- Gain insight into strategies for the prevention and treatment of sarcopenia, osteoporosis, and childhood obesity;
- Provide advanced training in exercise physiology as it relates specifically to resistance training for the purpose of increasing athletic performance and the prevention or treatment of inactivity-related health disorders; and
- Prepare students with knowledge and skills to take the Certified Strength and Conditioning Specialist (CSCS) exam offered through the NSCA, and the Level One Weightlifting Coaching Course offered through United States Weightlifting (USAW).

REQUIREMENTS

Course Requirements

All students who select the Strength and Conditioning Program enroll in both core courses (17 credits) and program-specific courses (19 credits). The 36 total credit requirement includes a culminating experience consisting of either successful completion of an oral research defense or the comprehensive exam.

Program Requirements

Prerequisites

Undergraduate exercise physiology - must be completed prior to beginning coursework at GW

Core courses:

EXNS 6202	Advanced Exercise Physiology I
EXNS 6203	Advanced Exercise Physiology II
EXNS 6204	Biostatistical Methods and Research Design
EXNS 6207	Psychological Aspects of Sport & Exercise
EXNS 6208	Physical Activity: Physiology and Epidemiology
EXNS 6209	Advanced Concepts in Nutrition Science

Program specific courses:

EXNS 6220	Power Training for Sports Performance
EXNS 6221	Science & Theory of Training

EXNS 6222 Current Topics in Strength and Conditioning

EXNS 6223 Biomechanical Analysis

Elective Approved by Program Director

Culminating experience:

One of the following options:

Option A

EXNS 6261 Thesis Seminar

EXNS 6998 Thesis Research

Option B

EXNS 6233 Graduate Internship

Comprehensive exam

Graduation requirements

1. Graduate credit requirement: 36 graduate credits
2. Course requirements: successful completion of core and program specific courses
3. Examination requirement: pass the American College of Sports Medicine Clinical Exercise Specialist® certification examination (clinical exercise physiology only)
4. Grade point requirement: 3.0 (B average) overall grade point average
5. Time limit requirement: the degree must be completed within four years
6. Transfer credit policy: up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the MSES. Courses need to have been taken within the past three years from an accredited institution with a grade of B or better.

GLOBAL HEALTH

The Department of Global Health offers diverse programs of study that prepare students to make a difference in the health of people around the world. With 3 fields of study, a joint degree program with Environmental and Occupational Health, several joint degree programs with other Schools at GW, and over 20 international practicum opportunities, our students have limitless opportunities to examine global health concepts and conduct interdisciplinary research. From our home base in Washington, D.C., you will gain the skills and experience necessary to take on today's most pressing global health challenges.

GRADUATE

Master's programs

- Master of Public Health in the field of global environmental health (p. 779)
- Master of Public Health in the field of global health communication (p. 783)
- Master of Public Health in the field of global health epidemiology (p. 750)
- Master of Public Health in the field of global health program design, monitoring, and evaluation (p. 789)
- Master of Public Health in the field of global health policy (p. 791)

Doctoral program

- Doctor of Public Health in the field of global health (p. 794)

FACULTY

Professors M.C. Ellsberg, J.M. Sherry, L. Simonsen (*Research*), J.M. Tielsch (*Chair*), R.J. Waldman

Associate Professors J.F. Sandberg, P. Vigilance

Assistant Professors S. Baird, U. Colon-Ramos, C. Garza (*Visiting*), T. Gurman, C. Huang, S. Mookherji, K. Ndiaye, A. Roess, E. Uretsky

Adjunct Instructors K. Gamble-Payne, E.A. Migliaccio

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PUBH 2115. Health, Human Rights, and Displaced Persons. 3 Credits.

Concepts of health as a human right, ethics, and the participation of the international community in moving toward health for all. Civil and international conflict in the generation of displaced populations.

PUBH 2116. Global Delivery of Health Systems. 3 Credits.

Introduction to health systems and the basic concepts of health systems administration and financing and health care reform with examples from advanced, middle income, and poor countries.

PUBH 3133. Global Health & Development. 3 Credits.

Basic concepts of development theory, international health policy, demographic trends, and health promotion; how the relationships between socioeconomic development and global health can be observed, measured, and used for the management of health programs.

PUBH 6400. Global Health Frameworks. 2 Credits.

Overview of current issues in global public health with particular emphasis on low and middle-income countries. Serves as both an introductory course for students entering the field of global health, as well as an update on current technical and policy issues for advanced students who may have considerable experience.

PUBH 6401. Comp Regional Determinants. 2 Credits.

Examines the set of social, cultural and economic issues most central to shaping health in each of the world's main regions. Overseas Learning Collaboration program in Bangladesh. Prerequisite: PubH 6400. Fee varies by year.

PUBH 6402. Washington Seminar. 2 Credits.

This seminar course will provide an overview of global health policy and practice institutional resources in Washington DC. Students gain an understanding of how global health issues are framed, presented and biased in a multi-institutional setting. This is a collaborative learning exercise where simple web based tools will be used to develop a virtual classroom of the current global health policy and practice dialogue among Washington DC based governmental, multilateral, NGO, private sector and policy institutes.

PUBH 6403. Scientific Basis GH Intervntn. 2 Credits.

Introduces the scientific basis of global health interventions and how they address proximal and underlying determinants of health. Successful students will obtain a strong technical grounding in the determinants, biology and pathogenesis of specific diseases, for which affordable tools for prevention, control, and case management exist and are in use in public health practice.

PUBH 6410. Global Health Study Design. 2 Credits.

A foundation in the tools necessary for planning and designing research related to identifying and solving problems in global health: choosing an appropriate research topic and research question, understanding the relationships between hypotheses and study objectives, conducting a literature review, choosing a research design to achieve the project purpose, writing a research proposal including planning for the challenges of global health research, and achieving productive dissemination of findings.

PUBH 6411. Global Health Qualitative Research Methods. 2 Credits.

An introduction to qualitative data collection and analysis in global health settings. Methodologies include survey design, interviews, focus groups, and participant observation. Archival research and clinical trial research are also addressed. The set of methods most commonly used to collect qualitative data in global health settings. Students are enabled to prepare interview guides, conduct in-depth interviews, and analyze and document the results from a qualitative field project. Prerequisites: PUBH 6002 and PUBH 6410.

PUBH 6412. Global Health Quantitative Research Methods. 3 Credits.

Continuation of the series of global health methods courses. Examination of the fundamental concepts of empirical analysis and qualitative analysis, including open and axial coding, the basis of grounded theory, and regression analysis. Prerequisites: PUBH 6002 and PUBH 6410.

PUBH 6430. Theories for Global Health Communication Interventions. 2 Credits.

Use of communication theory and methods in health promotion. Integration of multidisciplinary approaches to public health communication. Prerequisite: PUBH 6007, PUBH 6400.

PUBH 6431. Global Health Communication Strategies and Skills. 3 Credits.

Students conduct qualitative research to evaluate health communication programs, assess readability level and suitability of written health education materials, conduct content analyses, and review/critique current health communication literature. Prerequisites: PubH 6430-Theories and Applications in Global Health Promotion (unless waived by professor) PubH 6007- Social and Behavioral Approaches to Public Health.

PUBH 6435. Global Health Program Development and Implementation. 2 Credits.

Basic concepts and principles of program development and implementation including data collection methods, decision making, and problem-solving techniques. Application of program development techniques to specific interventions. Prerequisites: PUBH 6400.

PUBH 6436. Global Health Program Management and Leadership. 2 Credits.

Essential tools for successful project, personnel, and program management. Leadership and management theory; key issues in managing global health programs and projects; leadership and management skills development; use of data in management decision making; and importance of quality, supply chain, and resource management. Restricted to MPH in the field of global health program design, monitoring, and evaluation degree candidates. Prerequisites: PUBH 6400, PUBH 6400, and PUBH 6435.

PUBH 6437. Case Study Methods for Global Health Evaluation. 2 Credits.

The specifics of case study research and evaluation methods and application of these methods to the evaluation of global health interventions and programs. The particular challenges of case study design, data collection, and data analysis, with critical assessment of the quality of case studies used in global health evaluations. Appropriate designs and methods for case study evaluation to maximize generalizability and produce findings that engage policymakers and donors. Refinement of skills in analyzing quantitative and qualitative data from a program evaluation perspective, and development of skills in interpreting, disseminating, and using the results from program evaluations. Prerequisites: PUBH 6411, PUBH 6412, PUBH 6501.

PUBH 6440. Global Health Economics and Finance. 2 Credits.

Examination of economics and finance principles as they apply to global health. Organization, delivery, and financing of health care in developing countries. Tools for analyzing issues related to global health economics and finance and application of those tools to a variety of a global health issues, including demand for health care, health care financing, social insurance, pharmaceuticals, and HIV/AIDS. Prerequisite: PUBH 6400.

PUBH 6441. Global Health Organizations and Regulations. 3 Credits.

The functions, capacities, and governance of international health organizations; the normative power of some international health organizations for regulatory processes; and evidence-based development of public health policies with attention to issues of global trade as it shapes worldwide and national health. Prerequisite: PUBH 6400.

PUBH 6442. Comparative Global Health Systems. 2 Credits.

Examination of national health systems, how they differ, and how they are performing. Health systems analyzed through four different lenses: health care organizations, health workforce development, health care financing, and health policy development. Comparison of health systems and health reforms in seven regions of the world and assessment of how health system performance might be improved. Course fee may apply. Prerequisite: PUBH 6400.

PUBH 6443. Global Health Agreements and Conventions. 2 Credits.

Explores the impact of regulations, trade and human rights on health by examining the relevant international declarations, agreements and conventions. This course will examine a variety of topics including the impact of international trade agreements on health, the International Health Regulations and other regulations affecting global health, and the relationship between health and human rights. Prerequisite: PUBH 6400.

PUBH 6480. Public Health in Complex Emergencies. 2 Credits.

Analyze security institutions, vulnerable groups, humanitarian operations and natural disasters and global security, the impact of global health threats such as HIV/AIDS, SARS, avian flu, tuberculosis and malaria on security institutions, vulnerable populations, civil/military cooperation, and humanitarian operations. Also explore the potential value of various institutions in mitigating global health threats and responding to humanitarian emergencies. Examine a range of scientific, policy, and program interventions designed to address these issues. Prerequisite: PUBH 6400.

PUBH 6481. Global Mental Health. 2 Credits.

Focus on global mental health knowledge and public health policy implementation skills regarding the integration of mental health, public health, and primary care in diverse health systems and challenging cultural contexts. Prerequisite: PubH 6400.

PUBH 6482. International Food and Nutrition Policy. 2 Credits.

Major global food and nutrition issues, their determinants, and the strategies that in place to address them. Students identify major nutrition and food challenges in a country or region as well as the policies and programs that have proven successful in addressing those challenges. Prerequisite: PUBH 6400.

PUBH 6484. Prevention and Control of Vector Borne Diseases. 2 Credits.

Study of insects and other vectors responsible for transmission of diseases in developing countries, including plague, malaria, dengue fever, onchocerciasis (river blindness), and chikungunya virus. Special focus on developing countries, particularly in the Middle East, Africa, Asia, and Latin America. Diseases such as West Nile Virus and Lyme disease in the United States and elsewhere are also addressed. New methods for effective management and control.

PUBH 6485. Prevention and Control of Water and Sanitation Diseases. 1 Credit.

Problems associated with providing adequate water and sanitation in developing countries; infectious diseases such as cholera, dysentery and typhoid. Innovative tools and solutions for improving water supply and sanitation.

PUBH 6499. Topics in Global Health. 1-3 Credits.

Examination of a particular facet of public health. Topics vary by semester. May be repeated for credit provided topic differs. See the Schedule of Classes for more details.

MASTER OF PUBLIC HEALTH IN THE FIELD OF GLOBAL ENVIRONMENTAL HEALTH

Program Director J. Graham

Practicum Director S. McCormick

Mission

The Mission of the Global Environmental Health MPH program – a joint program between the Departments of Global Health and Environmental and Occupational Health – is to educate individuals who are committed to working in resource-poor settings and applying analytic skills to prevent or mitigate the adverse impact of environmental hazards on human health. The program has a particular focus on traditional environmental health hazards—that is, health risks that are a consequence of a lack of access to clean water, inadequate sanitation, poor hygiene, household air pollution, solid waste disposal, and vector-borne diseases such as malaria.

Goals

Our graduates will hold a multidisciplinary knowledge base and skill set that will provide them with a framework for addressing environmental health issues from environmentally mediated disease in the poorest performing regions of the world. They will understand the scientific and cultural foundations of environmental health in order to:

- Assess environmental exposures and understand the effects of these exposures on human health;
- Interpret epidemiologic and other research findings related to global environmental health risks; and
- Assume leadership roles in designing, implementing and evaluating programs that focus on modification of environmental health-related behaviors at local, regional, national and/or global levels.

COMPETENCIES

Upon completion of the MPH program in global environmental health, students should possess the following functional competencies:

Epidemiology & Biostatistics

Critically assess existing epidemiologic research.

- Summarize goals, design, methods, and results of published research.

PUBH 6015 Culminating Experience

PUBH 6121 Environmental and Occupational Epidemiology

PUBH 6131 Applied Data Analysis in Environmental and Occupational Health

PUBH 6400 Global Health Frameworks

PUBH 6411 Global Health Qualitative Research Methods

- Identify biases and evaluate the extent to which they threaten study validity.

PUBH 6121 Environmental and Occupational Epidemiology

PUBH 6131 Applied Data Analysis in Environmental and Occupational Health

PUBH 6411 Global Health Qualitative Research Methods

- Apply statistical principles to interpret epidemiologic data.

PUBH 6121 Environmental and Occupational Epidemiology

PUBH 6131 Applied Data Analysis in Environmental and Occupational Health

Design appropriate studies for investigating EOH problems.

- Identify appropriate resources and databases to plan and conduct studies.

PUBH 6015 Culminating Experience

PUBH 6121 Environmental and Occupational Epidemiology

PUBH 6128 Global Environmental and Occupational Health

PUBH 6400 Global Health Frameworks

PUBH 6411 Global Health Qualitative Research Methods

- Given a research question, identify appropriate study design, choose appropriate study populations, describe relevant exposure assessment methods, identify appropriate data collection instruments and processes, and describe procedures for protecting human subjects.

PUBH 6015 Culminating Experience

PUBH 6121 Environmental and Occupational Epidemiology

PUBH 6126 Assessment&Control/Env Hazards

PUBH 6131 Applied Data Analysis in Environmental and Occupational Health

PUBH 6411 Global Health Qualitative Research Methods

Conceptualize and carry out data analysis to address study goals.

- Conceptualize research questions

PUBH 6015 Culminating Experience

PUBH 6121 Environmental and Occupational Epidemiology

PUBH 6128 Global Environmental and Occupational Health

PUBH 6411	Global Health Qualitative Research Methods
-----------	--

- Utilize appropriate approaches to manage and analyze data

PUBH 6015	Culminating Experience
-----------	------------------------

PUBH 6131	Applied Data Analysis in Environmental and Occupational Health
-----------	--

PUBH 6411	Global Health Qualitative Research Methods
-----------	--

Assess Global Environmental and Occupational Risks

Assess environmental and occupational exposures.

- Describe the principle of operation, capability, and limitations of assessment instrumentation.

PUBH 6126	Assessment&Control/Env Hazards
-----------	--------------------------------

- Assess severity of potential hazards and select the appropriate instrument and measurement method.

PUBH 6126	Assessment&Control/Env Hazards
-----------	--------------------------------

- Interpret exposure measurements to assess the severity of a chemical, physical, or biological hazard.

PUBH 6126	Assessment&Control/Env Hazards
-----------	--------------------------------

PUBH 6435	Global Health Program Development and Implementation
-----------	--

- Compare exposure data against established occupational & environmental health standards and guidelines.

PUBH 6126	Assessment&Control/Env Hazards
-----------	--------------------------------

PUBH 6128	Global Environmental and Occupational Health
-----------	--

- Evaluate the strengths and weaknesses of epidemiologic exposure assessments.

PUBH 6121	Environmental and Occupational Epidemiology
-----------	---

PUBH 6128	Global Environmental and Occupational Health
-----------	--

Recommend strategies to prevent and control environmental and occupational exposures.

- Recommend appropriate control strategies, such as; environmental health interventions, protective equipment, behavior change campaigns, to mitigate health hazards.

PUBH 6126	Assessment&Control/Env Hazards
-----------	--------------------------------

PUBH 6128	Global Environmental and Occupational Health
-----------	--

PUBH 6400	Global Health Frameworks
-----------	--------------------------

Global Environmental Health Policy Analysis

Synthesize scientific evidence in order to inform global environmental health policy and reduce and prevent environmental health related disease and injury.

- Describe the authority and approaches of global environmental health agencies.

PUBH 6128	Global Environmental and Occupational Health
-----------	--

PUBH 6435	Global Health Program Development and Implementation
-----------	--

- Apply the risk assessment, risk management, and Source-to-Effect frameworks.

PUBH 6126	Assessment&Control/Env Hazards
-----------	--------------------------------

PUBH 6128	Global Environmental and Occupational Health
-----------	--

- Explain the role of scientific, economic, ethical, and political interests in development and implementation of global environmental health policy.

PUBH 6126	Assessment&Control/Env Hazards

-----------	--

- Analyze the role of global environmental health policies and politics in promoting sustainability.

PUBH 6128 Global Environmental and Occupational Health

PUBH 6435 Global Health Program Development and Implementation

Design, Implement, Monitor and Evaluate Global Environmental Health Programs

Synthesize relevant information in order to assess and manage environmental and occupational risks.

- Characterize political, social, cultural, religious and economic context to determine feasible interventions.

PUBH 6128 Global Environmental and Occupational Health

PUBH 6400 Global Health Frameworks

PUBH 6435 Global Health Program Development and Implementation

- Given a specific context, design a plan to collect relevant information to fully characterize global environmental health hazards and related human health effects.

PUBH 6121 Environmental and Occupational Epidemiology

PUBH 6128 Global Environmental and Occupational Health

PUBH 6435 Global Health Program Development and Implementation

- Evaluate data to characterize potential global environmental health hazards, potential for human exposure and health effects.

PUBH 6121 Environmental and Occupational Epidemiology

PUBH 6128 Global Environmental and Occupational Health

PUBH 6400 Global Health Frameworks

PUBH 6411 Global Health Qualitative Research Methods

PUBH 6435 Global Health Program Development and Implementation

- Recommend possible approaches to reduce the risk and/or impact of exposure to global environmental health hazards, and evaluate these approaches with regard to ethical issues, technical feasibility, resource requirements, and policy context.

PUBH 6126 Assessment&Control/Env Hazards

PUBH 6128 Global Environmental and Occupational Health

PUBH 6400 Global Health Frameworks

PUBH 6435 Global Health Program Development and Implementation

- Communicate with relevant stakeholder groups about environmental and occupational health issues and recommendations, using appropriate terminology and data.

PUBH 6128 Global Environmental and Occupational Health

PUBH 6435 Global Health Program Development and Implementation

REQUIREMENTS

All students who select the global environmental health program enroll in core courses (15 credits), program-specific courses (17 credits), and electives (9 credits). The 45-credit degree program also includes a practicum (2 credits) and a culminating experience (2 credits) where students apply their didactic education in a real world setting.

Program Requirements

Required Core Courses

PUBH 6001 Biological Concepts/Public Hlth

PUBH 6002 Biostatistical Applic for PubH

PUBH 6003 Prin & Practice/Epidemiology

PUBH 6004 Environmental and Occupational Health in a Sustainable World

PUBH 6006 Mgt & Policy Approaches to PH

PUBH 6007 Social&BehaviorAppr-Pub.Hlth

Required EOH Courses

PUBH 6121 Envrnmntl&OccptnlEpidemiology

PUBH 6126 Assessment&Control/Env Hazards

PUBH 6128 Global Envrnmntl & Occptnl Hlth

PUBH 6131 Applied Data Analysis in EOH

Required GH Courses

PUBH 6400 Global Health Frameworks

PUBH 6411	Global Health Qualitative Research Methods
PUBH 6435	Global Health Program Development and Implementation

Electives

9 credits from the following:

PUBH 6123	Toxicology: Applic for PH Pol
PUBH 6132	Design, Implementation and Evaluation of Global Water, Sanitation and Hygiene (WASH) Programs
PUBH 6125	Intro-Children's Health & Env
PUBH 6127	Germs: An Introduction to Environmental Health Microbiology
PUBH 6130	Sustainable Energy & Environmt
PUBH 6133	Social Dimen Clim Chnge & Hlth
PUBH 6134	Communication Science for PubH
PUBH 6262	Intro-Geog Information Systems
PUBH 6271	Disaster Epidemiology
PUBH 6435	Global Health Program Development and Implementation
PUBH 6437	Case Study Methods for Global Health Evaluation
PUBH 6480	Public Health in Complex Emergencies

Practicum and Culminating Experience

PUBH 6014	Practicum
PUBH 6015	Culminating Experience

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

MASTER OF PUBLIC HEALTH IN THE FIELD OF GLOBAL HEALTH COMMUNICATION

Program Directors T. Gurman, K. Ndiaye

Mission

The mission of the MPH in Global Health Communication is to train the next generation of public health professionals engaged in tackling global health issues with direct ties to human behavior. Human behavior is at the core of many of the world's most pressing public health challenges (i.e., HIV/AIDS, obesity). This MPH program will train professionals to approach the development and evaluation of behavior change communication programs that address the individual- and community-level factors relevant to the particular population and setting.

Goals

Understanding why people do what they do and being able to develop effective ways to get people to change their behavior requires a toolbox filled with a diverse set of skill sets. As a result, the goals of the MPH in Global Health Communication are to teach students the following:

- Recognition of the complexity of behavior change, especially the multiple levels of influence on human behavior;
- Ability to apply behavior change and communication theories in the development and evaluation of health communication programs and activities;
- Appreciation for the challenges that may arise in addressing behavior change in global settings;
- Critical thinking skills necessary to interpret and apply public health literature related to health communication and behavior change in global health settings;
- Skills for developing and evaluating health communication interventions in resource-limited settings or for vulnerable populations;
- Qualitative and quantitative research methods relevant to health communication;
- Knowledge of the various types of stakeholders, including governments, international donors, and local players, that may shape health communication interventions in global settings;
- Cultural competency skills necessary to develop programs and work in diverse cultural settings; and
- Awareness of the benefits and challenges to collaborating with organizations that serve disenfranchised/vulnerable communities.

COMPETENCIES

By the end of their MPH program, students should be able to:

- Apply multi-disciplinary perspectives to identify, analyze and address global health challenges.

Relevant courses:

PUBH 6400 Global Health Frameworks

PUBH 6410 Global Health Study Design

PUBH 6411 Global Health Qualitative Research Methods

- Distinguish between qualitative and quantitative methods and select the appropriate method depending on the specific research or programmatic need.

Relevant courses:

PUBH 6410 Global Health Study Design

PUBH 6411 Global Health Qualitative Research Methods

- Interpret and critique research and best practices to inform the development of evidence-based solutions for global health challenges.

Relevant courses:

PUBH 6400 Global Health Frameworks

PUBH 6410 Global Health Study Design

PUBH 6412 Global Health Quantitative Research Methods

- Communicate public health evidence on global health topics to a variety of audiences, such as technical experts, policymakers, lay audiences, and other relevant stakeholders.

Relevant courses:

PUBH 6412 Global Health Quantitative Research Methods

- Identify and address the ethical issues of global health programs, policies and research.

Relevant courses:

PUBH 6416 Ethical and Cultural Issues in Global Health Research and Programs

- Engage with diverse individuals, organizations, and communities with respect for different values, beliefs and practices.

Relevant courses:

PUBH 6416 Ethical and Cultural Issues in Global Health Research and Programs

- Explain multilevel determinants of problems in Global Health and the basis for strategies and interventions.

Relevant courses:

PUBH 6400 Global Health Frameworks

- Describe the governance and institutional landscape of global health.

Relevant courses:

PUBH 6400 Global Health Frameworks

- Demonstrate professionalism in practice, research and in communication activities.

Relevant courses:

PUBH 6410 Global Health Study Design

PUBH 6411 Global Health Qualitative Research Methods

- Explain the ways in which behavior change and communication theories can inform the development and evaluation of health communication interventions.

Relevant courses:

PUBH 6430 Theories for Global Health Communication Interventions

PUBH 6431 Global Health Communication Strategies and Skills

PUBH 6571 Social Marketing: Theory and Practice

- Develop logic and conceptual models to design, monitor, and evaluate context-specific health communication interventions.

Relevant courses:

PUBH 6430 Theories for Global Health Communication Interventions

PUBH 6431 Global Health Communication Strategies and Skills

PUBH 6571 Social Marketing: Theory and Practice

- Identify and describe essential components of health communication interventions and strategies, linking theory with practice.

Relevant courses

PUBH 6430	Theories for Global Health Communication Interventions
PUBH 6431	Global Health Communication Strategies and Skills
PUBH 6571	Social Marketing: Theory and Practice

- Evaluate health communication activities and interventions.

Relevant courses:

PUBH 6430	Theories for Global Health Communication Interventions
PUBH 6431	Global Health Communication Strategies and Skills

REQUIREMENTS

All Milken Institute School of Public Health (SPH) MPH students who select the Global Health Communication program enroll in Core Courses (15 credits), Department Courses (10 credits), Program-Specific Courses (8 credits), and Electives (7 credits).

The total 45 credit degree program also includes a Practicum (2 credits) and a Culminating Experience (2 credits) where students apply their didactic education in a real world setting.

Required Core Courses:

PUBH 6001	Biological Concepts/Public Hlth
PUBH 6002	Biostatistical Applic for PubH
PUBH 6003	Prin & Practice/Epidemiology
PUBH 6004	Environmental and Occupational Health in a Sustainable World
PUBH 6006	Mgt & Policy Approaches to PH
PUBH 6007	Social & Behavior Appr-Pub. Hlth

Required Global Health Departmental Courses:

PUBH 6400	Global Health Frameworks
PUBH 6410	Global Health Study Design
PUBH 6411	Global Health Qualitative Research Methods
PUBH 6412	Global Health Quantitative Research Methods
PUBH 6416	Ethical and Cultural Issues in Global Health Research and Programs

Required Communication Program Courses:

PUBH 6430	Theories for Global Health Communication Interventions
PUBH 6431	Global Health Communication Strategies and Skills
PUBH 6571	Social Mktg: Theory & Practice

Elective Courses:

One from the following:

ANTH 6301	The Anthropology of Development
ANTH 6505	Medical Anthropology
PUBH 6249	Stat Packages/Data Mgt & Data Anlys
PUBH 6262	Intro-Geog Information Systems
PUBH 6502	Practical Data Analysis: PCH
PUBH 6533	Design of Comm Health Surveys
PUBH 6534	Comm-Based Participatory Res
PUBH 6572	Marketing Rsch for Publ Health

One from the following:

IAFF 6502 & IAFF 6503	Professional Skills I and Professional Skills II
PUBH 6435 or PUBH 6500	Global Health Program Development and Implementation Planning and Implementing Health Promotion Programs
PUBH 6499	Topics in Global Health
PUBH 6501	Program Evaluation
PUBH 6515	High Risk & Special Populations
PUBH 6531	Hlth Promotion/Hlth Care Settings
PUBH 6570	Adv Publ Hlth Comm: Theory & Prac
PUBH 6574	Pub Hlth Branding Theory & Pract
PUBH 6573 or PUBH 6532	Media Advocacy for Public Hlth Commnty Org, Devlpmnt & Advocacy
PUBH 6575	Commun Skills for Pub Hlth Profsnl
SMPA 6201	Strategic Communications Skills
SMPA 6205	Media, Development, and Globalization

Any SPH or GWU course(s) with advisor's approval via petition

Practical and Culminating Experience:

PUBH 6014 Practicum

PUBH 6015 Culminating Experience

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

MASTER OF PUBLIC HEALTH IN THE FIELD OF GLOBAL HEALTH EPIDEMIOLOGY

This program is not accepting students in the 2015-16 Academic Year

Program Co-Directors H. Young, M. Magnus, L. Simonsen

Practicum Director L. Simonsen

Mission

The mission of the Global Health Epidemiology Program is to educate graduate students by developing the necessary methodological and quantitative skills to conduct research in an international setting and successfully improve the health and well-being of people around the world. While nurturing students' capacity to think critically and creatively, we strive to deepen their commitment to improving the public's health and to engaging in and promoting public service—qualities we believe are essential for future epidemiologists and public health practitioners.

Goals

The goals of the Global Health Epidemiology Program are to ensure that graduates:

- Identify determinants of health problems including sociocultural factors;
- Understand and adhere to high scientific standards for research;
- Understand and follow guidelines for ethical treatment of research participants;

- Communicate research findings to a lay audience;
- Assume leadership roles in designing and conducting epidemiologic and intervention research at both national and global levels; and
- Respect cultural diversity throughout all of the above.

COMPETENCIES

Program-Specific Competencies

The Global Health Epidemiology specialization prepares students for epidemiological research and evaluation in a variety of local, national, and international organizations. The curriculum prepares students to design and conduct studies, manage health data, and make leadership decisions in the context of international public health. The following competencies were developed in concert with professors of epidemiology and global health courses, epidemiology textbooks, conversations with prospective employers, and experience in the field.

Upon completion of the MPH in Global Health Epidemiology, students will demonstrate functional competence to:

- Apply the theories and principles of epidemiology, biostatistics, economics and social development to the identification, classification and elaboration of the determinants and distribution of disease and global health threats and opportunities at the community, national and international levels.

Relevant courses:

PUBH 6247 Design of Health Studies

PUBH 6249 StatPackages/DataMgt&DataAnlys

PUBH 6252 Advanced Epidemiology Methods

PUBH 6400 Global Health Frameworks

PUBH 6440 Global Health Economics and Finance

- Assess the functions, capacities, management and governance of governmental, international and non-state organizations in the translation of scientific and program evidence to inform public health policy making and strategy development.

Relevant courses:

PUBH 6400 Global Health Frameworks

PUBH 6401 Comp Regional Determinants

PUBH 6402 Washington Seminar

- Critically analyze global health trends and assess patterns of emerging diseases to postulate hypotheses and to differentiate determinants in order to evaluate the impact

of health problems and prioritize approaches based on economic affordability and political feasibility.

Relevant courses:

PUBH 6247	Design of Health Studies
PUBH 6249	StatPackages/DataMgt&DataAnlys
PUBH 6252	Advanced Epidemiology Methods
PUBH 6400	Global Health Frameworks
PUBH 6401	Comp Regional Determinants
PUBH 6440	Global Health Economics and Finance

- Apply underlying principles and methods including ethical issues involved in the design, planning, and conduct of epidemiologic studies including observational and experimental designs, screening programs, public health surveillance, and other epidemiologic designs in a global health setting.

Relevant courses:

PUBH 6247	Design of Health Studies
PUBH 6249	StatPackages/DataMgt&DataAnlys
PUBH 6252	Advanced Epidemiology Methods
PUBH 6400	Global Health Frameworks

- Identify the appropriate data analysis methods, conduct data management and data analysis using a computerized software program, and interpret the results from epidemiological studies.

Relevant courses:

PUBH 6249	StatPackages/DataMgt&DataAnlys
PUBH 6252	Advanced Epidemiology Methods

- Successfully apply public health theory and experiential evidence in the development and management of project, program and institutional strategies capable of reducing health risks, addressing underlying vulnerabilities, and mitigating the impact disease.

Relevant courses:

PUBH 6400	Global Health Frameworks
PUBH 6401	Comp Regional Determinants

- Effectively synthesize data and relevant literature with economic and social arguments to formulate communication strategies in global health action in various professional, institutional, political and cultural settings

as well as facilitate the distribution of scientific findings through manuscripts and scientific presentations.

Relevant courses:

PUBH 6247	Design of Health Studies
PUBH 6249	StatPackages/DataMgt&DataAnlys
PUBH 6252	Advanced Epidemiology Methods
PUBH 6400	Global Health Frameworks
PUBH 6401	Comp Regional Determinants

- Evaluate the benefits, costs and effectiveness of global health project, program and policy approaches and interventions though the appropriate choice and application of qualitative and quantitative survey and analysis methods.

Relevant courses:

PUBH 6247	Design of Health Studies
PUBH 6400	Global Health Frameworks
PUBH 6401	Comp Regional Determinants

- Demonstrate their understanding of the fundamental concepts related to the theory of the consumer and production decisions by health care organizations; be able to critically evaluate research findings related to various healthcare markets; and use economic analysis and statistical tools for evaluating problems faced by health care organizations.

Relevant course:

PUBH 6440	Global Health Economics and Finance
-----------	-------------------------------------

- Critically assess issues in at least one of the following specialty areas in global health epidemiology:
 - Clinical epidemiology such as decision analysis, cost-effectiveness to clinical and public health problems.
 - Major topics in infectious disease epidemiology
 - Methods and issues of cancer epidemiology
 - Methods and issues of surveillance systems in public health.
 - Qualitative research methods
 - Program design and implementation
 - Major topics in food, water and vector borne diseases and control
 - Advanced quantitative methods

REQUIREMENTS

Course Requirements

Students may not be admitted directly into the Global Health Epidemiology program. Students in either the Epidemiology program or the Global Health program may apply to the Global Health Epidemiology program after they have completed PUBH 6002 Biostatistical Applic for PubH, PUBH 6003 Prin & Practice/Epidemiology, and PUBH 6400 Global Health Frameworks (usually after their first semester). Successful applicants are expected to have earned a minimum of A- in each of these three courses.

Students who are interested in this program and intend to complete the MPH in two years will need to register for the above mentioned three courses in their first semester. Students not admitted into the Global Health Epidemiology program will continue in their original program.

All GW School of Public Health and Health Services (SPH) MPH students who are admitted into the MPH Global Health Epidemiology Program enroll in Core Courses (15 credits), Epidemiology Program-Specific Required Courses (9 credits), Global Health Program-Specific Required Courses (9 credits) and Concentration electives (8 credits). The total 45 credit degree program also includes a Practicum (2 credits) and a Culminating Experience (2 credits) where students apply their didactic education in a real world setting.

Program Requirements

Required core courses:

PUBH 6001	BiologicalConcepts/PublicHlth
PUBH 6002	Biostatistical Applic for PubH
PUBH 6003	Prin & Practice/Epidemiology
PUBH 6004	Environmental and Occupational Health in a Sustainable World
PUBH 6006	Mgt & Policy Approaches to PH
PUBH 6007	Social&BehaviorApr-Pub.Hlth

Global Health required program-specific courses:

PUBH 6400	Global Health Frameworks
PUBH 6401	Comp Regional Determinants
PUBH 6402	Washington Seminar
PUBH 6440	GH Econ & Finance

Epidemiology/Biostatistics required program-specific courses:

PUBH 6247	Design of Health Studies
PUBH 6249	StatPackages/DataMgt&DataAnlys

PUBH 6252	Advanced Epidemiology Methods
-----------	-------------------------------

Program elective courses:

8 credits from the following global health and epidemiology/biostatistics courses (other courses may be used with permission of advisor):

Department of Epidemiology and Biostatistics:

PUBH 6242	ClinicalEpid&Decision Analysis
PUBH 6244	Cancer Epidemiology
PUBH 6245	InfectiousDisease Epidemiology
PUBH 6250	Epidemiology of HIV/AIDS
PUBH 6253	Issues in HIV Care & Treatment
PUBH 6255	Org Responses to HIV/Epidemic
PUBH 6259	Epid Surveillance/PublicHealth
PUBH 6260	Adv DataAnalysis-Public Health
PUBH 6262	Intro-Geog Information Systems
PUBH 6263	Advanced GIS
PUBH 6267	Time Series:Applications in PH
PUBH 6268	Advanced SAS
PUBH 6269	Reproductive Epidemiology
PUBH 6270	HIV/AIDS Surveillance
PUBH 6271	Disaster Epidemiology
PUBH 6272	Infectious Agents- Cancer
PUBH 6273	Ethnographic Methods
PUBH 6274	Emerging ID for PH Pro's

Department of Global Health:

PUBH 6530	Qual Methods/Hlth Promotion
PUBH 6435	Global Health Program Development and Implementation
PUBH 6442	Comparative Global Health Systems
PUBH 6480	Public Health in Complex Emergencies
PUBH 6481	Global Mental Health
PUBH 6482	Int'l Food and Nutrition
PUBH 6484	Prev&Cont of VectorBorne Dis.
PUBH 6485	Prev&Cont of Water&Sanit. Dis.

Practicum and culminating experience:

PUBH 6014 Practicum

PUBH 6015 Culminating Experience

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

MASTER OF PUBLIC HEALTH IN THE FIELD OF GLOBAL HEALTH PROGRAM DESIGN, MONITORING, AND EVALUATION

Program Director S. Mookherji

Mission

The mission of the Global Health Program Design, Monitoring, and Evaluation (DME) Program is to prepare the next generation of global health professionals to implement and evaluate global health programs and initiatives. This program aims to train professionals who use evidence to improve performance of and investments in global health programs that will improve the health and well-being of populations in low and middle income settings abroad and within the United States.

Goals

The goals of the Global Health Design, Monitoring, and Evaluation Program are to prepare students to be skilled evaluators and practitioners who know how to:

- Utilize the full range of evaluation design options to generate the best evidence on how well a program is working, how it is working, and why;
- Work within real-world confines to strengthen methodological rigor of evaluation and program implementation;

- Use theory to ground program design, implementation, and evaluation;
- Generate and use data for management decision-making; and
- Translate evidence into implementation improvements and policy recommendations.

COMPETENCIES

By the end of the MPH, Global Health Program Design, Monitoring, and Evaluation program, students should be able to:

- Apply multi-disciplinary perspectives to identify, analyze and address global health challenges.

Relevant courses:

PUBH 6400 Global Health Frameworks

PUBH 6410 Global Health Study Design

PUBH 6411 Global Health Qualitative Research Methods

- Distinguish between qualitative and quantitative methods and select the appropriate method depending on the specific research or programmatic need.

Relevant courses:

PUBH 6410 Global Health Study Design

PUBH 6411 Global Health Qualitative Research Methods

- Interpret and critique research and best practices to inform the development of evidence-based solutions for global health challenges.

Relevant courses:

PUBH 6400 Global Health Frameworks

PUBH 6410 Global Health Study Design

PUBH 6412 Global Health Quantitative Research Methods

- Communicate public health evidence on global health topics to a variety of audiences, such as technical experts, policymakers, lay audiences, and other relevant stakeholders.

Relevant courses:

PUBH 6412 Global Health Quantitative Research Methods

- Identify and address the ethical issues of global health programs, policies and research.

Relevant courses:

PUBH 6416	Ethical and Cultural Issues in Global Health Research and Programs
-----------	--

- Engage with diverse individuals, organizations, and communities with respect for different values, beliefs and practices.

Relevant courses:

PUBH 6416	Ethical and Cultural Issues in Global Health Research and Programs
-----------	--

- Explain multilevel determinants of problems in Global Health and the basis for strategies and interventions.

Relevant courses:

PUBH 6400	Global Health Frameworks
-----------	--------------------------

- Describe the governance and institutional landscape of global health.

Relevant courses:

PUBH 6400	Global Health Frameworks
-----------	--------------------------

- Demonstrate professionalism in practice, research and in communication activities.

Relevant courses:

PUBH 6410	Global Health Study Design
-----------	----------------------------

PUBH 6411	Global Health Qualitative Research Methods
-----------	--

- Utilize epidemiological data, program theory, programmatic evidence, and health systems and policy contextual information for the design of effective global health interventions and programs, as well as their monitoring and evaluation.

Relevant courses:

PUBH 6435	Global Health Program Development and Implementation
-----------	--

PUBH 6501	Program Evaluation
-----------	--------------------

- Compare and select monitoring frameworks and evaluation methods according to specified purposes for each.

Relevant courses:

PUBH 6435	Global Health Program Development and Implementation
-----------	--

PUBH 6501	Program Evaluation
-----------	--------------------

- Identify frameworks for the design of culturally acceptable and contextually feasible global health interventions and evaluations.

Relevant courses:

PUBH 6435	Global Health Program Development and Implementation
-----------	--

- Apply research, leadership, and communication skills to support the design, implementation, evidence and policy cycle.

Relevant courses:

PUBH 6435	Global Health Program Development and Implementation
-----------	--

PUBH 6436	Global Health Program Management and Leadership
-----------	---

MASTER OF PUBLIC HEALTH IN THE FIELD OF GLOBAL HEALTH POLICY

Program Director J. Tielsch

Mission

The mission of the Global Health Policy Program is to prepare the next generation of global health professionals in the disciplines and perspectives necessary to contribute to the development, implementation, and evaluation of policies at the local, national, regional, and international levels that will improve the health and well-being of underserved populations in low and middle income settings abroad and within the United States.

Goals

The goals of the Global Health Policy Program are to prepare students to:

- Assess the burden and determinants of health problems in an underserved low or middle income population;
- Assess and evaluate the relevant policy issues appropriate to addressing these health problems using a multidisciplinary approach;
- Assume leadership roles in the policy development process with the goal of maximizing the performance and financial integrity of the health system.

COMPETENCIES

By the end of their MPH, Global Health Policy program, students should be able to:

- Apply multi-disciplinary perspectives to identify, analyze and address global health challenges.

Relevant courses:

PUBH 6400	Global Health Frameworks
-----------	--------------------------

PUBH 6410	Global Health Study Design
-----------	----------------------------

- Distinguish between qualitative and quantitative methods and select the appropriate method depending on the specific research or programmatic need.

Relevant courses:

PUBH 6412	Global Health Quantitative Research Methods
-----------	---

- Interpret and critique research and best practices to inform the development of evidence-based solutions for global health challenges.

Relevant courses:

PUBH 6400 Global Health Frameworks

PUBH 6410 Global Health Study Design

PUBH 6412 Global Health Quantitative Research Methods

- Communicate public health evidence on global health topics to a variety of audiences, such as technical experts, policymakers, lay audiences, and other relevant stakeholders.

Relevant courses:

PUBH 6412 Global Health Quantitative Research Methods

- Identify and address the ethical issues of global health programs, policies and research.

Relevant courses:

PUBH 6416 Ethical and Cultural Issues in Global Health Research and Programs

- Engage with diverse individuals, organizations, and communities with respect for different values, beliefs and practices.

Relevant courses:

PUBH 6416 Ethical and Cultural Issues in Global Health Research and Programs

- Explain multilevel determinants of problems in Global Health and the basis for strategies and interventions.

Relevant courses:

PUBH 6400 Global Health Frameworks

- Describe the governance and institutional landscape of global health.

Relevant courses:

PUBH 6400 Global Health Frameworks

- Demonstrate professionalism in practice, research and in communication activities.

Relevant courses:

PUBH 6410 Global Health Study Design

PUBH 6416 Ethical and Cultural Issues in Global Health Research and Programs

- Apply quantitative and qualitative tools and concepts to develop global health policy analyses for different audiences.

Relevant courses:

PUBH 6305 Fundamentals for Health Policy: Public Health and Health Care

PUBH 6315 Intro-Health Policy Analysis

- Analyze major multi-institutional and multi-sectoral initiatives in global health and make recommendations from an organizational and financial perspective on how they might be strengthened.

Relevant courses:

PUBH 6441 Global Health Organizations and Regulations

PUBH 6442 Comparative Global Health Systems

- Describe how health system performance is affected by various approaches to health system organization, financing and workforce development.

Relevant courses:

PUBH 6440 Global Health Economics and Finance

PUBH 6442 Comparative Global Health Systems

- Assess the historical and ongoing development of international health regulations and intellectual property rights and how they could be addressed through national and international policies. Understand the role they play in controlling a major epidemic or health emergency.

Relevant courses:

PUBH 6441 Global Health Organizations and Regulations

PUBH 6443 Global Health Agreements and Conventions

- Assess the relationship between the protection, promotion, and progressive realization of human rights and global health outcomes.

Relevant courses:

PUBH 6441 Global Health Organizations and Regulations

PUBH 6443 Global Health Agreements and Conventions

- Describe the economic challenges faced by low and middle-income countries regarding health status of their populations and health care delivery options and how different policy approaches can be used to address these challenges.

Relevant courses:

PUBH 6440 Global Health Economics and Finance

PUBH 6442 Comparative Global Health Systems

PUBH 6441 Intnat'l Health Organizations

PUBH 6442 Comparative Global Health Systems

PUBH 6443 Global Health Agreements and Conventions

Elective courses:

6 credits from the following:

PUBH 6262 Intro-Geog Information Systems

PUBH 6435 Global Health Program Development and Implementation

PUBH 6437 Case Study Methods for Global Health Evaluation

PUBH 6575 CommunSkills for PubHProfsnls

PUBH 6482 Int'l Food and Nutrition

PPPA 6015 Benefit-Cost Analysis

PPPA 6006 Policy Analysis

PPPA 6062 Community Development Policy and Management

IAFF 6198 Special Topics in International Trade and Investment Policy

IAFF 6158 Special Topics in International Science and Technology Policy

IAFF 6138 Special Topics in International Development Studies

Any SPH or GWU course(s) with advisor's approval via petition

Practicum and culminating experience:

PUBH 6014 Practicum

PUBH 6015 Culminating Experience

REQUIREMENTS

Course Requirements

All Milken Institute School of Public Health (SPH) MPH students who select the Global Health Communication program enroll in Core Courses (15 credits), Program-Specific Courses (20 credits), and Electives (6 credits). The total 45 credit degree program also includes a Practicum (2 credits) and a Culminating Experience (2 credits) where students apply their didactic education in a real world setting.

Program Requirements

Required core courses:

PUBH 6001 BiologicalConcepts/PublicHlth

PUBH 6002 Biostatistical Applic for PubH

PUBH 6003 Prin & Practice/Epidemiology

PUBH 6004 Environmental and Occupational Health in a Sustainable World

PUBH 6006 Mgt & Policy Approaches to PH

PUBH 6007 Social&BehaviorAppr-Pub.Hlth

Required program-specific courses:

PUBH 6400 Global Health Frameworks

PUBH 6410 Global Health Study Design

PUBH 6416 Ethical and Cultural Issues in Global Health Research and Programs

PUBH 6305 Fundamentals for Health Policy

PUBH 6315 Intro-Health Policy Analysis

PUBH 6412 Global Health Quantitative Research Methods

PUBH 6440 GH Econ & Finance

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been

earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

DOCTOR OF PUBLIC HEALTH IN THE FIELD OF GLOBAL HEALTH

Program Director A. Roess

Mission

The DrPH degree is the terminal degree in the professional discipline of public health. Consistent with this advanced professional orientation, the DrPH program will prepare future public health leaders to apply critical thinking and rigorous research methods to the complex practical problems facing practitioners and policy-makers in public health practice. The DrPH program is designed to both follow and promote the principles of academic public health practice. As noted in a recent ASPH publication, public health practice is the strategic, organized, and interdisciplinary application of knowledge, skills, and competencies necessary to perform essential public health services and other activities to improve the populations' health. Academic public health practice is the applied, interdisciplinary pursuit of scholarship in the field of public health. Recent events sharply illustrate the need for public health professionals who can provide the leadership to expand and strengthen the US and global public health systems. The DrPH program is designed to prepare professionals with skills to provide this leadership.

From the combination of course work and the implementation of the knowledge in the context of a thesis project in outstanding international placements, the DrPH degree in Global Health will enable professionals to develop innovative approaches and ability to negotiate the complex interrelationship between health and political, economic, and human development.

Goals

The DrPH graduate will be prepared to assume an advanced level of leadership in global health, in the context of health research as well as implementation programs in an international setting.

Admissions Requirements

The Doctor of Public Health Program is designed for mid-career professionals seeking to become public health leaders. Applicants who have completed an MPH degree from a Council of Education for Public Health (CEPH) accredited program are strongly preferred for admission to the DrPH program. Alternatively, applicants with a master's degree in another field may indicate their relevant training, research experience, or educational background comparable to the MPH. Doctoral applicants admitted without an MPH will be required to take additional course work at the graduate level that does not apply toward the minimum 48 credits required for the DrPH. Qualified applicants with degrees from institutions in foreign countries are also eligible for

admission. All applicants must submit scores from the Graduate Record Exam (GRE) taken within five years of the date of application. Because admission to this program is highly selective, successful applicants have competitive academic credentials and substantial prior public health professional work experience related to the specialty field to which they are applying.

Program Policies and Procedures

For program policies and procedures, please refer to the Doctor of Public Health Handbook and other resources located on DrPH in the field of Global Health website (<http://publichealth.gwu.edu/programs/global-health-drph>).

REQUIREMENTS

Program requirements:

20 credits of required foundational courses and research methods

PUBH 8401	Found PH Leadership & Practice
PUBH 8402	Ldrshp/PublicHlthPractc&Policy
PUBH 8416	Study Design & Evaluation Methods
PUBH 8418	Applied Statistical Analysis
PUBH 8417	Qual Research Methods&Analysis
PUBH 8419	Measrmnt/PublHlth&HlthSrvcRes
PUBH 8420	Advanced Analysis & Dissemination

6 credits required global health specialty field courses

PUBH 8406	AdvTpc-HlthResrch/GlobalArena
PUBH 8407	AdvTpc-HlthLdrshp/IntlSettings

Elective specialty field courses (sample list)

7-10 credits from the following:

PUBH 6123	Toxicology: Applic for PH Pol
PUBH 6128	Global Envrmntl & Occptnl Hlth
PUBH 6242	ClinicalEpid&Decision Analysis
PUBH 6244	Cancer Epidemiology
PUBH 6245	InfectiousDisease Epidemiology
PUBH 6250	Epidemiology of HIV/AIDS
PUBH 6259	Epid Surveillance/PublicHealth

PUBH 6443	Global Health Agreements and Conventions
PUBH 6481	Global Mental Health
PUBH 6482	Int'l Food and Nutrition

4 credits of professional leadership courses

PUBH 8413	Research Leadership
PUBH 8415	Instructional Leadership

Comprehensive Examination

8-11 credits of dissertation preparation and dissertation

PUBH 8422	AdvHlthCare&PublHlthRsrchDes
Advanced Health Care and Public Health Research Design prerequisites: Pass Comprehensive Exam, approval of Program Director, & one page abstract	
PUBH 8423	Dissertation Research

HEALTH POLICY AND MANAGEMENT

In early 2015, the Department of Health Policy and the Department of Health Services Management and Leadership consolidated to create a larger, integrated department that is even better prepared to lead education, research, and practice efforts related to public health policy, health care policy, and health services management. This positive evolution creates new and dynamic synergies for faculty, staff, students, and alumni, and maximizes our education and research potential.

The mission of the Department of Health Policy and Management—a practice-oriented academic community in Washington, DC—is to improve health and health systems locally, nationally, and globally through: excellence in education, innovative scholarship, and applied research that

is translated into practice and policy, and the promotion of transformational leadership that advances health policy and health services management.

We are committed to:

- Preparing graduates who will become innovative and effective leaders in public health and health policy, health services delivery, and health system transformation;
- Conducting rigorous multidisciplinary research that addresses significant health challenges, is objective, and is translated to inform and affect health policy, health care management, and public health practice;
- Being a trusted resource for shaping and advancing health policy and management practices because of our research integrity and rigor, the real-world leadership experiences of our faculty and staff, and our exceptional students;
- Leveraging our unique location in Washington, DC which allows for strong collaborations with health policy and management leaders and practitioners;
- Improving the health and health care of under-served and vulnerable populations; and
- Promoting and learning from the diversity among our faculty, staff, students, and alumni in terms of background, experience, and thought.

GRADUATE

Master's programs

- Master of Health Administration (p. 796)
- Master of Health Administration – online/executive program (p. 799)
- Master of Public Health in the field of health policy (p. 800)
- Master of Science in the field of health policy (p. 806)
- Health Services Administration Specialist (p. 807)

Doctoral programs

- Doctor of Philosophy in the field of public policy and administration (health policy track) (p. 808)
- Doctor of Public Health in the field of health policy (p. 808)

CERTIFICATE

- Graduate certificate in health administration generalist (p. 809)
- Graduate certificate in health policy (p. 810)
- Graduate certificate in long-term care (p. 811)

FACULTY

University Professor V.N. Gamble

Professors B. Biles, R.E. Burke, L. Chun-lee Ku, K.J. Darr, A. Dor, L.H. Friedman, K.Horton (*Research*), P. Lantz (*Chair*), J.W.

Levi, F.S.M. Mullan, M.J. Regenstein, J.J. Reum, S. Rosenbaum, D.M. Stevens (*Research*), J. P. Wisdom

Associate Professors T.L.Burke, L. Cartwright-Smith (*Research*), J.Fischer (*Research*), S.L. Frehywot (*Research*), M.M. Goldstein, R.L. Katz, A.R. Markus, M.McCarthy, P. Pittman, N.Seiler (*Research*), P.W. Shin, A.M.Stewart, J.B. Teitelbaum, J.H.Thorpe, S.F. Wood

Assistant Professors D.G. Anderson, C.P. Chen (*Research*), A. Hamilton, M. Harty (*Research*), S. Li, L. Masselink, K.H. Mead

Adjunct Instructors T. Jazweicki, P.Z. Marghella, N. McKelvey, J.A. Volarich

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
- Health Services Management and Leadership (HSML) (p. 1104)
- Public Health (PUBH) (p. 1265)

MASTER OF HEALTH ADMINISTRATION

Program Director L. Friedman

Mission

The Master of Health Administration program will develop leaders who possess the values, knowledge, and skills to achieve optimal delivery of healthcare.

Overview

Since its founding in 1959, the Master of Health Administration program has offered education in health services administration to help meet the growing need for skilled executives to manage health-related organizations and programs. Because it recognizes and responds to the fast-paced, dynamic changes occurring in the industry today, the program is well-positioned to prepare not only health care managers, but the health care leaders of tomorrow. An MHA degree from the Department of Health Policy and Management incorporates business and medical informatics training, knowledge of health care systems, management theory, ethics,

law, and policy, critical values in decision making, and much more.

The program's special strengths include an emphasis on experiential learning and community service, distinguished faculty, research collaborations, and relationships with policymaking and health care organizations in Washington, DC. Active alumni (<http://www.gwumc.edu/sphhs/alumni/hsmllaa>) and student (<http://www.gwumc.edu/sphhs/departments/hsmll/hsmllsa>) associations foster mentoring, networking, and other professional development opportunities.

The curriculum focuses on leadership and strategic management trends, quality and performance improvement, leadership skills, community health planning and advocacy, organizational theory, finance, and health law. The Program also offers residency and internship opportunities that allow students to apply their classroom knowledge in healthcare settings. Numerous seminar, conference, and networking opportunities are made possible through relationships with professional organizations and associations.

Goals

Graduates of the program will be able to:

- Effectively manage organizational change and promote organizational and clinical excellence;
- Manage health services organizations under alternative financing mechanisms;
- Lead and manage human resources in diverse organizational environments;
- Manage information resources to assist in effective decision making and clinical management;
- Use statistical, quantitative, and economic analyses in decision making; and
- Have the skills to improve both business and clinical outcomes of health services organizations.

COMPETENCIES

Broadly defined, the goal of the Master of Health Administration program is to provide health care delivery organizations with talented graduates who possess the knowledge, skills, and attitudes to deliver health services in the most effective and efficient manner possible. The Master of Health Administration degree is designed to provide students with the ability to develop and demonstrate leadership, communication and relationship management, business skills and knowledge, professionalism and healthcare knowledge applied across the widest possible spectrum of health care delivery organizations. Upon completion of the Master of Health Administration graduates will be competent to:

1. Lead and manage others, plan and implement change and engage in honest self-assessment.

Relevant courses:

HSML 6203	Introduction to Health Management
HSML 6213	Health Services, Marketing & Planning
HSML 6216	HumanResourcesMgt&OrgBehavior
HSML 6218	Sem-HlthServicesMgt&Leadership
HSML 6221	TransLdrshp/HealthServDelivery
HSML 6231	Management-Acute Care Hospital
HSML 6233	Delivery-Behav Health Services
HSML 6234	Physician Practice Management
HSML 6237	Managing/SkilledNursngFacility
HSML 6238	Ambulatory Care Management

2. Enhance and improve communication and relationship management within interpersonal communication, verbal and written communication, and team-based processes.

Relevant courses:

HSML 6202	Intro/Health Services Delivery
HSML 6203	Introduction to Health Management
HSML 6204	Quality&PerformancelImprovement
HSML 6212	CommunityHealth Mgt & Advocacy
HSML 6213	Health Services, Marketing & Planning
HSML 6216	HumanResourcesMgt&OrgBehavior
HSML 6218	Sem-HlthServicesMgt&Leadership
HSML 6221	TransLdrshp/HealthServDelivery
HSML 6231	Management-Acute Care Hospital
HSML 6237	Managing/SkilledNursngFacility

3. Demonstrate the breadth of core business skills and knowledge in the following areas:
- Solving business problems and decision making and project management.

Relevant courses:

HSML 6203	Introduction to Health Management
HSML 6204	Quality&PerformancelImprovement
HSML 6213	Health Services, Marketing & Planning

HSML 6218	Sem-HlthServicesMgt&Leadership
HSML 6231	Management-Acute Care Hospital
HSML 6246	Service Line & Project Mgt

- Quantitative skills, financial management, economic analysis and information and technology management.

Relevant courses:

REQUIREMENTS

Course Requirements

All MHA students enroll in 50 credits: Core Courses (31 credits), Electives (10-16 credits), and Field Experience (3-9 credits). There are two MHA focus areas that require the field experience of a Residency (9 credits): 1. Acute and Ambulatory Care Management; 2. Post-acute Care Management (includes Long Term care). There are three focus areas that require the field experience of an Internship (3 credits): 1. Information Systems and Financial Management; 2. Operations Management; 3. Strategic Management and Policy.

Prerequisites for admission into the MHA Program include an undergraduate course in introductory accounting and an introductory course in statistics earning a grade of a B or better.

Program Requirements

Core courses:

HSML 6202	Intro/Health Services Delivery
-----------	--------------------------------

HSML 6203	Intro to Health Management
-----------	----------------------------

HSML 6204	Quality&PerformanceImprovement
-----------	--------------------------------

HSML 6206	QuanMethds&Epid/HealthServices
-----------	--------------------------------

HSML 6207	HealthServicesInfoApplications
-----------	--------------------------------

Field experience:

Select one of the following areas:

Residency 1 Focus Areas:

HSML 6273 Residency

HSML 6274 Residency

HSML 6275 Residency

Acute and Ambulatory Care Management

Post-acute Care Management (including Long Term Care)

Internship Focus Areas:

HSML 6271 Field Problem Studies

Information Systems and Financial Management

Operations Management

Strategic Management and Policy

Graduation Requirements

1. Graduate Credit Requirement: 50 graduate credits are required.
2. Grade Point Requirement: A 3.0 (B average) overall grade point average is required.
3. Time Limit Requirement: The degree must be completed within five years.
4. Transfer Credit Policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the MHA, upon approval. Up to 18 credits may be transferred to the MHA from the Health Administration Generalist Certificate. Credits must have been earned from a CAHME accredited institution in the last 3 years with a grade point average of 3.0 or better.
5. Residency or Internship Requirement: Successful completion of a nine credit residency or three-credit internship.
6. Prerequisites: Undergraduate course in accounting and statistics with a grade of B or better.

MASTER OF HEALTH ADMINISTRATION - ONLINE/EXECUTIVE PROGRAM

Program Director L. Friedman

Mission

The Executive Master of Health Administration (MHA@GW) degree program will develop leaders who possess the values, knowledge, and skills to achieve optimal delivery of healthcare.

Overview

Since its founding in 1959, the Master of Health Administration program offers training in health services administration to help meet the growing need for skilled executives to manage health-related organizations and programs. Because it recognizes and responds to the fast-paced, dynamic changes occurring in the industry today, the program is well-positioned to prepare not only health care managers, but the health care leaders of tomorrow. An MHA@GW degree from the Department of Health Policy and Management incorporates business and medical informatics training, knowledge of health care systems, law, and policy, critical values in decision making, and much more.

The Department's special strengths include an emphasis on experiential learning and community service, distinguished faculty, research collaborations, and relationships with policy making and health care organizations in Washington, DC. Active alumni (<http://www.gwumc.edu/sphhs/alumni/hsmllaa>) and student (<http://www.gwumc.edu/sphhs/departments/hsmll/hsmllsa>) associations foster mentoring, networking, and other professional development opportunities.

Building on our 55 years of experience preparing health care leaders and our recent success in e-learning, the MHA@GW degree is designed for adult learners who possess either clinical or administrative experience in healthcare delivery. The MHA@GW is designed to be completed in two years but can be completed in five years. Classes are taught in a hybrid model combining online classes (ten weeks in length) and executive format intensive classes.

The MHA@GW curriculum focuses on two main themes. The first is developing the leadership and ethical skills needed for persons who seek to create highly effective healthcare organizations. Leadership and ethics will be taught throughout the curriculum. Eight online, integrated learning modules include: management and strategy; informatics and decision-science; finance; community and public health; economics and quantitative methods; quality improvement; law and policy; and a capstone seminar. The culminating activities for the MHA@GW are a field-based research project and completion of a leadership portfolio.

Goals

Graduates of the program will be expected to:

- Effectively manage organizational change and promote organizational and clinical excellence;
- Manage health services organizations under alternative financing mechanisms;
- Lead and manage human resources in diverse organizational environments;
- Manage information resources to assist in effective decision making and clinical management;
- Use statistical, quantitative, and economic analyses in decision making;

- Have the skills to improve both business and clinical outcomes of health services organizations; and
- Develop the skills to consistently use ethical decision making practices

COMPETENCIES

The goal of health services management and leadership is to provide health care delivery organizations with talented graduates who possess the knowledge, skills and attitude to deliver health services in the most effective and efficient manner possible. The Executive Master of Health Administration (MHA@GW) degree is designed to provide students with the ability to develop and demonstrate leadership, communication and relationship management, business skills and knowledge, professionalism and healthcare knowledge applied across the widest possible spectrum of healthcare delivery organizations. Upon completion of the MHA@GW in Health Services Management and Leadership, students will demonstrate competence to:

1. Demonstrate leadership by leading and managing others, planning and implementing change and engaging in honest self-assessment. Related courses: Modules 1 and 8 and immersions 1, 2 and 4
2. Enhance and improve communication and relationship management within interpersonal communication, verbal and written communication, and team based processes. Related courses: All modules, immersions, organizational research project and final portfolio
3. Demonstrate the breadth of core business skills and knowledge in the following areas:
4. Solving business problems and decision making, and project management. Related courses: Modules 1, 6 and 8 and immersion 2
5. Quantitative skills, financial management, economic analysis and information and technology management. Related courses: Modules 2, 3 and 5.
6. Legal principles, marketing, quality improvement, organizational dynamics and governance. Related courses: Modules 1, 6, 7, 8 and immersion 3
7. Apply the core elements of ethics and professionalism to improve management practice within health care delivery organizations. Related courses: All modules and immersions
8. Apply appropriate knowledge of healthcare policy issues and trends, healthcare personnel, standards and regulations and population health and assessment to optimize the delivery of services. Related courses: Module 4 and immersion 3.

REQUIREMENTS

Course requirements

All Department of Health Services Management and Leadership MHA@GW students enroll in 50 total credits. MHA@GW students must complete all eight online modules

along with four on-campus immersion classes. In addition, students complete an applied organizational research project and leadership portfolio.

Prerequisites for admission into the MHA@GW include an undergraduate course in introductory financial accounting and an introductory course in statistics. All MHA@GW students must have a minimum of three years of professional experience in the healthcare sector and be currently employed by a healthcare related organization.

Please refer to the MHA@GW website (<http://mha.gwu.edu>) for further information.

MASTER OF PUBLIC HEALTH IN THE FIELD OF HEALTH POLICY

Program Director T. Burke

Practicum Directors L. Cartwright-Smith, T. Burke

Mission Statement

The Department of Health Policy of the Milken Institute School of Public Health is an intellectual and practice-oriented community in the Nation's capital dedicated to advancing innovative and effective health policy education, research, and service to improve public health and health services domestically and globally.

We are committed to:

- offering a cutting-edge, multidisciplinary curriculum that provides students with deep content knowledge and the analytic, communication, and professional skills needed to be the next generation of health policy leaders;
- conducting rigorous multidisciplinary research that addresses significant health challenges, is objective, and is translated to inform and impact health policy and public health practice;
- being a trusted resource for shaping and advancing health policy options because of our research rigor, the real-world health policy leadership experiences of our faculty and staff, our deep expertise regarding a wide range of policy issues, and our exceptional students;
- leveraging our unique location which allows for strong collaborations with health policy leaders and practitioners in Washington, D.C.;
- improving the health and health care of underserved and vulnerable populations;
- learning from the diversity among our faculty, staff, and students in terms of background, experience, and thought.

Overview

The Department of Health Policy is the home for health policy studies and research at the Milken Institute School of Public Health (SPH). The Department focuses on virtually all facets of U.S. health policy related to both public health and health

services, and emphasizes preparing students to understand and analyze health policy matters in a broad, cross-cutting, and real-world context. Among schools of public health, the Milken Institute SPH Department of Health Policy is unique, having been created to take maximum advantage of its location in Washington, DC, the nation's health policy-making epicenter. The MPH in Health Policy is for students who wish to develop in-depth policy analysis skills for use in various practice settings, including both federal and state levels of government, private-sector health policy consulting, and not-for-profit advocacy. Additionally, this program is available to GW law students (the JD/MPH and LLM/MPH programs), lawyers seeking to develop expertise in all facets of health policy and practice, and to GW medical students (the MD/MPH and PA/MPH programs) who wish to enhance their clinical training with a thorough understanding of health policy.

COMPETENCIES

A. Knowledge Domain: Graduates of the program will have a thorough understanding of public health and health care system issues, specifically the following areas:

- The various theories of policymaking and politics.

Related courses:

PUBH 6015	Culminating Experience
PUBH 6315	Intro-Health Policy Analysis
PUBH 6320	Advanced Health Policy Analysis
PUBH 6325	Federal Policymaking and Policy Advocacy

- Comparative models of structuring and financing public health activities and health care services, with emphasis on the mechanisms employed in the U.S., including private health insurance, Medicare, Medicaid, managed care, and directly-financed services.

Related courses:

PUBH 6305	Fundamentals for Health Policy: Public Health and Health Care
PUBH 6325	Federal Policymaking and Policy Advocacy
PUBH 6335	Public Health and Law

- The complex systems for delivery of public health and health care services, including facilities, workforce, technology, and the incentives at work in these systems.

Related courses:

PUBH 6305	Fundamentals for Health Policy: Public Health and Health Care
-----------	---

PUBH 6320	Advanced Health Policy Analysis
PUBH 6325	Federal Policymaking and Policy Advocacy

- The methods and mechanisms for determining the benefits of public health and health care services, including measures of health outcomes and quality, measuring population health and disparities, public health surveillance, the use of HIT, and issues of privacy and access to data.

Related courses:

PUBH 6242	ClinicalEpid&Decision Analysis
PUBH 6305	Fundamentals for Health Policy: Public Health and Health Care
PUBH 6310	Statistical Analysis in Health Policy
PUBH 6320	Advanced Health Policy Analysis
PUBH 6335	Public Health and Law

- The systems and activities in place to provide a safety net for vulnerable populations and reduce health disparities, including community health centers, major federal programs, and public health clinics, and related concepts such as uncompensated care and disparities in access.

Related courses:

PUBH 6305	Fundamentals for Health Policy: Public Health and Health Care
PUBH 6325	Federal Policymaking and Policy Advocacy
PUBH 6330	Health Services and Law

- The framework of laws and regulations governing public health and health care services, including constitutional rights and limitations, federal and state statutes, regulations, judicial opinions, and other public policy instruments.

Related courses:

PUBH 6305	Fundamentals for Health Policy: Public Health and Health Care
PUBH 6325	Federal Policymaking and Policy Advocacy
PUBH 6330	Health Services and Law
PUBH 6335	Public Health and Law

B. Analysis Domain: Graduates of the program will have skills in policy analysis, legal analysis, economic analysis, statistical analysis and population health assessment, and will be able to:

Policy Analysis:

- Locate, assess, appropriately use and synthesize information relevant to key issues in health policy, including evidence related to the legislative, regulatory and judicial processes, peer-reviewed literature, and the “gray literature” produced by think tanks, research organizations, and government agencies.

Related courses:

PUBH 6305	Fundamentals for Health Policy: Public Health and Health Care
PUBH 6315	Intro-Health Policy Analysis
PUBH 6320	Advanced Health Policy Analysis
PUBH 6325	Federal Policymaking and Policy Advocacy
PUBH 6330	Health Services and Law
PUBH 6335	Public Health and Law
PUBH 6340	Health Economics and Finance
PUBH 6014	Practicum

- Understand and critique the research design/methods of different types of applied policy analyses, including program evaluations, cost benefit/cost effectiveness studies, and forecasting/simulation models.

Related courses:

PUBH 6242	ClinicalEpid&Decision Analysis
PUBH 6310	Statistical Analysis in Health Policy
PUBH 6315	Intro-Health Policy Analysis
PUBH 6320	Advanced Health Policy Analysis
PUBH 6335	Public Health and Law
PUBH 6340	Health Economics and Finance

- Apply the core elements of a sophisticated policy options analysis to key issues in health care and public health.

Related courses:

PUBH 6014	Practicum
PUBH 6015	Culminating Experience
PUBH 6315	Intro-Health Policy Analysis

PUBH 6320 Advanced Health Policy Analysis

PUBH 6325 Federal Policymaking and Policy Advocacy

PUBH 6335 Public Health and Law

PUBH 6340 Health Economics and Finance

- Design and implement process, impact and economic assessments of health programs and policies that have been implemented.

Related courses:

PUBH 6015	Culminating Experience
PUBH 6242	ClinicalEpid&Decision Analysis
PUBH 6320	Advanced Health Policy Analysis
PUBH 6325	Federal Policymaking and Policy Advocacy

REQUIREMENTS

All MPH students admitted to the Health Policy program enroll in SPH Core Courses (15 credits), Program-Specific Courses (17 credits) and Elective Courses (9 credits). The 45-credit total requirement includes a Practicum (2 credits) in which students apply their didactic education by working for credit for an organization that engages in health policy analysis and a Culminating Experience (2 credits). Students may wish to give greater emphasis to either public health or health services policy as they develop their course of study with their advisor.

Program Requirements

Required core courses (15 credits):

PUBH 6001	BiologicalConcepts/PublicHlth
-----------	-------------------------------

PUBH 6002	Biostatistical Applic for PubH
-----------	--------------------------------

PUBH 6003	Prin & Practice/Epidemiology
-----------	------------------------------

PUBH 6004	Environmental and Occupational Health in a Sustainable World
-----------	--

PUBH 6006	Mgt & Policy Approaches to PH
-----------	-------------------------------

PUBH 6007	Social&BehaviorAppr-Pub.Hlth
-----------	------------------------------

Required program-specific courses (17-18 credits):

PUBH 6305	Fundamentals for Health Policy: Public Health and Health Care
-----------	---

PUBH 6310	Statistical Analysis in Health Policy
-----------	---------------------------------------

PUBH 6315	Introduction to Health Policy Analysis
-----------	--

PUBH 6325	Federal Policymaking & Policy Advocacy
-----------	--

PUBH 6330	Health Services and Law
-----------	-------------------------

or PUBH 6335	Public Health and Law
--------------	-----------------------

PUBH 6340	Health Economics and Finance
-----------	------------------------------

or PUBH 6242 & PUBH 6243

Advanced health policy requirement

One of the following:

-----------	--------------------

Elective courses (8-9 credits):

A personalized combination of elective courses

Practicum and culminating experience courses (4 credits):

PUBH 6014	Practicum
-----------	-----------

PUBH 6015	Culminating Experience
-----------	------------------------

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average

4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

MASTER OF SCIENCE IN THE FIELD OF HEALTH POLICY

The Master of Science (M.S.) degree in Health Policy is designed to prepare students to enter academic or research careers in health policy. The program prepares candidates for subsequent doctoral study or for research roles in health-delivery systems, regulatory and other government agencies, or university settings. The program emphasizes individual study design and allows students to focus their training in particular areas of health policy (for example, long-term care policy, maternal and child health policy, and health services research and policy). The M.S. is also suitable as a terminal degree for students, such as physicians in fellowship training, who wish to gain research skills.

REQUIREMENTS

Course Requirements

All MS-Health Policy students take 32-33 core credits and 15-16 elective credits. The 48-credit requirement includes a Master's Thesis. Students may emphasize either public health or health services policy as they develop their course of study with their advisor.

Program Requirements

Public health core requirements (12 credits):

PUBH 6002	Biostatistical Applic for PubH
PUBH 6003	Prin & Practice/Epidemiology
PUBH 6006	Mgt & Policy Approaches to PH
PUBH 6242 & PUBH 6243	ClinicalEpid&Decision Analysis and Topics:ClinicalEpi&DecAnalysis

Program-specific requirements (20-21 credits):

PUBH 6013	Master's Thesis
PUBH 6305	Fundamentals for Health Policy: Public Health and Health Care
PUBH 6310	Statistical Analysis in Health Policy
PUBH 6315	Introduction to Health Policy Analysis

PUBH 6330 Health Services and Law

or PUBH 6335 Public Health and Law

PUBH 6340 Health Economics and Finance

PUBH 6345 Health Policy Research Design

Advanced health policy analysis requirement:

PUBH 6320 Advanced Health Policy Analysis

Or one of the following:

EMSE 6740 Systems Thinking and Policy Modeling I

PPPA 6015 Benefit-Cost Analysis

PPPA 6016 Public and Nonprofit Program Evaluation

PUBH 6247 Design of Health Studies

PUBH 6249 StatPackages/DataMgt&DataAnlys

PUBH 6411 Global Health Qualitative Research Methods

PUBH 6501 Program Evaluation

PUBH 6530 Qual Methods/Hlth Promotion

PUBH 6533 Design of Comm Health Surveys

PUBH 8417 Qualitative Research Methods & Analysis

PUBH 8419 Measurement in Public Health & Health Services

Electives (15-16 credits):

Any SPH graduate course

Graduation Requirements

1. Graduate Credit Requirement: 48
2. Course Requirements: Successful completion of the core and elective courses, including completion of the Master's Thesis, are required.
3. Grade Point Requirement: A 3.0 (B average) overall grade point average is required.
4. Time Limit Requirement: The degree must be completed within five years.
5. Transfer Credit Policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the MS. Credits must have been earned from an accredited institution in the last 3 years with a grade point average of 3.0 or better.

HEALTH SERVICES ADMINISTRATION SPECIALIST

Program Director K. Darr

Mission

The Health Services Administration Specialist degree will develop leaders who possess the values, knowledge, and skills to achieve optimal delivery of healthcare. The degree is designed for individuals who have earned a post-baccalaureate degree and wish to either change careers by gaining knowledge and skills in health services administration or to upgrade their formal knowledge and skills in healthcare administration to include the latest advancements in the field.

Applicants must hold a post-baccalaureate degree from an accredited college or university.

REQUIREMENTS

Course Requirements

All Health Services Administration Specialist degree candidates complete 30 graduate credits of approved coursework.

1. Thirty graduate credits are required. The Specialist has one required course: HSML 6270 Research-Health Services Admin (Independent Study). All other courses are chosen in consultation with the program director.
2. The program director must pre-approve all course selections and sequencing by developing a "program of study" with the student prior to initial registration. Specialist candidates must meet with the program director each semester before registration; all changes to the program of study must be approved.
3. The program director may approve up to eight graduate credits that have not been applied to a previous graduate degree as transfer credit into the Specialist degree program. Course(s) must be relevant to the Specialist degree; credit must have been earned from an accredited institution within the past three years with a grade of B, or better.
4. Grade Point Requirement: A 3.0 (B average) overall grade point average, or better, is required.
5. Time Limit Requirement: The degree must be completed within four years.

Program Requirements

DOCTOR OF PHILOSOPHY IN THE FIELD OF PUBLIC POLICY AND ADMINISTRATION (HEALTH POLICY TRACK)

Students in the Doctor of Philosophy in the field of public policy and administration (health policy track) are prepared to analyze a broad array of health policy issues, such as assessing health and health needs, financing health services, health care reform, global health, care for underserved populations and long-term care. A multidisciplinary approach to these issues brings together the disciplines of economics, philosophy, sociology, law, public health, and health management.

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Visit the program webpage (<https://tspppa.gwu.edu/phd-field-health-policy>) for additional information.

REQUIREMENTS

Students who choose this field will be prepared to analyze a broad array of health policy issues. These problems include, for example, assessing health and health needs, financing health services, health care reform, global health, care for underserved populations and long-term care. A multidisciplinary approach to these issues will combine the curricula of economics, philosophy, sociology, law, public health and health management.

DOCTOR OF PUBLIC HEALTH IN THE FIELD OF HEALTH POLICY

Program Directors A. Markus, P. Lantz

Mission

The DrPH Health Policy Specialty Field focuses on understanding and learning to apply to complex and real world problems the policy framework of public health and health care. Particular emphasis is placed on areas affecting medically underserved and vulnerable populations. The specialty field allows candidates to work at the nexus of health policy, public health practice, and health services research.

Goals

The goal of the health policy specialty field is to create doctoral-level public health professionals who are uniquely equipped to provide real-world leadership at the national and state levels in all phases of public health, health care, and health policy development and implementation. The objectives of this specialty field are to:

- Provide advanced training on cutting edge issues in health policy;

- Equip candidates with the research and analytic methods to conduct the types of advanced analysis that can make a real difference in health care and public health.

Admissions Requirements

The Doctor of Public Health Program is designed for mid-career professionals seeking to become public health leaders. Applicants who have completed an MPH degree from a Council of Education for Public Health (CEPH) accredited program are strongly preferred for admission to the Program. Alternatively, applicants with a master's degree in another field may indicate their relevant training, research experience, or educational background comparable to the MPH. Doctoral applicants admitted without an MPH will be required to take additional course work at the graduate level that does not apply toward the minimum 48 credits required for the DrPH. Qualified applicants with degrees from institutions in foreign countries are also eligible for admission. All applicants must submit scores from the Graduate Record Exam (GRE) taken within five years of the date of application. Because admission to this program is highly selective, successful applicants must have competitive academic credentials and substantial prior public health professional work experience related to the specialty field to which they are applying.

Program Policies and Procedures

For program policies and procedures, please refer to the Doctor of Public Health Handbook and other resources located on the DrPH in the field of Health Policy website (<http://publichealth.gwu.edu/programs/health-policy-drph>).

GRADUATE CERTIFICATE IN HEALTH ADMINISTRATION GENERALIST

Program Director L. Friedman

Program Advisor L. Friedman

The Health Administration Generalist certificate develops health sector leaders, innovators and managers who are dedicated to advancing the health of local, national, and global communities. Combining the Master's degree in one of the academic departments with the Health Administration Generalist Graduate Certificate uniquely positions graduates for careers that require both breadth and depth of knowledge and skills in health services. This certificate program is open to applicants with a Master's degree or higher who may wish to gain knowledge and skills in health services management. Applicants without Master's degrees (e.g., public health nursing, RN) may be eligible depending upon their professional experience in public health. The Health Administration Generalist Certificate is tailored to the individual's professional goals. An advisor is assigned to each student to develop the program of study.

REQUIREMENTS

The following requirements must be fulfilled: 18 credits.

Required

18 credits from the following (with advisor approval)

HSML 6202	Intro/Health Services Delivery
HSML 6203	Introduction to Health Management

GRADUATE CERTIFICATE IN HEALTH POLICY

Program Director T. Burke

For those seeking a solid foundation in the substance of health policy and the skills of health policy analysis, but who do not wish to undertake the full Master of Public Health degree program, the Milken School SPH Department of Health Policy and Management offers an 18-credit graduate certificate. Designed to provide both basic and advanced-level skills in policy research and analysis, the program curriculum includes elective course offerings, which, with their advisors' assistance, students use to craft a personalized course of study to fit their particular needs and interests.

The graduate certificate in health policy may be taken on its own; as a supplement to a Master of Public Health degree from a different Milken Institute SPH department; or as a supplement to a graduate degree from another school. When pursued as a supplement to the master's degree from another Milken Institute SPH department, 6 credits from the M.P.H. degree may be counted toward the 18 credits required for the certificate, allowing students to complete both the degree and certificate program simultaneously with 57 credits.

Specific admission requirements are shown on the Graduate Program Finder.

Visit the program webpage (<http://publichealth.gwu.edu/programs/health-policy-certificate>) for additional information.

REQUIREMENTS

Required

PUBH 6002	Biostatistical Applic for PubH
PUBH 6305	Fundamentals for Health Policy: Public Health and Health Care
PUBH 6310	Statistical Analysis in Health Policy
PUBH 6315	Introduction to Health Policy Analysis
PUBH 6320	Advanced Health Policy Analysis

Electives

Six credits of elective courses in health policy

Graduation Requirements

- Graduate credit requirement: 18 graduate credits are required.
- The program director/advisor must pre-approve all course selections and course sequencing by developing a "program of study" prior to the student's initial registration. Graduate certificate students meet with their advisor each semester before registration. All changes in this program

HSML 6204	Quality&PerformanceImprovement
HSML 6206	QuanMethds&Epid/HealthServices
HSML 6207	HealthServicesInfoApplications
HSML 6208	Medical Informatics
HSML 6209	Health Services Finance
HSML 6210	Hlth Serv FinancI Applications
HSML 6211	Health Economics
HSML 6212	CommunityHealth Mgt & Advocacy
HSML 6213	Health Services, Marketing & Planning
HSML 6215	Health Law for Managers
HSML 6216	HumanResourcesMgt&OrgBehavior
HSML 6218	Sem-HlthServicesMgt&Leadership
PUBH 6004	Environmental and Occupational Health in a Sustainable World
Other courses may be used to fulfill the requirement with advisor approval.	

Graduation Requirements

1. The Program Director/Advisor must pre-approve all course selections and course sequencing by developing a "program of study" prior to the student's initial registration. Graduate Certificate students meet with their advisor each semester before registration. All changes in this program of study must be pre-approved by the Program Director/ Advisor.
2. Course Requirements. Since most graduate certificate students are currently enrolled in an MPH program or have previously earned a graduate degree, most course credits will be selected from the program-specific course list. Under no circumstances may a certificate student enroll in fewer than 9 credits of program-specific courses.
3. Grade Point Requirement. A 3.0 (B average) overall grade point average or better is required for the award of the certificate
4. Time Limit Requirement. The certificate must be completed within 2 years.
5. Transfer Credit Policy. The Program Director/Advisor may approve up to 4 graduate credits that have not been applied to a previous graduate degree to be transferred to the Graduate Certificate. The course(s) must be relevant to the Graduate Certificate. Credits must have been earned in the last 3 years from an accredited institution with a grade point of 3.0 or better.

of study must be pre-approved by the program director/ advisor.

- Successful completion of the required on-line CITI human subject research training modules.
- Successful completion of 8 Professional Enhancement hours.
- Grade point requirement: A 3.0 (B average) overall grade point average or better is required.
- Time limit requirement: The certificate must be completed within 2 years.
- Transfer credit policy: The program director/advisor may approve up to 4 graduate credits that have not been applied to a previous graduate degree to be transferred to the graduate certificate. The course(s) must be relevant to the graduate certificate. Credits must have been earned in the last 3 years with a grade point average of 3.0 or better.

GRADUATE CERTIFICATE IN LONG-TERM CARE

Program Director R. Burke

The National Association of Boards of Licensure for Long Term Care has accredited the program in long term care management. More and more states require that for those seeking nursing home administrator licenses, only courses in programs with this accreditation are considered to meet the educational requirements of the state licensure standards. We are excited to be one such program. Our certificate is 18 credits all of which can be applied to the MHA degree.

REQUIREMENTS

Course Requirements

1. Graduate credit requirement. 18 graduate credits are required.
2. The program director/advisor must pre-approve all course selections and course sequencing by developing a "program of study" prior to the student's initial registration. PREVENTION AND COMMUNITY HEALTH

The Department of Prevention and Community Health is concerned with social and behavior change for the health and well-being of people around. Its programs focus on prevention and the promotion of health and well-being with the active participation of individuals and communities, and are appropriate for students who are interested in putting into practice the latest public health research, or making significant scholarly contributions to the evidence base of public health. Master of Public Health students study four interrelated fields—community-oriented primary care; health promotion; maternal and child health; and public health communication and marketing, while doctoral students develop innovations in the science of health behavior.

GRADUATE

Master's programs

- Master of Public Health in the field of community oriented primary care (p. 815)
- Master of Public Health in the field of public health communication and marketing (p. 822)
- Master of Public Health in the field of health promotion (p. 819)
- Master of Public Health in the field of maternal and child health (p. 821)

Doctoral program

- Doctor of Public Health in the field of health behavior (p. 825)

FACULTY

Professors J.F. Cawley, W.H. Dietz, Jr. (*Visiting*), W.D. Evans, K.A. Horn, R.N. Rimal (*Chair*)

Associate Professors L.C. Abrams, M.C. Edberg, K.A. McDonnell, M.A. Napolitano, O.A. Price, K.M. Roche, C.H. Sparks, F.Spielberg, M. Turner, A.N. Vyas

Assistant Professors E.L. Andrade (*Research*), J. Bingenheimer, C. Harrington, E.B. Parrish, M. Ruiz (*Research*)

Adjunct Professor T. Henry

Adjunct Instructor A.Franz

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PUBH 2112. Principles of Health Education and Health Promotion. 3 Credits.

Social and behavioral theories underlying health promotion program development and evaluation. Practical applications in a variety of domestic and global public health settings. Prerequisite or corequisite: PUBH 1101.

PUBH 2113. Impact of Culture upon Health. 3 Credits.

Relationships between cultural values and the development of modern health systems based on Western models of health care practice. Reliance upon traditional forms of health care. Examples of successful incorporation of traditional practices into evolving health care systems.

PUBH 6001. Biological Concepts in Public Health. 2 Credits.

An overview of current knowledge about biological mechanisms of major diseases causing death and disability in the United States and globally; understanding and interpreting the reciprocal relationships of genetic, environmental, and behavioral determinants of health and disease in an ecologic context; analyzing, discussing, and communicating biologic principles of disease from a public health perspective.

PUBH 6500. Planning and Implementing Health Promotion Programs. 3 Credits.

Students develop skills to effectively plan, design, and implement programs that address public health problems for defined populations in a variety of settings. Prerequisites: PubH 6007.

PUBH 6501. Program Evaluation. 3 Credits.

The knowledge, competencies, and skills needed to plan and implement evaluations of public health programs in a variety of settings. Types of program evaluation, including needs assessment, process evaluation, quantitative and qualitative monitoring of outputs, outcomes, and impact. Prerequisites: PUBH 6002, PUBH 6003, PUBH 6007, PUBH 6435, and PUBH 6500.

PUBH 6502. Practical Data Analysis: PCH. 1 Credit.

Practical aspects of dataset creation, data management, rudimentary statistical analysis & tabular/graphical presentation of results in the user-friendly environments of PASW (formerly SPSS) and MS Excel. Students will create codebooks, enter & clean data, derive new variables from existing ones, choose appropriate analytical techniques & implement them, graph & tabulate results, and document & protect work. Examples will be drawn from commonly-encountered situations in prevention and community health, such as needs assessments & program evaluations. Fall, Spring, Summer.

PUBH 6503. Introduction to Public Health Communication and Marketing. 3 Credits.

Communication theories and methods used in promoting health and preventing disease. Theoretical background in communication and behavior science and practical communication development methods. Prerequisite: PubH 6007.

PUBH 6510. COPC Principles and Practice. 3 Credits.

Theory and practice of community-oriented primary care, including an extended small group exercise carrying out a COPC project with a simulated community using Web-based data sets.

PUBH 6512. Comm-Oriented Primry Care Pol&Iss. 2 Credits.

Advanced work on COPC methods and policy, focusing on issues related to the provision of health care in underserved communities. Prerequisite: PubH 6510.

PUBH 6513. Community Health Management. 2 Credits.

Management and development of community health services. Builds upon principles for management and community-oriented primary care. Prerequisite: PubH 6510, 6003.

PUBH 6514. Preventing Health Disparities. 2 Credits.

Provides students with an understanding of how social, political, and economic factors contribute to disparities (e.g. racial, ethnic, gender, and geographical) in health and health care and how to use evidence-based approaches to prevent or address health disparities.

PUBH 6515. High Risk&Special Populations. 2 Credits.

Provides students with an overview of the methods to plan, implement and evaluation health promotion and education programs targeted towards high risk and special populations. The course will review the socioeconomic, political-economic, cultural and psychosocial factors of populations who are considered to be at high risk for specific health problems and efforts that have been addressed in current health promotion programs. Prerequisite: PubH 6007.

PUBH 6516. Community Health InfoResources. 2 Credits.

COPC and community health promotion require diverse information skills in order to assess community needs and strengths, determine priority health issues, analyze data, plan interventions, and evaluate programs. This course will introduce students to the information resources useful in planning and implementing COPC and community health projects that address racism. The selected resources will support methods for defining a community, characterizing a community's social and health characteristics, investigating a prioritized problem, and developing programs and solutions. Students will learn how to choose resources, search them, and consider bias in information sources.

PUBH 6530. Qualitative Methods in Health Promotion. 2 Credits.

Application of qualitative methods in the development of health promotion interventions, evaluations, and research. Collecting and analyzing qualitative data through participant observation, interviewing, group methods, and case studies. Prerequisite: PUBH 6007.

PUBH 6531. HlthPromotion/HlthCareSettings. 2 Credits.

Behavioral change counseling and training skills to improve health by changing individuals' behaviors and by developing training materials for use with providers, health professionals and high risk groups. This is an advanced course for second year students. Prerequisite: PubH 6007, 6500.

PUBH 6532. Commnty Org,Devlpmnt&Advocacy. 3 Credits.

Educates health promotion practitioners in how to organize community groups to promote health. The focus is on learning how to use resources available in the community to advocate change. Prerequisite: PubH 6007.

PUBH 6533. Design of Comm Health Surveys. 2 Credits.

This course teaches students how to frame questions in health promotion surveys using sound principles of questionnaire design with emphasis on reliability and validity. Students learn survey design principles and methods and how to analyze survey data.

PUBH 6534. Comm-Based Participatory Res. 1 Credit.

Students learn how to conduct community research in collaboration with community leaders and residents. This course emphasizes the principles of CBPR for addressing health promotion issues in communities including community needs and administrative and policy changes.

PUBH 6535. Promotion of Mental Health. 2 Credits.

Increases understanding about issues in mental health promotion. The emphasis is on mental health as a public health issue and linkages between individual mental health and the environment. Prerequisite: PubH 6007.

PUBH 6536. Workplace Health Promotion. 2 Credits.

Planning, management and evaluation of programs designed to serve employees' needs, promotion of employee health and reduction of health care costs in the workplace. Prerequisite: PubH 6007.

PUBH 6537. Health Promotion & Aging. 2 Credits.

Introduces students to the basic health aspects of the aging process and special health promotion needs for this group. Problems of aging and public health solutions for older Americans will be examined. Students will be able to define the public health concerns for aging Americans, how aging is affected by a multitude of factors, identify health promotion strategies to assist in reaching out to this population and develop methods of collaboration with agencies and organizations to improve the health of the aging population. Prerequisite: PubH 6007.

PUBH 6550. Maternal & Child Health I. 3 Credits.

Public health issues affecting the health and well-being of women, children, and families. A multidisciplinary perspective that integrates the biological, demographic, epidemiological, economic, behavioral, social, cultural and environmental aspects.

PUBH 6551. Maternal & Child Health II. 3 Credits.**PUBH 6552. Women's Health. 2 Credits.**

Issues of women's health through the life cycle. The process of critically evaluating women's health research and issues.

PUBH 6553. Adolescent Health. 2 Credits.

Issues of physical, mental, and social development and their bearing on the health of adolescents, with special emphasis on prevention.

PUBH 6554. Children & Youth/Special Needs. 2 Credits.

In order to place children and youth with special needs into a public health framework, this course presents an introduction to and an overview of children and youth with special needs due to a developmental disability. Many aspects of developmental disability will be addressed including 'concept' and definitions of disability, causes, epidemiological considerations, and development of federal legislation. The scope and range of developmental disabilities will be reviewed along with classification schemes. Both national and international distributions will be considered from a sociopolitical viewpoint.

PUBH 6555. Reproductive Health: US & Global Perspective. 2 Credits.

Reproductive health from a variety of public health perspectives, from defining reproductive health, past perspectives, needed improvements, and the factors that influence reproductive health.

PUBH 6556. Maternal & Child Nutrition. 2 Credits.

Covers the nutritional needs of women during the child bearing years, infants, children and adolescents. The course emphasizes the life course approach to nutrition and has a special emphasis on the effects of diet during infancy on obesity and degenerative diseases in later life. Students will examine the biological basis of nutrition, identify risk factors associated with poor nutrition in individuals and populations and evaluate domestic and international programs. Summer (1-credit) and Spring (2-credits).

PUBH 6557. Child Development & Public Health. 2 Credits.

Examination of the development of children from a public health perspective and provide a detailed examination of the indicators of children's health that are needed to assist public health professionals improve children's health.

PUBH 6558. Women, Gender and Health. 2 Credits.

Focuses on gender as a social determinant of health. Emphasis will be placed on examining the frameworks that are used in public health research to understand gender-based issues and how these frameworks affect the types of programs and intervention efforts developed.

PUBH 6559. HIV Prevention: Interdisciplinary Approach. 2 Credits.

Provides an interdisciplinary overview of HIV prevention research from the behavioral, biological and biomedical perspective. Students are encouraged to approach the assignments and discussions from their own particular expertise and career interests/goals.

PUBH 6560. School Health and Safety. 1,2 Credit.

Examines the history, organization, financing, and politics of school health programs. It will provide an overview of the core components of school health as defined by the Center for Disease Control and Prevention: health services, health education, physical education, nutrition services, counseling or mental health, school environmental health, health promotion, and family/community involvement. Summer (1 credit); Spring (2 credits).

PUBH 6561. Maternal & Child Health Policy Analysis. 2 Credits.

Provides instruction in maternal and child health policy in the U.S. with a particular emphasis on policies related to the organization, financing, delivery, and quality oversight of personal health services for mothers and children.

PUBH 6562. Physical Activity and Obesity Interventions: From the Individual to the Environment. 2 Credits.

This course will broadly examine the public health issues related to physical activity and obesity, particularly as they relate to solutions for addressing individual factors and the obesogenic environment. Students will gain a further understanding of the social, physiological, behavioral, and environmental factors related to both obesity and physical activity. The course will focus on examining multiple levels of solutions, specifically: 1) individual and behavioral interventions; 2) school-based and community-level interventions; 3) environmental interventions; 4) policy-level interventions. Students will be expected to critically evaluate the necessary components of interventions, and apply that knowledge to future programmatic efforts.

PUBH 6570. Advanced Public Health Communication: Theory & Practice. 3 Credits.

Focuses on the use of communication to positively influence people's – and population's – understanding of health information, decision-making, and health behavior. In this skills-based course students will study, and in a group project apply, a range of theories and techniques germane to effective message design and delivery. Prerequisite: PubH 6503.

PUBH 6571. Social Marketing: Theory and Practice. 3 Credits.

The use of marketing to change the behavior of people, populations, and policy makers in ways that are in their, and society's, best interests. Students in this skills-based course study and work in teams to apply a range of marketing strategies to a real-world situation. Prerequisites: PUBH 6503.

PUBH 6572. Marketing Research for Public Health. 3 Credits.

The use of marketing research techniques used to better understand customers of public health programs in order to improve program design, implementation, and effectiveness. A range of qualitative and quantitative techniques are studied for their relevance to program planning, development, and continuous improvement.

PUBH 6573. Media Advocacy for Public Health. 3 Credits.

Focuses on the use of communication to positively influence public policy and public opinion. In this skills-based course students will study and apply a range of theories and techniques germane to the policy advocacy process. Prerequisite: PubH 6503.

PUBH 6574. Pub Hlth Branding Theory&Pract. 2 Credits.

This course focuses on the use of branding in the public health and social sectors. Learning from the commercial sector, we will examine how to brand behaviors as well as products and services. We will review branding methods, examine research on branding and its effectiveness, and build skills in branding for public health objectives.

PUBH 6575. CommunSkills for PubHProfsnls. 1 Credit.

Helps students develop writing and oral presentation skills through intensive, interactive training, practice, and feedback. Provides participants with a solid foundation for all forms of public health and other scientific and technical written and oral communication.

PUBH 6590. Intro Social Entrepreneurship. 2 Credits.

Examine innovative organizations created to improve people's lives and contribute to improved social & economic conditions. Course emphasis on how such organizations are started, how they are sustained, and the various business models that are adopted to achieve an organizational mission.

PUBH 6591. P.A./M.P.H. Clinal Leadership Seminar. 1 Credit.

For first-year physician assistant and master of public health program students, an orientation to their roles as health professionals. Special emphasis on preventive and community medicine.

PUBH 6599. Topics in PCH. 1-3 Credits.

In-depth examination of a particular facet of prevention and community health. Topics and prerequisites vary.

MASTER OF PUBLIC HEALTH IN THE FIELD OF COMMUNITY ORIENTED PRIMARY CARE

Program Director F. Spielberg

Practicum Director K. Pomerantz

Mission Statement

The Community Oriented Primary Care program at the Milken Institute School of Public Health offers Master of Public Health (MPH) and Graduate Certificate programs designed to train health professionals and public health practitioners to implement and evaluate evidence-based interventions to improve community health, clinical care outcomes, and patient experience, while lowering health care costs and decreasing health disparities.

COPC

The Community Oriented Primary Care (COPC) program trains future health care innovators in the methods of COPC which provide skills to conceptualize, implement, evaluate, and disseminate interventions that bridge public health and clinical medicine. COPC begins by teaching practitioners methods to fully understand the needs of communities, health care providers, and policy makers. Concurrently skills are

developed to read and interpret literature to inform future intervention design. With this in-depth understanding, COPC practitioners learn to work with stakeholders to prioritize interventions that will have a high likelihood of improving health outcomes and patient experience while lowering health care costs and decreasing health disparities. COPC practitioners learn to conduct in-depth assessments which help to shape intervention design and serve as baseline data to evaluate intervention impact. Intervention skills are acquired that include implementation of social marketing campaigns, advocacy campaigns, mobile health interventions, individual brief behavioral interventions, peer interventions, quality improvement projects using data from electronic health records, structural interventions to impact health behaviors, and health system innovations to improve the ability of community based organizations to educate, test, and link to care patients with preventable and chronic health conditions. Evaluation skills are acquired that include analysis of qualitative, quantitative, and cost data. Dissemination skills are acquired to take best practices to scale. Through experiential learning COPC practitioners will develop the skills necessary to lead health improvement projects in community, health department, academic, and clinical settings.

Goals

The following are goals of this educational program:

- Provide the knowledge and skills necessary to implement a COPC program
- Provide an analytical framework for evaluating community-based interventions using the principles and methods of COPC as a reference.
- Provide opportunities for COPC practice, especially within vulnerable communities
- Create health and public health practitioners with skills necessary to excel in the following positions:
 - Clinic Quality Improvement Specialist (clinic setting)
 - Patient Centered Medical Home team leader (clinic setting)
 - Supervisor of patient care coordination (clinic or MCO setting)
 - Community health specialist (community, clinic or public health setting)
 - Health promotion specialist (community or clinic setting)
 - Supervisor of Community Health Worker program (community or clinic setting)
 - Community Health Research coordinator (academic, clinic or community setting)
 - Director of community clinic or community health organization (With dual health and MPH degree)

Background

COPC provides the bridge between clinical medicine and public health, in which the community is the focal point in the delivery of health care. It provides a conceptual and

methodological framework to rationalize, organize, and adapt available resources to the delivery of health services. The methods are essential to the organized delivery of health care in community based practices, organizations engaged in managed care, and responsive governmental health systems.

The basic concepts of COPC were initially implemented in South Africa during the early 1940's by Sidney and Emily Kark with the creation of community health centers. These centers promoted a reorientation of health services at the community level through a unique linkage between individual clinical care and public health. They served as a laboratory for teaching and training health professionals.

Since that time, COPC has been taught and practiced in a number of settings around the world. Significantly it has been an important element in the Community Health Center movement, the Indian Health Service, and a number of urban health departments in the United States as well as a variety of public health and primary care systems around the world. Developments in computer-based information management, mobile health, geographic information systems, and qualitative information gathering techniques have proved important assets to COPC practice.

The Concept of COPC

The essence of COPC is the planning and delivery of health care to a defined community in response to the defined needs of that community. To do this successfully requires the planned integration of the classical public health roles of health promotion and disease prevention at population levels with the delivery of primary health care, which focuses on the clinical treatment of disease and its sequelae. COPC recognizes that, in line with the World Health Organization definition of health as being far more than the absence of disease, a clinical practice should be responsive to the broad health needs of the community and should be flexible enough to respond to changes in those needs. COPC can be defined as a continuous process by which primary care is provided to a defined community on the basis of its assessed health needs through the planned integration of public health with clinical practice. The COPC program curriculum will teach a six step process as follows:

1. Community definition
2. Community characterization
3. Problem prioritization
4. Detailed assessment
5. Intervention
6. Evaluation

The overall curriculum is designed to give the learner the necessary public health tools to apply the principles of COPC in the context of community health practice and to be well educated in the disciplines of applied public health.

COMPETENCIES

All MPH students in the Prevention and Community Health Department should possess the following functional competencies:

- Identify the causes of social and behavioral factors that affect health of individuals and populations.

PUBH 6500	Planning and Implementing Health Promotion Programs
-----------	---

PUBH 6501	Program Evaluation
-----------	--------------------

- Apply appropriate theories toward the development, implementation, and evaluation of health promoting programs, interventions, and policies.

PUBH 6500	Planning and Implementing Health Promotion Programs
-----------	---

PUBH 6501	Program Evaluation
-----------	--------------------

- Develop interventions, programs, and policies to affect change at the individual, interpersonal, community, and population level.

PUBH 6500	Planning and Implementing Health Promotion Programs
-----------	---

PUBH 6501	Program Evaluation
-----------	--------------------

- In collaboration with others, prioritize individual, organizational, and community concerns and resources for public health programs.

PUBH 6500	Planning and Implementing Health Promotion Programs
-----------	---

PUBH 6501	Program Evaluation
-----------	--------------------

- Apply theory and strategy-based communication principles across different settings and audiences.

PUBH 6500	Planning and Implementing Health Promotion Programs
-----------	---

PUBH 6501	Program Evaluation
-----------	--------------------

- Apply ethical principles to public health program planning, implementation, evaluation, communication, and dissemination.

PUBH 6500	Planning and Implementing Health Promotion Programs
-----------	---

PUBH 6501	Program Evaluation
-----------	--------------------

Upon completion of the MPH in Community Oriented Primary Care students should possess the following functional competencies:

- Communicate and discuss the principles and methods of COPC.
Students should have the knowledge and understanding to be able to discuss the principles of COPC and describe the 6 steps which are:
- defining the community,
- characterizing the community,
- prioritizing community health issues and problems,
- conducting a detailed assessment of the priority health issue,
- planning and implementing COPC interventions, and
- evaluating the interventions.

Overarching principles include community participation and partnership. Students should be capable of communicating these to audiences with different educational levels and cultural backgrounds.

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health

from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

MASTER OF PUBLIC HEALTH IN THE FIELD OF HEALTH PROMOTION

Program Director C.Sparks

Practicum Director T. Henry

Mission Statement

The mission of the Master of Public Health degree in Health Promotion is to train students to enhance and protect the health of the public.The program is designed to assist individuals to become responsible and productive public health professionals who are capable of assessing, implementing, managing and evaluating health promotion and health education programs for the public and for at-risk populations. The required courses as well as the suggested electives are intended to train students in social and behavioral approaches and applications for improving public health using interventions at the individual, group, organizational, and societal level.

Goals

The goals of this educational program are to provide and improve:

- Knowledge of and ability to use social and behavioral theory and behavior change models and strategies that have been shown to be successful in improving health behaviors and practices for a variety of populations;
- Knowledge and skills to assess needs for health interventions for the general public as well as at-risk populations;
- Ability to plan, design, implement, evaluate, and communicate programs and research targeted toward health promotion and/or disease prevention for the public;
- Ability to advocate for improvements in social practices, policy, and law that will provide supportive environments for the improvement of public health; and
- Utilization of structures and resources of organizations and governments to create healthy environments that promote health.

COMPETENCIES

The competencies for the Health Promotion Program are based on the Association of Schools of Public Health (ASPH) competencies in social and behavioral health, as well as the National Health Educator Competencies that students need to qualify at the master’s level as certified health education specialists (CHES) which are recognized by the Society for Public Health Education. Upon Completion of the Health

Promotion Program should possess the following seven functional competencies:

- Assess the individual, community, organizational and societal health and mental health needs of the general public and at-risk populations.

PUBH 6503	Introduction to Public Health Communication and Marketing
PUBH 6504	Social and Behavioral Science Research Methods
PUBH 6530	Qualitative Methods in Health Promotion
PUBH 6531	HlthPromotion/HlthCareSettings
PUBH 6532	Commnty Org,Devlpmnt&Advocacy

- Plan health promotion/education strategies, interventions and programs based on theory and evidence and cultural appropriateness for individuals, groups and communities.

PUBH 6503	Introduction to Public Health Communication and Marketing
PUBH 6531	HlthPromotion/HlthCareSettings
PUBH 6532	Commnty Org,Devlpmnt&Advocacy

- Implement health promotion and health education strategies, interventions and programs to meet the health and mental health needs of the public.

PUBH 6531	HlthPromotion/HlthCareSettings
PUBH 6532	Commnty Org,Devlpmnt&Advocacy

- Conduct evaluation of health promotion program and conduct research related to health promotion and health education.

4. Time limit requirement: The degree must be completed within four years.

- Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

MASTER OF PUBLIC HEALTH IN THE FIELD OF MATERNAL AND CHILD HEALTH

Program Director A. Vyas

Faculty Advisors M. Napolitano, K. McDonnell, K. Roche, M. Ruiz

Mission Statement

The Maternal and Child Health program (MCH) at the Milken Institute School of Public Health (SPH) is a Master of Public Health (MPH) program designed to train individuals to become responsible and productive public health professionals with an emphasis on MCH populations. This program investigates maternal and child health from a multi-disciplinary perspective that integrates the life course, biological, demographic, epidemiological, developmental, environmental, behavioral, and social characteristics that are unique to the health and well-being of women, children, and families.

Goals

The goals of this educational program are to provide and improve:

- Knowledge and skills to assess the health care needs of women, children, and families; and
- Ability to plan, design, implement, evaluate, and communicate programs and research targeted toward health promotion and disease prevention among women, children, and families,

COMPETENCIES

Program-Specific Competencies

The Association of Teachers of Maternal and Child Health have outlined 5 basic competency areas in MCH that our program strives to attain:

- Scientific Basis of MCH public health practice
- Methodological/Analytical Skills
- Management and Communication Skills
- Policy and Advocacy Skills
- Values and Ethics in MCH Public Health Practice

Upon Completion of the MPH, Maternal and Child Health Program students should possess the following functional competencies:

- Assess the individual, community, organizational and societal needs of women, children, and families.

Relevant courses:

PUBH 6550	Maternal & Child Health I
PUBH 6551	Maternal & Child Health II

- Develop and implement strategies and interventions to improve the health needs of women, children and families.

Relevant courses:

PUBH 6550	Maternal & Child Health I
PUBH 6551	Maternal & Child Health II

- Conduct evaluation and research related to the health and well-being of women, children and families.

Relevant courses:

PUBH 6550	Maternal & Child Health I
PUBH 6551	Maternal & Child Health II

- Administer MCH strategies and policies to improve the health and well-being of women, adolescents, children and families.

Relevant courses:

PUBH 6550	Maternal & Child Health I
-----------	---------------------------

- Communicate and advocate for health and well-being of women, children and families.

Relevant courses:

PUBH 6550	Maternal & Child Health I
PUBH 6551	Maternal & Child Health II

- Incorporate a life course perspective to the health and well-being of women, children and families.

Relevant courses:

PUBH 6550	Maternal & Child Health I
PUBH 6551	Maternal & Child Health II

REQUIREMENTS

MPH students who select the Maternal and Child Health Program enroll in Core Courses (15 credits), Department and Program-Specific Required Courses (12 credits), Program-Specific Electives (11 credits), and an additional 3 credits of any SPH elective(s). The 45 total credit requirements include a Practicum and Culminating experience (4 credits), where

students apply their classroom education in a Maternal and Child Health organization and/or research endeavor.

Begin planning Practicum during Year 1; complete Culminating Experience in Year 2.

Program Requirements

Required core courses (15 credits)

Graduation Requirements

1. Graduate credit requirement: 45 graduate credits
2. Course requirements: Successful completion of core and program-specific courses
3. Grade point requirement: 3.0 (B average) overall grade point average
4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to 18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

MASTER OF PUBLIC HEALTH IN THE FIELD OF PUBLIC HEALTH COMMUNICATION AND MARKETING

Program Director L. Abroms

Practicum Director K. Pomerantz

Mission

Based on an ecological model of health, the mission of this program is to educate public health professionals to use communication and marketing as strategic tools to influence people, places, and environmental conditions in ways that advance public health objectives.

Goals

Graduates will possess the skills necessary to become highly effective public health practitioners and leaders. Their specific expertise in the strategic use of communication and marketing tools will enable them to work collaboratively with a broad range of other public health experts to plan high-impact health enhancement initiatives, and to implement or supervise the implementation of the communication and marketing components of public health initiatives.

Specifically, students will become proficient at developing, implementing, and evaluating:

- Communication programs that help people make sound health decisions and effectively manage their health behaviors;
- Marketing programs that improve the health capacity of communities by enhancing the competitiveness of the healthful (versus unhealthful) products and services offered to community members; and
- Communication programs that promote the adoption of policies - in the public and private sector - which enhance health.

COMPETENCIES

Program-Specific Competencies

Upon completion of the MPH Program in Public Health Communication and Marketing, students will be able to:

- Apply an ecological framework to assess and promote population health.

4. Time limit requirement: The degree must be completed within four years.
5. Transfer credit policy: Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. Up to

18 credits may be transferred to the Master of Public Health from the SPH graduate certificate. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.

DOCTOR OF PUBLIC HEALTH IN THE FIELD OF HEALTH BEHAVIOR

Program Director M. Turner

Mission

The mission of the Department of Prevention and Community Health is to train professionals to provide leadership in the field of health behavior. The Dr.P.H. program in health behavior is based on the ecological model of health and well-being and is aimed at understanding and having an impact on the health of populations and cultures, with special emphasis on underserved populations. Graduates are prepared to apply their research and analytic skills to a range of implementation, evaluation, and advocacy needs of various cultural and socioeconomic groups and communities.

Program Policies and Procedures

For program policies and procedures, please refer to the Doctor of Public Health Handbook and other resources located on the DrPH in the field of Health Behavior website (<https://publichealth.gwu.edu/programs/health-behavior-drph>).

REQUIREMENTS

PUBH 8413	Research Leadership
PUBH 8415	Instructional Leadership

Comprehensive Examination

Dissertation Preparation & Dissertation

8-11 credits

PUBH 8422	Advanced Health Care & Public Health Research Design
PUBH 8423	Dissertation Research

Graduation Requirements*

1. Graduate credit requirement: 60 graduate credits are required.
2. Course requirements: successful completion of the foundational and research methods courses. The program-specific specialty field courses and the professional leadership credits are required.

3. Comprehensive exam: Once the course of study is completed, students are required to pass the comprehensive exam to be officially admitted to the candidacy phase.
4. Dissertation: PUBH 8422 Advanced Health Care and Public Health Research Design 6-12 dissertation research credits are required. Once the proposal has been successfully defended and dissertation research credits have been met, the oral defense may be scheduled.
5. Grade point requirement: A 3.0 (B average) overall grade-point average is required.
6. Time limit requirement: The degree must be completed within eight (8) years.
7. Transfer credit policy: up to 12 graduate credits may be transferred to the DrPH degree, with program director approval. Credits must have been earned from an accredited institution in the last 3 years, with a grade point of 3.0 or better.

COLLEGE OF PROFESSIONAL STUDIES

Dean A. Eskandarian

Associate Deans A. Ashkar, T. Marsh, J. Prostko

The College of Professional Studies offers an expanding range of degree programs leading to associate's, bachelor's, and master's degrees in professional studies, along with a range of certificate programs.

The College's innovative programs are typically co-developed through collaboration among University content specialists and outside partners – government agencies, professional associations, consulting organizations, and business and industry leaders.

Programs draw from multiple academic disciplines and are delivered in flexible formats: face-to-face, online, or a blend of both.

By combining University faculty experts with accomplished practitioners, the College of Professional Studies is a catalyst for academic innovation, constructing credentials for the workforce that uphold the University's rigorous standards of academic excellence and respond to the needs of today's professionals. Professional studies degree and certificate programs are also offered to organizational clients under contract and can be presented in flexible formats, including series of short classroom-based modules and distance learning.

New programs not included in this bulletin may be found at the College of Professional Studies website (<http://www.cps.gwu.edu>).

CPS manages facilities and services for off-campus programs offered by other schools of the University. The staff of instruction includes members of the full-time faculty of the University and academically qualified adjunct faculty from the professional community. All University off-campus offerings in Maryland are approved by the Maryland State Board for Higher Education; those in Virginia are certified by the State Council of Higher Education for Virginia.

REGULATIONS

Enrollment Status

Once entered in a degree or certificate program, a student is expected to be continuously enrolled and actively engaged in fulfilling the requirements each semester of the academic year until such time as the degree is conferred or certificate completed. For fall and spring semesters you must register for one or more credits to maintain enrollment status. A student who must interrupt active pursuit of the degree or certificate may petition the dean, through the Program Director, for a leave of absence for a specified period of time, generally limited to one calendar year. If the petition is approved, the student must register for a leave of absence in each fall and

spring semester, following regular registration procedures. Students who discontinue their studies without being granted a leave of absence and students granted leaves who do not return to active study at the close of the period of approved absence must apply for readmission and are subject to the regulations and requirements then in force.

Time Limits

A full-time student is allowed a maximum of three calendar years (excluding time spent for taking only English for Academic Purposes courses) to complete all degree requirements from the date of the first registration as a degree student. A part-time student is allowed a maximum of five calendar years. The time limit does not include any period of registration as an unclassified student before admission to degree candidate status or any period spent on approved leave of absence. Students who do not complete degree requirements within the allowed time will have their degree candidate status terminated. They may be readmitted to degree candidate status under conditions specified by the program director and approved by the dean.

Scholarship Requirements

Undergraduate students must maintain a minimum grade-point average of 2.0 (C), and graduate students must maintain a minimum grade-point average of 3.0 (B). If a student's cumulative GPA falls below the required minimum GPA, he or she will receive an academic warning and will be allowed one semester in which to raise the GPA to the minimum required level or higher, provided that students who would mathematically be unable to raise their grade to the required minimum GPA during such following semester will not receive academic warning and will be asked to leave the program immediately. Students receiving a warning who have not raised their GPA to the minimum required level or higher within a semester following the academic warning will be dismissed from the program.

See University Regulations-Grades (p. 20) for a description of the grades available to undergraduate and graduate students.

Grade of F

A student who receives a grade of *F* is subject to removal from the program. If the student wishes to remain enrolled, he or she must present cause for consideration by the dean and the program director as to why continued study should be permitted. Once a grade of *F* is earned it remains a part of the student's permanent record and is calculated into the grade-point average. A student given the grade of *F*, if permitted to remain in the program, must repeat the course and achieve a passing grade (as well as maintain the required 3.0 GPA). Such a repeat does not expunge the grade of *F*, which remains part of the student's permanent record. Failure to (i) receive permission to remain in the program and retake the failed course or (ii) achieve a passing grade upon permitted retake of a failed course will result in dismissal from the program.

Incompletes

The symbol *I* (Incomplete) indicates that a satisfactory explanation has been given to the instructor for the student's inability to complete the required course work during the semester of enrollment. At the option of the instructor, the symbol *I* may be recorded if a student, for reasons beyond the student's control, is unable to complete the work of the course, and if the instructor is informed of, and approves, such reasons before the date when grades must be reported. This symbol may be used only if the student's prior performance and class attendance in the course have been satisfactory. Any failure to complete the work of a course that is not satisfactorily explained to the instructor before the date when grades must be turned in will be graded *F*, Failure. If acceptable reasons are later presented to the instructor, that instructor may initiate an appropriate grade change. Instructor and student must sign an Incomplete Agreement available through the dean's office which sets forth the requirements and due dates for successful completion of the course. The course work must be completed within the designated time period agreed upon by the instructor and student in the Incomplete contract, but no more than one calendar year from the end of the semester in which the course was taken. All students who receive an Incomplete must maintain active student status during the subsequent semester(s) in which course work is being completed. If not registered in other classes during this period, the student must register for Continuous Enrollment status.

When work for the course is completed, the instructor will submit the final grade to the Office of the Registrar and, beginning with courses taken in the Fall 2014 semester, the final grade will replace the symbol *I*. If work for the course is not completed within the designated time, the grade will be automatically converted to a grade of *F*, Failure, 0 quality points, and the grade-point average and academic standing recalculated.

For courses taken through the Summer 2014 term, the grade earned will be indicated in the form of *I*, followed by the grade. The indication of *I* cannot be removed and remains on the student's permanent academic record even after the course has been successfully completed.

Transfer of Credit

A maximum of one-quarter of the credits of graduate course work required for a degree may be approved for transfer to a graduate program in the College of Professional Studies from enrollment in nondegree status at GW or from another degree-granting school of this University or another accredited college or university. For a transfer of credit to be approved, *all* of the following conditions must be met: the course work must be from an accredited institution and must have been taken within the two years prior to matriculation; it must be approved as part of the student's program of studies; it must not have been applied to the completion of requirements for another degree; it must be post-baccalaureate graduate-level course work; and the student must have received a grade of *B* or better in each

course for which a transfer credit is requested. Requests for transfer credit must be submitted in writing and approved by the program director and the dean during the student's first year in the program. An official transcript of the course work must be on file before the request can be considered.

Once enrolled in the College of Professional Studies, students are not permitted to transfer course work taken outside the University, except under extraordinary circumstances; permission must be obtained in advance from the dean.

Provisional Admission

Applicants with credentials that are weaker than expected for the program of study, but who nonetheless show promise of successful work, are occasionally granted provisional admission by the program director/admissions committee. While on provisional status, students must meet the requirements set forth in their admission letter. Students who do not meet these requirements are dismissed from the program.

Readmission

The College of Professional Studies will not review any application for readmission to a program by a student who was dismissed from such program (or any other program at the college or course of study at the university) until at least one (1) year has passed since the dismissal of such student.

Academic Integrity

The University community, in order to fulfill its purposes, must establish and maintain guidelines of academic behavior. All members of the community are expected to exhibit honesty and competence in their academic work. Incoming students have a special responsibility to acquaint themselves with, and make use of, all proper procedures for doing research, writing papers, and taking examinations. Members of the community will be presumed to be familiar with the proper academic procedures and held responsible for applying them. Deliberate failure to act in accordance with such procedures will be considered academic dishonesty. Acts of academic dishonesty are a legal, moral, and intellectual offense against the community and will be prosecuted through the proper University channels, possibly resulting in dismissal from the program together with other university sanctions. The University Code of Academic Integrity (<https://studentconduct.gwu.edu/code-academic-integrity>) can be found at the Office of Academic Integrity (<http://studentconduct.gwu.edu>).

UNDERGRADUATE

Bachelor's completion programs

- Bachelor of Professional Studies with a major in cybersecurity (p. 830)
- Bachelor of Professional Studies with a major in integrated information science and technology (p. 831)

- Bachelor of Professional Studies with a major in police and security studies (p. 832)

Dual degree programs

- Bachelor of Arts with a major in political communication and Master of Professional Studies in the field of political management (p. 833)
- Bachelor of Arts with a major in political science and Master of Professional Studies in the field of legislative affairs (p. 833)
- Bachelor of Arts with a major in political science and Master of Professional Studies in the field of political management (p. 834)

GRADUATE

Master's programs

Admission Requirements

Applicants must hold a baccalaureate degree from a regionally accredited institution of higher learning or international equivalent. Applicants should have a strong academic background, normally with a B average or better (3.0 GPA on a 4.0 scale). Additional application requirements can be found on the Graduate Programs Finder (<http://www.gwu.edu/all-graduate-programs>).

- Master of Professional Studies in the field of cybersecurity strategy and information management (p. 835)
- Master of Professional Studies in the field of landscape design (p. 836)
- Master of Professional Studies in the field of law firm management
- Master of Professional Studies in the field of paralegal studies (p. 838)
- Master of Professional Studies in the field of paralegal studies with a concentration in healthcare corporate compliance (p. 839)
- Master of Professional Studies in the field of public leadership (p. 840)
- Master of Professional Studies in the field of publishing
- Master of Professional Studies in the field of security and safety leadership (p. 843)
- Master of Professional Studies in the field of sustainable urban planning (p. 845)

The Graduate School of Political Management, through the College of Professional Studies, offers the following:

- Master of Professional Studies in the field of advocacy in the global environment (p. 848)
- Master of Professional Studies in the field of legislative affairs (p. 849)

- Master of Professional Studies in the field of political management (<http://bulletin.gwu.edu/professional-studies/graduate-programs/political-management>)
- Master of Professional Studies in the field of political communication and governance (p. 850) *Offered only in Spanish*
- Master of Professional Studies in the field of strategic public relations (<http://bulletin.gwu.edu/professional-studies/graduate-programs/strategic-public-relations>)

CERTIFICATES

Undergraduate certificates

- Cyber Attacks and Cyber Threats Analysis
- Investigation of Cyber Security Incidents (p. 852)
- Protection and Defense of Computer Networks (p. 852)

Graduate certificates

The College of Professional Studies offers the following graduate certificates. Requirements are listed at www.cps.gwu.edu (<http://www.cps.gwu.edu>). Note that Strategic Cyber Security Enforcement is available only to students enrolled in the M.P.S. in safety security and leadership online program. In addition to those listed, graduate certificates in political management and strategic governance and in strategic communications campaigns are offered in Spanish to closed cohorts of students in Latin America and in Spain.

- Academic Publishing
- Campaign Strategy (p. 852)
- Climate Change Management and Policy (p. 853)
- Community Advocacy (p. 853)
- Digital Politics (p. 853)
- Fundamentals of Strategic Security
- Global Public Relations (p. 853)
- Health Care Corporate Compliance (p. 854)
- Justice and Public Safety Information Management (p. 854)
- Landscape Design (p. 854)
- Law Firm Management (p. 855)
- Organization Performance Improvement (p. 855)
- PACs and Political Management (p. 855)
- Paralegal Studies (p. 856)
- Public Relations (p. 856)
- Safety Leadership
- Strategic Cyber Security Enforcement
- Strategic Management and Executive Leadership for Law Enforcement
- Sustainable Landscapes (p. 857)
- Urban Sustainability (p. 857)

FACULTY

Program Directors A. Ashkar, S. Billet, L. Brown, J. Carruthers, A. Grossblatt, N. Houghtby-Haddon, S. Hooshangi, R. Izurieta, F. Lemieux, C. Leonard, T. Marsh, L. Matos, L. Parnell, D. Rehr, J. Thorpe

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
 - Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
 - Those in the 6000s and 8000s are for master’s, doctoral, and professional-level students
 - The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
- College of Professional Studies (CPS) (p. 943)
 - Legislative Affairs (LGAF) (p. 1180)
 - Political Management (PMGT) (p. 1237)
 - Advocacy in the Global Environment (PSAD) (p. 1255)
 - Landscape Design (PSLD) (p. 1251)
 - Law Firm Management (PSLM) (p. 1252)
 - Paralegal Studies (PSLX) (p. 1218)
 - Publishing (PSPB) (p. 1254)
 - Public Leadership (PSPL (p. 1252))
 - Public Relations (PSPR) (p. 1253)
 - Security and Safety Leadership (PSSL) (p. 1298)
 - Urban Sustainability (PSUS) (p. 1256)

UNDERGRADUATE PROGRAMS

Bachelor's completion programs

- Bachelor of Professional Studies with a major in cybersecurity (p. 830)
- Bachelor of Professional Studies with a major in integrated information science and technology (p. 831)
- Bachelor of Professional Studies with a major in police and security studies (p. 832)

Dual degree programs

- Bachelor of Arts with a major in political communication and Master of Professional Studies in the field of political management (p. 833)
- Bachelor of Arts with a major in political science and Master of Professional Studies in the field of legislative affairs (p. 833)

- Bachelor of Arts with a major in political science and Master of Professional Studies in the field of political management (p. 834)

BACHELOR OF PROFESSIONAL STUDIES WITH A MAJOR IN CYBERSECURITY

The bachelor’s degree in Cybersecurity is intended for students with associate’s or non-technical bachelor’s degrees who are looking for entry level positions and advancement in the field of cybersecurity. The program consists of a core curriculum and two concentrations that focus on 1) protection and defense of computer networks and 2) cyber attacks and cyber threats analysis. Upon completion of this program, students will be able to understand and implement cybersecurity requirements, protect and effectively defend computer networks against malicious activities, and correct computer network vulnerabilities through penetration testing and hacking techniques.

REQUIREMENTS

Students completing this program will have satisfied GW's university-wide general education requirement which includes 22 credits in the following area.

1. Mathematics or statistics (3 credits)
2. Natural or physical science with lab (4 credits)
3. Humanities (3 credits)
4. Social and behavioral sciences (6 credits)
5. Written communication or composition (6 credits)

In addition, ethics, cross cultural awareness, and oral communication competencies are integrated within the core and concentration areas of the cybersecuirty curriculum.

Curriculum and Course Requirement for Completion of the Program

The core curriculum of this bachelor’s degree will include courses primarily related to the areas of specialties identified by NICE. The course work in area of concentration will also culminate in a practicum that will focus on preparing students to obtain key professional certification combined with hands-on exercises in the computer lab. The bachelor curriculum is composed of 24 credits of foundations/core courses and 36 credits in two areas of concentration.

Core courses:

PSCS 2101	Writing and Communication in a Technical Field
PSCS 2102	Fundamentals of Information Technology and Computing
PSCS 2103	Ethics in the Age of Technology

PSCS 4110	Data Communication and Networking Technologies
PSCS 4120	Introduction to Cybersecurity
PSCS 4190	Capstone Project
Area 1: Protection and Defense of Computer Networks	
PSCS 4101	Introduction to Protection Technologies
PSCS 4102	Intrusion Detection and Vulnerability Management
PSCS 4103	
PSCS 4104	Securing Network Devices
PSCS 4105	Practicum - Cyber Defense Techniques
Area 2: Cyber Attacks and Cyber Threats Analysis	
PSCS 4201	
PSCS 4202	Attacker Tools and Techniques
PSCS 4203	All Sources Intelligence
PSCS 4204	Computer Network Attack and Exploitation
PSCS 4205	Practicum - Cyber Attack Techniques

BACHELOR OF PROFESSIONAL STUDIES WITH A MAJOR IN INTEGRATED INFORMATION, SCIENCE, AND TECHNOLOGY

The Bachelor of Professional Studies in the field of integrated information, science, and technology is an innovative and interdisciplinary program designed for community college graduates and working professionals who are seeking to complete their bachelor's degree.

The program is for students who currently hold an associate's degree or have earned at least 60 credits towards their undergraduate degree. The remaining 60 credits required to earn the bachelor's degree consist of 44 credits of core courses and 16 credits of elective courses. The program can be completed within two academic years (5 consecutive semesters, including a summer session).

REQUIREMENTS

Admission requirements

Applicants to the Bachelor of Professional Studies in integrated information, science, and technology must have earned an Associate's degree in science, technology, or related field or

at least 60 credits of relevant course work from a regionally accredited community college, university, or equivalent.

Applicants without an Associate's degree (but with 60 credits from a regionally accredited institution of higher education or equivalent) must have a range of courses that satisfies a general education distribution requirement. This requirement includes a total of 24 credits with at least 6 credits in each of the following general areas:

1. Quantitative and logical reasoning
2. Natural sciences with one lab course
3. Arts and humanities
4. Social and behavioral sciences

Degree requirements: 11 core and 4 elective courses for a total of 60 credits

Core courses:

PSIS 2101	Writing & Comm & Med Rel - I
PSIS 2102	Writing & Comm & Med Rel - II
PSIS 2103	Found Math & Stat Sci - I
PSIS 2104	Found Math & Stat Sci - II
PSIS 2105	Found Info Tech & Comp - I
PSIS 2106	Found Info Tech & Comp - II
PSIS 3122	Ethics in Sci & Tech Policy
PSIS 4138	Introduction to Health IT
PSIS 4142	Rel Databases & Design
PSIS 4152	Entrprnrshp/Tech Venture Cr
PSIS 4191	Capstone Project and Senior Thesis I
PSIS 4192	Caps Proj & Senior Thesis- II
or PSIS 4190	Capstone Proj & Senior Thesis
PSIS 4190	Capstone Proj & Senior Thesis

Four upper-level electives selected from the following:

PSIS 4132	Phys Principles of Biotech
PSIS 4133	Bioinformatics
PSIS 4137	Alternative Energy Sources
PSIS 4141	Comp & Telecom Networks
PSIS 4144	Info & Network Security

PSIS 4145 Software Sys Dev Processes

PSIS 4195 Undergraduate Research

PSIS 4199 Special Topics

FACULTY

Director S. Hooshangi

BACHELOR OF PROFESSIONAL STUDIES WITH A MAJOR IN POLICE AND SECURITY STUDIES

This program prepares students with the knowledge and skills needed to work more effectively as police professionals. Developed by faculty in consultation with metropolitan area law enforcement and police specialists, the core course work is designed to develop three central areas of competency: (1) intelligence and criminal analysis; (2) forensic science; and (3) leadership and management. Elective courses are offered from a variety of disciplines including sociology, leadership, public health, and international affairs.

REQUIREMENTS

Admission requirements:

To be considered for admission to the College of Professional Studies Police and Security Studies program, the applicant must possess an academic record of achievement and be employed as a security and safety professional. The admission requirements are listed below.

- Completion of a college-level English Composition course at a regionally accredited U.S. college or university with a grade of C or higher. **Note:** Applicants may submit an acceptable writing sample taken in a CPS test setting if a college-level English Composition course has not been completed. Test centers are located in DC, Alexandria, Arlington, and Newport News, VA.
- Attended at least one college-level course (minimum 3 credits) at a regionally accredited institution of higher education.
- Two or more years of work experience in the safety and security field.
- Completion of the first 12 credit hours taken at GW with a grade of C or higher. *All degree candidates receive provisional admission until completion of their first 12 credit hours at GW.*

Requirements for the degree: 120 credits

Requirements for the program:

30 credits of general education coursework including:*

6 credits of English composition or UW 1020 University Writing plus 2 credits of independent research with a focus on the application of the principles learned in UW 1020

6 credits of quantitative and logical reasoning

6 credits of social and behavioral sciences

6 credits of natural sciences, including one laboratory course

6 credits of arts and humanities

60 credits of core courses:

Intelligence and Criminal Analysis

CPS 2103 Particular Forms of Crime (Intelligence and Criminal Analysis)

CPS 2107 Models of Policing

CPS 2108 Criminal Intelligence

CPS 2109 Criminal Analysis (Forensic Science)

CPS 2110 Predictive Policing

Forensic Science

CPS 2130 Intro to Forensic Science

CPS 2131 Crime Scene Investigation

CPS 2132 Computer Crime Investigation

CPS 2133 Incident Management

CPS 2171 The Criminal Mind

Leadership and Management

CPS 2102 Resource Management

CPS 2104 Leading Teams

CPS 2106 Strategic Planning

CPS 2134 Ethical Dilemmas in Policing

CPS 4192 Capstone Simulation

30 credits of electives selected from the following, in consultation with academic advisor:

CPS 2101 The Criminal Justice System

CPS 2170 Domestic Violence

CPS 2172 Comparative Police Systems

CPS 2173 Transnational Threats&Security

CPS 2174 Crisis & Emergency Planning

CPS 2175 Emergency Pub. Health Issues

CPS 2176 Media, PR & Crisis Communication

General education and elective courses may be completed at any regionally accredited institution. A grade of C or higher is required for transfer credit to be approved. General education and elective course work may be completed before, during, or within five years of completing the other requirements for the bachelor's degree.

FACULTY

Director F. Lemieux

Assistant Director J. Delinski

BACHELOR OF ARTS IN POLITICAL COMMUNICATION AND MASTER OF PROFESSIONAL STUDIES IN POLITICAL MANAGEMENT

OVERVIEW

The School of Media and Public Affairs (SMPA) and the Graduate School of Political Management (GSPM) offer the dual B.A./M.P.S. degree program for undergraduate students who are interested in careers in the field of political management. The program allows students to take a specified number of graduate credits as part of their undergraduate degree, thereby allowing both degrees to be earned more quickly and at a lower cost.

SMPA and GSPM share a common commitment to nurturing students who are interested in pursuing professional careers in politics. GSPM graduate-level courses offer a clear and logical extension of many SMPA undergraduate courses.

Interested political science undergraduates should consult with the departmental advisor for more information about program requirements and regulations and for application procedures.

REQUIREMENTS

SMPA Senior Year Curriculum

Students pursuing the 5-year dual B.A. in Political Communication/M.P.S. in Political Management must meet all requirements of their respective SMPA program. To meet the requirements of the dual program, students must take 6 credits in graduate-level courses as part of their B.A. program of study.

Students must take the following course from the Political Management curriculum:

PMGT 6401 Fundamentals of Political Management

And choose one of the following courses:

PMGT 6402 Applied Political Communications

PMGT 6456 Speechcraft

PMGT 6430 Campaign Strategy

BACHELOR OF ARTS IN POLITICAL SCIENCE AND MASTER OF PROFESSIONAL STUDIES IN LEGISLATIVE AFFAIRS

The George Washington University's Department of Political Science (<http://www.gwu.edu/~psc>) and the Graduate School of Political Management (GSPM) offer a dual degree B.A./M.P.S. program designed for high-quality undergraduate students majoring in political science who are interested in careers in the field of Legislative Affairs (<http://gspm.gwu.edu/node/139>). This dual degree program, by allowing the counting of credits for several courses towards both programs, enables both degrees to be granted in a shorter time and at lower cost than if both programs were pursued separately. This option is available only to George Washington University students.

The Department of Political Science and GSPM share a common commitment to nurturing students who are interested in pursuing professional careers in politics. GSPM graduate-level courses offer a clear and logical extension to many political science undergraduate courses.

Application to the dual degree program may be made by a declared political science major in the semester that he or she completes 60 credits. The 60 credits must not include any transfer credits. A political science major may apply later than the end of sophomore year; however, by doing so may limit the ability to fully enjoy the benefits of this program.

Admission to the dual degree program allows the student to substitute three Legislative Affairs (<http://gspm.gwu.edu/node/139>) courses for the requirements of the undergraduate political science major. These courses will count toward three of the four upper level elective courses in political science required for the major and may be taken during the second semester of junior year and during senior year. All political science majors are required to complete an undergraduate proseminar. The student must take the GRE and apply to the M.P.S. program in the last semester of undergraduate course work. The student will graduate from the Columbian College of Arts and Sciences with a B.A. in Political Science, then continue to pursue a M.P.S. in Legislative Affairs (<http://gspm.gwu.edu/node/139>) at the Graduate School of Political Management.

REQUIREMENTS

Admissions requirements:

All materials, other than those included in the online Graduate School of Public Management application, are to be submitted directly to the undergraduate advisor (swiley@gwu.edu). Application materials to the undergraduate dual degree program can be used in the application for the Master of Professional Studies in Legislative Affairs (<http://gspm.gwu.edu/node/139>). The admission decision at the undergraduate level is not a guarantee of admission into the master's program, nor does it require the applicant to complete the master's degree at the Graduate School of Political Management upon graduation from the Columbian College of Arts and Sciences.

The following documents are required:

Completion of the application form (<https://gspm.gwu.edu/sites/gspm.gwu.edu/files/downloads/PSC-LEGA%20Dual%20Degree%20Application.pdf>) submitted in the semester before graduating with a Bachelor of Arts in the field of political science. Applications are due:

- Fall - June 15
- Spring - November 15
- Summer - April 15

Personal statement: In an essay of roughly 250-500 words, explain why you are interested in pursuing the 5-year option and why you should be considered for admission. Among the issues to be addressed are:

- What are the kinds of intellectual issues in political science that you find intriguing?
- Why are you interested in graduate studies in the field?
- What special skills and knowledge can you contribute to the graduate program?

Three letters of recommendation (at least two must be from Political Science faculty): Letters of recommendation may be submitted through the online application to the M.P.S. program and used as application materials for both the undergraduate dual degree program and the political management master's program.

Program of study:

Three of the following core courses:

LGAF 6201	Politics and Public Policy
LGAF 6202	Legislative Politics
LGAF 6203	Executive–Legislative Relations
LGAF 6204	Research Methods for Legislative Affairs Specialists

Contact the undergraduate advisor (swiley@gwu.edu) for more information.

BACHELOR OF ARTS IN POLITICAL SCIENCE AND MASTER OF PROFESSIONAL STUDIES IN POLITICAL MANAGEMENT

The Department of Political Science and the Graduate School of Political Management (GSPM) offer the dual B.A./M.P.S. degree program for undergraduate students in political science who are interested in careers in the field of political management. The Department of Political Science and GSPM share a common commitment to nurturing students who are interested in pursuing professional careers in politics. GSPM graduate-level courses offer a clear and logical extension of many political science undergraduate courses.

The program allows students to take a specified number of graduate credits as part of their undergraduate degree, thereby allowing both degrees to be earned more quickly and at a lower cost. Application to the dual degree program may be made by a declared political science major in the semester that he or she completes 60 credits. The 60 credits do not include any transfer credits. A political science major may apply later than the end of sophomore year; however, doing so may limit the potential benefits of the program to the student.

Interested political science undergraduates should consult with the departmental advisor for more information about program requirements and regulations and for application procedures.

REQUIREMENTS

Admissions requirements:

At least 60 credits of undergraduate course work at GW

A minimum grade point average of 3.3 earned and completed at GW

The following documents are required:

Completion of the application form (<https://gspm.gwu.edu/sites/gspm.gwu.edu/files/downloads/PSC-LEGA%20Dual%20Degree%20Application.pdf>) submitted in the semester before graduating with a Bachelor of Arts in the field of political science. Applications are due:

- Fall - June 15
- Spring - November 15
- Summer - April 15

Personal statement: In an essay of roughly 250-500 words, explain why you are interested in pursuing the 5-year option and why you should be considered for admission. Among the issues to be addressed are:

- What are the kinds of intellectual issues in political science that you find intriguing?
- Why are you interested in graduate studies in the field?

- What special skills and knowledge can you contribute to the graduate program?

Three letters of recommendation (at least two must be from Political Science faculty): Letters of recommendation may be submitted through the online application to the M.P.S. program and used as application materials for both the undergraduate dual degree program and the political management master's program.

All materials, other than those included in the online Graduate School of Political Management application, are to be submitted directly to the undergraduate advisor (swiley@gwu.edu). Application materials to the undergraduate dual degree program can be used in the application for the M.P.S. in Political Management (<http://gspm.gwu.edu/node/120>). The admission decision at the undergraduate level is not a guarantee of admission into the M.P.S program, nor does it require the applicant to complete the M.P.S. at the Graduate School of Political Management upon graduation from the Columbian College of Arts and Sciences.

Contact the undergraduate advisor (swiley@gwu.edu) for more information.

Program of study

Three of the following core courses:

PMGT 6401	Fundamentals of Political Management
PMGT 6402	Applied Political Communications
PMGT 6403	Political Data and Analytics
PMGT 6404	Principled Political Leadership

GRADUATE PROGRAMS

Master's programs

Admission Requirements

Applicants must hold a baccalaureate degree from a regionally accredited institution of higher learning or international equivalent. Applicants should have a strong academic background, normally with a B average or better (3.0 GPA on a 4.0 scale). Additional application requirements can be found on the Graduate Programs Finder (<http://www.gwu.edu/all-graduate-programs>).

- Master of Professional Studies in the field of cybersecurity strategy and information management (p. 835)
- Master of Professional Studies in the field of landscape design (p. 836)
- Master of Professional Studies in the field of law firm management
- Master of Professional Studies in the field of paralegal studies (p. 838)

- Master of Professional Studies in the field of paralegal studies with a concentration in healthcare corporate compliance (p. 839)
- Master of Professional Studies in the field of public leadership (p. 840)
- Master of Professional Studies in the field of publishing
- Master of Professional Studies in the field of security and safety leadership (p. 843)
- Master of Professional Studies in the field of sustainable urban planning (p. 845)

The Graduate School of Political Management, through the College of Professional Studies, offers the following:

- Master of Professional Studies in the field of advocacy in the global environment (p. 848)
- Master of Professional Studies in the field of legislative affairs (p. 849)
- Master of Professional Studies in the field of political management (<http://bulletin.gwu.edu/professional-studies/graduate-programs/political-management>)
- Master of Professional Studies in the field of political communication and governance (p. 850) *Offered only in Spanish*
- Master of Professional Studies in the field of strategic public relations (<http://bulletin.gwu.edu/professional-studies/graduate-programs/strategic-public-relations>)

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF CYBERSECURITY STRATEGY AND INFORMATION MANAGEMENT

This program is for working professionals from the military, homeland security, and private sectors who want to gain the expertise to address current and emerging challenges in cyber space. Students will learn strategies and practices that will empower them to manage critical information in the fight against hackers, terrorism, and cyber criminals. This program will also enhance the cybersecurity leadership skills of current homeland security and criminal justice professionals, preparing the next generation of strategic leaders to secure the country's digital infrastructure.

REQUIREMENTS

Specific admission requirements can be found on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>). (<http://www.gwu.edu/all-graduate-programs>)

Required:

PSCS 6244	Information Systems Protection
PSCS 6245	Cybersecurity Law and Policy

PSCS 6246	Cyber Intelligence and Strategic Analysis
PSCS 6247	Cyber Defense Strategy
PSCS 6248	Introduction to Cyber Conflicts
PSCS 6255	Information Mgmt. for Justice and Public Safety Professionals
PSCS 6256	Applied Technology to Data Analytics
PSCS 6257	Enterprise Architecture & Standards
PSCS 6258	Information Sharing and Safeguarding
PSCS 6259	Strategic Information Technology Investment and Performance Management
PSHS 6260	Methods of Analysis in Security
PSHS 6270	Capstone Project

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF LANDSCAPE DESIGN

The Master of Professional Studies in the field of landscape design program is ideally suited for landscape professionals seeking to upgrade skills, individuals who want to become professional landscape designers, amateurs with an interest in the art of garden design, institutional horticultural staff, nursery employees and garden-design writers. Courses are geared to small-scale landscape design applications with emphasis on sound design principles, good site engineering methods, and creative use of plant materials.

The 46-credit master of professional studies degree in landscape design combines the landscape design graduate certificate program with the 18-credit graduate certificate in sustainable landscapes. Students acquire an understanding of best practices in landscape conservation and sustainability, adapted to the small-scale landscape.

REQUIREMENTS

Specific admission requirements can be found on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>). (<http://www.gwu.edu/all-graduate-programs>)

Applicants must hold a baccalaureate degree from a regionally accredited institution of higher learning or international equivalent. Applicants should have a strong academic background, normally with a *B* average or better (3.0 GPA on a 4.0 scale).

The 46-credit degree program consists of:

PSLD 6100	Landscape Graphics
PSLD 6201	Introduction to Design
PSLD 6202	Site Analysis
PSLD 6203	Site Engineering
PSLD 6204	Construction Methods and Materials
PSLD 6212	History of Landscape Design
PSLD 6213	Contemporary Themes in the Landscape
PSLD 6221	Landscape Plants for Fall
PSLD 6223	Landscape Plants for Spring
PSLD 6225	Landscape Plants for Summer
PSLD 6231	Site Design Studio
PSLD 6236	Planting Design Studio
PSLD 6240	Comprehensive Project
PSLD 6260	Introduction to Sustainable Design
PSLD 6261	Ecology of the Built Environment
PSLD 6262	Tools for Sustainable Design
PSLD 6264	Native Plants I
PSLD 6265	Native Plants II
PSLD 6266	Ecological Restoration
PSLD 6268	Sustainable Design Methods
PSLD 6269	Sustenance and the Landscape
PSLD 6270	Sustainable Design Charrette
Electives	
PSLD 6229	Herbaceous Plants
CPS 6291	Special Topics

Special Topics courses address new developments in the field (e.g., Vectorworks I & II).

Scholarship Requirements

A grade-point average of 3.0 is required for award of a master's degree. Students who receive a grade of *C* in more than 6 credits are subject to suspension. Students who receive a grade of *F* must confer with the dean before enrollment for further coursework is allowed. See CPS regulations (p. 827) for

additional information regarding enrollment status and time limits.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF LAW FIRM MANAGEMENT

The Master of Professional Studies in law firm management responds to the need for highly skilled and adaptable leadership in law firms and companies providing services to law firms. This unique, flexible program provides law firm professionals with the business and leadership knowledge they need to succeed in the fast-growing law firm industry. The program consists of 30 credits and can be completed in 18 months. The first 12 credits may stand alone as a graduate certificate in law firm management. The program is specially designed for those working full-time, with a combination of distance learning and short-term residencies at the GW Alexandria Graduate Education Center. The program begins in June each year.

REQUIREMENTS

Specific admission requirements can be found on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

Applicants must hold a baccalaureate degree from a regionally accredited institution of higher learning or international equivalent. Applicants should have a strong academic background, normally with a *B* average or better (3.0 GPA on a 4.0 scale).

Degree requirements: 30 credits including:

PSLM 6201	Theories, Principles, and Practices of Law Firm Management
PSLM 6202	ApplyingStrategic&BusPlanning
PSLM 6203	Practical Applications of Law Firm Management
PSLM 6204	Principles of Leadership
PSLM 6205	Application of Leadership Frameworks
PSLM 6206	Strategic Leadership for Sustainability and Change
PSLM 6207	Process Improvement in Law Firms
PSLM 6208	Legal Technology and Knowledge Management

Scholarship Requirements

A grade-point average of 3.0 is required for award of a master's degree. Students who receive a grade of *C* in more than 6 credits are subject to suspension. Students who receive a grade of *F* must confer with the dean before enrollment for further coursework is allowed. See CPS regulations (p. 827) for additional information regarding enrollment status and time limits.

See CPS regulations (p. 827) for additional information regarding enrollment status and time limits.

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSLM 6201. Theories, Principles, and Practices of Law Firm Management. 6 Credits.

PSLM 6202. ApplyingStrategic&BusPlanning. 3 Credits.

Team projects using a simulated law firm case study, including practice group and office profitability analysis, market assessments, creation of strategic plans, and merger analyses. Prerequisite: PSLM 6201.

PSLM 6203. Practical Applications of Law Firm Management. 3 Credits.

Presentation of strategic plans, analyses, and recommendations developed in PSLM 6202 before a panel of faculty, managing partners, and law firm professionals. Prerequisite: PSLM 6202.

PSLM 6204. Principles of Leadership. 6 Credits.

An intensive course focused on theories and principles of leadership within firms, including leading organizational change. Prerequisite: PSLM 6203.

PSLM 6205. Application of Leadership Frameworks. 3 Credits.

Concepts and frameworks that highlight leadership roles in firms. Prerequisite: PSLM 6204.

PSLM 6206. Strategic Leadership for Sustainability and Change. 3 Credits.

Integration of the content of PSLM 6204 and PSLM 6205 through a focus on strategic leadership. Prerequisite: PSLM 6205.

PSLM 6207. Process Improvement in Law Firms. 3 Credits.

Development of charters for major projects in law firms, applying skills pertaining to managing change and conflict. Prerequisite: PSLM 6206.

PSLM 6208. Legal Technology and Knowledge Management. 3 Credits.

Key elements of knowledge management, including development of a knowledge management strategy. Prerequisite: PSLM 6207.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF PARALEGAL STUDIES

The Master of Professional Studies in the field of paralegal studies is an advanced credential for those who wish to lead the profession in a variety of settings such as law, finance, insurance, consulting, and healthcare. The program curriculum balances a focus on analysis and critical thinking with the applied skills that employers seek: written and oral communication, research, and managing complex tasks and teams.

The master's is a 32-credit program that students complete in four semesters. GW's College of Professional Studies also offers an 18-credit graduate certificate, which is completed in two semesters. Credits earned in the graduate certificate program may be applied toward master's degree requirements.

Students may attend classes in the evenings on GW's Foggy Bottom campus (<http://nearyou.gwu.edu/kstreet>) or in a distance learning (http://paralegalstudiesmasters.online.gwu.edu/?Access_Code=GW-MPL-SEO2&utm_source=seo2&utm_medium=referral&utm_campaign=GW-MPL-SEO2) format.

Visit the program website (<http://cps.gwu.edu/paralegal>) for additional information.

REQUIREMENTS

Specific admission requirements can be found on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

The following requirements must be fulfilled: 32 credits, including 20 credits in core courses and 12 credits in the track selected.

Required

CPS 6294	Independent Research
CPS 6298	Practicum

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSLX 6210. American Jurisprudence. 3 Credits.

An introduction to the foundations, theories, history, and applications of the American legal system; local, state, and federal courts and sources of law; and ethics and professionalism issues of especial importance to paralegals.

PSLX 6211. Legal Research and Writing. 3 Credits.

Fundamentals of legal research using print and online tools.

PSLX 6212. Litigation. 3 Credits.

Legal technology and the rules of court, procedure, and evidence; technical and substantive skills necessary for effective litigation support.

PSLX 6213. Corporations and Contracts Law. 3 Credits.**PSLX 6214. Administrative Law. 3 Credits.**

An introduction to administrative and regulatory law; history and development of administrative law; agency, due process, agency actions, administrative investigation and hearings, and judicial review.

PSLX 6215. Government Contracts Law. 3 Credits.

The law of procuring, forming, and executing government contracts, including drafting and litigation; competition requirements, contract changes, and contract terminations; researching and drafting documents common to a government contracts practice.

PSLX 6216. Elements of Intellectual Property Law. 3 Credits.**PSLX 6217. Prosecution and Litigation in Intellectual Law Practice. 3 Credits.****PSLX 6218. International Trade and Finance. 3 Credits.****PSLX 6219. International Litigation. 3 Credits.****PSLX 6221. Tanzanian Legal System. 3 Credits.****PSLX 6222. Tanzanian Community Law. 3 Credits.****PSLX 6223. Contracts. 3 Credits.**

Contract elements, their attendant legal ramifications, and the processes necessary to make such determinations. Development of legal reasoning skills in evaluating issues arising from contract law.

PSLX 6224. Advanced Legal Writing. 3 Credits.

Advanced legal writing techniques and drafting for legal practice. Legal writing in plain English; strategies for effective writing; emphasis on legal memoranda, legal correspondence, and preparing and drafting legal pleadings and documents for court. Refines and advances skills in written legal analysis and legal citation.

PSLX 6225. Business Entities. 3 Credits.

Overview of business organizations, including partnerships, limited liability companies, and corporations. Key concepts applicable to business organizations, including regulation, business formation, document preparation. Application of legal analysis within the context of business entities and other topics applicable to paralegals in all disciplines.

PSLX 6226. International Law. 3 Credits.

Introduction and survey of international law, including international trade law and litigation. Rules and principles governing relations among sovereign states, international organizations, and sources of international law. Analysis of the rules and customs for handling international trade. International courts and tribunals; overview of the treaties, customary principles, and institutional structures governing international human rights law.

PSLX 6227. Intellectual Property Law. 3 Credits.

Introduction to the legal structure of an intellectual property practice. Trademarks, copyrights, and patents and the supporting practice concomitant to each element. Analysis of the processes, supporting documentation, laws, and rules regarding patent prosecution and litigation. This course complements and builds upon the legal issues and analysis introduced in the courses on contracts, business entities, and litigation.

PSLX 6294. Independent Research in Legal Studies. 2 Credits.

Guided, independent research to demonstrate the higher level of competency in research, analysis, writing, and oral presentation. Restricted to master's degree candidates in the paralegal studies programs.

PSLX 6298. Paralegal Practicum. 0-3 Credits.

Students work in legal environments while completing their studies, taking active roles to obtain, manage, and maximize the value of their positions. Restricted to master's degree candidates in the paralegal studies programs.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF PARALEGAL STUDIES WITH A CONCENTRATION IN HEALTHCARE CORPORATE COMPLIANCE

The Master of Professional Studies in the Field of Paralegal Studies with a Concentration in Healthcare Corporate Compliance program allows paralegal students to enroll in the master of paralegal studies program and the healthcare corporate compliance (<http://cps.gwu.edu/healthcare-compliance>) program concurrently and receive both credentials: a master's degree in paralegal studies and a graduate certificate in healthcare corporate compliance. Graduates will have acquired the skills, knowledge, and abilities required to enter the field of healthcare law.

The Master of Professional Studies in Paralegal Studies prepares students for one of the fastest growing professions and balances analysis and critical thinking with applied skills. The rigorous curriculum imparts the skills employers demand:

written and oral communication, research and managing complex tasks and teams.

The graduate certificate is the nationally recognized industry standard; the master's is an advanced credential for those who wish to lead the profession in a variety of settings such as law, finance, insurance, consulting, and healthcare.

The GW program is flexible, manageable, and practical. Students attend classes in the evenings on the Foggy Bottom Washington, D.C. campus (<http://cps.gwu.edu/paralegal>) or fully online (<http://paralegalstudiesmasters.online.gwu.edu>).

REQUIREMENTS

Applicants must hold a baccalaureate degree from a regionally accredited institution of higher learning or international equivalent. Additional admission requirements can be found on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

Required:

PSLX 6210	American Jurisprudence
PSLX 6211	Legal Research and Writing
PSLX 6212	Litigation
PSLX 6223	Contracts
PSLX 6224	Advanced Legal Writing
PSLX 6225	Business Entities
PSHC 6201	Introduction to Health Care Corporate Compliance
PSHC 6202	Compliance with Laws and Regulations I
PSHC 6204	Compliance with Laws and Regulations II
PSHC 6206	Case Studies in Health Care Corporate Compliance
CPS 6294	Independent Research
CPS 6298	Practicum

See CPS regulations for additional information regarding enrollment status and time limits.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF PUBLIC LEADERSHIP

The Master of Professional Studies in public leadership is a 39-credit program that focuses on the development of the key executive leadership skills required to lead organization

change initiatives. Students will acquire the managerial leadership skills required to integrate day-to-day operations with strategic priorities.

REQUIREMENTS

Applicants must hold a baccalaureate degree from a regionally accredited institution of higher learning or international equivalent. Applicants should have a strong academic background, normally with a *B* average or better (3.0 GPA on a 4.0 scale).

Specific admission requirements can be found on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

Required

PSPL 6221. Org Process Improvement Meth. 3 Credits.

PSPL 6222. Org Process Analysis. 3 Credits.

PSPL 6223. Org Process Design. 3 Credits.

PSPL 6224. PI Research Project. 3 Credits.

PSPL 6301. Fundamentals of Organization Performance Improvement. 6 Credits.

In-depth instruction on the Lean Six Sigma approach to organization performance improvement and appropriate uses of a variety of its analytical methods and tools. Students are required to complete a Lean Six Sigma application project and pass all examinations with a score of 80% or better. Students completing all requirements earn a Green Belt Certificate for proficiency in Lean Six Sigma methods and applications. Recommended background: currently working in an organization.

PSPL 6302. Leading Organization Performance Improvement Initiatives. 3 Credits.

Approaches for designing organization performance improvement initiatives and criteria for selecting the most effective approach for the intended initiative. Organization dynamics and change processes considered toward crafting a strategy for leading the changes required by the initiative. Methods and tools for planning and managing each phase of the change initiative. Application of concepts and skills to the design and development of Lean Six Sigma Black Belt projects that are implemented in subsequent courses. Recommended background: currently working in an organization.

PSPL 6303. Advanced Methods for Organization Performance Improvement. 3 Credits.

Advanced methods for data gathering, analysis, problem definition, and conducting and documenting performance improvement experiments. Change management strategies, experimental process design and tests, use of pilots and "sandboxes," and user-centered design principles. Black Belt-level change initiatives, performance improvement design criteria, and change management and organization engagement strategies. Students are required to begin leading an initiative and implementing changes resulting in documented benefits as well as passing all examinations with a score of 80% or better. Prerequisites: PSPL 6301. Recommended background: currently working in an organization.

PSPL 6304. Advanced Applications in Organization Performance Improvement. 3 Credits.

Students learn tools for pulsing the organization to test the effectiveness of their approaches and assess the degree of support from key leaders. Students are encouraged to adopt an evolutionary design perspective and modify their solutions continuously based on feedback and results achieved--documented benefits in cost savings, process speed increases, enhanced customer satisfaction, and revenue enhancements. All examinations must be passed with a score of 80% or better. Students present their final project reports and receive feedback from faculty and a team of peers. Those who complete all requirements with a grade of B or better will earn a Black Belt Certificate demonstrating proficiency in using advanced Lean Six Sigma methods and processes to lead organization performance improvement initiatives. Prerequisites: PSPL 6301, PSPL 6303. Recommended background: currently working in an organization.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF PUBLISHING

The Master of Professional Studies in the field of publishing is a 30-credit program designed for current and aspiring professionals, including post-bachelor and post-graduate students with degrees in varied disciplines. The program is offered part-time with a classroom-based or online option. Core course work provides a broad foundation of the entire industry, regardless of method of delivery (book, journal, or online), with five tracks focusing on professional roles: editorial, business, design, marketing, and technology.

Specific admission requirements can be found on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

Visit the program website (<https://cps.gwu.edu/publishing>) for more information.

REQUIREMENTS

The following requirements must be fulfilled: 30 credits, including 16 credits in required courses and the requisite number of credits in a selected track. The remaining credits are taken in elective courses; at least one elective course must be taken in each of the two remaining tracks.

Admission Requirements

Applicants must hold a baccalaureate degree from a regionally accredited institution of higher learning or international equivalent. Applicants should have a strong academic background, normally with a B average or better (3.0 grade point average on a 4.0 scale). The program is available on a part-time basis only.

Additional application requirements can be found on the Graduate Programs Finder (<http://www.gwu.edu/all-graduate-programs>).

Degree requirements: 30 credits including:

PSSL 6259. Strat. IT Invsmt. & Perf. Mgmt. 3 Credits.

PSSL 6260. Methods of Analysis in Security. 3 Credits.

PSSL 6270. Capstone Project. 3 Credits.

Development of a research project integrating theoretical and analytic perspectives applied to improving organizational effectiveness in public safety agencies.

PSSL 6401. National & International Security Threats. 6 Credits.

The evolution of terrorism and politically motivated violence. Shifts in the operational tactics of guerrilla, terrorist, and insurgent groups and rogue states. Approaches to the formulation of counter-terrorist strategies. The conduct of national and international threat assessment. The various international legal and strategic options available to public safety agencies.

PSSL 6443. Intelligence and Information Systems. 6 Credits.

This course explores the principles of the structure and components of both the national intelligence community and law enforcement communities. It focuses on the analysis of intelligence policies and strategies at the international, national, and regional levels. This course will provide a general understanding of information security, recognize the different challenges, and acquire an awareness of the different cyber threats that today's organizations are exposed to.

PSSL 6448. Introduction to Cyber Conflict, Cyber Intelligence and Strategic Analysis. 6 Credits.

An exploration of cyber conflict, its history, and how it is being integrated into government and military strategies. The evolution of cyber intelligence and models for its collection and analysis. Technical, tactical, and strategic use of information technology between states and non-state actors; national and international cyber strategies, law, and policy as they relate to cyber intelligence efforts; advanced persistent threats; cyber threats to national security; strategic, operational, and tactical cyber intelligence efforts and countermeasures; and cyber weapons, actors, and methods of delivery. The current state and the future of cyber conflict as an evolving phenomenon. Restricted to Master of Professional Studies in the field of strategic cyber operations and information management students only.

PSSL 6450. Strategic IT Investment and Methods of Analysis. 6 Credits.

The effective use of information technology (IT) within public safety organizations. Integration of IT into business processes. Performance measurement, cost benefits analysis, and program evaluation. Methods and problems related to data collection in security fields, with emphasis on analytical design, instrument usage, sampling, and measurement.

PSSL 6452. Strategic Planning & Emergency Response. 6 Credits.

The adaptation of strategic planning and performance measures beyond budgeting for the requirements of government agencies that deal with long-term security issues. Basic principles of emergency planning, including development of an across-the-board response plan involving all levels of government and the private sector, Strategies for ensuring that communication channels are open and secure during a crisis situation.

PSSL 6453. Leadership and Change Management. 6 Credits.

An in-depth look at the role of power and influence in organizations. Case studies demonstrate the necessity of mobilizing the political support and resources needed to implement objectives. The challenges, techniques, burdens and successes associated with initiating and implementing organizational change from multiple theoretical vantages.

PSSL 6455. Information Management & Data Analytics. 6 Credits.

Application of information management techniques to justice and public safety fields: governance structure, emerging modes of communication within and outside organization, processes that enable managers to make decisions. Strategic application of technology to data analysis. Introduction to cutting edge software including predictive and spatial analytics. Principles of data visualization. Application of analytics and visualization in solving justice and public safety problems.

PSSL 6457. Enterprise Architecture and Information Sharing and Safeguarding. 6 Credits.

Overview of technology environments including software, hardware, networks, applications, data, communications, and other relevant architecture disciplines with a focus on service-oriented architecture and similar innovations applicable to the subject fields. Principles of privacy and safeguarding data in government owned or operated databases related to justice, public safety and homeland security.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF SUSTAINABLE URBAN PLANNING

The Master of Professional Studies in Sustainable Urban Planning is a professional master's degree program dedicated to giving students the skills they need to face the challenges of modern urbanization, both in the United States and around the globe. The 48-credit program offers an array of high-level theoretical, philosophical, and historical courses in planning, urban issues, and new technological approaches that aim to prepare new planning professionals for success in the burgeoning field. Students gain a deep understanding of cities and the expertise to turn that understanding into forward-looking inquiry and action. The program of study focuses on the theory and application of urban and environmental economics; sustainable development planning for urban adaptation and resiliency; pragmatic approaches to land use and transportation planning within established and newly developing city systems; climate change and other global, development-related crises; sustainable design techniques and building technologies; and applied research skills, including advanced geospatial and econometric methods. Above all, the program gives students the ability to use their ideas to help forge better cities and, thereby, to create a brighter future for the world as a whole.

Specific admission requirements are shown on the Graduate Program Finder.

Visit the program website for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits, including 30 credits in common curriculum and 18 credits in courses in one track.

Admission requirements

Applicants must hold a baccalaureate degree from a regionally accredited institution of higher learning or international equivalent. Applicants should have a strong academic background, normally with a B average or better (3.0 GPA on a 4.0 scale). Additional application requirements can be found on the Graduate Programs Finder (<http://www.gwu.edu/all-graduate-programs>)

Degree requirements

The Master of Professional Studies in sustainable urban planning program consists of 48 credits offered in three parts:

1. Certificate in Urban Sustainability - 18 credits
2. Core Planning Courses - 12 credits
3. Certificate in Climate Change Management and Policy or Sustainable Landscapes - each 18 credits

Scholarship Requirements

A grade-point average of 3.0 is required for award of a master's degree. Students who receive a grade of C in more than 6 credits are subject to suspension. Students who receive a grade of F must confer with the dean before enrollment for further course work is allowed. See CPS regulations (p. 827) for additional information regarding enrollment status and time limits

Certificate in Urban Sustainability

PSUS 6201	Princs of Sust Urb Planning
PSUS 6202	Environmental and Urban Economics
PSUS 6210	Sust Transportation Systems
PSUS 6211	Sustainable Land Use
PSUS 6212	Sustainable Communities
PSUS 6230	Sustainable Comm Design Studio

Core Planning

PSUS 6203	Res Methods for Planners
PSUS 6204	Land Use Law
PSUS 6213	Advanced Research Methods
PSUS 6233	Capstone Studio

Certificate in Climate Change Management

PSUS 6221	Greenhouse Gas Acctg & Mgmt
PSUS 6222	Buildings and Climate Issues
PSUS 6223	Transportation & Climate Issues
PSUS 6224	Production and Climate Issues
PSUS 6231	Practicum: Climate Change Mgt & Pol
PSUS 6235	Adv Topics in Urban Sust

Certificate in Sustainable Landscapes

PSUS 6260	Intro to Sustainable Design
PSUS 6261	Ecology of the Built Env.
PSUS 6262	Tools for Sustainable Design
PSUS 6264	Native Plants I
PSUS 6265	Native Plants II
PSUS 6268	Sustainable Design Methods
PSUS 6269	Sustenance and the Landscape
PSUS 6266	Ecological Restoration
PSUS 6270	Sustainable Design Charette

FACULTY

Director J. Carruthers

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

PSUS 6201. Principles of Sustainable Urban and Regional Planning. 3 Credits.

The environmental, social, and economic elements of sustainability. Present and future challenges, including environmental management, energy policy, financial crises, global warming, inequality, public education, third and first world slums, the success and failure of nations, urban agriculture, urban economics, and more. The implications of sustainable development and conducting research based on evidenced-based policy. Students focus on the work of researchers outside of the planning field as they write a series of research essays containing reviews of relevant scientific literature.

PSUS 6202. Urban and Environmental Economics. 3 Credits.

The application of neoclassical economics to problems faced by practitioners of the field of sustainable urban and regional planning. Key economic concepts including supply and demand, consumption and production, markets and market failure, and measurement of environmental and other non-market commodities. An economist's perspective on the principals and methods for understanding urban and environmental challenges and solutions, urban growth, environmental quality, public policy, and other issues fundamental to contemporary development.

PSUS 6203. Research Methods I: Geospatial and Econometric Analysis. 3 Credits.

Focus on developing proficiency in geographic information systems (GIS) and econometric analysis, a method of statistical analysis for measuring the relationships at work in socioeconomic phenomena. Building and analyzing spatial datasets, specifically using ArcGIS and Stata statistical software.

PSUS 6204. Land Use Law. 3 Credits.

PSUS 6210. Transportation Planning in City Systems. 3 Credits.

Transportation planning with long-run goals in mind, including reducing greenhouse gas emissions. The role of planning at local and regional scales within the broader framework of transportation engineering.

PSUS 6211. Regional Development and Agricultural Economics. 3 Credits.

The economics of land use patterns and development processes in the United States and elsewhere in the world. Introduction to the field of agricultural economics and examination of food deserts and other food-related problems relevant to the field of sustainable urban planning.

PSUS 6212. Sustainable Communities I: Housing and Design. 3 Credits.

Community development with a focus on policy and the various sectors of interest that affect contemporary urbanization. How policies, planning techniques, and implementation strategies form the core work of planning practitioners. Topics include water supply, food deserts, public health, and urban resilience. Pathways to more sustainable communities are explored through the policy arenas in which key decisions are made; key sectors that make up the fabric of communities; and special topics that have emerged as critical challenges for sustainable community development.

PSUS 6213. Research Methods II: Advanced Geospatial and Econometric Analysis. 3 Credits.

Builds upon the skills learned in PSUS 6203. Application of econometric and geospatial analysis in the field of sustainable urban and regional planning. Emphasis on objectivity and use of the scientific method to form defensible, evidence-based policy. Prerequisite: PSUS 6203.

PSUS 6220. Planning Resilient and Low-Carbon Cities. 3 Credits.

International perspectives on urban planning, taking into consideration increased global temperatures resulting from greenhouse gas emissions-induced climate change. The course is taught with reference to the findings of the Intergovernmental Panel on Climate Change (IPCC) and considers how urbanization around the world must adapt to the reality of global warming and its consequences.

PSUS 6221. The Scientific Basis of Climate Change. 3 Credits.

The science underlying climate change policy and decision making. Earth systems, climate change projections, the need for mitigation, and impact assessment. Designed for non-scientists.

PSUS 6222. Sustainable Building: Energy Demand, Efficiency, and Supply. 3 Credits.

Energy use in built environments with an emphasis on fundamental drivers of energy demand, strategies to promote energy efficiency, and essential features of energy supply. Examination of the relationship between energy demand and supply in development. How advances in construction technology can help counter greenhouse gas emissions.

PSUS 6223. Sustainable Communities II: Tools for Assessment and Transformation. 3 Credits.

Builds on PSUS 6212 by further detailing the theory and tools relevant to the assessment and transformation of neighborhood and communities. Geospatial analysis explore the fundamental drivers of urban form, advanced transportation systems, theories of change, and various impact assessment tools used to inform policy implementation.

PSUS 6224. Sustainable Energy for Cities and the Environment. 3 Credits.

Resource management and renewable energy technologies. Vulnerabilities of existing urban structures, particularly the energy grid. Implications of and solutions to energy-related problems likely to arise in present and future cities.

- PSUS 6230. Sustainable Comm Design Studio. 3 Credits.**
- PSUS 6231. Practicum:ClimateChangeMgt&Pol. 3 Credits.**
- PSUS 6233. Capstone Studio. 3 Credits.**
- PSUS 6235. Adv Topics in Urban Sust. 3 Credits.**
- PSUS 6260. Intro to Sustainable Design. 2 Credits.**
- PSUS 6261. Ecology of the Built Env.. 2 Credits.**
- PSUS 6262. Tools for Sustainable Design. 3 Credits.**
- PSUS 6264. Native Plants I. 2 Credits.**
- PSUS 6265. Native Plants II. 1 Credit.**
- PSUS 6266. Ecological Restoration. 1 Credit.**
- PSUS 6268. Sustainable Design Methods. 2 Credits.**
- PSUS 6269. Sustenance and the Landscape. 2 Credits.**

PSUS 6270. Sustainable Design Charrette. 3 Credits.
Preparation of a final project that demonstrates students' understanding of how to select and use sustainable site principles in a landscape design. Building and expanding upon techniques learned in previous coursework, students show comprehension of how their project site has boundaries within its surrounding ecosystem, but is still part of a larger life cycle. Students work in a concentrated charrette format to develop a site design that is fully sustainable and buildable.

POLITICAL MANAGEMENT

The Graduate School of Political Management, through the College of Professional Studies, offers the Master of Professional Studies in the fields of political management, legislative affairs, strategic public relations, and advocacy in a global environment. Each program has a prerequisite of a bachelor's degree with a *B* average from an accredited college or university and is subject to the CPS regulations (<http://www.cps.gwu.edu>) that appear under the respective programs. In addition, graduate certificate programs are offered in campaign strategy, digital politics, community advocacy, public relations, PACs and political management, and global public relations. The Master of Professional Studies in political communication and governance; and graduate certificates in both political management and strategic governance, and strategic communications and campaigns are offered in Spanish to closed cohorts of students in Latin America and in Spain.

GRADUATE

Master's programs

- Master of Professional Studies in the field of advocacy in the global environment (p. 848)
- Master of Professional Studies in the field of legislative affairs (<http://bulletin.gwu.edu/professional-studies/political-management/mps-legislative-affairs>)

- Master of Professional Studies in the field of political communication and governance (offered only in Spanish) (p. 850)
- Master of Professional Studies in the field of political management (p. 850)
- Master of Professional Studies in the field of strategic public relations (p. 851)

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office
- PMGT (p. 1237)
- LGAF (p. 1180)
- PSPR (p. 1253)

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF ADVOCACY IN THE GLOBAL ENVIRONMENT

The Master of Professional Studies in the field of advocacy in the global environment offers innovative experiential learning opportunities for professionals involved in all aspects of global politics and advocacy, from lobbying to strategic public relations, campaigns, and influence building.

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program (<http://www.gwu.edu/all-graduate-programs>) Finder.

Applicants must hold a baccalaureate degree from a regionally accredited institution of higher learning or international equivalent. Applicants should have a strong academic background, normally with a *B* average or better (3.0 GPA on a 4.0 scale).

This innovative program is designed for both working professionals and full-time students with classes meeting conveniently Monday through Thursday evenings in the Washington, DC metro area. The program is also offered online. The required 39 credits can be completed in as little as one year; however, the usual pace is two courses per semester completed in two years. Twelve credits of coursework are dedicated to the global immersion residencies in regions

around the globe: North America (Washington, DC), Europe (Brussels), Middle East and Africa (Istanbul), Asia (Hong Kong), and Latin America (São Paulo).

Requirements for the major:

Core courses	
PSAD 6225	Fundamentals of Global Political Management
PMGT 6403	Political Data and Analytics
PMGT 6402	Applied Political Communications
PMGT 6404	Principled Political Leadership
PSAD 6240	Global Advocacy: Strategies, Tools, and Tactics
or PSAD 6270	International Public Relations and Global Advocacy
PSAD 6250	Cultural Aspects of Global Engagement
PSAD 6260	Comparative Political Management Environments
Four global residences	
PSAD 6200	Global Perspective Residencies
Six credits of electives selected in consultation with advisor*	

*Electives may be chosen from course offerings of the Legislative Affairs, Strategic Public Relations, or Political Management programs. Some students may take courses in the Elliott School of International Affairs, Trachtenberg School of Public Policy and Public Administration, the School of Business, or create an independent study course with the permission of the program director and approval of the director.

Scholarship Requirements

A grade-point average of 3.0 is required for award of a master's degree. Students who receive a grade of C in more than 6 credits are subject to suspension. Students who receive a grade of F must confer with the dean before enrollment for further coursework is allowed. See CPS regulations (p. 827) for additional information regarding enrollment status and time limits .

FACULTY

Professors M. Kennedy

Associate Professors M. Cornfield, S. Billet, L. Parnell, S. Wiley

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF LEGISLATIVE AFFAIRS

The Master of Professional Studies in the Field of Legislative Affairs centers on the study of applied politics in the legislative arena, offering students the perspective of both political scholars and working professionals in the legislative arena. The curriculum focuses on how Congress operates, how legislative procedures shape outcomes, and how entities like the Executive Branch, lobbyists, and constituents influence the work of the legislature.

The program is designed for both working professionals and full-time students with classes meeting conveniently Monday through Thursday evenings in the Washington, D.C. metro area. The required 33 credits can be completed in as little as one year; however, the usual pace is two courses per semester completed in two years.

REQUIREMENTS

Applicants must hold a baccalaureate degree from a regionally accredited institution of higher learning or international equivalent. Applicants should have a strong academic background, normally with a B average or better (3.0 GPA on a 4.0 scale). Specific admission requirements can be found on the Graduate Program Finder.

The 33-credit program requires:

LGAF 6201	Politics and Public Policy
LGAF 6202	Legislative Politics
LGAF 6203	Executive-Legislative Relations
LGAF 6204	Research Methods for Legislative Affairs Specialists

At least two courses chosen from each of the following groups:

American political process	
LGAF 6217	Budgetary Politics
LGAF 6218	Judicial Politics
LGAF 6219	American Presidency
LGAF 6222	Parties and Elections
LGAF 6223	Public Opinion/Pol Socializatn
LGAF 6224	Interest Group Politics
LGAF 6228	Media and Congressional Politics
LGAF 6233	Comparative Legislatures

LGAF 6234	PACs and Congress
Public policy analysis	
LGAF 6246	Congress & Foreign Policy
LGAF 6249	Congress and National Security Policy
LGAF 6251	Budgetary Policy
LGAF 6260	Special Topics: Domestic Policy
LGAF 6270	Special Topics: Congress and Foreign Policy

The program may be completed with or without a thesis (LGAF 6998- LGAF 6999).

With prior approval of the academic advisor, students may take up to three courses in related disciplines. All students must pass a Master's Comprehensive Examination.

See CPS regulations for additional information regarding enrollment status and time limits.

FACULTY

Director S. Billet

Associate Professors D. Johnson, M. Cornfield, S. Billet, L. Parnell, S. Wiley

Professorial Lecturers J. Weinberg, R. Whitlock, C. Veillette

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF POLITICAL COMMUNICATION AND GOVERNANCE (OFFERED ONLY IN SPANISH)

Specific admission requirements are shown on the Graduate Program Finder. (<http://www.gwu.edu/all-graduate-programs>)

Graduate certificates in political management and strategic governance and in strategic communications campaigns and the Master of Professional Studies in political communication and governance are offered in Spanish to closed cohorts of students in Latin America and in Spain. Additional information can be found at the program's website (<http://www.gspminternational.org>).

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF POLITICAL MANAGEMENT

REQUIREMENTS

Specific admission requirements can be found on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

There are two options available for the Political Management Master's Degree:

- 12 courses (36-credit-hours); **OR**
- 10 courses (30-credit-hours) plus a master's thesis (6-credit-hours)

The 36-credit program requires:

PMGT 6401 Fundamentals of Political Management

PMGT 6402 Applied Political Communications

PMGT 6403 Political Data and Analytics

PMGT 6404 Principled Political Leadership

One of the following:

PMGT 6495 Political Power & Practice

or

PMGT 6498 Thesis I

PMGT 6499 Thesis II

Students may choose to focus their coursework in one of the following areas, or work with the program director to select courses from several areas to meet individual aspirations.

18-21 credits are completed through electives grouped in "clusters" to assist students in identifying related course content.

Applied Proficiencies:

PMGT 6450 Rules, Laws, and Strategy

PMGT 6452 Digital Strategy

PMGT 6454 Fundraising and Budgeting

PMGT 6456 Speechcraft

PMGT 6458 Crisis Management

PMGT 6460 Audience Research

PMGT 6462 Opposition Research

PMGT 6464 Influencing the Media

PMGT 6466	Political Advertising
PMGT 6468	Digital Advertising and Action
PMGT 6470	Digital Content Creation
PMGT 6472	Maximizing Social Media
PMGT 6474	Stereotypes and Political Strategy
PMGT 6476	Political Consulting
Advocacy politics:	
PMGT 6410	Grassroots Engagement
PMGT 6412	Issues Management
PMGT 6414	Lobbying
PMGT 6416	International Lobbying
PMGT 6418	Budget Politics
PMGT 6420	Corporate Public Affairs
PMGT 6422	State and Intergovernmental Politics
Electoral politics:	
PMGT 6430	Campaign Strategy
PMGT 6432	Managing Campaigns
PMGT 6434	Running for Office
PMGT 6436	National Campaign Dynamics
PMGT 6438	State and Local Campaigns
PMGT 6440	Targeting and Voter Contact
PMGT 6442	Campaigns Around the World

See CPS regulations for additional information regarding enrollment status and time limits.

MASTER OF PROFESSIONAL STUDIES IN THE FIELD OF STRATEGIC PUBLIC RELATIONS REQUIREMENTS

Specific admission requirements can be found on the Graduate Program Finder.

The 33-credit degree program consists of:

PSPR 6201	Public Relations Principles and Practices
PSPR 6202	Advanced Writing for PR Professionals

PSPR 6203	Research Methods for Public Relations and Public Affairs Managers
PSPR 6204	Media Relations in the New Media World
PSPR 6205	Fundamentals of Business and Management for Public Relations and Public Affairs
PSPR 6206	Ethical Standards in Public Relations and Public Affairs
Four courses chosen in consultation with the director of the program	
CPS 6300	Capstone Research Project

See CPS regulations for additional information regarding enrollment status and time limits.

CERTIFICATE PROGRAMS

Undergraduate certificates

- Cyber Attacks and Cyber Threats Analysis
- Investigation of Cyber Security Incidents (p. 852)
- Protection and Defense of Computer Networks (p. 852)

Graduate certificates

The College of Professional Studies offers the following graduate certificates. Requirements are listed at www.cps.gwu.edu (<http://www.cps.gwu.edu>). Note that Strategic Cyber Security Enforcement is available only to students enrolled in the M.P.S. in safety security and leadership online program. In addition to those listed, graduate certificates in political management and strategic governance and in strategic communications campaigns are offered in Spanish to closed cohorts of students in Latin America and in Spain.

- Academic Publishing
- Campaign Strategy (p. 852)
- Climate Change Management and Policy (p. 853)
- Community Advocacy (p. 853)
- Digital Politics (p. 853)
- Fundamentals of Strategic Security
- Global Public Relations (p. 853)
- Health Care Corporate Compliance (p. 854)
- Justice and Public Safety Information Management (p. 854)
- Landscape Design (p. 854)
- Law Firm Management (p. 855)
- Organization Performance Improvement (p. 855)
- PACs and Political Management (p. 855)
- Paralegal Studies (p. 856)

- Public Relations (p. 856)
- Safety Leadership
- Strategic Cyber Security Enforcement
- Strategic Management and Executive Leadership for Law Enforcement
- Sustainable Landscapes (p. 857)
- Urban Sustainability (p. 857)

UNDERGRADUATE CERTIFICATE IN CYBER ATTACKS AND CYBER THREATS ANALYSIS

The certificate in Cyber Attacks and Cyber Threats Analysis is intended for students with associate's or non-technical bachelor's degrees who are looking to learn about highly specialized review and evaluation of incoming cyber security attacks and breaches. Upon the completion of this program, students will be able to investigate cyber security incidents, and identify and correct computer network vulnerabilities through penetration testing and hacking techniques.

REQUIREMENTS

Required (18 credits):

PSCS 4201

PSCS 4202 Attacker Tools and Techniques

PSCS 4203 All Sources Intelligence

PSCS 4204 Computer Network Attack and Exploitation

PSCS 4205 Practicum - Cyber Attack Techniques

UNDERGRADUATE CERTIFICATE IN INVESTIGATION OF CYBER SECURITY INCIDENTS

The certificate in Investigation of Cyber Security Incidents is designed for students who are looking to learn about investigation of cyber events and crimes that impact information technology systems and computer networks. Upon the completion of this program, students will be able to investigate and analyze cyber security incidents and collect digital evidence for analysis.

REQUIREMENTS

Required (18 credits):

PSCS 2301 Cyber Investigation

PSCS 2302 Digital Forensics

PSCS 2303 Compliance and Risk Management

PSCS 2304 Incident Response

PSCS 2305 Practicum - Incident Response Techniques

UNDERGRADUATE CERTIFICATE IN PROTECTION AND DEFENSE OF COMPUTER NETWORKS

The certificate in Protection and Defense of Computer Networks is designed for students with associate's or non-technical bachelor's degrees who are looking to learn about current, state-of-the-art protection technologies. Upon the completion of this program, students will be able to identify, analyze, and mitigate potential threats to information technology systems or computer networks.

REQUIREMENTS

Required (18 credits):

PSCS 4101 Introduction to Protection Technologies

PSCS 4102 Intrusion Detection and Vulnerability Management

PSCS 4103

PSCS 4104 Securing Network Devices

PSCS 4105 Practicum - Cyber Defense Techniques

GRADUATE CERTIFICATE IN CAMPAIGN STRATEGY

REQUIREMENTS

Specific admission requirements are shown on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

Required courses (5 courses, 15 credits):

PMGT 6401 Fundamentals of Political Management

PMGT 6402 Applied Political Communications

PMGT 6403 Political Data and Analytics

PMGT 6430 Campaign Strategy

PMGT 6440 Targeting and Voter Contact

Elective course (1 course, 3 credits):

PMGT 6432 Managing Campaigns

PMGT 6434 Running for Office

PMGT 6454 Fundraising and Budgeting

See CPS regulations (p. 827) for additional information regarding enrollment status and time limits.

GRADUATE CERTIFICATE IN CLIMATE CHANGE MANAGEMENT AND POLICY

Specific admission requirements can be found on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

Required:

PSUS 6221 Greenhouse Gas Acctg & Mgmt

PSUS 6222 Buildings and Climate Issues

PSUS 6223 Transportation & Climate Issues

PSUS 6224 Production and Climate Issues

PSUS 6231 Practicum: Climate Change Mgt & Pol

PSUS 6235 Adv Topics in Urban Sust

See CPS regulations (p. 827) for additional information regarding enrollment status and time limits.

GRADUATE CERTIFICATE IN COMMUNITY ADVOCACY

REQUIREMENTS

Specific admission requirements can be found on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

Required courses:

PMGT 6401 Fundamentals of Political Management

PMGT 6402 Applied Political Communications

PMGT 6403 Political Data and Analytics

PMGT 6410 Grassroots Engagement

PMGT 6460 Audience Research

Elective courses:

PMGT 6422 State and Intergovernmental Politics

PMGT 6440 Targeting and Voter Contact

See CPS regulations (p. 827) for additional information regarding enrollment status and time limits.

GRADUATE CERTIFICATE IN DIGITAL POLITICS

REQUIREMENTS

Specific admission requirements can be found on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

Required courses:

PMGT 6402 Applied Political Communications

PMGT 6403 Political Data and Analytics

PMGT 6452 Digital Strategy

Elective courses:

PMGT 6440 Targeting and Voter Contact

PMGT 6468 Digital Advertising and Action

PMGT 6470 Digital Content Creation

PMGT 6472 Maximizing Social Media

See CPS regulations (p. 827) for additional information regarding enrollment status and time limits.

GRADUATE CERTIFICATE IN GLOBAL PUBLIC RELATIONS

REQUIREMENTS

Specific admission requirements can be found on the Graduate Program Finder (<http://www.gwu.edu/all-graduate-programs>).

Required courses (5 courses, 15 credit hours):

PMGT 6402 Applied Political Communications

PMGT 6403 Political Data and Analytics

PSPR 6204 Media Relations in the New Media World

PSAD 6270 International Public Relations and Global Advocacy

PSAD 6200 Global Perspectives Residencies

Elective course (1 course, 3 credits)

Flexible electives: With the program director's approval, you may take an elective from the strategic public relations, legislative affairs, or political management programs. Some students may elect to take a course at another GW school or college with approval from the program director.

See CPS regulations (p. 827) for additional information regarding enrollment status and time limits.

GRADUATE CERTIFICATE IN HEALTH CARE CORPORATE COMPLIANCE

Specific admission requirements can be found on the Graduate (<http://www.gwu.edu/all-graduate-programs>)Program Finder.

The following requirements must be fulfilled: 12 credits in required courses.

To earn the Healthcare Corporate Compliance Graduate Certificate, students must complete the 12 credit program and maintain a grade point average of 3.0 (B) or higher.

Required:

PSHC 6201	Introduction to Health Care Corporate Compliance
PSHC 6202	Compliance with Laws and Regulations I
PSHC 6204	Compliance with Laws and Regulations II
PSHC 6206	Case Studies in Health Care Corporate Compliance

See CPS regulations (p. 827) for additional information regarding enrollment status, grade-point average requirements, and time limits.

GRADUATE CERTIFICATE IN JUSTICE AND PUBLIC SAFETY INFORMATION MANAGEMENT REQUIREMENTS

Specific admission requirements can be found on the Graduate (<http://www.gwu.edu/all-graduate-programs>)Program Finder.

Program Format - Graduate Certificate

The 15 credit graduate certificate in justice and public safety information management curriculum has been tailored to address the rising demand for professionals with a comprehensive and strategic knowledge of policy, best practices, and strategies related to IT and data management for use by public and private sector homeland security and justice organizations..

The program combines classroom-based and online instruction delivered via Blackboard, GW's web-based educational platform. The online component allows students to fit a full course load into their busy schedules, making it possible to complete the degree in three semesters.

Required: 15 credits

Semester One

PSSL 6255	Info. Mgt. Just. & Pub. Safety
PSSL 6256	Applied Tech in Data Analytics

Semester Two

PSSL 6257	Enterprise Arch. & Standards
PSSL 6258	Info Sharing & Safeguarding

Semester Three

PSSL 6259	Strat. IT Invsmt. & Perf. Mgmt
-----------	--------------------------------

Program Schedule

- Students can be admitted for Spring or Fall cohort. Students can also begin Summer semester as a nondegree student. See admissions page for more details.
- All classes are three credits.
- Students will attend online classes and one weekend residency per month. Weekend residency classes will meet Saturday and Sunday, from 9:00am-4:00pm, with a break for lunch.
- 24 hours in class, the rest of the coursework will be completed online via Blackboard.

See CPS regulations (p. 827) for additional information regarding enrollment status and time limits.

GRADUATE CERTIFICATE IN LANDSCAPE DESIGN REQUIREMENTS

Specific admission requirements can be found on the Graduate (<http://www.gwu.edu/all-graduate-programs>)Program Finder.

Requirements:

One introductory course:

PSLD 6100	Landscape Graphics
-----------	--------------------

26 credits with a GPA of 3.0 or above:

PSLD 6201	Introduction to Design
PSLD 6202	Site Analysis

PSLD 6203	Site Engineering
PSLD 6204	Construction Methods and Materials
PSLD 6212	History of Landscape Design
PSLD 6213	Contemporary Themes in the Landscape
PSLD 6221	Landscape Plants for Fall
PSLD 6223	Landscape Plants for Spring
PSLD 6225	Landscape Plants for Summer
PSLD 6231	Site Design Studio
PSLD 6236	Planting Design Studio
PSLD 6240	Comprehensive Project

Permission from the instructor is required for students not admitted to the graduate certificate program to take courses 6201 and above. A maximum of six credits (including the introductory course) can be taken in non-degree status.

See CPS regulations (p. 827) for additional information regarding enrollment status and time limits.

GRADUATE CERTIFICATE IN LAW FIRM MANAGEMENT

Specific admission requirements can be found on the Graduate (<http://www.gwu.edu/all-graduate-programs>)Program Finder.

The Master of Professional Studies in law firm management is a 30-credit program that can be completed in 18 months. The first 12 credits may stand alone as a graduate certificate. As described below, the program is specially designed for people working full-time, with a combination of distance learning and short-term residencies at the GW Alexandria Graduate Education Center.

Required:

PSLM 6201	Theories, Principles, and Practices of Law Firm Management
PSLM 6202	Applying Strategic & Business Planning
PSLM 6203	Practical Applications of Law Firm Management
PSLM 6204	Principles of Leadership
PSLM 6205	Application of Leadership Frameworks
PSLM 6206	Strategic Leadership for Sustainability and Change
PSLM 6207	Process Improvement in Law Firms

PSLM 6208	Legal Technology and Knowledge Management
-----------	---

See CPS regulations (p. 827) for additional information regarding enrollment status and time limits.

GRADUATE CERTIFICATE IN ORGANIZATION PERFORMANCE IMPROVEMENT

Specific admission requirements can be found on the Graduate (<http://www.gwu.edu/all-graduate-programs>)Program Finder.

The Graduate Certificate Program in Organization Performance Improvement is a 15-credit program comprised of four courses, Green and Black Belt certification exams, two organization performance improvement projects and individual project coaching for content application and practical project management strategies. The courses are:

PSPL 6301	Fundamentals of Organization Performance Improvement
-----------	--

PSPL 6302	Leading Organization Performance Improvement Initiatives
-----------	--

PSPL 6303	Advanced Methods for Organization Performance Improvement
-----------	---

PSPL 6304	Advanced Applications in Organization Performance Improvement
-----------	---

See CPS regulations (p. 827) for additional information regarding enrollment status and time limits.

GRADUATE CERTIFICATE IN PACS AND POLITICAL MANAGEMENT REQUIREMENTS

Specific admission requirements can be found on the Graduate (<http://www.gwu.edu/all-graduate-programs>)Program Finder.

Required course:

LGAF 6234	PACs and Congress
-----------	-------------------

Four elective courses including:

Two political management courses:

PMGT 6454	Fundraising and Budgeting
-----------	---------------------------

PMGT 6221	Fundraising for Organizations
-----------	-------------------------------

PMGT 6412	Issues Management
-----------	-------------------

PMGT 6410	Grassroots Engagement
-----------	-----------------------

PMGT 6450 Rules, Laws, and Strategy

Two legislative affairs courses:

LGAF 6202 Legislative Politics

LGAF 6222 Parties and Elections

LGAF 6224 Interest Group Politics

LGAF 6260 Special Topics: Domestic Policy

See CPS regulations (p. 827) for additional information regarding enrollment status and time limits.

GRADUATE CERTIFICATE IN PARALEGAL STUDIES

REQUIREMENTS

Specific admission requirements can be found on the Graduate (<http://www.gwu.edu/all-graduate-programs>)Program Finder.

Students who successfully complete the graduate certificate curriculum acquire the knowledge, skills, and abilities to succeed in any law firm, government agency, corporation, or non-profit. Those who earn the graduate certificate may apply all of the credits toward the master's degree in paralegal studies.

18 core curriculum credits:

PSLX 6210 American Jurisprudence

PSLX 6211 Legal Research and Writing

PSLX 6212 Litigation

PSLX 6223 Contracts

PSLX 6224 Advanced Legal Writing

PSLX 6225 Business Entities

See CPS regulations (p. 827) for additional information regarding enrollment status and time limits.

GRADUATE CERTIFICATE IN PUBLIC RELATIONS

REQUIREMENTS

Specific admission requirements can be found on the Graduate (<http://www.gwu.edu/all-graduate-programs>)Program Finder.

Required courses:

PSPR 6201 Public Relations Principles and Practices

PSPR 6202 Advanced Writing for PR Professionals

PSPR 6203 Research Methods for Public Relations and Public Affairs Managers

PSPR 6204 Media Relations in the New Media World

PSPR 6205 Fundamentals of Business and Management for Public Relations and Public Affairs

PSPR 6206 Ethical Standards in Public Relations and Public Affairs

See CPS regulations (p. 827) for additional information regarding enrollment status and time limits.

GRADUATE CERTIFICATE IN STRATEGIC MANAGEMENT AND EXECUTIVE LEADERSHIP FOR LAW ENFORCEMENT

REQUIREMENTS

Specific admission requirements can be found on the Graduate (<http://www.gwu.edu/all-graduate-programs>)Program Finder.

Prerequisite: a Bachelor's degree with a 3.0 GPA or better (on a 4.0-point to 4.0 point scale) from a regionally accredited college or university.

The 18-credit graduate certificate in Strategic Management and Executive Leadership for Law Enforcement program is jointly offered by GW and American University. The curriculum has been tailored to address the rising demand for law enforcement professionals with a comprehensive set of leadership and strategic thinking skills. Three courses are taken at GW and three at American University.

The following requirements must be fulfilled:

Required (18 credits):

PSSL 6250 Strategic Planning and Budgeting

PSSL 6253 Managing the Politics of Leadership

PSSL 6270 Capstone Project

PUAD 620 *

PUAD 638 *

PUAD 639 *

*Course taken at American University

See CPS regulations (p. 827) for additional information regarding enrollment status and time limits.

GRADUATE CERTIFICATE IN SUSTAINABLE LANDSCAPES

Specific admission requirements can be found on the Graduate (<http://www.gwu.edu/all-graduate-programs>)Program Finder.

Required:

PSUS 6260	Intro to Sustainable Design
PSUS 6261	Ecology of the Built Env.
PSUS 6262	Tools for Sustainable Design
PSUS 6264	Native Plants I
PSUS 6265	Native Plants II
PSUS 6268	Sustainable Design Methods
PSUS 6269	Sustenance and the Landscape
PSUS 6266	Ecological Restoration
PSUS 6270	Sustainable Design Charette

See CPS regulations (p. 827) for additional information regarding enrollment status and time limits.

GRADUATE CERTIFICATE IN URBAN SUSTAINABILITY

Specific admission requirements can be found on the Graduate (<http://www.gwu.edu/all-graduate-programs>)Program Finder.

Required:

PSUS 6201	Princs of Sust Urb Planning
PSUS 6202	Environmental and Urban Economics
PSUS 6210	Sust Transportation Systems
PSUS 6211	Sustainable Land Use
PSUS 6212	Sustainable Communities
PSUS 6230	Sustainable Comm Design Studio
PSUS 6270	Sustainable Design Charette

See CPS regulations (p. 827) for additional information regarding enrollment status and time limits.

SCHOOL OF NURSING

Dean P. Jeffries

Senior Associate Dean for Academic Affairs M.J. Schumann

Associate Deans K. Acquaviva, J. Greene, C. Pintz, B. Tebbenhoff

Assistant Dean R. Halbgewachs

The School of Nursing educates and inspires nurses to provide high quality, compassionate, person-centered health care. The School develops leaders actively engaged in health promotion, patient advocacy, and health care innovation, and prepares exceptional nurse educators who pursue quality and advance the profession.

Established in 2010, the School of Nursing has a proven record of innovation, entrepreneurship, and leadership.

The programs offered by the School include the Bachelor of Science in Nursing (B.S.N.) degree, Master of Science in Nursing (M.S.N.) degree, Doctor of Nursing Practice (D.N.P.) degree, and multiple certificates. These programs emphasize the integration of nursing practice, research, and policy with a strong focus on solving “real-world” problems that promote strong nursing practice and leadership skills in graduates.

School of Nursing programs are offered both online and on campus. The M.S.N., D.N.P., and certificate programs are online. Also, the B.S.N. and M.S.N. pathways for nurses already prepared with an associate degree of nursing (A.D.N.) are online. The Accelerated B.S.N. (a second-degree option) and the Veterans B.S.N. are on campus.

The School has two campus locations: the Virginia Science and Technology Campus, where the Accelerated B.S.N. and Veterans B.S.N. are offered, and the Foggy Bottom Campus. The Foggy Bottom campus location places the School in the heart of the nation’s capital and at the doorstep of policy decision-makers, government agencies, non-government organizations, think tanks, and other preeminent institutions.

Students at the Virginia Science and Technology Campus, in Ashburn, VA, use the School’s premier Skills and Simulation Laboratory, a sophisticated learning environment and one of the School’s most esteemed features. In the lab, students develop competencies using high tech manikins in multiple simulated health care settings that cross the human life span. Students experience life in a hospital long before their first clinical experience.

The School of Nursing is committed to improving the health and well-being of people and communities locally, nationally, and globally. The School values lifelong learning, and its students advance nursing practice, policy, and education as they make a difference in the world.

Mission

The mission of the George Washington University School of Nursing is to:

- Inspire nurses to provide high quality, compassionate health care;
- Transform health care through innovative education, research, policy, and practice;
- Develop entrepreneurial leaders and educators who pursue quality and advance the profession; and
- Improve the health and well-being of people and communities locally, nationally, and globally.

Vision

The School of Nursing will drive innovation and improvements in health care worldwide through the education of compassionate nurses, esteemed educators and researchers, entrepreneurial leaders, and influential policy experts.

REGULATIONS

Admission

To be considered for admission to any GW School of Nursing (SON) program, an applicant must complete the NursingCAS application. Applicants will be required to pay an application fee for NursingCAS; the NursingCAS fee will vary based on the number of programs applied for.

Application to NursingCAS may be made at o (<http://www.nursingcas.org>)nline (<http://www.nursingcas.org>). Official transcripts must be submitted to NursingCAS from each academic institution attended, regardless of whether credit was earned or is desired.

Applicants should refer to the individual program descriptions for information on prerequisites and supporting documents, since these vary by program.

Information is available online (<http://nursing.gwu.edu/how-apply>). It is the responsibility of applicants to ensure that all required application materials are submitted by the designated deadlines. Unofficial copies, facsimiles, or photocopies of transcripts, certificates, or diplomas will not be accepted. All records become the property of the University and will not be returned. In addition, admitted applicants may need to submit information from a criminal background check, drug screen, physical examination, and evidence of required immunizations and health insurance coverage depending on the program.

Conditional Admission

Admission with conditions may be offered at the discretion of the admissions committee and the Associate Dean for the Division. The terms of admission will be outlined in the letter of acceptance from the University.

Advance Tuition Deposit

Upon notification of acceptance, an advance tuition deposit will be required of students. The deposit is credited toward tuition and is not refundable. Failure to pay this deposit may result in the revocation of a student's admission offer.

International Applicants

The following additional requirements pertain to international applicants:

Required Records

Official copies of all required documentation (transcripts, diplomas, and certificates as well as any other records listing subjects studied, grades received, examinations taken, the results of CHS:keeps its official records. If these documents are in a language other than English, they must be accompanied by a certified English translation. In addition, an evaluated copy completed by an acceptable international evaluation service must be submitted regardless of whether or not the official record is in English.

Language Tests

Applicants whose native language is not English or who are not citizens of countries where English is an official language must submit official test scores for either academic IELTS or TOEFL. The following are the minimum scores for admission consideration:

- Academic IELTS: an overall band score of 7.0, with no individual band score below 6.0
- TOEFL: 600 on paper-based; 100 on Internet-based

The IELTS/TOEFL requirement may be waived for applicants who hold a degree from an accredited college or university located in a country in which English is the official language and also the language of instruction at the institution.

Financial Certificate

A Financial Certificate must be completed and submitted with the application for admission of all international students planning to study at the University under the authorization of either a student (F) or exchange visitor (J) visa. Satisfactory completion and submission of the Financial Certificate is required for the issuance of a Form I-20 or IAP-66. Students pursuing distance education programs are not eligible to apply for or obtain a student visa.

Unclassified Students

A student who wishes to take individual courses in the School of Nursing must obtain permission to register as an unclassified student. Application is made to the Office of Admissions, School of Nursing. The dean's office, in conjunction with the appropriate Associate Dean for the Division, will determine if permission to register will be granted to an unclassified student. Permission to take individual courses, if granted, will generally be limited to a total of 6 credit hours.

Credit earned for courses taken as an unclassified student may be transferred to a degree program at the University if

the courses are applicable to the program, have been taken for credit, and have been completed with the minimum grade required in the program. Successful completion of coursework taken as an unclassified student does not guarantee admission to a degree program.

Readmission

Students who were previously registered in a School of Nursing program at the University but did not register during the immediately preceding semester (summer sessions excluded) must apply for readmission. Students who have attended other academic institutions while not enrolled at this University must have complete official transcripts sent directly to the Office of Admissions, School of Nursing, from each institution attended. Applications for readmission are considered on the basis of regulations currently in effect.

Transfer Credit

Graduate Students

Up to 6 credit hours of coursework may be accepted as transfer credit for graduate students provided the coursework was completed within the past five years at an accredited college or university and the student earned a grade of B or better in the course. A limited amount of additional transfer credit may be approved upon petition to the Senior Associate Dean of Academic Affairs. The University reserves the right to refuse transfer credit in part or in whole or to allow credit provisionally. Students' completing the GW School of Nursing's accelerated BSN program will have up to 12 credits applied to the MSN program at GW. The completed credits are eligible to be used for the SON graduate program, for a period not to exceed five years.

Undergraduate Students

Advanced standing may be awarded for appropriate coursework completed at other accredited institutions provided minimum grade requirements have been met. The minimum acceptable grade is 'C' for coursework to be applied toward an undergraduate degree. Advanced standing may also be awarded for non-traditional classroom or clinical experience as outlined below. The University reserves the right to refuse transfer credit in part or in whole or to allow credit provisionally. The School of Nursing program will award no more than 66 credit hours accepted as advanced standing from a two-year institution. The School of Nursing will review relevant experiences, licensure, and certification as part of the course, Nurs4121: Nursing Advancement Professional Portfolio, to award credit to associate degree prepared nurses applying to the BSN/MSN Nursing Advancement program.

Degree candidates who are currently enrolled at this institution and plan to take courses at other accredited institutions for transfer credit must secure preapproval by the Associate Dean for the Division and the Senior Associate Dean of Academic Affairs.

Credit for College Board College-Level Examination Program (CLEP)

GW grants credit for specific examinations; those examinations that are not accepted include English composition, English composition with essay, and college mathematics. To earn credit, the student must score at the 50th percentile on each examination. Arrangements for taking the examinations are the responsibility of the applicant and should be made through College Board College-Level Examination Board. Information is available online (<http://www.collegeboard.com/clep>).

Credit is not assigned for any examination that duplicates material studied in college coursework previously completed. Assignment of credit is determined by the School of Nursing Office of Admissions.

Criminal Background Check and Urine Drug Screen

Following acceptance into a clinical program, new students must complete a criminal background check and urine drug screen prior to the first day of their first term. These services are supplied by Certified Background. Instructions for completing this are provided upon admission. Clinical sites may additionally require that students complete the clinical agency's screening for criminal background and drugs in order for a student to have a clinical experience in that agency.

Fees and Financial Regulations

The following fees and financial regulations were adopted for the academic year 2014-2015. Costs are expected to increase in subsequent years.

Tuition & Fees

BSN Students

Entering
Fall 2015
or Spring
2016 (total
program
cost,
excluding
fees):

\$57,600

** Entered

Fall 2014
or Spring
2015 (total
program
cost,
excluding
fees):

\$54,240

** Entered

Fall 2013
or Spring
2014 (total
program
cost,
excluding
fees):

\$50,640

\$130.00

NCLEX
Review
each term

\$200 Lab

Fee (per
semester,
for four
semesters)

\$75 new

student
orientation
fee (first
term only)

MSN, DNP, and Certificate students Online Education

All graduate programs (entering in Summer/Fall 2015 or Spring 2016): \$1,030 per credit hour ** All graduate programs (entering prior to Summer 2015): \$975 per credit hour

\$35.00 Registration Fee (each semester registered)

Associate Degree to BSN Online Education \$595 credit hour for Bachelor's portion

\$500 Portfolio Review Fee (NURS 4121 - Nursing Advancement Professional Portfolio)

\$35.00 Registration Fee (each semester registered)

*MSN tuition rates for MSN-Nursing Advancement program

Special Fees and Deposits (Nonrefundable)

Application fee	50*
Deposits	500
Late registration beginning the first week of the semester	80
Registration for continuous enrollment or leave of absence	35

Late application for graduation	35
Late-payment fee (see Payment of Fees, below)	75
Returned check fee, charged a student whose check is improperly drafted, incomplete, or returned by the bank for any reason	35
Transcript fee	5
Replacement of lost or stolen picture identification card	25
Replacement of diploma	50

* Subject to change.

University Fees and Financial and Regulations

The following regulations apply to all GW students. Visit the University Financial Fees and Regulations website (<http://bulletin.gwu.edu/fees-financial-regulations>) for additional information. Note that other fees and regulations included therein may not apply to students in the School of Nursing.

- Special fees and deposits (nonrefundable)
- Voluntary Library Gift
- Payment of fees
- Monthly payment plans
- Third-party payments
- Past due accounts
- Dishonored/Returned checks
- Withdrawals and refunds

Drop-Refund Schedule for on-campus students (BSN only):

On or before the end of the first week of classes	90%
On or before the end of the second week of classes	60%
On or before the end of the third week of classes	40%
On or before the end of the fourth week of classes	25%
After the fourth week of classes	None

Drop-Refund schedule for off-campus students (distance education):

On or before the end of the second week of classes	90%
On or before the end of the fourth week of classes	50%
After the fourth week of classes	None

School of Nursing: State Requirements

Tuition Refund for Oregon Residents Taking Online Courses Only

Oregon residents enrolled in an on-line education course are allowed a modified tuition refund policy in order to meet Oregon State Mandate OAR 583-030-0035(18)(c). An Oregon student who withdraws from an on-line course is eligible for a partial refund through the middle week of the term. Refunds are based on unused instructional time and are prorated on a weekly basis. Students must be current residents of Oregon at

the time of course registration and withdrawal to be eligible for this modified refund policy.

Fall and Spring term (15 week), Oregon Residents:

During the first week of classes	100%
On or before the end of the second week of classes	87%
On or before the end of the third week of classes	80%
On or before the end of the fourth week of classes	74%
On or before the end of the fifth week of classes	67%
On or before the end of the sixth week of classes	60%
On or before the end of the seventh week of classes	50%
After the seventh week of classes	None

Summer term (10 week), Oregon Residents:

During the first week of classes	100%
On or before the end of the second week of classes	80%
On or before the end of the third week of classes	70%
On or before the end of the fourth week of classes	60%
On or before the end of the fifth week of classes	50%
After the fifth week of classes	None

Refund policies of the University are in conformity with guidelines for refunds as adopted by the American Council on Education. Federal regulations require that financial aid recipients use such refunds to repay financial aid received for that semester's attendance. This policy applies to institutional aid as well.

In no case will tuition be reduced or refunded because of absence from classes. Authorization to withdraw and certification for work done will not be given to a student who does not have a clear financial record.

Financial Aid

The George Washington University offers student financial assistance to all eligible students from a variety of resources. Undergraduate aid consists of two basic types: awards for academic achievement or talent without reference to financial circumstances (merit scholarships) and scholarships, grants, loans, and employment based on academic achievement and demonstrated financial need.

In addition to GW assistance, the University participates in federal student aid programs from the U.S. Department of Education and student financial assistance programs from other U.S. government agencies such as the U.S. Department of Veterans Affairs and the U.S. Department of Defense. Some states offer student financial assistance for undergraduate enrollment at GW.

In general, consideration for student financial assistance is restricted to students in good academic standing at the University who meet minimum grade point average and

satisfactory academic progress requirements for specific awards and not financially encumbered by any other University office. Failure to meet and maintain satisfactory academic progress requirements may result in rescinding of awards.

Students in the Bachelor of Science in Nursing accelerated degree program are only eligible to apply for federal direct and private alternative student loans through the Office of Student Financial Assistance (<http://financialaid.gwu.edu>). There are no University grants available for this program. However, students may be eligible to apply for School of Nursing scholarships.

Several offices on campus provide information on financial assistance for graduate and certificate students. A general overview of financing options is provided in the brochure *Graduate Funding Opportunities*, published by the Office of Graduate Student Assistantships and Fellowships, The George Washington University, Washington, D.C. 20052. Forms and information on federal loans for graduate students can be obtained from the Office of Student Financial Assistance. Information on the Federal Work-Study Program, cooperative education opportunities, and on- and off-campus employment is available from the GW Career Center.

Gift aid (scholarships, grants, fellowships, assistantships, etc.) is taxable to the extent that it exceeds the allowable costs of tuition, fees, and required books and supplies or is dedicated to other costs, such as room and board. Federal grants may be taxable if, together with other gift assistance, they exceed the allowable costs. In the case of a student who is awarded tuition scholarships, grants, or awards from more than one source, the combined amount cannot exceed tuition charges; institutional aid will be adjusted to this limit.

In general, consideration for financial aid is restricted to students in good academic standing who are at least half-time and meet the minimum grade-point average for particular awards and are not financially encumbered by any other University office. Applications for institutional or federal aid cannot be processed if the relevant tax returns have not been filed in accordance with the IRS Code. Documents submitted as part of aid applications become the property of the University and cannot be returned. Federal regulations require that the University report suspected cases of fraud or misrepresentation to the appropriate federal, state, and local authorities.

Information on financial aid is accurate at the time each Bulletin is prepared for press. Future changes in federal regulations or institutional policies may alter the application requirements or program guidelines.

Health and Safety

Health and Accident Insurance

All GW students are required to have health and accident insurance. Students who fail to maintain such insurance may be placed on Leave of Absence without tuition refund. Undergraduate students are automatically enrolled in the

university's student health insurance program through Aetna. Students who have their own insurance plans must provide the required information to be waived from the program and have this item removed from their bill. Graduate students must submit verification of health insurance coverage to the Clinical Coordinator.

Immunization Requirements

It is the law in the District of Columbia that all students under the age of 26 have a record on file with the Colonial Health Services documenting immunity to measles, mumps, and rubella (two immunizations with the initial dose given after the first birthday or positive titers), varicella (chickenpox-by immunization, documented history of disease or positive titers), hepatitis B series, meningococcal vaccine (or meningitis waiver), and a current tetanus/diphtheria booster (within 10 years prior to the beginning of the semester).

In addition, the School of Nursing requires all clinical students to submit verification of health and immunization status prior to commencing any clinical coursework. All Undergraduate and Graduate students in clinical programs must submit the required documentation to Certified Background. All students must have a hepatitis screening test (see immunization policy).

Students are responsible for providing proof of immunity to: measles, mumps, rubella, and varicella by titer. Students must show documentation of Tdap (Tetanus, diphtheria, acellular pertussis) within the past 7 years. Skin testing for tuberculosis exposure (PPD) is required on an annual basis. Annual influenza Immunization is required. The Colonial Health Services is available to provide any needed inoculations on a fee-for-service basis.

Undergraduate students who have not provided proof of necessary immunization by the end of the second week of classes may be removed from classes until such proof is given and will not be able to register for the next semester until such proof is given. Graduate students are not permitted to enroll in clinical courses without completion of immunization requirements.

Verification of Health Status

The School of Nursing requires completion of a full physical examination within the twelve months prior to the beginning of clinical courses for all students.

Compliance with HIPAA and OSHA Guidelines

The clinical sites in which students have their clinical experiences must comply with federal guidelines regarding education of employees concerning prevention of the spread of blood borne pathogens and patient privacy. Therefore, they require that all students show evidence of this annual training. Undergraduate students have this as part of their classroom experience. Graduate students must complete the required university module on HIPAA and either provide evidence of OSHA training or complete the School of Nursing's training on OSHA.

Procedures on the Evaluation of Professional Comportment

1. Preamble:

Students enrolled in the undergraduate and graduate degree and certificate nursing programs ("Nursing School students") are required to conform to all rules, regulations, and policies with University-wide applicability, including those contained in the Guide to Student Rights and Responsibilities (hereinafter "the Guide"). In this regard, the Guide's *Code of Academic Integrity*, *Policy on Equal Opportunity*, *Policy on Sexual Harassment*, *Student Grievance Procedures*, *Privacy of Student Records*, and Articles I-IV, VI, and VII of the Guide's *Statement of Student Rights and Responsibilities* apply to Nursing School students. However, because of the unique curriculum and degree requirements of the School of Nursing, the following Procedures govern Nursing School students (hereinafter "Procedures").

These Procedures *supplement* certain of the applicable policies established by the Guide. For instance, the process set forth in Section Q(2) of Article VI of this Bulletin is designed to provide protection against improper academic evaluation as guaranteed by Article II, Section B of the Guide (Protection Against Improper Academic Evaluation). However, these Procedures, including the rights and procedures contained in them, *replace* the Guide in all instances involving alleged misconduct by Nursing School students, with the exception of matters involving alleged academic dishonesty which are processed under the Guide's *Code of Academic Integrity*.

All cases involving alleged misconduct (with the exception of those involving alleged academic dishonesty) will be processed solely under these Procedures. Further, Nursing School students accused of misconduct will be afforded only those procedures and rights specifically set out in the Procedures below, unless the School of Nursing dean or his/her designee (hereinafter "dean") decides in a particular case to have the case processed under the Guide's Code of Student Conduct. To the extent these Procedures are silent as to a particular right or procedure; such right or procedure is not intended to be afforded under these Procedures. In the case of any inconsistency or ambiguity between these Procedures and University-wide rules, regulations, and policies, including the Guide, these Procedures shall govern.

2. Evaluation of Professional Comportment:

As members of the health care community, Nursing School students are expected to behave in a manner consistent with the principles and obligations inherent in professional practice. Professional maturity, integrity, and competence are expected of students in every aspect of the clinical setting with faculty, preceptors, coworkers, and patients. Students are obliged to practice diligence, loyalty, and discretion in the patient-provider relationship. Some behaviors or patterns, either during the didactic or clinical phase, may raise concerns as to the student's

suitability to continue in the program of study.

Inappropriate behaviors for a nursing student may include, but are not limited to, breaching patient confidentiality, using illegal drugs or abusing controlled substances, becoming sexually involved with a patient, undertaking a procedure or scope of practice beyond that of a student, disobeying or showing disrespect for others, threatening verbal or physical behavior toward others, including students, faculty or patients, showing a judgmental attitude toward patients, or revealing a lack of concern or compassion in practice.

The process described below is intended to address behaviors that are unacceptable to the School of Nursing and raise questions about the student's fitness for the practice of nursing.

- a. When a problem with professional comportment (other than academic dishonesty) regarding a student is perceived, the observer will communicate this concern to the Senior Associate Dean of Academic Affairs. If the communication is verbal, it must be confirmed immediately by a signed written statement or else it will not be pursued further.
- b. Upon receiving such a communication, the Senior Associate Dean of Academic Affairs will create a confidential file in which all documents pertaining to the matter will be placed. The contents of the file will be preserved for a period of time not less than five (5) years from the date of separation or graduation from the School of Nursing. Access to this file will be restricted to the student under consideration; the Senior Associate Dean of Academic Affairs, the Dean of the School of Nursing and his/her staff; the School of Nursing Ad Hoc Committee, if one is constituted; and attorneys for the University and student.
- c. The Dean will notify the student in writing that s/he has received a communication from someone who perceives that the student has a problem with professional comportment. The notice will include a copy of these Procedures.
- d. The Senior Associate Dean of Academic Affairs will meet informally with the student as soon as possible. At that meeting, or as soon thereafter as possible, the Senior Associate Dean of Academic Affairs may do one or more of the following:
 - i. Advise the student.
 - ii. Recommend that the student seek professional assistance, at the student's expense.
 - iii. Develop additional information through contacts with the student, his/her peers, faculty, professional consultants, and/or any other source deemed to have relevant information. With the student's concurrence, s/he may be referred for a medical, psychiatric, and/or psychological evaluation. The cost of such an evaluation will be paid by the University, and the student will be asked to authorize the professional consultant to make a written report to the Senior Associate Dean of Academic Affairs for inclusion in the student's confidential file. This authorization of the release of information regarding a psychiatric or psychological evaluation shall be made only after the student has had a chance to review the written report.
- e. Refer the case to a School of Nursing Ad Hoc Committee ("Ad Hoc Committee").
- f. Suspend the student pending investigation and recommendation of the Ad Hoc Committee.
- e. The involvement of, and actions taken by, the Senior Associate Dean of Academic Affairs may be continuing in nature *Paragraphs 6 through 19 apply if the student is referred to an Ad Hoc Committee.*
- f. An Ad Hoc Committee and its Chair will be named by the Senior Associate Dean of Academic Affairs. The Ad Hoc Committee, including the Chair, will consist of three faculty members from the School of Nursing.
- g. The Senior Associate Dean of Academic Affairs will notify the student in writing of the composition of the Ad Hoc Committee. The student will be allowed ten (10) calendar days from the mailing of this notice to object to any person's appointment to the Ad Hoc Committee. Such objection must be sent to the Senior Associate Dean of Academic Affairs in writing. The Senior Associate Dean of Academic Affairs will, at his/her sole discretion, determine whether an objection warrants the appointment of one or more different persons to the Ad Hoc Committee, who shall be selected as set forth in subsection (vi) above.
- h. The Ad Hoc Committee will investigate the allegation. The Ad Hoc Committee will review the student's confidential file and interview him or her. The Ad Hoc Committee also may gather and review other material and interview any other person who the Ad Hoc Committee, at its sole discretion, has reason to believe may have relevant information to contribute.
- i. The student under review and/or the student's advisor may attend the information-gathering sessions. The information sessions will be recorded or transcribed. The method used is at the discretion of the Ad Hoc Committee. The student and/or his or her advisor may submit written questions to be answered by persons interviewed by the Ad Hoc Committee, but the procedure regarding their questioning is left to the sole discretion of the Ad Hoc Committee, including whether the questions submitted by the student and/or his or her advisor will be modified and/or posed to the persons interviewed. The student also may suggest persons to be interviewed by the Ad Hoc Committee, but the decision to interview such persons is left to the sole discretion of the Ad Hoc Committee. The student may speak on his/her behalf and may submit other material. The student's adviser may not speak. The materials and/or testimony to be considered and the

- weight to be given to them are left to the sole discretion of the Ad Hoc Committee. The information sessions should not become excessively legalistic and are not conducted as criminal or civil trials. The legal rules of evidence, including, but not limited to, those rules regarding relevancy, hearsay, and admissibility are not applicable and the criminal and/or civil standards of due process are not controlling. The student and the student's advisor cannot be present when the Ad Hoc Committee meets in executive session.
- j. Meetings of the Ad Hoc Committee are confidential. Minutes of the Ad Hoc Committee will be placed in the student's confidential file upon the completion of the Ad Hoc Committee's review.
 - k. The Chair and all members will be required to be present for all meetings of the Ad Hoc Committee. Meetings may be conducted by conference call when it is not possible for all members to be physically present.
 - l. The Ad Hoc Committee will make its final recommendation(s) to the Senior Associate Dean of Academic Affairs. Such recommendation(s) will be in writing and shall include findings of fact and the reasons for the recommendation(s). There is no required format for the recommendation(s). The content of the recommendation(s), including the nature and specificity of the findings and reasons, is left to the sole discretion of the Ad Hoc Committee. The Chair may review and sign the final recommendation(s) on behalf of the Ad Hoc Committee. The recommendation(s) could include, but is (are) not limited to, one or more of the following:
 - i. Advising the student.
 - ii. Recommending that the student seek professional assistance, at the student's expense.
 - iii. Recommending conditions with which the student must comply in order to continue in the School of Nursing.
 - iv. Recommending temporary suspension from the School of Nursing
 - v. Recommending dismissal from the School of Nursing.

The Ad Hoc Committee must agree that its recommendation is supported by a preponderance of the evidence (more likely than not). The Ad Hoc Committee shall make an additional recommendation regarding whether or not the confidential file will be made a part of the student's permanent academic file.
 - m. The Ad Hoc Committee will forward its recommendation(s) to the Dean of the School of Nursing and shall send a copy to the student.
 - n. The Dean of the School of Nursing will review the student's confidential file and the recommendation(s) of the Ad Hoc Committee. The Dean of the School of Nursing, at his/her sole discretion, may meet with the student prior to making his/her determination.
 - o. The Dean of the School of Nursing will take whatever action s/he deems appropriate, including dismissal of the student from the School of Nursing. The Dean of the School of Nursing will inform the student in writing of his/her decision.
 - p. The student shall have 15 calendar days in which to appeal the decision of the Dean of the School of Nursing. Such appeal shall be in writing sent to the Provost and Executive Vice President for Academic Affairs. The scope of this appeal is limited to the Provost and Executive Vice President for Academic Affairs or his/her designee's determination as to whether the procedures set forth in these Procedures have been complied with. Failure to appeal the decision shall be deemed a waiver of any and all rights to challenge the dean's decision and shall be deemed an acceptance of the same.
 - q. The Provost and Executive Vice President for Academic Affairs or his/her designee will make his/her decision on the written record of the proceedings. His/her decision shall be final.
 - r. At any time during the process, if the student in question selects an attorney as his or her advisor, the University will have its attorney present. The student, therefore, is required to inform the Office of the Dean two (2) days in advance of the hearing if counsel is to be present.

Academic Regulations

Many School of Nursing programs are taught in whole or in part via distance learning. Students enrolled in such programs must have specified hardware and software and meet the technical requirements. Check your computer's readiness for distance learning (http://citl.gwu.edu/tech_help.html).

The School of Nursing publishes student handbooks each academic year that contains updated information on policies, regulations, and other matters of concern to matriculated students. It is the responsibility of the student to be aware of the information contained in this Bulletin and the applicable program-specific student handbook.

Scholarship Requirements

Undergraduate students must maintain a minimum GPA of 3.0 in courses required in the major during their program in order to graduate. A minimum grade of *B* is required in clinical courses and a minimum grade of *C* is required in didactic courses.

Graduate students must maintain a minimum cumulative GPA of 3.0 during their program and in order to graduate. A minimum grade of *B* is required in clinical courses and in advanced pathophysiology, advanced pharmacology, and advanced health assessment and a minimum grade of *C* is required in other didactic courses.

In some cases, programs may establish higher GPA requirements.

Although transfer credit may be assigned, courses taken at other institutions are not considered in computing the GPA.

Evaluation of Academic Performance

Faculty members are responsible for evaluating the performance of students in a meaningful, useful, and timely manner and for assigning grades on a basis that is rational, just, and unbiased. The authority for assignment of grades rests with faculty in the respective programs. Official grades for coursework can be obtained through Degree Map.

Grades in Undergraduate Degree or Certificate and Post-Baccalaureate Certificate Programs

In the School of Nursing, grades that may be assigned are A, A-, B+, B, B-, C+, C, C-, D+, D, D- and F. Except for courses that specifically state that repetition for credit is permitted, a candidate for an undergraduate degree in the School may not repeat a course in which a grade of C or better was received, or a clinical course in which a grade of B or better was received, unless a petition to do so is approved by the Senior Associate Dean of Academic Affairs upon recommendation of the Associate Dean for the Division. If a course is repeated, the first grade remains on the student's record and is included in the cumulative GPA. Please see *Progression* statement for further policy on course repetition. Symbols that may appear include CR, Credit; AU, Audit; P, Pass; NP, No Pass; I, Incomplete; IPG, In Progress; W, Authorized Withdrawal; Z, Unauthorized Withdrawal. These symbols are not considered in determining the GPA.

Grades in Graduate Degree and Certificate Programs

In the School of Nursing, grades that may be assigned are A, A-, B+, B, B-, C+, C, C-, and F. Except for courses that specifically state that repetition is permitted, a candidate for a graduate degree or certificate in the School may not repeat a course in which a grade of C or better was received, or a clinical course in which a grade of B or better was received, unless a petition to do so is approved by the Senior Associate Dean of Academic Affairs upon recommendation of the Associate Dean for the Division. If a course is repeated, the first grade remains on the student's record and is included in the cumulative GPA. Please see *Progression* statement for further policy on course repetition. Symbols that may appear include CR, Credit; AU, Audit; P, Pass; NP, No Pass; I, Incomplete; IPG, In Progress; W, Authorized Withdrawal; Z, Unauthorized Withdrawal. These symbols are not considered in determining the GPA.

Incomplete/In Progress

Grades of 'incomplete' may be used at the discretion of the faculty member. The symbol of I indicates that the instructor has received a satisfactory explanation for the student's inability to complete the required work of the course. The grade may be used only if the student's prior performance in the course has been satisfactory. Any failure to complete the work of a course that is not satisfactorily explained to the instructor before

the date when grades must be turned in will be graded F. Incomplete work must be made up by a date agreed on by the instructor and the student but no later than the last day of the examination period for the semester immediately following the semester or summer session in which the grade of I is assigned. An extension of one additional semester can be requested by the student and may be approved by the Associate Dean for the Division. When work for the course is completed, the grade earned will replace the grade of I on the student's transcript. An Incomplete that is not changed within the allotted time automatically becomes an F.

The symbol of IPG is reserved for courses (such as special projects or clinical courses) in which the course requirements may extend beyond the official University deadline for submitting grades. IPG must be completed during semester following the course in which IPG was assigned. Once the course has been completed, the IPG will be removed from the transcript and the earned grade recorded.

Unauthorized Withdrawal

The symbol of Z is assigned when students are registered for a course that they have not attended or have attended only briefly, and in which they have done no graded work. At the end of the academic year, students' records are reviewed; if there is more than one Z per semester, a student's record will be encumbered until released by the Associate Dean for the Division or the Senior Associate Dean for Academic Affairs. The symbol of Z is not a grade but an administrative notation.

The Grade-Point Average

Scholarship is computed in terms of the grade-point average, based only on the student's record in this University. The grade-point average is computed from grades as follows: A, 4.0; A-, 3.7; B+, 3.3; B, 3.0; B-, 2.7; C+, 2.3; C, 2.0; C-, 1.7; D+, 1.3; D, 1.0; D-, 0.7; F, 0, for each credit hour for which the student has registered in a degree program. (Grades below C will be computed in the grade-point average but will not be considered as fulfilling degree requirements.) Courses in which an I or IPG has been assigned will be included when a final grade has been recorded.

Dean's List

The name of any full-time undergraduate student who achieves a GPA of 3.5 or higher in any one semester with no grades below B- will be placed on the Dean's List for that semester.

Appeal Procedures for Cases of Alleged Improper Academic Evaluation

Students who believe that a grade or evaluation is unjust or inaccurate may submit a petition through the program that offers the course. If a mutually satisfactory resolution is not achieved, the student may use the following appeal procedures:

1. The student must submit a written appeal to the Senior Associate Dean of Academic Affairs within five (5) days of posting the grade.

2. The Senior Associate Dean of Academic Affairs will meet with the student to attempt to resolve the issue.
3. If the issue cannot be resolved, the Senior Associate Dean of Academic Affairs will form a three-person special committee ("Grade Appeal Committee"). The Grade Appeal Committee will consist of three (3) members of the School of Nursing faculty.
4. The Grade Appeal Committee will conduct a hearing at which the student and the faculty member have an opportunity to state, in each other's presence, their views on the academic evaluation at issue.
5. The Grade Appeal Committee will make a recommendation to the Dean of the School of Nursing regarding how the issue should be resolved. The Dean of the School of Nursing shall make the final decision regarding the grade appeal and will advise the student and the faculty member in writing of his or her decision.

Academic Standing

An enrolled student is considered to be in good academic standing by the School of Nursing provided that he or she is not on probation or suspended.

Warning

An undergraduate student whose GPA falls between a 3.0 and 3.2 will receive a warning letter from the Senior Associate Dean of Academic Affairs, with a copy to the Associate Dean for the Division.

A graduate student whose GPA falls between a 3.0 and 3.2 will receive a warning letter from the Senior Associate Dean of Academic Affairs, with a copy to the Associate Dean for the Division.

Academic Probation

A full-time undergraduate student who has attempted a minimum of 12 credit hours of coursework and whose cumulative GPA is below 3.0 will be placed on academic probation and will receive a probation letter from the Senior Associate Dean of Academic Affairs, with a copy to the Associate Dean for the Division. This probation extends over the period in which the student attempts an additional 12 credit hours of coursework. While on probation, students will be allowed to register for no more than 13 credit hours per semester, unless approved by the Associate Dean for the Division and the Senior Associate Dean of Academic Affairs.

A part-time undergraduate student who has attempted a minimum of 6 credit hours of coursework and whose cumulative GPA is below 3.0 will be placed on academic probation and will receive a probation letter from the Senior Associate Dean of Academic Affairs, with a copy to the Associate Dean for the Division. This probation extends over the period in which the student attempts an additional 6 credit hours of coursework.

A full- or part-time graduate student who's cumulative GPA falls below 3.0 will be placed on academic probation and will

receive a probation letter from the Senior Associate Dean of Academic Affairs, with a copy to the Associate Dean for the Division. For full-time students, probation extends for one semester of full-time coursework as defined by the program; for part-time students, probation extends during the period in which the student attempts 9 credit hours of coursework.

Progression

In undergraduate programs, any grade less than a C in supporting courses, or less than a B in clinical courses, is not satisfactory and students will not be permitted to progress as planned under the original program of study, but will have a new program of study as recommended by the student's advisor and the Associate Dean for the Division of Undergraduate Studies. An unsatisfactory grade on a second attempt is grounds for dismissal. Failure of a second course is grounds for dismissal. BSN students who are absent from their program for a semester or more, regardless of the reason, may be required to be re-examined on clinical competencies before resuming their studies. Accelerated BSN students must complete their program of study in no more than 6 semesters of enrollment (does not include leaves of absence).

In graduate programs, any grade less than a C in supporting courses or less than B in clinical courses, pathophysiology, pharmacology, and advanced health assessment is not satisfactory. Students receiving an unsatisfactory grade may attempt a course a second time. An unsatisfactory grade on a second attempt is grounds for dismissal. Failure of a second course is grounds for dismissal. Any graduate student who earns less than a B in a clinical course will not progress in the clinical portion of the program until that course is successfully completed. Both grades remain on the student's transcript and are calculated into the final GPA. Graduate students must complete their studies within 5 years.

Suspension

An undergraduate student whose cumulative GPA remains below 3.0 after a period of probation may be suspended. A student suspended for poor scholarship may not register for any coursework at the University, even as an auditor. A suspended student may apply for readmission after the lapse of the semester following suspension. Evidence must be presented to the Senior Associate Dean of Academic Affairs, through the student's Associate Dean for the Division, demonstrating that the student is now better prepared to pursue academic coursework. Any student suspended twice for poor scholarship will not be readmitted.

A graduate student who is suspended for failure to raise the cumulative GPA to 3.0 may apply for readmission after the lapse of one calendar year by submitting evidence that he or she is now better prepared to pursue graduate coursework. If the student fails to achieve the minimum GPA of 3.0 at the end of the semester following readmission, the Associate Dean for the Division may recommend that graduate study be terminated and further enrollment prohibited.

Dismissal

Any student who has received one or more unsatisfactory grades during a semester may be recommended for dismissal by the Associate Dean for the Division. This will be reviewed by the Senior Associate Dean of Academic Affairs. The final decision regarding dismissal will be made by the Dean of the School of Nursing.

Programs of Study

Students enrolled in undergraduate, graduate or certificate programs must meet (in person or electronically) with their faculty advisor to review a program of study, listing all coursework required for the degree or certificate, including applicable transfer credit. Changes to the program of study can be made through petition to the program.

Transfer within School of Nursing

To apply for a transfer from one program to another, a written request must be submitted to the Office of Student Services, School of Nursing, along with the necessary supporting documentation required by the program. Transfers will be considered individually by the Associate Dean of the Division and the Senior Associate Dean in consultation with the director of the program within the SON program to which the students wishes to transfer. Consideration will include the student's prior and current academic performance and the current enrollment within the proposed program.

Changes within School of Nursing

A student may not substitute one course for another without approval of the Associate Dean for the Division and the Senior Associate Dean of Academic Affairs. After the deadlines for adding or dropping courses, a student must obtain the permission of the course instructor, the Associate Dean for the Division, and the Senior Associate Dean of Academic Affairs to withdraw from a course or to change status from credit to audit or audit to credit.

Adding and Dropping Courses

During the registration period (before the end of the second week of classes) students may add or drop courses using GWeb. After the second week of classes, students who wish to add or drop a course must complete a Registration Transaction Form (<http://registrar.gwu.edu/registration-forms>) and submit the form to the office of their dean; forms are available online, at SON offices, and in the Office of the Registrar (<http://registrar.gwu.edu>). Adding a course after the second week requires a signature of the instructor or other authorized member of the school.

A course dropped during the first four weeks of classes will not appear on the student's transcript. A course dropped after the fourth week but before the end of the eighth week will be assigned a notation of *W* (Authorized Withdrawal). The deadline for dropping a course without academic penalty is the end of the eighth week of classes in the fall and spring semesters. After the end of the eighth week of classes, dropping a course without academic penalty is only possible

after the student presents a petition to the Senior Associate Dean and receives written permission.

All charges for courses from which the student withdraws are subject to the refund policy listed under Fees and Financial Regulations (<http://bulletin.gwu.edu/fees-financial-regulations>) in this Bulletin. Failure to withdraw by these procedures can result in an extended financial obligation and the recording of a grade of *F* (Failure) or a notation of *Z* (Unauthorized Withdrawal).

Graduation Requirements

Degrees are conferred in January, May, and August. Graduating students are strongly encouraged to participate in the commencement ceremony held each year in May.

To be recommended for graduation by the faculty, students must have met admission requirements; have completed satisfactorily the scholarship, curriculum, residence, and other requirements for the degree; have filed an application for graduation prior to the published deadline; and be free from all indebtedness to the University. Registration, either for coursework or for continuous enrollment, is required for the semester or summer session at the close of which the degree is to be conferred.

Applications for graduation must be filed by October 1 for fall graduation, February 1 for spring graduation, and July 1 for summer graduation.

Residence Requirements

The minimum number of credit hours that must be satisfactorily completed in residence in the School of Nursing. See information on the School of Nursing website for specific information regarding the accelerated B.S.N. and the B.S.N./M.S.N. program for associate degree prepared RNs. Students in all other Master of Science in Nursing programs, and Doctor of Nursing Practice programs must take all but 6 of the total required credit hours in residence. Courses applicable to the degree taken while registered in any division of The George Washington University in the semester immediately prior to admission to degree candidacy in the School of Nursing are counted as courses in residence.

Honors

Bachelor's degrees with honors are awarded to students whose academic records give evidence of particular merit. The student's grade-point average determines the level of honors as follows: *cum laude*, 3.4–3.59; *magna cum laude*, 3.6–3.79; *summa cum laude*, 3.8–4.0. The grade-point average includes all coursework completed at GW and is not rounded off. To be eligible for an honors designation, a student must complete at least 60 hours of coursework at GW.

The grade-point average is calculated by the Office of the Registrar, and the honors designation is entered on the transcript and the diploma of those students who earn an honors designation. If honors are entered in the commencement program, honors status will be determined

on the basis of work completed by the end of the seventh term and entered only for those students who have completed seven-eighths of the credit hours required for the degree. Honors indicated on the diploma are calculated on the basis of all coursework completed. The diploma and transcript are the official indication that a degree was conferred and honors awarded.

Honor Society

The School of Nursing has a chartered chapter of Sigma Theta Tau International (<http://phiepsilon.nursingsociety.org/phiepsilonchapter/home>), the national honor society of nursing. School of Nursing students who meet the qualifications specified by the constitution of Sigma Theta Tau are eligible for membership and may be nominated by a Associate Dean for the Division, faculty, or other Sigma Theta Tau members.

University Policy on Equal Opportunity

The George Washington University does not unlawfully discriminate against any person on any basis prohibited by federal law, the District of Columbia Human Rights Act, or other applicable law, including without limitation, race, color, religion, sex, national origin, age, disability, veteran status, sexual orientation, or gender identity or expression. This policy covers all programs, services, policies, and procedures of the University, including admission to education programs and employment.

UNDERGRADUATE

Associate degree pathway programs

- Associate's Degree in Nursing Pathway to Bachelor of Science in Nursing (p. 874)
- Associate's Degree in Nursing Pathway to Bachelor of Science in Nursing and Master of Science in Nursing, Adult-Gerontology Primary Care Nurse Practitioner (p. 874)
- Associate's Degree in Nursing Pathway to Bachelor of Science in Nursing and Master of Science in Nursing, Family Nurse Practitioner (p. 876)
- Associate's Degree in Nursing Pathway to Bachelor of Science in Nursing and Master of Science in Nursing, Nurse-Midwifery (p. 877)
- Associate's Degree in Nursing Pathway to Bachelor of Science in Nursing and Master of Science in Nursing, Nurse Coaching and Leadership (p. 878)
- Associate's Degree in Nursing Pathway to Master of Science in Nursing (p. 879)

Bachelor's program

- Bachelor of Science in Nursing (p. 879)

GRADUATE

Master's programs

- Master of Science in Nursing in the field of adult-gerontology primary care nurse practitioner (p. 880)
- Master of Science in Nursing in the field of family nurse practitioner (p. 882)
- Master of Science in Nursing in the field of health care quality (p. 883)
- Master of Science in Nursing in the field of nursing leadership and management (p. 885)
- Master of Science in Nursing in the field of nurse-midwifery (p. 884) (collaborative program between George Washington University School of Nursing and Shenandoah University)

Doctoral program

- Doctor of Nursing Practice (p. 886)

CERTIFICATE

In addition to degree programs in which a certificate is awarded along with the degree, the School of Nursing offers certificate-only programs in nursing. The School of Nursing offers post-master's certificates in Adult-Gerontology Nurse Practitioner, Family Nurse Practitioner, Family Specialty for Nurse Practitioners, Nursing Education, and Palliative Care Nurse Practitioner. The School of Nursing also offers a Graduate certification Health Care Quality. Further information can be obtained from the Office of Admissions, School of Nursing.

*As used in this section, "certificate program" refers to an established program in which a certificate only is awarded at completion, rather than a degree program in which both a degree and a certificate are awarded at completion.

COURSES

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

NURS 3101. Ethical Foundations of Nursing. 3 Credits.

Theories and principles related to common ethical and moral dilemmas faced by nursing professionals in their clinical practice. Methods of analyzing and resolving moral dilemmas using clinical decision making frameworks; methods for increasing awareness by examining and understanding the impact of the nurse's own value system.

NURS 3102. Nutrition for Health Professionals. 3 Credits.

Fundamentals of human nutrition and their scientific foundations. Nutritional requirements related to changing individual and family needs; food choices, health behaviors, food safety, prevention of chronic disease, and nutrition-related public health in the United States and globally.

NURS 3103. Human Anatomy and Physiology I. 4 Credits.

Designed for students entering the allied health professions. Fundamental structures and functions as they relate to the human body, including homeostasis, anatomical language and body organization, tissues and histology, integumentary; and skeletal, muscular, nervous and endocrine systems. Requires a basic background in introductory cell/molecular biology; an equivalent course with a minimum grade of C may be substituted for the prerequisite. Prerequisite: BISC 1111.

NURS 3104. Human Anatomy and Physiology II. 4 Credits.

Continuation of NURS 3103. Fundamental structures and functions as they relate to the human body, including homeostasis, anatomical language and body organization, tissues and histology; and cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems. Requires a basic background in introductory cell/molecular biology. Prerequisite: NURS 3103.

NURS 3110. Transition into the Nursing Profession. 2 Credits.

Historical and evolutionary perspectives in nursing in the context of current issues and trends in health care delivery and professional nursing. Values and characteristics of professional nursing practice by examining legal, regulatory, ethical issues, critical reasoning, evidence-based practice, and nursing self-care. Same as NURS 3110W.

NURS 3110W. Transition: Nursing Profession. 2 Credits.

Historical and evolutionary perspectives in nursing considered in the context of current issues and trends in health care delivery and professional nursing. The values and characteristics of professional nursing practice are examined in terms of legal, regulatory, and ethical issues as well as critical reasoning, evidence-based practice, and nursing self-care.

NURS 3111. Foundations of Health Assessment. 3 Credits.

Development of the knowledge and skills necessary for conducting comprehensive and need-specific health assessments for individuals in the context of their family and community; determining areas in which health promotion activities should be implemented or reinforced. Students use structured interviews to elicit health histories and health practices and perform physical examinations in a systematic manner. Identification of a broad range of normal variations through practice with peers in the laboratory setting. Nursing practice in the laboratory setting, including physical mobility, safety, infection control, drug calculation, medication administration, and other health technologies.

NURS 3112. Nursing Practice and Clinical Reasoning 1: Adult and Aging Acute and Chronic Illness. 3 Credits.

The values, knowledge and competencies at the foundation of safe, evidence-based, professional holistic nursing care of adults with common medical and surgical needs; essentials of the nursing process and disease process; expected outcomes and effects of nursing interventions with adults experiencing selected health conditions at multiple levels of care.

NURS 3113. Clinical Skills Lab: Adult Medical-Surgical 1. 6 Credits.

Foundational values, knowledge, skills, and competencies for safe, evidence-based, professional, and holistic nursing care of adults with common medical and surgical needs, and using critical thinking and effective communication skills to deliver such care in clinical and laboratory environments.

NURS 3114. Nursing Practice and Clinical Reasoning 2: Advanced Adult Medical-Surgical. 3 Credits.

Builds upon the basic concepts introduced in NURS 3112 by introducing complex, multi-system disease processes requiring a higher level of critical thinking. Safe, evidence-based, professional, and holistic nursing care related to the management of clients with advanced medical and surgical needs; knowledge, skills, and competencies for assessing and managing clients/patients in a hospital environment. Prerequisites: NURS 3110, NURS 3111, NURS 3112, NURS 3113 and NURS 3118.

NURS 3115. Clinical Skills Lab: Adult Medical-Surgical 2. 4 Credits.

Builds upon the basic concepts introduced in NURS 3113 by introducing complex, multi-system disease processes requiring a higher level of critical thinking. Safe, evidence-based, professional, and holistic nursing care related to the management of clients with advanced medical and surgical needs; knowledge, skills, and competencies for assessing and managing clients/patients in a hospital environment. Prerequisites: NURS 3110, NURS 3111, NURS 3112, NURS 3113 and NURS 3118.

NURS 3116. Nursing Practice and Clinical Reasoning 3: Psychiatric Mental Health. 3 Credits.

Theoretical principles, concepts, and skills applicable to the provision of safe and effective nursing interventions to clients across the lifespan who are experiencing psychiatric and mental health conditions. Application of scientific principles; assessing, planning, and evaluating nursing interventions; developing therapeutic communication, critical reasoning, analytical skills. Practical learning for promoting wellness of clients in acute and/or community-based psychiatric health care settings. Prerequisites: NURS 3110, NURS 3111, NURS 3112, NURS 3113 and NURS 3118.

NURS 3117. NCPR: 4 Maternity/Women Hlth. 3 Credits.

NURS 3118. Pharmacology 1. 2 Credits.

The underlying principles of pharmacology and medication administration; historical perspective on pharmacotherapy, legal/ethical responsibilities of the nurse in drug administration, regulatory (FDA) drug approval process, major drug classifications, and nursing management required for drug therapy; basic principles of pharmacokinetics, pharmacodynamics, pharmacotherapeutics, medication calculations, drug-drug interactions, contraindications/precautions, and adverse effects; the nursing process and patient teaching principles as they relate to pharmacologic concepts.

NURS 4099. Variable Topics. 1-6 Credits.

Assigned topics determined by the School of Nursing.

NURS 4116. NPCR 5: Children & Families. 3 Credits.

NURS 4117. NPCR 6: Epidemiology & Comm Health. 3 Credits.

NURS 4119. Patient Safety & Hlth Care Quality. 3 Credits.

NURS 4120. Capstone: Transition to Practice. 6 Credits.

NURS 4121. Nursing Advancement Portfolio. 0-15 Credits.

Upon admission to one of the Associate's Degree in Nursing Pathway to Bachelor of Science in Nursing/Master of Science in Nursing programs, a student's professional portfolio is evaluated and between 0-15 credits are awarded as part of the total credits required for the bachelor's degree. If fewer than 15 credits are awarded, completion of one or more of the following courses may be required, as determined by the program director: NURS 3112, NURS 3113, and NURS 3118. In lieu of tuition, a \$500 portfolio evaluation fee is charged for this course.

NURS 6180. Dimensions of Prof. Nursing. 3 Credits.

NURS 6202. Concepts in Population Health. 3 Credits.

Graduate-level nurses integrate and synthesize concepts associated with quality, health promotion, disease prevention, and chronic health problems with communities, the general population, and specific population groups. Issues related to culturally diverse and vulnerable populations.

NURS 6203. Nursing Leadership. 3 Credits.

Evidence-based leadership skills as a core competency in nursing to improve quality in patient care and strengthen nursing as a profession. Emphasis on theories of leadership, personal leadership, skill building, team-building techniques, change, conflict resolution, motivation, and communication skills.

NURS 6204. Health Information and Technology. 3 Credits.

Key issues and concepts related to the use of technology and information management to support the provision of high quality health care and outcomes.

NURS 6205. Health Policy, Quality, Political. 3 Credits.

The health policy process and analysis relevant to the three main thrusts of policy: cost, quality and access. Political, social, economic, and population factors that influence this process. Comparisons to health systems in other countries as appropriate. Quality science and informatics in the context of interdisciplinary, coordinated, and ethical health care delivery.

NURS 6207. Evidence-Based Practice for Health Care Researchers. 3 Credits.

The methodological issues of health care research. Appraisal and synthesis of research results and evidence-based methods. Identification and use of appropriate inquiry methodologies; ethical implications of research and translational scholarship.

NURS 6208. Biostatistics for Health Care Research. 3 Credits.

Introduction to the basic ideas and modeling approaches used in biostatistics through the use of health care research data. Descriptive and inferential statistics; identification of appropriate statistical procedures and estimation of appropriate sample size. Application of univariate, bivariate, and multivariate statistical procedures.

NURS 6209. Transitional Care. 3 Credits.

Transitional care planning and implementation, including pertinent health care policy, transitional care models, inter-professional collaboration, quality outcomes, multifaceted interventions, and the patient engagement dynamics that influence patient-centered care transitions in the current health care environment. Recommended background: BSN.

NURS 6210. Building a Quality Culture. 3 Credits.

NURS 6211. Health Care Quality Landscape. 3 Credits.

NURS 6212. Quality Improvement Science. 3 Credits.

NURS 6213. Health Care Quality Analysis. 3 Credits.

NURS 6214. Patient Safety Systems. 3 Credits.

NURS 6220. Advanced Physiology and Pathophysiology. 3 Credits.

System-focused advanced physiology and pathophysiology for analysis of health deviations across the life span. Interpretation of changes in normal function that result in symptoms indicative of illness. This systematic assessment is foundational to clinical decision making and management of health deviations.

NURS 6222. Advanced Health Assessment and Diagnostic Reasoning. 4 Credits.

Nurse Practitioner and nurse-midwifery students will acquire the knowledge, skills and clinical foundation for advanced health assessment and diagnostic reasoning in the ambulatory health care setting. This course is a prerequisite to all other clinical courses and includes a fifteen-week online didactic course, a 75-hour clinical practicum and a three day, on-campus skills training session.

NURS 6224. Adult/Gerontology Primary Care Nurse Practitioner 1, Practice Introduction. 4 Credits.

Theoretical and practical foundations of common primary care conditions in the adult patient. Assessment, diagnosis, and management of culturally diverse adults. Advanced decision making and clinical judgment, evidence-based practice, health promotion and disease prevention. Concurrent clinical practicum in a primary care setting under the supervision of preceptors and faculty. Prerequisites: NURS 6220, NURS 6222, NURS 6234.

NURS 6225. Adult/Gerontology Primary Care Nurse Practitioner 2, Adolescent & Adult. 8 Credits.

Theoretical and practical foundations of primary care of culturally diverse adolescents, adults, and older adults with chronic health problems. Synthesis and integration of advanced decision-making skills, including diagnostic reasoning and clinical judgment, health assessment, health promotion, technology, and evidence-based practice. Concurrent clinical practicum in which students manage patients in a primary care setting under the supervision of preceptors and faculty. A two- to three-day on-campus session is required. Prerequisites: Nurs 6224.

NURS 6226. Primary Care of the Family. 5 Credits.

The theoretical and practical foundations of family primary care.

NURS 6227. Family Nurse Practitioner Clinical Practicum. 1-7 Credits.

Clinical experiences focused on the primary care needs of women, adults, older adults, children, and childbearing families. Students complete a total of 7 credits in this course as their clinical experience.

NURS 6228. Advanced Family Primary Care. 5 Credits.

Seminar and clinical practicum focusing on the integration of the family nurse practitioner role through the application of family theory and evidenced-based practice in primary care settings.

NURS 6229. Adult/Gerontology Primary Care Nurse Practitioner 3, Adult, Older/Frail. 8 Credits.

Theoretical and evidence-based practice foundations for assessment and management of patients across the aging continuum. The physiologic, psychological, socioeconomic, emotional, cultural, and spiritual dimensions of the older adult in relationship to self, family, care-givers, and the health-care system are emphasized. Concurrent clinical practicum in which the student manages patients across the older-age spectrum under the supervision of preceptors and faculty. An on-campus visit is required in which students participate in a Standardized Patient final examination test-out. Prerequisites: Nurs 6225.

NURS 6230. Family Nurse Practitioner 1, Lifespan Primary Care/Diagnosis/Management. 4 Credits.

First clinically based course for family nurse practitioner students. Didactic and clinical experiences in primary care, focusing on prevention and common/chronic health problems across the lifespan. Prerequisites: NURS 6220 Advanced Pathophysiology, NURS 6222 Advanced Health Assessment, NURS 6234 Advanced Pharmacology.

NURS 6231. Family Nurse Practitioner 2, Lifespan Primary Care/Diagnosis/Management. 8 Credits.

Second clinically based course for family nurse practitioner students. Didactic and clinical experiences in family nurse practitioner care, focusing on prevention and common/chronic health problems across the lifespan. Prerequisites: N6220 Advanced Pathophysiology, N6222 Advanced Health Assessment, N6234 Advanced Pharmacology, N6230 FNP I.

NURS 6232. Family Nurse Practitioner 3, Professional Issues/Diagnosis/Management. 8 Credits.

Third course for family nurse practitioner students. Didactic and clinical experiences in primary care, focusing on prevention and common/chronic health problems across the lifespan. Consideration of professional issues for FNP: Role development, certification, ethical issues in practice, inter-professional collaboration, and health care reimbursement issues are discussed and related to current clinical experiences. Prerequisites: Nurs 6220 Advanced Pathophysiology, Nurs 6222 Advanced Health Assessment, Nurs 6234 Pharmacology, Nurs 6230 FNP I, Nurs 6231 FNP 2.

NURS 6233. Genetics for Healthcare Providers. 3 Credits.

Basic scientific principles of genetics and their clinical applications.

NURS 6234. Advanced Pharm for Nursing. 3 Credits.

This course will cover an introduction to pharmacotherapeutics as it primarily applied to Advanced practice Nurses in Primary Care settings. The course will briefly review key pathophysiologic points, and then will discuss the pharmacotherapeutic interventions that may be considered in the treatment of disease. The course will begin with a general introduction to the foundations for professional practice and the concepts of pharmacoeconomics, pharmacokinetics, pharmacodynamics, and pharmacogenetics will be introduced. Issues surrounding community practices in pharmacotherapeutics will be explored. The course will then focus on pharmacological interventions in the spectrum of disease states seen in primary care practices involving the Nervous system, Immune System, Cardiovascular system, Hematologic system, Genitourinary system, Gastrointestinal system, Respiratory system, Endocrine system, Sensory systems, and the Skin.

NURS 6239. Bridge to Nurse Midwifery. 1 Credit.**NURS 6241. The Health Care Enterprise. 3 Credits.**

Overview of general management business principles related to health care systems. Management of patient-centered care delivery; strategic health care leadership; organizational, marketing, and fiscal management principles. Same as HSCI 6241.

NURS 6256. Intro to Palliative Care. 3 Credits.**NURS 6258. Leadership Capstone Pract I. 3 Credits.**

Nursing 6258 is the first of a two-semester capstone course designed to provide a mentored practicum that offers the opportunity to apply leadership content and refine leadership abilities in a setting and practice area mutually agreed upon by the student and course faculty.

NURS 6259. Leadership Capstone Pract II. 3 Credits.

Nursing 6259 is a continuation of NURS 6258 and is designed to provide a mentored internship practicum, the opportunity to apply leadership content, and refine leadership abilities.

NURS 6260. Foundations of Coaching. 3 Credits.

Nurse coaching methodology and competencies. Leadership and therapeutic relationship skills and the theory and meta-science fundamental to each skill. Assessing readiness for change, building trust and warmth, obtaining and holding the clients agenda, visioning, awareness raising techniques, brainstorming, and goal setting.

NURS 6261. Advanced Coaching Skills. 3 Credits.

Builds on concepts introduced in NURS 6260. Multidisciplinary and nursing theories foundational to nurse coaching. Advanced coaching techniques and common coaching topics and contexts such as weight loss, stress and time management, and executive coaching. Prerequisites: NURS 6260.

NURS 6262. Leadership Coaching in Nursing. 3 Credits.

Theoretical foundations and evidence for leadership coaching in nursing; the different applications of coaching in nursing management. Executive coaching, team coaching, peer coaching, and personal career coaching. Application and evaluation of multiple models, competencies, and methodologies for nursing leadership coaching through learning activities and live demonstration. Creation of a complete evidence-based coaching strategy for a case study.

NURS 6272. HumanResrcDev/HlthProfPractice. 3 Credits.**NURS 6273. Health Info Quality & Outcomes. 3 Credits.****NURS 6274. Health Economics & Finance. 3 Credits.****NURS 6275. Leadership &Change/Health Care. 3 Credits.****NURS 6276. Foundations of Palliative Care. 3 Credits.****NURS 6277. Pain and Suffering. 3 Credits.****NURS 6278. PalliativeCare:Chronic Illness. 3 Credits.****NURS 6279. Palliative Care Practicum I. 1-4 Credits.****NURS 6280. Palliative Care Practicum II. 1-4 Credits.****NURS 6281. PC Leadership and Management. 2 Credits.****NURS 6291. AdvTopics. 1-9 Credits.****NURS 6292. Teachw/Tech.inHealthProfession. 3 Credits.****NURS 6293. Health Ed.for Indiv&Community. 3 Credits.****NURS 6294. SpirtlBelief&Pract/HlthCare. 3 Credits.****NURS 6295. Health Care Quality Process. 3 Credits.****NURS 6296. Ped Health Assess & Pharm. 1 Credit.****NURS 6297. Independent Study. 1-9 Credits.****NURS 6298. NP Clinical Completion. 1-5 Credits.****NURS 8401. Org Concepts in Nursing. 3 Credits.****NURS 8402. Knowledge Managemnt in Nursing. 3 Credits.****NURS 8403. Translating Research into Prac. 3 Credits.****NURS 8404. Research & Policy for Nursing. 3 Credits.****NURS 8405. Healthcare Quality Practicum. 3 Credits.**

Application of quality improvement processes and patient safety theories, models, methods, and tools in health care settings to conceive and execute a quality improvement (QI) project in an organizational setting. The final deliverable is a comprehensive QI project report.

NURS 8410. Executive Presence I. 2 Credits.

NURS 8411. Executive Presence II. 2 Credits.

This is a continuation of Executive Presence I. In this course, the student will examine power shifts in leadership, revisit change as a stimulus for innovation, participate in an interactive session for individuals who can practice communicating their practicum proposals and receiving friendly feedback and constructive input from their peers, and re-evaluate the leadership development plan designed in Executive Presence I.

NURS 8412. HC Finance for Nurse Leaders. 3 Credits.

NURS 8414. DNP Residency. 3 Credits.

NURS 8498. Research Project Proposal. 3 Credits.

NURS 8499. Clinical Research Project. 3 Credits.

ASSOCIATE'S DEGREE IN NURSING PATHWAY TO BACHELOR OF SCIENCE IN NURSING

A combination of ADN course work and courses taken as part of GW's General Education Requirement (<http://nursing.gwu.edu/sites/nursing.gwu.edu/files/downloads/BSNPrerequisiteDescriptions.pdf>) allows students in the Associate's Degree in Nursing to Bachelor of Science in Nursing pathway (ADN-BSN) to complete the program over three semesters and one summer session. Students attend part time, which allows them to continue working as professional nurses. The BSN curriculum is completed through distance learning, and students complete clinical practicum rotations in the local community with faculty mentoring. Select on-campus experiences provide opportunities for students to interact with faculty members and fellow students. Upon completion of the program some credits earned may be applied toward a GW MSN degree.

Visit the ADN-BSN website (<http://nursing.gwu.edu/adn-bsn>) for detailed program information.

Information for VA Community College Graduates

GW School of Nursing is pleased to provide guaranteed admission to students who have earned associate's degrees from accredited nursing programs at community colleges across Virginia and who meet GW's academic requirements.

Information for Montgomery (MD) Community College Graduates

GW School of Nursing is pleased to provide guaranteed admission to students who have earned associate's degrees from accredited nursing programs at Montgomery Community Colleges in Maryland and who meet GW's academic requirements.

For more information visit the ADN Pathways webpage (<http://nursing.gwu.edu/adn-pathways-online>).

REQUIREMENTS

The following requirements must be fulfilled: 21 credits in required courses; 15 credits toward the University General Education Requirement, which is usually fulfilled by transfer of credits from the ADN program; and up to 15 credits based on review of the student's professional portfolio and awarded through enrollment in NUR 4121. If fewer than 15 credits are awarded, completion of one or more of the following courses may be required, as determined by the program director: NURS 3112, NURS 3113, and NURS 3118.

Year One

Semester One: Fall

NURS 6205 HealthPolicy,Quality,Political

NURS 6203 Nursing Leadership

Semester Two: Spring

NURS 6202 Concepts in Population Health

NURS 6207 Evidence-Based Practice for Health Care Researchers

Semester Three: Summer

NURS 4117 NPCR 6:Epidemiology&CommHealth

NURS 4119 PatientSafety&HlthCareQuality

NURS 4121 Nursing Advancment Portfolio

Year Two

Semester Four: Fall

NURS 6233 Genetics for HC Providers

or NURS 6260 Foundations of Coaching

ASSOCIATE'S DEGREE IN NURSING PATHWAY TO BACHELOR OF SCIENCE IN NURSING/MASTER OF SCIENCE IN NURSING ADULT-GERONTOLOGY PRIMARY CARE NURSE PRACTITIONER

For new ADN graduates as well as experienced ADN nurses, the ADN Pathway to BSN/MSN: Adult-Gerontology Primary Care Nurse Practitioner prepares registered nurses for growth in advanced nursing practice. The program is designed to

move the ADN nurse seamlessly through the BSN program and into MSN coursework, allowing students to complete both degree programs in three years (six semesters and two summer sessions) on a part-time basis.

Students complete coursework via distance learning and faculty-mentored clinical practicum rotations in their local community. This format allows professional nurses to advance their education with access to GW's resources and expert faculty while continuing to work. In addition, students are required to attend four on campus programs:

- New Student Orientation—To assist students in their transition to GW, the School of Nursing hosts a mandatory orientation for all new students. Designed to empower students with the knowledge and tools needed to be successful in the School of Nursing, the orientation program is a vital first step toward academic success. Students become familiar with various campus academic resources, program requirements, course registration, online technology, and student expectations. They will also have the opportunity to meet fellow students, faculty members, consult with advisors, visit the campus, and tour local attractions. Orientation typically takes place the 2nd or 3rd week in August.
- NURS 6222: Advanced Health Assessment and Diagnostic Reasoning—All nurse practitioner students are expected to come to campus towards the end of the health assessment course to be tested on their history and physical examination skills in the simulation center. On-campus training is also provided utilizing GW teaching assistants. Seminars are presented that strengthen diagnostic reasoning skills. This on-campus experience typically takes place over a 4-5 day period towards the end of April.
- NURS 6225-AGPCNP II: Adolescent and Adult and NURS 6231-FNP 2: Lifespan Primary Care/Diagnosis/Management—All nurse practitioner students are expected to come to campus towards the end of the AGPCNP II/FNP 2 courses to be tested on their clinical reasoning skills in the simulation center. On-campus seminars include reading 12 lead EKGs, radiological interpretation, and a hands on suturing/wound care workshop. This on-campus experience typically takes place over a 4-5 day period in early November.
- NURS 6229-AGPCNP III: Adult, Older/Frail (or) NURS 6232-FNP 3: Professional Issues/Diagnosis/Management—All nurse practitioner students are required to pass final skills assessment with standardized patients in the simulation center. This on-campus experience typically takes place over a 2-3 day period in April prior to graduation in May.
- Upon completion of the program students will be eligible to sit for the nationally recognized AANP or ANCC certification examination for the adult-gerontology primary care nurse practitioner role and population focus.

Please note that students are responsible for all travel costs. See the University's Visiting Campus website (<http://www.gwu.edu/gw-overview>).

Visit the program website (<https://nursing.gwu.edu/adult-gerontology-primary-care-nurse-practitioner-adn-bsnmsn-program>) for more information.

NURS 6234	Advanced Pharm for Nursing

ASSOCIATE'S DEGREE IN NURSING PATHWAY TO BACHELOR OF SCIENCE IN NURSING/MASTER OF SCIENCE IN NURSING FAMILY NURSE PRACTITIONER

This program is designed for recent ADN graduates as well as experienced ADN nurses. It incorporates the completion of specified courses which lead to the completion of both the BSN and MSN degrees.

Students enrolled part-time can go from an ADN to a BSN in four semesters and can earn a MSN in approximately three years. Students with a bachelor's degree in another field that have an ADN degree and work experience as a licensed registered nurse should apply directly to the MSN program (<http://nursing.gwu.edu/node/13>), as GW School of Nursing offers a bridge pathway.

This program is versatile yet rigorous. Students complete the course work online via distance education, complete the clinical practicum rotations in their local communities, and receive mentoring from GW faculty. The distance based format allows professional nurses to advance their education with access to GW's resources and expert faculty while continuing to work.

In addition, students are required to attend four on-campus programs:

- **New Student Orientation**—To assist students in their transition to GW, the School of Nursing hosts a mandatory orientation for all new students. Designed to empower students with the knowledge and tools needed to be successful in the School of Nursing, the orientation program is a vital first step toward academic success. Students become familiar with various campus academic resources, program requirements, course registration, online technology, and student expectations. They will also have the opportunity to meet fellow students, faculty members, consult with advisors, visit the campus, and tour local attractions. Orientation typically takes place the 2nd or 3rd week in August.
- **NURS 6222: Advanced Health Assessment and Diagnostic Reasoning**—All nurse practitioner students are expected to come to campus towards the end of the health assessment course to be tested on their history and physical examination skills in the simulation center. On-campus training is also provided utilizing GW teaching assistants. Seminars are presented that strengthen diagnostic reasoning skills. This on-campus experience typically takes place over a 4-5 day period towards the end of April.
- **NURS 6225-AGPCNP II: Adolescent and Adult and NURS 6231-FNP 2: Lifespan Primary Care/Diagnosis/Management**—All nurse practitioner students are expected to come to campus towards the end of the AGPCNP II/FNP 2 courses to be tested on their clinical reasoning skills in the simulation center. On-campus seminars include reading 12 lead EKGs, radiological interpretation, and a hands on suturing/wound care workshop. This on-campus experience typically takes place over a 4-5 day period in early November.

ASSOCIATE'S DEGREE IN NURSING PATHWAY TO BACHELOR OF SCIENCE IN NURSING/MASTER OF SCIENCE IN NURSING NURSE MIDWIFERY

The Associate's Degree in Nursing Pathway to Bachelor of Science in Nursing/Master of Science in Nursing (ADN to BSN/MSN) in the field of nurse-midwifery program is a collaboration between GW and Shenandoah University (SU). The program applies previously completed ADN credits toward curriculum requirements for the BSN degree, allowing students to earn both the BSN and MSN with a seamless, three-year program of study.

Coursework for the ADN to BSN/MSN program is completed via distance learning, a format that allows professional nurses to advance their education while continuing to work. Students have access to GW and SU resources and expert faculty and attend select on-campus programs. Core-level courses required for the BSN and MSN are completed through GW, which awards the two degrees. The nurse-midwifery didactic and clinical components of the curriculum are fulfilled through SU, which awards a Certificate of Endorsement in Nurse-Midwifery. Program graduates are eligible to sit for the national certification exam given by the American Midwifery Certification Board.

The Nurse-Midwifery Program at Shenandoah University is fully accredited by the Accreditation Commission for Midwifery Education.

Visit the ADN Pathway to BSN/MSN Nurse-Midwifery website (<http://nursing.gwu.edu/adn-bsnmsn-concentration-nurse-midwifery>) for detailed program information.

Information for VA Community College Graduates

GW School of Nursing is pleased to provide guaranteed admission to students who have earned associate's degrees from accredited nursing programs at community colleges across Virginia and who meet GW's academic requirements.

Information for Montgomery (MD) Community College Graduates

GW School of Nursing is pleased to provide guaranteed admission to students who have earned associate's degrees

from accredited nursing programs at Montgomery Community Colleges in Maryland and who meet GW's academic requirements.

For more information visit the ADN Pathways webpage (<http://nursing.gwu.edu/adn-pathways-online>).

REQUIREMENTS

The following requirements must be fulfilled: 53 credits, including 34 credits in required courses taken at GW and 19 credits of required courses taken at Shenandoah University. In addition, for the Bachelor of Science in Nursing portion of the program, students must complete 15 credits toward the University General Education Requirement, which is usually fulfilled by transfer of credits from the ADN program; and up to 15 credits based on review of the student's professional portfolio and awarded through enrollment in NURS 4121. If fewer than 15 credits are awarded under NURS 4121, completion of one or more of the following courses may be required, as determined by the program director: NURS 3112, NURS 3113, and NURS 3118.

Program Requirements

Required for BSN-GW

NURS 4117	NPCR 6:Epidemiology&CommHealth
NURS 4119	PatientSafety&HlthCareQuality (course has an on-campus component)
NURS 4121	Nursing Advancment Portfolio
NURS 6202	Concepts in Population Health
NURS 6203	Nursing Leadership
NURS 6205	HealthPolicy,Quality,Political
NURS 6207	Evidence-Based Practice for Health Care Researchers
NURS 6233	Genetics for HC Providers

Required for MSN-GW

NURS 6208	Biostatistics for Health Care Research
NURS 6220	Advanced Physiology and Pathophysiology
NURS 6222	Advanced Health Assessment and Diagnostic Reasoning (course has an on-campus component)
NURS 6234	Advanced Pharm for Nursing

Required for Nurse-Midwifery certificate-SU

NM 610 - Primary Care of Women (3)

NM 620 - Comprehensive Antepartal Care (3)

NM 630 - Midwifery Practicum (3)

NM 640 - Comprehensive Perinatal Care (3)

NM 651 - Integrated Midwifery Internship (5)

NM 652 - Evidence Based Practice Project (1)

NM 660 - Advanced Nurse-Midwifery Role Development (1)

ASSOCIATE'S DEGREE IN NURSING PATHWAY TO BACHELOR OF SCIENCE IN NURSING/MASTER OF SCIENCE IN NURSING NURSE COACHING AND LEADERSHIP

A critical role of nurses is educating individuals to achieve better health. Using the coaching techniques acquired in this program, nurses are able to help individuals improve their own health status by making lifestyle changes. Structured for both recent ADN graduates and experienced ADN nurses, the Bachelor of Science in Nursing/Master of Science in Nursing Nurse Coaching and Leadership pathway provides registered nurses with additional higher-level skills that increase their value to hospitals aspiring to achieve "magnet" status and to communities seeking to improve the overall health of their citizens. The program also enhances nurses' career options and job security.

This three-year, part-time program is versatile yet rigorous. Students complete course work online via distance learning, complete the clinical practicum preceptorships in their local communities, and receive mentoring from GW faculty. The distance-based format allows professional nurses to advance their education with access to GW's resources and expert faculty while continuing to work. Students enter as ADN-prepared nurses, earn their BSN in the fall of their second year, and in the spring of their second year enter the MSN nurse coaching and leadership component of the curriculum.

Visit the program website (<http://nursing.gwu.edu/nurse-coaching-and-leadership>) for more information.

ASSOCIATE'S DEGREE IN NURSING PATHWAY TO MASTER OF SCIENCE IN NURSING

ADN to MSN Bridge

The Associate Degree in Nursing to Master of Science in Nursing bridge option is designed for nurses with an A.D.N. and a B.A. or B.S. in a non-nursing field who wish to pursue graduate study. Students go straight into a master's program by taking a "bridge course," NURS 3110 Transitions into the Nursing Profession, the summer before matriculation in the M.S.N. program.

The A.D.N. to M.S.N. bridge option is available in the fields listed below. For more information visit the program website (<http://nursing.gwu.edu/adn-msn-bridge>):

Adult-Gerontology Primary Care Nurse Practitioner (<https://nursing.gwu.edu/node/123>)

Family Nurse Practitioner (<https://nursing.gwu.edu/node/125>)

Health Care Quality (<https://nursing.gwu.edu/node/126>)

Nurse-Midwifery (with Shenandoah University) (<https://nursing.gwu.edu/node/511>)

Nursing Leadership and Management (<https://nursing.gwu.edu/node/127>)

BACHELOR OF SCIENCE IN NURSING

Through the school's accelerated Bachelor of Science in Nursing (ABSN) program, students who already have a Bachelor's degree in a non-nursing field can pursue professional nursing. The Veterans BSN (VBSN) is an option for military veterans seeking to capitalize on their military training and experience, for which they are eligible to receive academic credit. These 15-month, full-time programs draw upon students' previous knowledge from the natural and behavioral sciences, the humanities, and nursing theory to critically analyze and synthesize responses to health problems and provide appropriate nursing interventions. Taught to practice in a multicultural world, the students learn to utilize the nursing process to support and promote health in diverse individuals, families, groups, and communities.

Graduates of the ABSN and VBSN. program are equipped with the knowledge, skills, and practical experience needed to enter the nursing profession with high ethical, legal, and

professional values. What’s more, upon completion, students will have earned 12 graduate credits, with at least 9 graduate credits eligible to be applied to any of GW’s MSN degrees within five years.

Housed at GW’s Virginia Science and Technology Campus, the programs offer the unique opportunity to put theory into practice through the school’s Skills and Simulation Laboratory (<http://nursing.gwu.edu/skills-and-simulation-laboratories>), a sophisticated and innovative learning environment in which students gain hands-on experience even before entering a clinical facility.

As the curriculum advances, students are placed in clinical rotations in top-rated facilities in the greater DC area, including Northern Virginia. This gives students highly valued exposure to medical and surgical nursing, obstetrics, pediatrics, psychiatric nursing, and community health. The combination of learning in a traditional classroom setting, in a premier simulation lab, through online courses, and in myriad clinical environments makes GW’s ABSN and VBSN programs exceptional choices for aspiring nurses.

REQUIREMENTS

The followed requirements must be fulfilled: 60 credit hours including the required curriculum and at least 700 clinical hours; clinical hours are a component of some required courses.

MASTER OF SCIENCE IN NURSING IN THE FIELD OF ADULT- GERONTOLOGY PRIMARY CARE NURSE PRACTITIONER

Application to the MSN program

Applicants to the Master of Science in Nursing programs must have an earned Bachelor's degree from an accredited institution and a current license as a registered nurse with a GPA of 3.0 or higher. A Bachelor of Science in Nursing is preferred. RNs with a Bachelor's degree in another field may apply and, if accepted, will be required to take a bridge course the summer prior to the start of their studies.

Students may apply for admission if they will receive their Bachelor's degree before the first day of classes at GW. Applicants must complete the required applications before the deadline and notify the Admissions Office of their current student status. Admitted students will be required to submit a final transcript reflecting degree conferral before the first day of classes at GW. Satisfactory completion of NCLEX (National Council Licensure Examination for Registered Nurses) is required in order to continue in the Masters programs. It is recommended that applicants without relevant nursing work experience attend part time while working as a registered nurse.

Applicants must have a minimum GPA of 3.0 in all coursework, though the admission committee reserves the right to interview applicants who have less than a 3.0 GPA for either undergraduate or graduate studies. The GRE is not required for this program.

Degree Requirements

In addition to fulfilling general admission requirements, applicants to Master of Science in Nursing programs must have a BSN from an accredited institution, normally with a minimum GPA of 3.0 or higher, and a current RN license. Applicants that are registered nurses with a bachelor’s degree in a related field may be admitted with the condition that they complete a Nursing bridge course prior to the start of their academic program.

Depending upon the program chosen, MSN credit requirements vary from 36 to 48 credit hours. All MSN programs require 9 credits of professional core courses (NURS 6202 Concepts in Population Health,NURS 6203 Nursing Leadership, NURS 6205 HealthPolicy,Quality,Political) and 6

credits of research courses (NURS 6270 , NURS 6271). Field-specific course requirements follow, with credit indicated in parentheses in the case of courses offered for variable credit.

The Master of Science in Nursing degree in the field of Adult-Gerontology Primary Care Nurse Practitioner (AGPCNP) program provides the theoretical and practical foundations for nurses to expand their scope of practice and to become leaders in their roles as advanced practice nurses providing care for patients across the adult age continuum: the adolescent patient (12 and up), adult patient, older adult patient, and frail elderly patient.

Students complete the coursework online via distance learning and the clinical practicum rotations in their local community with faculty mentoring. The curriculum integrates research, policy, technology, simulation, and evidence-based nursing practice with diagnostic reasoning and clinical judgment to solve real-world health care problems. The distance-based format allows professional nurses to advance their education with access to GW's resources and expert faculty while continuing to work. Students may choose to enroll in the program on a full- or part-time basis.

Upon completion of the program students are eligible to sit for the nationally recognized AANP or ANCC certification examination for the Adult-Gerontology Primary Care Nurse Practitioner role and population focus.

Students in the AGPCNP option are required to complete four on-campus components.

- New Student Orientation—To assist in your transition to GW, the School of Nursing will host a mandatory orientation for all new students. The New Student Orientation is a vital first step towards your academic success. It is designed to empower students with the knowledge and tools needed to be successful in the School of Nursing. Students become familiar with various campus academic resources, program requirements, course registration, online technology, and student expectations. They will also have the opportunity to meet fellow students, faculty members, consult with advisors, visit the campus, and tour local attractions. Orientation typically takes place the 2nd or 3rd week in August.
- NURS 6222—Advanced Health Assessment and Diagnostic Reasoning --All nurse practitioner students are expected to come to campus towards the end of the health assessment course to be tested on their history and physical examination skills in the simulation center. On-campus training is also provided utilizing GW teaching assistants. Seminars are presented that strengthen diagnostic reasoning skills. This on-campus experience typically takes place over a 4-5 day period towards the end of April.
- NURS 6225 – AGPCNP II: Adolescent and Adult and NURS 6231-FNP 2: Lifespan Primary Care/Diagnosis/Management –All nurse practitioner students are expected to come to campus towards the end of the AGPCNP II/FNP 2 courses to

be tested on their clinical reasoning skills in the simulation center. On-campus seminars include reading 12 lead EKGs, radiological interpretation, and a hands on suturing/wound care workshop. This on-campus experience typically takes place over a 4-5 day period in early November.

- NURS 6229 – AGPCNP III: Adult, Older/Frail (or) NURS 6232 – FNP 3: Professional Issues/Diagnosis/Management—All nurse practitioner students are required to pass final skills assessment with standardized patients in the simulation center. This on-campus experience typically takes place over a 2-3 day period in April prior to graduation in May.

Please note that students are responsible for all travel-related expenses. See the Visiting Campus (<http://www.gwu.edu/visiting-campus>) website for more information about visiting GW.

Visit the program website (<http://nursing.gwu.edu/adult-nurse-practitioner>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 33 credits, including 9 credits in professional core courses, 6 credits in research courses, 30 credits in field-specific courses, 3 credits in elective courses, and completion of 625 clinical hours.

MASTER OF SCIENCE IN NURSING IN THE FIELD OF FAMILY NURSE PRACTITIONER

Application to the MSN program

Applicants to the Master of Science in Nursing programs must have an earned Bachelor's degree from an accredited institution and a current license as a registered nurse with a GPA of 3.0 or higher. A Bachelor of Science in Nursing is preferred. RNs with a Bachelor's degree in another field may apply and, if accepted, will be required to take a bridge course the summer prior to the start of their studies.

Students may apply for admission if they will receive their Bachelor's degree before the first day of classes at GW. Applicants must complete the required applications before the deadline and notify the Admissions Office of their current student status. Admitted students will be required to submit a final transcript reflecting degree conferral before the first day of classes at GW. Satisfactory completion of NCLEX (National Council Licensure Examination for Registered Nurses) is required in order to continue in the Masters programs. It is recommended that applicants without relevant nursing work experience attend part time while working as a registered nurse.

Applicants must have a minimum GPA of 3.0 in all coursework, though the admission committee reserves the right to interview applicants who have less than a 3.0 GPA for either undergraduate or graduate studies. The GRE is not required for this program.

Degree Requirements

In addition to fulfilling general admission requirements, applicants to Master of Science in Nursing programs must have a BSN from an accredited institution, normally with a minimum GPA of 3.0 or higher, and a current RN license. Applicants that are registered nurses with a bachelor's degree in a related field may be admitted with the condition that they complete a Nursing bridge course prior to the start of their academic program.

Depending upon the program chosen, MSN credit requirements vary from 36 to 48 credit hours. All MSN programs require 9 credits of professional core courses (NURS 6202 Concepts in Population Health, NURS 6203 Nursing Leadership, NURS 6205 Health Policy, Quality, Political) and 6 credits of research courses (NURS 6270, NURS 6271). Field-

specific course requirements follow, with credit indicated in parentheses in the case of courses offered for variable credit.

The Master of Science in Nursing in the field of Family Nurse Practitioner (FNP) program prepares registered nurses for leadership in primary care to families and individuals of all ages.

This specialty stresses the integration of research and nursing practice with a strong emphasis on solving real-world problems. Curriculum content includes pathophysiology and pharmacology, health assessment, health maintenance and promotion, and diagnosis and management of common primary care health concerns, providing the theoretical and practical foundations for nurses to expand their scope of practice. Simultaneous clinical experiences ensure that students meet all criteria to sit for the nationally recognized AANP or ANCC certification examination for the Family Nurse Practitioner role and population focus. Students may choose to enroll in the program on a full- or part-time basis.

Students in the FNP option are required to complete four on-campus components:

- **New Student Orientation:** To assist in the transition to GW, the School of Nursing will host a mandatory orientation for all new students. The New Student Orientation is a vital first step towards academic success. It is designed to empower students with the knowledge and tools needed to be successful in the School of Nursing. Students become familiar with various campus academic resources, program requirements, course registration, online technology, and student expectations. They will also have the opportunity to meet fellow students, faculty members, consult with advisors, visit the campus, and tour local attractions. Orientation typically takes place the 2nd or 3rd week in August.
- **NURS 6222—Advanced Health Assessment and Diagnostic Reasoning:** All students are expected to come to campus towards the end of the health assessment course to be tested on their history and physical examination skills in the simulation center. On-campus training is also provided utilizing GW teaching assistants. Seminars are presented that strengthen diagnostic reasoning skills. This on-campus experience typically takes place over a 4-5 day period towards the end of April.
- **NURS 6225 – AGPCNP II: Adolescent & Adult and NURS 6231-FNP 2: Lifespan Primary Care/Diagnosis/Management:** All students are expected to come to campus towards the end of the AGPCNP II/FNP 2 courses to be tested on their clinical reasoning skills in the simulation center. On-campus seminars include reading 12 lead EKGs, radiological Interpretation, and a hands on suturing/wound care workshop. This on-campus experience typically takes place over a 4-5 day period in early November.
- **NURS 6229 – AGPCNP III: Adult, Older/Frail (or) NURS 6232 – FNP 3: Professional Issues/Diagnosis/Management:** All

students are required to pass final skills assessment with standardized patients in the simulation center. This on-campus experience typically takes place over a 2-3 day period in April prior to graduation in May.

Please note that students are responsible for all travel-related expenses. See the Visiting Campus (<http://www.gwu.edu/visiting-campus>) website for more information about visiting GW.

Visit the Program website (<http://nursing.gwu.edu/adult-nurse-practitioner>) for additional information.

The School of Nursing also offers a Family Nurse Practitioner program for professionals holding a master's degree in nursing. Visit the certificate program website (<http://nursing.gwu.edu/adult-nurse-practitioner-certificate>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 48 credits including, 6 credits in professional core courses, 9 credits in research courses, 30 credits in field-specific study, and completion of 700 clinical hours.

Program Requirements

Research core courses

NURS 6207	Evidence-Based Practice for Health Care Researchers
NURS 6208	Biostatistics for Health Care Research

MASTER OF SCIENCE IN NURSING IN THE FIELD OF HEALTH CARE QUALITY

Application to the MSN program

Applicants to the Master of Science in Nursing programs must have an earned Bachelor's degree from an accredited institution and a current license as a registered nurse with a GPA of 3.0 or higher. A Bachelor of Science in Nursing is preferred. RNs with a Bachelor's degree in another field may apply and, if accepted, will be required to take a bridge course the summer prior to the start of their studies.

Students may apply for admission if they will receive their Bachelor's degree before the first day of classes at GW. Applicants must complete the required applications before the deadline and notify the Admissions Office of their current student status. Admitted students will be required to submit a final transcript reflecting degree conferral before the first day of classes at GW. Satisfactory completion of NCLEX (National Council Licensure Examination for Registered Nurses) is required in order to continue in the Masters programs. It is recommended that applicants without relevant nursing work experience attend part time while working as a registered nurse.

Applicants must have a minimum GPA of 3.0 in all coursework, though the admission committee reserves the right to interview applicants who have less than a 3.0 GPA for either undergraduate or graduate studies. The GRE is not required for this program.

Degree Requirements

In addition to fulfilling general admission requirements, applicants to Master of Science in Nursing programs must have a BSN from an accredited institution, normally with a minimum GPA of 3.0 or higher, and a current RN license. Applicants that are registered nurses with a bachelor's degree in a related field may be admitted with the condition that they complete a Nursing bridge course prior to the start of their academic program.

Depending upon the program chosen, MSN credit requirements vary from 36 to 48 credit hours. All MSN programs require 9 credits of professional core courses (NURS 6202 Concepts in Population Health, NURS 6203 Nursing Leadership, NURS 6205 HealthPolicy,Quality,Political) and 6 credits of research courses (NURS 6270 , NURS 6271). Field-specific course requirements follow, with credit indicated in parentheses in the case of courses offered for variable credit.

GW's School of Nursing developed the Master of Science in Nursing in the field of health care quality program in partnership with the National Committee for Quality Assurance

(NCQA) (<http://www.ncqa.org>) to meet the growing need for quality and patient safety specialists. Graduates are prepared for quality and patient safety leadership, management, and research positions within health care organizations or policy agencies.

Students complete the course work online via distance learning. This distance-based format allows professional nurses to advance their education with access to GW's resources and expert faculty while continuing to work full time. In addition, students attend select on-campus experiences to interact with faculty and fellow students. Students may choose to enroll in the program on a full- or part-time basis.

Visit the program website (<http://nursing.gwu.edu/health-care-quality>) for additional information.

REQUIREMENTS

The following requirements must be fulfilled: 36 credits including 9 credits of research courses, 6 credits of professional core courses, and 21 credits of required courses in quality and safety.

MASTER OF SCIENCE IN NURSING IN THE FIELD OF NURSE- MIDWIFERY

Application to the MSN program

Applicants to the Master of Science in Nursing programs must have an earned Bachelor's degree from an accredited institution and a current license as a registered nurse with a GPA of 3.0 or higher. A Bachelor of Science in Nursing is preferred. RNs with a Bachelor's degree in another field may apply and, if accepted, will be required to take a bridge course the summer prior to the start of their studies.

Students may apply for admission if they will receive their Bachelor's degree before the first day of classes at GW. Applicants must complete the required applications before the deadline and notify the Admissions Office of their current student status. Admitted students will be required to submit a final transcript reflecting degree conferral before the first day of classes at GW. Satisfactory completion of NCLEX (National Council Licensure Examination for Registered Nurses) is required in order to continue in the Masters programs. It is recommended that applicants without relevant nursing work experience attend part time while working as a registered nurse.

Applicants must have a minimum GPA of 3.0 in all coursework, though the admission committee reserves the right to interview applicants who have less than a 3.0 GPA for either undergraduate or graduate studies. The GRE is not required for this program.

Degree Requirements

In addition to fulfilling general admission requirements, applicants to Master of Science in Nursing programs must have a BSN from an accredited institution, normally with a minimum GPA of 3.0 or higher, and a current RN license. Applicants that are registered nurses with a bachelor's degree in a related field may be admitted with the condition that they complete a Nursing bridge course prior to the start of their academic program.

Depending upon the program chosen, MSN credit requirements vary from 36 to 48 credit hours. All MSN programs require 9 credits of professional core courses (NURS 6202 Concepts in Population Health,NURS 6203 Nursing Leadership, NURS 6205 HealthPolicy,Quality,Political) and 6 credits of research courses (NURS 6270 , NURS 6271). Field-specific course requirements follow, with credit indicated in parentheses in the case of courses offered for variable credit.

The Master of Science in Nursing in the Field of Nurse-Midwifery program is a collaboration between GW and Shenandoah University (SU). The program prepares graduates to be eligible for the American Midwifery Certification Board's national certification exam. The Nurse-Midwifery Program at

SU is fully accredited by the Accreditation Commission for Midwifery Education.

Core courses required for the MSN are completed through GW, which awards the MSN degree, while the nurse-midwifery didactic and clinical component of the curriculum is fulfilled through SU, which awards the Postgraduate Certificate in Midwifery. A versatile distance learning format allows professional nurses to advance their education while continuing to work, and provides students with access to the resources and experts at GW and SU. In addition, there are selected on-campus sessions for skills training and education as well as clinical practicums in sites across the country. Students may choose to enroll in the program on a full- or part-time basis.

Visit the program website (<http://nursing.gwu.edu/msn-concentration-nurse-midwifery>) for additional information.

REQUIREMENTS

MASTER OF SCIENCE IN NURSING IN THE FIELD OF NURSING LEADERSHIP AND MANAGEMENT

Application to the MSN program

Applicants to the Master of Science in Nursing programs must have an earned Bachelor's degree from an accredited institution and a current license as a registered nurse with a GPA of 3.0 or higher. A Bachelor of Science in Nursing is preferred. RNs with a Bachelor's degree in another field may apply and, if accepted, will be required to take a bridge course the summer prior to the start of their studies.

Students may apply for admission if they will receive their Bachelor's degree before the first day of classes at GW. Applicants must complete the required applications before the deadline and notify the Admissions Office of their current student status. Admitted students will be required to submit a final transcript reflecting degree conferral before the first day of classes at GW. Satisfactory completion of NCLEX (National Council Licensure Examination for Registered Nurses) is required in order to continue in the Masters programs. It is recommended that applicants without relevant nursing work experience attend part time while working as a registered nurse.

Applicants must have a minimum GPA of 3.0 in all coursework, though the admission committee reserves the right to interview applicants who have less than a 3.0 GPA for either

undergraduate or graduate studies. The GRE is not required for this program.

Degree Requirements

In addition to fulfilling general admission requirements, applicants to Master of Science in Nursing programs must have a BSN from an accredited institution, normally with a minimum GPA of 3.0 or higher, and a current RN license. Applicants that are registered nurses with a bachelor's degree in a related field may be admitted with the condition that they complete a Nursing bridge course prior to the start of their academic program.

Depending upon the program chosen, MSN credit requirements vary from 36 to 48 credit hours. All MSN programs require 9 credits of professional core courses (NURS 6202 Concepts in Population Health, NURS 6203 Nursing Leadership, NURS 6205 HealthPolicy, Quality, Political) and 6 credits of research courses (NURS 6270, NURS 6271). Field-specific course requirements follow, with credit indicated in parentheses in the case of courses offered for variable credit.

The Master of Science in Nursing in the Field of Nursing Leadership and Management program is designed to prepare graduates for upper-level positions in the field by enhancing the depth and breadth of the practicing clinical professional's knowledge and skills. The program focuses on leadership development by training nurses to think and act strategically, participate in policy decisions, and lead organizations through change and improvement.

Students complete the course work online via distance learning. This distance-based format allows professional nurses to advance their education with access to GW's resources and expert faculty while continuing to work full-time. In addition, students attend select on-campus experiences to interact with faculty and fellow students. Students may choose to enroll in the program on a full- or part-time basis.

Visit the program website (<http://nursing.gwu.edu/nursing-leadership-management>) for additional information.

DOCTOR OF NURSING PRACTICE

An alternative to research-focused doctoral programs, the Doctor of Nursing Practice (D.N.P.) advances professional nursing roles in clinical practice and nursing leadership and management. It is designed to develop leaders in health care – at the local and national levels. Graduates will be able to incorporate health policy, knowledge of information technology, evidence based practice, business principles, collaboration, health systems, and health policy into practice. A clinical research project immerses students in a practice environment that lays the foundation for future scholarship and success in the nursing field. Students can enter either at the post-Bachelor's or post-Master's level.

Application

Prospective students to the D.N.P. program have two entry options. For students who are B.S.N.-prepared nurses, the admission requirements include a Bachelor of Science in Nursing from an accredited nursing program with a cumulative GPA of 3.3 or higher. R.N.s with a bachelor's degree in a nursing-related field will be required to take a bridge course. All applicants applying through this option must have an active R.N. license.

The second entry option is for M.S.N.-prepared nurses who must have a Master of Science in Nursing degree from an accredited nursing program, with a cumulative GPA of 3.3 from an advanced practice registered nursing program, (including nurse practitioners, clinical nurse specialists or nurse midwives with national certification), or from a nursing Leadership and Management or Nursing Administration program. Students admitted to the program may be required to provide verification of clinical hours completed in their Master's program if it is not clear on the transcript.

All prospective students will be required to complete an interview (either by telephone or in person) with faculty to

discuss career goals and previous experience in nursing (to be arranged by the school admissions committee). Interviews will be conducted at the discretion of the committee and will not be extended to all applicants. The GRE is not required for this program.

The degree of Doctor of Nursing Practice is offered to graduates of accredited B.S.N. and M.S.N. programs. As indicated below, D.N.P. program requirements differ according to the concentration chosen and the prior nursing degree held. The program can be entered at the post-B.S.N. and the post-M.S.N. levels.

In addition to fulfilling general admission requirements, all applicants must hold a current R.N. license. Minimum grade-point averages, on a 4.0 scale, are 3.33 for B.S.N. graduates and 3.3 for M.S.N. graduates.

REQUIREMENTS

Below are program options for the D.N.P. degree.

POST-BACHELOR'S OPTIONS

- Doctor of Nursing Practice - Family Nurse Practitioner
- Doctor of Nursing Practice - Adult-Gerontology Primary Care Nurse Practitioner

POST-MASTER'S OPTIONS

- Doctor of Nursing Practice
- Doctor of Nursing Practice - Education Concentration
- Doctor of Nursing Practice - Executive Leadership
- Doctor of Nursing Practice - Family Specialty for Nurse Practitioners
- Doctor of Nursing Practice - Health Care Quality
- Doctor of Nursing Practice - Palliative Care Specialty for Nurse Practitioner

Program Requirements

Students who enter the D.N.P. program at the post-master's level must complete 36 credits of doctoral work. Students who enter the program at the post-bachelor's level must complete the credit requirements for their concentration (adult gerontology primary care nurse practitioner or family nurse practitioner) before beginning doctoral coursework. Students pursuing a Post-Graduate APRN Certificate: FSNP must complete 500 clinical hours

Degree Requirements

The concentration courses that follow are required for post BSN entry:

Adult gerontology primary care nurse practitioner

NURS 6202 Concepts in Population Health

NURS 6203 Nursing Leadership

NURS 6205 HealthPolicy,Quality,Political

NURS 6207 Evidence-Based Practice for Health Care Researchers

NURS 6208 Biostatistics for Health Care Research

NURS 6220 Advanced Physiology and Pathophysiology

NURS 6222 Advanced Health Assessment and Diagnostic Reasoning

NURS 6224 Adult/Gerontology Primary Care Nurse Practitioner 1, Practice Introduction

NURS 6225 Adult/Gerontology Primary Care Nurse Practitioner 2, Adolescent & Adult

NURS 6229 Adult/Gerontology Primary Care Nurse Practitioner 3, Adult, Older/Frail

NURS 6233 Genetics for HC Providers

NURS 6234 Advanced Pharm for Nursing

Family nurse practitioner

NURS 6202 Concepts in Population Health

NURS 6203 Nursing Leadership

NURS 6205 HealthPolicy,Quality,Political

NURS 6207 Evidence-Based Practice for Health Care Researchers

NURS 6208 Biostatistics for Health Care Research

NURS 6220 Advanced Physiology and Pathophysiology

NURS 6222 Advanced Health Assessment and Diagnostic Reasoning

NURS 6230 Family Nurse Practitioner 1, Lifespan Primary Care/Diagnosis/Management

NURS 6231 Family Nurse Practitioner 2, Lifespan Primary Care/Diagnosis/Management

NURS 6232 Family Nurse Practitioner 3, Professional Issues/Diagnosis/Management

NURS 6233 Genetics for HC Providers

NURS 6234 Advanced Pharm for Nursing

Following completion of concentration courses, AGNP and FNP students take:

NURS 6241 The Health Care Enterprise

NURS 8401 Org Concepts in Nursing

NURS 8402	Knowledge Managemnt in Nursing
NURS 8403	Translating Research into Prac
NURS 8404	Research & Policy for Nursing
NURS 8405	Healthcare Quality Improvement
NURS 8414	DNP Residency
NURS 8498	Research Project Proposal
NURS 8499	Clinical Research Project
(NURS 8499 is taken twice for a total of 6 credits.)	
3 credits of approved elective courses	

Post MSN entry students enrolled in the nursing practice major take:

NURS 6202	Concepts in Population Health
NURS 6241	The Health Care Enterprise
NURS 8401	Org Concepts in Nursing
NURS 8402	Knowledge Managemnt in Nursing
NURS 8403	Translating Research into Prac
NURS 8404	Research & Policy for Nursing
NURS 8405	Healthcare Quality Improvement
NURS 8498	Research Project Proposal
NURS 8499	Clinical Research Project
(NURS 8499 is taken twice for a total of 6 credits.)	
6 credits of approved elective courses unless concentration specifies different program of study	

Post MSN entry students enrolled in the executive leadership major take:

NURS 6202	Concepts in Population Health
NURS 6241	The Health Care Enterprise
NURS 8401	Org Concepts in Nursing
NURS 8402	Knowledge Managemnt in Nursing
NURS 8403	Translating Research into Prac
NURS 8404	Research & Policy for Nursing
NURS 8405	Healthcare Quality Improvement
NURS 8410	Executive Presence I

NURS 8411	Executive Presence II
NURS 8412	HC Finance for Nurse Leaders
NURS 8498	Research Project Proposal
NURS 8499	Clinical Research Project
(NURS 8499 is taken twice for a total of 6 credits.)	
MBAD 6262	Managing Human Capital
MBAD 6265	Entrepreneurship
MBAD 6290	Special Topics (Social Entrepreneurship)
MBAD 6234	Financial Management

A 1.5 credit approved MBAD approved

Post MSN entry students enrolled in the nursing education concentration take:

NURS 6202	Concepts in Population Health
NURS 6241	The Health Care Enterprise
NURS 8401	Org Concepts in Nursing
NURS 8402	Knowledge Managemnt in Nursing
NURS 8403	Translating Research into Prac
NURS 8404	Research & Policy for Nursing
NURS 8405	Healthcare Quality Improvement
NURS 8498	Research Project Proposal
NURS 8499	Clinical Research Project
(NURS 8499 is taken twice for a total of 6 credits.)	

HOL 6701	Adult Learning
HOL 6721	Assessing the Impact of Organizational Change
HOL 6742	Design of Adult Learning Interventions

Post MSN entry students enrolled in palliative care nurse practitioner major take:

NURS 6202	Concepts in Population Health
NURS 6276	Foundations of Palliative Care
NURS 6277	Pain and Suffering
NURS 6278	PalliativeCare:Chronic Illness

NURS 6279	Palliative Care Practicum I
NURS 6280	Palliative Care Practicum II
NURS 6241	The Health Care Enterprise
NURS 8401	Org Concepts in Nursing
NURS 8402	Knowledge Managemnt in Nursing
NURS 8403	Translating Research into Prac
NURS 8404	Research & Policy for Nursing
NURS 8405	Healthcare Quality Improvement
NURS 8498	Research Project Proposal
NURS 8499	Clinical Research Project
(NURS 8499 is taken twice for a total of 6 credits.)	

Post MSN entry students enrolled in the health care quality major take:

NURS 6202	Concepts in Population Health
NURS 6212	Quality Improvement Science
NURS 6213	Health Care Quality Analysis
NURS 6214	Patient Safety Systems
NURS 6241	The Health Care Enterprise
NURS 8401	Org Concepts in Nursing
NURS 8402	Knowledge Managemnt in Nursing
NURS 8403	Translating Research into Prac
NURS 8404	Research & Policy for Nursing
NURS 8405	Healthcare Quality Improvement
NURS 8498	Research Project Proposal
NURS 8499	Clinical Research Project
(NURS 8499 is taken twice for a total of 6 credits.)	

Post MSN entry students enrolled in dual family specialty for nurse practitioner certificate program take:

NURS 6202	Concepts in Population Health
NURS 6226	Primary Care of the Family
NURS 6227	FNP Clinical Practicum
NURS 6228	Advanced Family Primary Care

NURS 6241	The Health Care Enterprise
NURS 8401	Org Concepts in Nursing
NURS 8402	Knowledge Managemnt in Nursing
NURS 8403	Translating Research into Prac
NURS 8404	Research & Policy for Nursing
NURS 8405	Healthcare Quality Improvement
NURS 8498	Research Project Proposal
NURS 8499	Clinical Research Project
(NURS 8499 is taken twice for a total of 6 credits.)	

COURSES

ACADEMY FOR CLASSICAL ACTING (ACA)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ACA 6201. Acting I. 3 Credits.

The focus of the acting sequence shifts with each session, providing a studio structure to explore and meet the demands of the classical canon. Portions of the sequence focus on the history plays and tragedies, classic comedy, high comedy, the Jacobean, and master classes.

ACA 6202. Acting II. 2,3 Credits.

The focus of the acting sequence shifts with each session, providing a studio structure to explore and meet the demands of the classical canon. Portions of the sequence focus on the history plays and tragedies, classic comedy, high comedy, the Jacobean, and master classes.

ACA 6203. Acting: Classical Comedy. 2,3 Credits.

The focus of the acting sequence shifts with each session, providing a studio structure to explore and meet the demands of the classical canon. Portions of the sequence focus on the history plays and tragedies, classic comedy, high comedy, the Jacobean, and master classes.

ACA 6204. Acting: Master Class. 2,3 Credits.

The focus of the acting sequence shifts with each session, providing a studio structure to explore and meet the demands of the classical canon. Portions of the sequence focus on the history plays and tragedies, classic comedy, high comedy, the Jacobean, and master classes.

ACA 6205. Topics in Classical Drama and Culture. 2 Credits.

Plays and other writings from the Elizabethan, Jacobean, and Restoration eras and the 18th century. The historical world in which the plays were written as well as the imaginary worlds created in the plays themselves.

ACA 6206. Topics in Classical Drama and Culture. 2 Credits.

Plays and other writings from the Elizabethan, Jacobean, and Restoration eras and the 18th century. The historical world in which the plays were written as well as the imaginary worlds created in the plays themselves.

ACA 6207. Topics in Classical Drama and Culture. 2 Credits.

Plays and other writings from the Elizabethan, Jacobean, and Restoration eras and the 18th century. The historical world in which the plays were written as well as the imaginary worlds created in the plays themselves.

ACA 6208. Topics in Classical Drama and Culture. 1 Credit.

Plays and other writings from the Elizabethan, Jacobean, and Restoration eras and the 18th century. The historical world in which the plays were written as well as the imaginary worlds created in the plays themselves.

ACA 6209. Text I. 2 Credits.

Textual analysis emphasizing development of aesthetic expression. The forms and rules of verse: its meter, scansion, and overall structure in the early, middle, and late Shakespeare plays, as well as the intricacies of the prose.

ACA 6210. Text II. 2 Credits.

Textual analysis emphasizing development of aesthetic expression. The forms and rules of verse: its meter, scansion, and overall structure in the early, middle, and late Shakespeare plays, as well as the intricacies of the prose.

ACA 6211. Voice and Speech I. 3 Credits.

The development of clear, supported speech and sound that can meet the demands and challenges of classical texts. Resonators, articulators, breathing, and placement; phonetics and ear training; defining the character through the voice.

ACA 6212. Voice and Speech II. 2,3 Credits.

The development of clear, supported speech and sound that can meet the demands and challenges of classical texts. Resonators, articulators, breathing, and placement; phonetics and ear training; defining the character through the voice.

ACA 6213. Voice and Speech III. 3 Credits.

The development of clear, supported speech and sound that can meet the demands and challenges of classical texts. Resonators, articulators, breathing, and placement; phonetics and ear training; defining the character through the voice.

ACA 6214. Voice and Speech IV. 2 Credits.

The development of clear, supported speech and sound that can meet the demands and challenges of classical texts. Resonators, articulators, breathing, and placement; phonetics and ear training; defining the character through the voice.

ACA 6215. Movement I. 1,2 Credit.

The development of an awareness of the body and its expressive abilities through an integrated approach that includes ballet, modern dance, Hatha Yoga, and Feldenkrais for coordination, focus, and expression.

ACA 6216. Movement II. 1,2 Credit.

The development of an awareness of the body and its expressive abilities through an integrated approach that includes ballet, modern dance, Hatha Yoga, and Feldenkrais for coordination, focus, and expression.

ACA 6217. Movement III. 1,2 Credit.

The development of an awareness of the body and its expressive abilities through an integrated approach that includes ballet, modern dance, Hatha Yoga, and Feldenkrais for coordination, focus, and expression.

ACA 6218. Movement IV. 1,2 Credit.

The development of an awareness of the body and its expressive abilities through an integrated approach that includes ballet, modern dance, Hatha Yoga, and Feldenkrais for coordination, focus, and expression.

ACA 6219. Alexander Technique I. 1,2 Credit.

Through group work and individual sessions, students develop a further awareness of the body toward expression of imagination and the creative process, enabling powerful characterization without stress or personal physical distortion.

ACA 6220. Alexander Technique II. 1,2 Credit.

Through group work and individual sessions, students develop a further awareness of the body toward expression of imagination and the creative process, enabling powerful characterization without stress or personal physical distortion.

ACA 6221. Alexander Technique III. 1,2 Credit.

Through group work and individual sessions, students develop a further awareness of the body toward expression of imagination and the creative process, enabling powerful characterization without stress or personal physical distortion.

ACA 6222. Alexander Technique IV. 1,2 Credit.

Through group work and individual sessions, students develop a further awareness of the body toward expression of imagination and the creative process, enabling powerful characterization without stress or personal physical distortion.

ACA 6223. Stage Combat I. 2 Credits.

Skills in stage combat techniques, including unarmed combat and broadsword, buckler, rapier, dagger, and other lighter weapons, toward development of greater physical strength and an awareness of safety issues. The course is designed to lead to certification as an actor/combatant through the Society of American Fight Directors.

ACA 6224. Stage Combat II. 2 Credits.

Skills in stage combat techniques, including unarmed combat and broadsword, buckler, rapier, dagger, and other lighter weapons, toward development of greater physical strength and an awareness of safety issues. The course is designed to lead to certification as an actor/combatant through the Society of American Fight Directors.

ACA 6225. Practicum I. 2 Credits.

This sequence of courses includes scene preparation, rehearsal/production, clown class, and other performance skills.

ACA 6226. Practicum II. 1-6 Credits.

This sequence of courses includes scene preparation, rehearsal/production, clown class, and other performance skills.

ACA 6227. Practicum III. 1-6 Credits.

This sequence of courses includes scene preparation, rehearsal/production, clown class, and other performance skills.

ACA 6228. Practicum IV. 1-6 Credits.

This sequence of courses includes scene preparation, rehearsal/production, clown class, and other performance skills.

ACA 6229. Audition Techniques. 3 Credits.

A set of workshops to help students develop strong audition skills. Business aspects of acting, such as selection of agents, Equity status, and taxation issues. The workshop concludes with a showcase performance for casting directors, agents, and theatre directors.

ACA 6595. Selected Topics. 1 Credit.

ACCOUNTANCY (ACCY)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ACCY 2001. Intro Financial Accounting. 3 Credits.

The fundamental concepts underlying financial statements and the informed use of accounting information. Analysis and recording of business transactions; preparation and understanding of financial statements. Measurement of the profitability and financial position of a business. Restricted to sophomore standing.

ACCY 2002. Introductory Managerial Accounting. 3 Credits.

The use of accounting information to plan and control the activities of a business. Several widely used methods of determining the cost of business activities for use in making business decisions. Prerequisite: ACCY 2001.

ACCY 3101. Intermediate Accounting I. 3 Credits.

Financial accounting concepts underlying the preparation and interpretation of financial statements. Topics include revenue and expense recognition; accounting for receivables, inventories, fixed assets, intangible assets, and liabilities. Prerequisite: ACCY 2001.

ACCY 3102. Intermediate Accounting 2. 3 Credits.

Financial accounting concepts underlying the preparation and interpretation of financial statements. Topics include accounting for stockholders' equity, earnings per share, debt and equity investments, incomes taxes, pensions and other postretirement benefits, accounting changes, statements of cash flows, financial statement analysis, and disclosure. Prerequisite: ACCY 2001.

ACCY 3106. Financial Statement Analysis. 3 Credits.

Introduction to the analysis and interpretation of corporate financial statements within the context of a company's industry and economic environment. Cash flow analysis, profitability and risk analysis, accounting policy analysis, forecasting and performance analysis, elements of equity valuation, and decision perspectives of creditors. Students cannot earn credit for both this course and ACCY 4801. Prerequisite: ACCY 2002.

ACCY 3401. Federal Income Tax: Individuals. 3 Credits.

A study of federal income tax concepts, including what shall be taxed, and when, and at what rate. Taxable entities, income measurement, the use of different tax rates for different types of income, and the use of the tax laws to motivate taxpayer behavior to achieve economic goals.

ACCY 3403. Advanced Tax. 3 Credits.

Taxation of partnerships, corporations, and their owners. Formation, operation, and liquidation of each type of entity. Financial and tax accounting for each type of transaction, with the goal of gaining a better understanding of each system by comparing and contrasting it with the other one. Prerequisites: ACCY 2001 & ACCY 3401.

ACCY 3601. Business Law: Contracts, Torts, and Property. 3 Credits.

Essential legal principles of contracts, torts, and property, including trusts and estates, leases, professional liability, and the Uniform Commercial Code.

ACCY 4107. Advanced Accounting. 3 Credits.

Accounting for corporate combinations, foreign currency financial statements, and derivative financial instruments. Governmental and not-for-profit accounting. Prerequisites: ACCY 3101 and ACCY 3102.

ACCY 4301. Auditing. 3 Credits.

A study of generally accepted auditing standards and accepted professional auditing practices and procedures, including reviewing and evaluating financial controls, auditing financial statements, and testing financial data of manual and automated accounting systems. Prerequisite: ACCY 3102.

ACCY 4501. Accounting Systems. 3 Credits.

Introduction to the design and operation of accounting systems and data management controls. Principles and applications of internal control applicable to manual and automated accounting systems. Prerequisite: ACCY 3102.

ACCY 4601. Business Law: Enterprise Organization. 3 Credits.

The legal aspects of organizing, financing, and operating an enterprise: agency, partnerships, corporations, securities regulation, insurance, secured credit financing, and commercial paper. Prerequisite: ACCY 2001.

ACCY 4801. Financial Accounting Capstone. 3 Credits.

Synthesis and application of knowledge of financial accounting to specific contexts, using the perspectives of the preparer and user of financial statements. Students cannot earn credit for both this course and ACCY 3106. Restricted to seniors only.

ACCY 4900. Special Topics. 3 Credits.

Experimental offering; new course topics and teaching methods. Restricted to department approval.

ACCY 4995. Independent Study. 3 Credits.

Assigned topics. Admission by permission of the department chair.

ACCY 6101. Financial Accounting. 3 Credits.

The basic concepts and methods used in financial reports for understanding their content and context. The income statement, balance sheet, and statement of cash flows. Detailed accounting procedures and choices. How the most important accounting procedures are calculated and how different choices impact financial statements. Same as MBAD 6211.

ACCY 6104. Intermediate Accounting I. 3 Credits.

Accounting principles and concepts for financial accounting and reporting; emphasis on the preparation of general-purpose financial statements. Prerequisite: ACCY 6101 and MBAD 6211.

ACCY 6105. Intermediate Accounting II. 3 Credits.

Revenue recognition, employee compensation and pension plans, income tax expense, and earnings per share. Prerequisites: ACCY 6104.

ACCY 6106. Financial Statement Analysis. 3 Credits.

Analysis and interpretation of financial statements for managers, stockholders, creditors, and financial analysts; ratio-driven financial analysis; earnings-based and cash-flow-based equity valuation; sales and EPS forecasting; preparation of projected financial statements. Prerequisites: ACCY 6101/MBAD 6211.

ACCY 6107. Corp Reorganizatn &Affiliation. 3 Credits.

Financial and tax accounting for intercorporate investments and corporate acquisitions and for consolidated groups of corporations. Consolidation procedures, accounting for goodwill, intercompany sales, foreign subsidiaries, and taxation of the corporations and their shareholders. Prerequisite: ACCY 6102, ACCY 6401.

ACCY 6110. International Reporting and Control. 1.5 Credit.

International comparisons of forces that shape financial management, such as corporate governance mechanisms, tax policies, economic development, and privatization. Same as IBUS 6308.

ACCY 6111. International Accounting. 1.5 Credit.

Financial management in multinational enterprises: management techniques that improve international financial reporting and control, such as hedging foreign currency fluctuations, and controlling foreign subsidiaries. Prerequisite: ACCY 6101. Same as IBUS 6309.

ACCY 6112. International Financial Reporting Standards. 1.5 Credit.

Financial reporting standards that are used throughout most of the world other than the United States. Comparisons of these standards with those of the United States. Prerequisite: ACCY 6101/MBAD 6211. Same as IBUS 6310.

ACCY 6201. Managerial Accounting I. 1.5 Credit.

Effective use of accounting information in decision making and control of organizations. Same as MBAD 6213. Prerequisite: ACCY 6101/MBAD 6211.

ACCY 6202. Managerial Accounting II. 1.5 Credit.

Further topics in applying concepts of control and decision analysis to optimize the financial management of organizations. Prerequisite: ACCY 6201/MBAD 6213.

ACCY 6203. Controls, Alignment & the Org.. 1.5 Credit.**ACCY 6301. Contemporary Auditing Theory. 3 Credits.**

A comprehensive survey of contemporary auditing as practiced by external auditors (primarily certified public accountants) and internal auditors (those employed within government and corporate entities). Generally accepted auditing standards; government auditing standards. Planning, directing, and reporting on various audits. Prerequisite: ACCY 6101/MBAD 6211; corequisite: ACCY 6104.

ACCY 6302. Fraud Examination and Forensic Accounting. 3 Credits.

Financial statement fraud, misappropriation of assets, and methods of deterrence, prevention, detection, and investigation. Prerequisite: ACCY 6101/MBAD 6211; a course in auditing preferred but not required.

ACCY 6401. Federal Income Taxation. 3 Credits.

A study of federal income taxation, covering gross income, deductions and credits, sales and other disposition of property, capital gains and losses, and timing of income and deductions.

ACCY 6402. Federal Income Taxation of Partnerships. 3 Credits.

Financial and tax accounting for partnerships; formation and operation, distribution to partners, liquidation, and transfer of partnership interests. S corporations are also considered. Prerequisite: ACCY 6401.

ACCY 6403. Federal Income Taxation of Corporations. 3 Credits.

Federal income taxation of C corporations, covering formation, capital structure, nonliquidating distributions, complete liquidations, corporate accumulations, and the alternative minimum tax.

ACCY 6501. Accounting Information Systems and EDP. 3 Credits.

Development and application of accounting system theory, including analysis, design, control concepts, and implementation. Integration of electronic data processing, accounting systems, and management information systems. Prerequisite: ACCY 6101/MBAD 6211.

ACCY 6601. Business Law: Contracts, Torts, and Property. 3 Credits.

Essential legal principles of contracts, torts, and property, including trusts and estates, leases, professional liability, and the Uniform Commercial Code.

ACCY 6602. Business Law: Enterprise Organization. 3 Credits.

The legal aspects of organizing, financing, and operating an enterprise: agency, partnerships, corporations, securities regulation, insurance, suretyship, secured credit financing, and commercial paper.

ACCY 6701. Government and Nonprofit Accounting and Auditing. 3 Credits.

The budgeting, accounting, financial reporting, and auditing required of federal, state, and local governments, nonprofit organizations, and colleges and universities. The financial practices and requirements applicable to organizations receiving governmental financial assistance and those subject to governmental audits. Prerequisite: ACCY 6101/MBAD 6211.

ACCY 6801. Corporate Governance and Ethics. 3 Credits.

The theory, practice, and public policy environment of corporate governance. Purpose, functioning, and responsibilities of boards of directors. Power, control, and compensation of corporate management. Shareholders and stakeholders. Corporate governance in comparative national settings. Same as SMPP 6215.

ACCY 6900. Special Topics. 1-3 Credits.

Experimental offering; new course topics and teaching methods.

ACCY 6998. Directed Readings and Research. 1-3 Credits.**ACCY 8001. Doctoral Seminar. 1-12 Credits.**

Reasoning and research in technical areas of accounting; theoretical issues and their application to practice; conceptual themes in professional literature; comparative accounting research analyses.

ACCY 8002. Doctoral Seminar. 0-3 Credits.**ACCY 8009. Dissertation Research. 1-12 Credits.**

Limited to doctoral candidates. May be repeated for credit.

ACCY 8999. Advanced Reading and Research. 1-12 Credits.

Limited to doctoral candidates preparing for the general examination. May be repeated for credit.

AFRICANA STUDIES (AFST)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

AFST 1001. Introduction to Africana Studies. 3 Credits.

An interdisciplinary introduction to the study of people of Africa and the African diaspora in historical context. Links in the cultural, political, and intellectual experiences of people of African descent in the Americas, Caribbean, Europe, and Africa.

AFST 3001. Research in Africana Studies. 3 Credits.

AMERICAN STUDIES (AMST)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

AMST 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the schedule of classes for more details. Restricted to CCAS freshmen only.

AMST 1050. Explorations in American Culture. 0-3 Credits.

Exploration of different aspects of American culture depending on the topic. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AMST 1070. The American Cinema. 3 Credits.

History and criticism of American films. The course enables the student to recognize and evaluate cinema techniques, to express the evaluation clearly in writing, and to understand the role of films in the context of American culture. Laboratory fee. Same as AH 1070.

AMST 1100. Politics and Film. 0-3 Credits.

How American films interpret and challenge political power in America.

AMST 1160. Race, Gender and Law. 0-3 Credits.

Significant civil rights cases, critical race theory, feminist theory, and current public policy debates on domestic violence, mass imprisonment, sexual assault, and racial profiling.

AMST 1200. The Sixties in America. 3 Credits.

A survey of American society, culture, and politics during the decade of the 1960s. Topics include the civil rights movement, the student movement, the Vietnam War, and the counterculture.

AMST 2000. Sophomore Colloquium. 3 Credits.

The Sophomore Colloquia are small seminar-style courses limited to second-year students in Columbian College. These courses engage students deeply in a discipline, focus on a narrow issue of high interest and impact, and require independent research projects of the students. Topics vary by semester. Consult the Schedule of Classes for more details. Restricted to Permission of the instructor.

AMST 2010. Early American Cultural History. 3 Credits.

How culture was important in the creation of the United States—in its origins as a colonial outpost and its expansion across the continent; in its hierarchies and expressions of power, especially as organized by race, class, ethnicity, or gender; in the creation of democracy and the valuing of free expression; and in the development of cities and the varied uses of the countryside. Same as HIST 2010.

AMST 2011. Modern American Cultural History. 3 Credits.

The effects of culture in the shaping of the United States since 1876. The role of the mass media; effects of cultural conceptions on the physical landscape; changing ideas of race, ethnicity, gender, and sexuality; and the political meanings of cultural conflict. Transnational influences on U.S. culture and effects of U.S. culture abroad. Same as HIST 2011.

AMST 2020. Washington, D.C.: History, Culture, and Politics. 0-3 Credits.

Introduction to interdisciplinary methods of studying the contemporary city. Major problems of metropolitan life, past and present, analyzed by faculty and community leaders. Emphasis on experiential team projects. Same as HIST 2020.

AMST 2020W. Washington, D.C.: History, Culture, and Politics. 0-3 Credits.

Introduction to interdisciplinary methods of studying the contemporary city. Major problems of metropolitan life, past and present, analyzed by faculty and community leaders. Emphasis on experiential team projects. Same as HIST 2020.

AMST 2071. Introduction to the Arts in America. 3 Credits.

A survey of American art from the period of colonial exploration and settlement to the postmodern present. Political and social meanings of painting, sculpture, architecture, prints, and photographs. The relationship of art to religion and nationalism; issues of class, race, and gender. Same as AH 2071.

AMST 2120W. Freedom in American Thought and Popular Culture. 0-3 Credits.

America was founded on the premise of providing freedom to its people. But what, exactly, is freedom? The question has been debated in America since its founding and continues today; this course examines varied answers provided by American political thought and popular culture. Same as PSC 2120.

AMST 2125. Varieties of Feminist Theory. 3 Credits.

Classical and contemporary texts on feminist explanations of women's status. Relationships within the sex/gender system and arrangements based on class and race. Evaluation, through the lens of feminist theory, of several academic disciplines in the sciences, social sciences, and humanities. Same as WSTU 2125. Prerequisite: WSTU 1020 or WSTU 2120 or permission of instructor.

AMST 2144. Explorations in Historical Geography. 3 Credits.

Examination of selected themes in the cultural geography of the United States over the course of its history, in relation to an overview of the historical geography of the country. Same as GEOG 2144.

AMST 2210. The African American Experience. 3 Credits.

This course will provide a survey of the historical, political, and cultural dimensions of the African American experience in the U.S. The course will be organized chronologically and thematically and will cover topics such as American slavery, medical experimentation, Hurricane Katrina, aesthetics, hip-hop, and Afro-futurism.

AMST 2320. U.S. Media and Cultural History. 3 Credits.

History and analysis of 20th-century U.S. media and culture, including the rise of consumer culture, film, and television. Racial, gendered, and national identities in the context of modernism, mass culture, and globalization. Same as HIST 2320.

AMST 2350. U.S. Religion and Politics. 3 Credits.

How religion and politics have influenced each other in the United States and how Americans have understood those influences. Religious violence; conflicts between faith and science; religious factors in racial and gender politics; and the separation of church and state. Same as HIST 2350.

AMST 2380. Sexuality in US History. 3 Credits.

Examination of the changing social organization and meaning of sexual practices and desires in American culture, with particular attention to the relationship between sexuality and gendered racial and class identities and politics. Same as HIST 2380/ WSTU 2380.

AMST 2410. 20th-Century U.S. Immigration. 3 Credits.

Survey of immigration policy and immigrants' lives. How immigrants have changed the United States and how the United States has changed immigrants. Same as HIST 2410.

AMST 2440. The American City. 3 Credits.

An interdisciplinary introduction to the ethnic, cultural, political, and architectural landscape of the American city. Urban theory, race and ethnicity, urban history, planning and architecture, city politics, and cultural representations of the city. Same as HIST 2440.

AMST 2490. Themes in U.S. Cultural History. 3 Credits.

Topical examination of the ideas, values, and modes of expression that have made American life distinctive, as revealed through a cross-cultural or global perspective. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Same as HIST 2490.

AMST 2490W. Themes in U.S. Cultural History. 3 Credits.

Topical examination of the ideas, values, and modes of expression that have made American life distinctive, as revealed through a cross-cultural or global perspective. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs. (Same as HIST 2490W).

AMST 2495. Special Topics in African American History. 3 Credits.

Concentration on specific issues central to the African American experience. Consult the Schedule of Classes for issues to be addressed.

AMST 2520. American Architecture I. 3 Credits.

Stylistic properties, form and type characteristics, technological developments, and urbanistic patterns are introduced as a means of interpretation of historic meaning. Buildings are analyzed both as artifacts and as signifiers of social, cultural, and economic tendencies. 1600-1860. Same as AH 2154.

AMST 2521. American Architecture II. 3 Credits.

Continuation of AMST 2520. Stylistic properties, form and type characteristics, technological developments, and urbanistic patterns are introduced as a means of interpretation of historic meaning. Buildings are analyzed both as artifacts and as signifiers of social, cultural, and economic tendencies. 1860-present. Same as AH 2155.

AMST 2533. Material Culture in America. 3 Credits.

Review and analysis of the cultural messages embedded in our material surroundings. Consideration of a range of humanly created artifacts, ranging from specific objects to vast landscapes. Same as ANTH 2533.

AMST 2710. The United States in Global Context, 1898-Present. 0-3 Credits.

How the 20th- and 21st-century U.S. has been engaged globally, both politically and culturally, with attention to global culture, transnational ideas and social movements, foreign policy, and economic transformations. Same as HIST 2710.

AMST 2730. World War II in History and Memory. 0-3 Credits.

Examination of Americans' histories and memories of World War II. Same as HIST 2730.

AMST 2730W. World War II in History and Memory. 0-3 Credits.

Examination of Americans' histories and memories of World War II. Same as HIST 2730.

AMST 2750W. Latinos in the United States. 3 Credits.

Exploration of the term Latino and its impact on discussions of race, identity, and citizenship expectations throughout U.S. history. How geographic, linguistic, aesthetic, political, and economic factors construct Latino identity and influence policymaking and international relations. (Same as ANTH 2750W).

AMST 3151. American Art in the Age of Revolution. 3 Credits.

Same as AH 3151.

AMST 3324. US Urban History. 3 Credits.

History of American urban life and culture from the colonial era to the present, focusing on transitions from pre-industrial to industrial and post-industrial forms. The social and spatial configuration of U.S. cities, and the urban politics of race, class, and gender. Same as HIST 3324.

AMST 3351. U.S. Social History. 3 Credits.

Survey of American society and social change from the Civil War to the present. Gender, sexuality, race, ethnicity, and class perspectives. (Same as HIST 3351).

AMST 3352. Women in the United States to 1865. 3 Credits.

Survey of women's experience in U.S. history, the way gender has organized relations of power, and the impact of race, region, class, and ethnicity on women and on gender roles. (Same as HIST 3352, WSTU 3352).

AMST 3352W. Women in the United States to 1865. 3 Credits.

Survey of women's experience in U.S. history, the way gender has organized relations of power, and the impact of race, region, class, and ethnicity on women and on gender roles. (Same as HIST 3352W, WSTU 3352W).

AMST 3353. Women in the United States II. 3 Credits.

Continuation of AMST 3352. Survey of women's experience in U.S. history, the way gender has organized relations of power, and the impact of race, region, class, and ethnicity on women and on gender roles. Same as HIST 3353/ WSTU 3353.

AMST 3360. African American History to 1865. 3 Credits.

Major themes and concepts emerging from the early history of the African presence in the Americas and black experiences in the new nation of the United States. Focus on the emergence and evolution of the concept of race, the ways race evolved in concert with Atlantic slavery, and how race intersected with gender, economics, religion, and nationality. (Same as HIST 3360).

AMST 3361. African American History II. 3 Credits.

Continuation of AMST 3360. Survey of the African American experience, emphasizing the contributions of black Americans to and their impact upon American history. Same as HIST 3361.

AMST 3362. African American Women's History. 3 Credits.

Addresses the history of African American women's labor, cultural expression, institution-building, activism and strategies to combat oppression from the antebellum period through the late 20th century. Investigates the intersection of race, gender, and class as it has shaped U.S. society, racism, the black freedom movement and African American women's experiences. (Same as HIST 3362, WSTU 3362).

AMST 3362W. Black Women in U.S. History. 3 Credits.

Black women from the Middle Passage to contemporary times. Same as HIST 3362/WSTU 3362.

AMST 3367. The American Jewish Experience. 3 Credits.

The study of the Jewish minority in America from colonial times to the present. Emphasis on the interaction between a powerful majority culture and that of protean minority people. (Same as HIST 3367).

AMST 3810. Planning Cities. 3 Credits.

An examination of historical and contemporary trends and dynamics in urban planning in the United States and abroad. Same as GEOG 3810. Prerequisite: GEOG 1001.

AMST 3811. Historical Archaeology. 3 Credits.

Survey of the basic data and methods of research in the material culture of recent history. Same as ANTH 3811.

AMST 3835. Historical Archaeology Field Program. 3 Credits.

Practical experience with a variety of excavation and laboratory techniques in historical archaeology; specific site and topics announced in the Schedule of Classes. Same as ANTH 3835.

AMST 3900. Critiquing Culture. 3 Credits.

Modes of analysis, including ethnography and other cultural studies methods, applied to examination of the interaction of cultural texts and practices with structures of power. Theories and themes central to American studies; scholarly debate about mass culture, ideology, visuality, discourse, and affect. For departmental majors; minors admitted with permission of instructor.

AMST 3901. Examining America. 3 Credits.

Modes of power and forms of identification within and across U.S. national borders. Social constructions of the nation; forms of diversity and identity, such as race, gender, and sexuality; and the transnational flow of people, ideas, culture, and religion. Restricted to American Studies majors.

AMST 3950. Special Topics. 3 Credits.

May be repeated for credit provided the topic differs. Topics announced in the Schedule of Classes.

AMST 3950W. Special Topics. 3 Credits.

May be repeated for credit provided the topic differs. Topic announced in the Schedule of Classes.

AMST 4400. Independent Study. 1-3 Credits.

Open to a limited number of American studies majors as directed research or as an internship with a Washington museum or historical society. Approval of advisor required.

AMST 4450. Internship. 1-3 Credits.

Open to a limited number of American studies majors pursuing an internship directly related to the study of American culture. Students must make the case for a scholarly project that emerges from the internship and must write a significant final paper. Approval of a supervising faculty member required for registration. P/NP grading only.

AMST 4500. Proseminar in American Studies. 3 Credits.

For American studies majors. Directed research and writing on special topics. Prerequisite: at least two of the required courses for the major (AMST 2010, AMST 2011, AMST 3900, AMST 3901). May be repeated for credit provided the topic differs.

AMST 4500W. Proseminar in American Studies. 3 Credits.

For American studies majors. Directed research and writing on special topics. Prerequisite: at least two of the required courses for the major (AMST 2010, AMST 2011, AMST 3900, AMST 3901). May be repeated for credit provided the topic differs.

AMST 4701W. Epidemics in American History. 3 Credits.

The history of epidemics in the United States from the late nineteenth to the early twentieth century. The development of medical and public health responses to epidemics, and their social, political, cultural, and economic impacts. Sources include primary documents, historical accounts, memoirs, fiction, and films.

AMST 4702W. Race, Medicine, and Public Health. 3 Credits.

The experiences of African Americans as patients and health care providers; the history of the relationship between race, American medicine, and public health. Emphasis on the importance of understanding the historical roots of contemporary policy dilemmas such as racial and ethnic disparities in health and health care.

AMST 6100. Scope and Methods in American Studies. 3 Credits.

Consideration of American studies as an area for research and teaching; introduction to bibliography. Required of candidates for the degree of Master of Arts in the field of American studies.

AMST 6110. Cultural Theory and American Studies. 3 Credits.

Major issues in critical and cultural theory as they relate to American culture. Various interpretive approaches including discourse analysis, cultural studies, new historicism, anthropological theory, etc. Prerequisite: AMST 6100 or permission of instructor.

AMST 6120. Theories and Practices in the Study of Media. 3 Credits.

Examination of theories and methods in the study of media and popular culture; case studies explore specific issues related to cultural products such as film, television, music, and the Internet.

AMST 6190. Topics in American Studies. 1-4 Credits.

Topics vary by semester. May be repeated for credit provided the topic differs. Consult the Schedule of Classes for more details.

AMST 6195. Research Seminar in American Studies. 3 Credits.

May be repeated for credit provided the topic differs.

AMST 6210. The United States in a Global Context. 3 Credits.

Analysis of the cultural constructions of the nation and international power, comparing the context of the 18th and 19th century, European colonialism, and U.S. expansion in the 20th century. The role of literature and mass media in furthering the logic of globalization. Readings are both theoretical and historical.

AMST 6220. Theory and Emotions. 3 Credits.

Interdisciplinary exploration of politics of emotion, with an emphasis on the emotions that attach to race, gender, and sexuality.

AMST 6240. Borders and Boundaries. 3 Credits.

Exploration of borders (the literal edge or limit of a territory) and boundaries (intra-societal differences). Readings from cultural anthropology, political science, and social history examine classic tensions between state formation and nation building. The U.S.-Mexico border and other border zones across the globe are used to assess and challenge what is local and particular about border space.

AMST 6410. Readings in American Cultural History. 3 Credits.

Studies in the cultural history of the United States.

AMST 6420. Religion & American Culture. 3 Credits.

Interdisciplinary analysis of religious beliefs, practices, and representations in the United States, as well as intersections of the religious and the secular. Relationships of religion to race, gender, capitalism, science, mass media, and material culture. Same as HIST 6420.

AMST 6430. Gender, Sexuality, and American Culture I. 3 Credits.

The changing social organization, cultural representation, and meaning of gender and sexuality in the United States, with emphasis on their relationship to race, class, region, nationality, empire, and globalization. Pre-colonial to 1877. (Same as HIST 6430, WSTU 6430).

AMST 6431. Gender, Sexuality, and American Culture II. 3 Credits.

Continuation of AMST 6430. The changing social organization, cultural representation, and meaning of gender and sexuality in the United States, with emphasis on their relationship to race, class, region, nationality, empire, and globalization. 1877 to present. Same as HIST 6431/ WSTU 6431.

AMST 6435. Readings on Women in American History. 3 Credits.

Important works in American women's history; evolution of the field in historiographical context. Same as HIST 6435/ WSTU 6435.

AMST 6450. Race in America. 3 Credits.

Interdisciplinary analysis of the history of race and its changing political, social, and cultural meanings in the United States. Transnational racial formations, struggles for and against civil rights, multiracialism, and interracialism. Same as HIST 6450.

AMST 6455. American Social Movements. 3 Credits.

The history of social movements in the United States, with emphasis on civil rights, feminism, conservatism, and labor in local, national, and transnational contexts; the historical rise and fall of these movements and their larger impact on American life. Same as HIST 6455.

AMST 6460. Popular Music Studies. 3 Credits.

Readings in popular music studies; varying methodologies for American studies work on sound and popular music; cultural histories of popular music; American music transnationally. Restricted to Registration restricted to graduate students.

AMST 6470. Cityscapes. 3 Credits.

Interdisciplinary examination of the American city, including urban theory, history, planning, architecture, urban politics, and cultural representations of the city. Same as HIST 6470.

AMST 6475. US Urban History. 3 Credits.

History of American urban life and culture from the Colonial era to the present, focusing on the transitions from pre-industrial to industrial and post-industrial forms, the social and spatial configuration of U.S. cities, and the urban politics of race, class, and gender. Same as HIST 6475.

AMST 6480. Theory and Practice of Public History. 3 Credits.

Theoretical and practical dimensions of public history, as illustrated by recent controversies surrounding public exhibitions and debates on revisionist history as well as more traditional means of presenting the past in public forums. Same as HIST 6480.

AMST 6495. Historic Preservation: Principles and Methods. 3 Credits.

The scope and purpose of the preservation movement in the United States, with focus on developments since the 1960s. Preservation theories, attitudes toward the past and toward design, the intent and impact of legislation, approaches to documentation, the concept of significance, and preservation as an instrument of change. Same as HIST 6495.

AMST 6496. Historic Preservation: Principles and Methods. 3 Credits.

Continuation of AMST 6495. The scope and purpose of the preservation movement in the United States, with focus on developments since the 1960s. Preservation theories, attitudes toward the past and toward design, the intent and impact of legislation, approaches to documentation, the concept of significance, and preservation as an instrument of change. Same as HIST 6496.

AMST 6520. Economics of Preservation. 3 Credits.

Analysis of economic techniques and benefits used to encourage the retention and reuse of historic buildings and districts in the United States. Emphasis on revitalization of older commercial centers and the Mainstreet program. Prerequisite: Permission of instructor.

AMST 6525. The Politics of Historic Preservation. 3 Credits.

Overview of the political issues, forces, events, and players that have shaped contemporary preservation practice, with an emphasis on public policy issues that have not been resolved and continue to confront preservation objectives. Prerequisite: Permission of instructor.

AMST 6530. Field Methods in Architectural Documentation. 3 Credits.

In-depth thematic examination of cultural landscape, focusing on field techniques for recording, analysis, and interpretation of historic properties. Work at field sites is supplemented by lectures, discussion, and readings.

AMST 6550. Seminar in American Architecture. 3 Credits.

Advanced research problems addressing artistic, cultural, social, technical, and urbanistic aspects of American architecture in the 19th and 20th centuries. Topics vary. Prerequisite: AMST 2520 or AMST 2521, or permission of instructor.

AMST 6560. Vernacular Architecture. 3 Credits.**AMST 6709. Interpretation in the Historic House Museum. 3 Credits.**

Seminar integrating advanced practices of museum education with current scholarship in architectural history, material culture, and social history. Extensive use of Washington museum resources. Admission by permission of instructor. Same as EDUC 6709.

AMST 6710. American Material Culture. 3 Credits.

Opportunities for research and publication based on historical objects in the collections of the Smithsonian Institution.

AMST 6720. American Decorative Arts I. 3 Credits.

Recognition and evaluation of domestic artifacts from the 17th, 18th, and 19th centuries.

AMST 6721. American Decorative Arts II. 3 Credits.

Continuation of AMST 6720. Recognition and evaluation of domestic artifacts from the 17th, 18th, and 19th centuries.

AMST 6730. Studies in American Art and History. 3 Credits.

Selected problems and themes in American cultural history involving the use of artistic materials in different media; emphasis on methodology and analytic techniques. May be repeated for credit. Same as AH 6255.

AMST 6835. Historical Archaeology Field Program. 3 Credits.

Practical experience with a variety of excavation and laboratory techniques in historical archaeology; specific site and topics announced in the Schedule of Classes. Same as ANTH 6835.

AMST 6930. Independent Study. 3 Credits.

Limited to master's and doctoral candidates. Written permission of instructor required.

AMST 6998. Thesis Research. 3 Credits.**AMST 6999. Thesis Research. 3 Credits.****AMST 8998. Advanced Reading and Research. 3-9 Credits.**

Limited to students preparing for the Doctor of Philosophy general examination. May be repeated for credit.

AMST 8999. Dissertation Research. 3-12 Credits.

Limited to Doctor of Philosophy candidates. May be repeated for credit.

ANATOMY & REGENERATIVE BIOLOGY (ANAT)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ANAT 2130. Human Embryology. 3 Credits.

Development of the basic organ systems; molecular control of development, congenital birth defects, and assisted reproductive technologies.

ANAT 2150. Human Microscopic Anatomy. 3 Credits.

Normal histological structure of cells, tissues, and organs. Structural-functional correlates; the relationship between histological structure-function and the etiology of disease states.

ANAT 2160. Human Functional Neuroanatomy. 3 Credits.

The central and peripheral nervous systems; diseases and injuries with impact on the normal structural-functional relationship.

ANAT 2181. Human Gross Anatomy. 3 Credits.

Structure and function of the musculoskeletal system; regional organization, structure, and function of the major organ systems; structural organization of the head and neck. Same as BISC 2581.

ANAT 6130. Clinically Oriented Human Embryology. 3 Credits.

The mechanisms of human embryology with clinical correlations of embryological development. Developmental control mechanisms and development of basic organ systems. Molecular control of development. Assisted reproductive technologies. Congenital birth defects. Demonstration labs and online animations for clinical correlates. Restricted to students enrolled in the Graduate Certificate in Anatomical and Translational Sciences program. Recommended background: introductory course in biology or its equivalent. Same as ANAT 2130.

ANAT 6150. Clinically Oriented Human Microscopic Anatomy. 3 Credits.

The normal histological structure of cells, tissues, and organs of the human body with emphasis on clinical relevance. Because there is an inseparable relationship between structure and function, emphasis is placed on structural/functional correlates at both the light and electron microscopic levels. Descriptions of alterations in normal histology through disease or injury provide an understanding of the etiology of various disease states. Integration of histological concepts with clinical correlates. Prerequisites: BISC 1111 and BISC 2202. Restricted to students in either the Graduate Certificate in Anatomical and Translational Sciences (GCATS) or Special Master's in Anatomical and Translational Sciences (M-ATS) program.

ANAT 6160. Clinically Oriented Human Functional Neuroanatomy. 3 Credits.

Structure/function relationships of the human central and peripheral nervous systems and clinical correlations of diseases or injuries whose occurrence or expression has an abnormal impact on the normal structure/function relationship. Integration of neuroanatomy concepts with contemporary clinical neuroscience. Demonstrations of human brain material in the anatomy lab. Prerequisites: Introductory Biology for Science or non-Science Majors. Restricted to students enrolled in the Graduate Certificate in Anatomical and Translational Sciences program.

ANAT 6181. Clinically Oriented Human Gross Anatomy. 3 Credits.

Structural organization of the human body and the relationship of the organization to regional and systems-related functions. Clinical implications and how disease or injury affects normal anatomical structure/function relationships. Clinical cases match the topic of each lecture. Online manual uses content from the department's NetAnatomy website. Demonstrations in the gross anatomy laboratory. Restricted to Graduate Certificate in Anatomical and Translational Sciences. Prerequisites: Introductory Biology for Science or non-Science Majors.

ANAT 6182. Fundamentals of Regenerative Biology and Systems Physiology. 4 Credits.

This course is similar to BMSC 8212 but with additional time to introduce techniques of confocal laser scanning microscopy and laser-based quantitative and functional cell analyses.

Topics include genetic control mechanisms, cell signaling pathways, and tissue regeneration and repair. Introduction of concepts on the functions and regulation of organ systems complement the learning objectives of human gross anatomy and microscopic anatomy. Restricted to Graduate Certificate in Anatomical and Translational Sciences. Prerequisites: Introductory Biology for Science or non-Science Majors.

ANAT 6203. Human Developmental Anatomy. 1 Credit.

ANAT 6204. Neuroanatomy. 2 Credits.

ANAT 6210. Gross Anatomy. 6 Credits.

Required for medical students.

ANAT 6212. Neurobiology. 3 Credits.

Same as Idis 212.

ANAT 6213. Microscopic Anatomy. 4 Credits.

Required for medical students.

ANAT 6215. Anatomy for Health Sciences Students. 3 Credits.

A gross anatomy course that includes examination of prosected cadavers. Sessions on how to conduct a physical examination of a particular body region are preceded immediately by lectures on the same region.

ANAT 6216. Cellular Anatomy & Histology. 2 Credits.

ANAT 6221. Spec Topics-Stem Cell Biology. 1-3 Credits.

ANAT 6222. Spec Topics-Stem Cell Biology. 1-3 Credits.

ANAT 6223. Special Topics in Regenerative Medicine. 2 Credits.

Students attend seminars given by invited lecturers to present their research findings and breakthroughs on topics of regenerative medicine. Seminars can be sponsored by the Department of Anatomy and Regenerative Biology, the Stem Cell Interest Group Journal and Data Club, the Molecular Medicine Graduate Program (MMED 8214), and the GW Institute for Neuroscience. Restricted to Graduate Certificate in Anatomical and Translational Sciences only. Prerequisites: Introductory Biology for Science or non-Science Majors.

ANAT 6249. Intro to Anatomical Research. 1 Credit.

ANAT 6252. Human Variation. 1 Credit.

ANAT 6253. Developmental Neurobiology. 3 Credits.

ANAT 6260. Developmental Genetics. 2 Credits.

ANAT 6262. Gross Anat-Upper/Lower Extrem. 2 Credits.

ANAT 6264. Gross Anatomy of Head & Neck. 2 Credits.

ANAT 6266. Gross Anatomy-Thorax & Abdomen. 2 Credits.

ANAT 6268. Gr Anat-Pelvis/Perineum/Low Ex. 2 Credits.

ANAT 6275. Advanced Studies in Translational Sciences. 3 Credits.

Student research opportunities in laboratories conducting translational research. Application of fundamental concepts learned in didactic courses. Development of versatility with new technologies. Students spend the equivalent of three full days per week in a research laboratory during the semester. The course director must approve all laboratory assignments prior to initiating research studies in a laboratory. Restricted to students in the Graduate Certificate in Anatomical and Translational Sciences. Prerequisites: Introductory Biology for Science or non-Science Majors.

ANAT 6276. Advanced Studies in Anatomy. 1 Credit.

Detailed study of an anatomic topic.

ANAT 6277. Special Topics in Neurobiology. 1-3 Credits.

ANAT 6279. Applied Regional Anatomy. 1-5 Credits.

Regional dissection, guided readings.

ANAT 6284. Appl Surface Anat & Radiology. 5 Credits.

ANAT 6288. Surface Anatomy and Radiology. 1 Credit.

ANAT 6291. Special Projects in Anatomy. 1-12 Credits.

Independent study on any aspect of gross anatomy.

ANAT 6292. Projects in Anatomical Sciences. 2 Credits.

Various imaging techniques and approaches to visualize normal anatomy toward development and application of skills in teamwork, presentation, and discussion. Literature searches. The course is taken in conjunction with ANAT 6181. Restricted to Graduate Certificate in Anatomical and Translational Sciences. Prerequisites: ANAT 6181. Recommended background: Human clinically-oriented gross anatomy (previously or simultaneously).

ANAT 6295. Research. 1-12 Credits.

ANAT 8120. Graduate Human Gross Anatomy. 4 Credits.

An in-depth introduction to human gross anatomy with cadaveric dissection. The structural organization of the human body, including its regional and systems-related functions. The relationship between normal human anatomical variation in structure and function and how disease and/or injury affect these relationships. Prerequisites: Permission of the instructor. Recommended background: Graduate students with prior coursework in the biological sciences or anthropology.

ANAT 8501. Didactic Anatomy. 3 Credits.

Development of a didactic program to include human developmental anatomy, microscopic anatomy, gross anatomy, and/or neuroanatomy. May also include interdepartmental study.

ANAT 8800. Summer Remedial: Gross Anatomy. 6 Credits.**ANAT 8802. Summer Remedial: Human Dev Anat. 1 Credit.**

ANTHROPOLOGY (ANTH)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ANTH 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the schedule of classes for more details.

ANTH 1001. Biological Anthropology. 0-4 Credits.

Survey of human evolution, genetics and physical variation, and primatology. Regular laboratory exercises. Laboratory fee.

ANTH 1002. Sociocultural Anthropology. 3 Credits.

Survey of the world's cultures, illustrating the principles of cultural behavior.

ANTH 1002W. Sociocultural Anthropology. 3 Credits.

Survey of the world's cultures, illustrating the principles of cultural behavior.

ANTH 1003. Archaeology. 0-3 Credits.

Introduction to archaeological survey and excavation techniques and laboratory methods of dating and analysis. Brief history of archaeology and survey of world prehistory. Films and laboratory exercises. (Fall and spring).

ANTH 1004. Language in Culture and Society. 3 Credits.

Comparison and analysis of how cultures use language to communicate. The relationship of language to issues of human nature, gender, race, class, artistic expression, and power. Laboratory fee.

ANTH 1005. The Biological Bases of Human Behavior. 4 Credits.

Human behavior from an evolutionary perspective, including issues such as communication, intelligence, reproductive behavior, parental behavior, aggression, and cooperation, and drawing on an understanding of the behavior and biology of the nonhuman primates. Laboratory fee.

ANTH 2008. Foundations of Anthropological Thought. 3 Credits.

The development of anthropological thought in historical context. Exploration of selected basic concepts and theories of contemporary anthropology. To be taken in the junior or senior year. Prerequisite: ANTH 1002.

ANTH 2008W. Foundations of Anthropology. 3 Credits.

The development of anthropological thought in historical context. Exploration of selected basic concepts and theories of contemporary anthropology. To be taken in the junior or senior year. Prerequisites: ANTH 1002 or ANTH 1002W.

ANTH 2406. Human Evolutionary Genetics. 3 Credits.

Introduction to the patterns and processes of human genetic variation. Topics include human origins and migration; molecular adaptations to environment, lifestyle, and disease; ancient and forensic DNA analyses; and genealogical reconstructions.

ANTH 2501. The Anthropology of Gender: Cross-Cultural Perspectives. 3 Credits.

Anthropological representations of gender relations in "other" cultures have provided important case material for feminist theorizing of sex differences and gender roles and statuses. How a cross-cultural approach can inform our understanding of gender. Same as WSTU 2121.

ANTH 2502. Anthropology of Science and Technology: 21st-Century Brave New Worlds. 3 Credits.

The relationship between science and society, with consideration of how scientific knowledge and emergent technologies affect our lives, identities, social relations, and material conditions. The sociopolitical context in which scientific knowledge is produced and the ethnographic study of biotechnology, especially genetics and its various applications.

ANTH 2505. Introduction to Ethnomusicology. 3 Credits.

Models of understanding music as a cultural endeavor. Application and critique of models in the design and execution of student independent field research. Same as MUS 2105. Prerequisite: MUS 1101 or ANTH 1002 or ANTH 1004 or permission of instructor.

ANTH 2506. Religion, Myth, and Magic. 3 Credits.

Theories of religion developed by anthropologists; survey of world religions with emphasis on non-Western societies; religious process and change. (Same as REL 3506).

ANTH 2533. Material Culture in America. 3 Credits.

Review and analysis of the cultural messages embedded in our material surroundings. Consideration of a range of humanly created artifacts, ranging from specific objects to vast landscapes. Same as AMST 2533.

ANTH 2750. Latinos in the United States. 3 Credits.

Exploration of the term Latino and its impact on discussions of race, identity, and citizenship expectations throughout U.S. history. How geographic, linguistic, aesthetic, political, and economic factors construct Latino identity and influence policymaking and international relations.

ANTH 2750W. Latinos in the United States. 0-3 Credits.

Exploration of the term Latino and its impact on discussions of race, identity, and citizenship expectations throughout U.S. history. How geographic, linguistic, aesthetic, political, and economic factors construct Latino identity and influence policymaking and international relations. Same as AMST 2750.

ANTH 3401. Human Functional Anatomy. 3 Credits.

The anatomy of the human body, how it works, and how it differs from other animals, especially other primates. Principles and approaches of functional morphology and biomechanics and how function can be reconstructed from fossils, with special focus on the musculoskeletal system. No prior knowledge of anatomy is required. Laboratory fee. Prerequisite: ANTH 1001.

ANTH 3402. Human Evolutionary Anatomy. 3 Credits.

The structure and function of human anatomy, as compared to our closest relatives, the great apes. Using this comparative approach, the course investigates the fossil record of human evolution, with an emphasis on reconstructing relationships, function, behavior, and adaptation in fossil hominins. Prerequisite: ANTH 1001.

ANTH 3403. Forensic Anthropology Laboratory. 2 Credits.

Identification of human skeletal remains by body part, age, sex, race, and individual disease or trauma history; study of skeletal variation in modern and recent populations. Taught at the Smithsonian. Corequisite: Anth 3404.

ANTH 3404. Human Variation. 1 Credit.

An overview of human variation, with special emphasis on the skeleton. Includes history of physical anthropology, individual and population variations, archaeological recovery of human remains, paleodemography, growth, paleopathology, and forensic anthropology. Prerequisite: Anth 1001; corequisite for undergraduates: ANTH 3403.

ANTH 3405. Human Growth and Development. 3 Credits.

Modern human growth and development considered through an evolutionary perspective. The growth stages and life cycles of modern humans, emphasizing physiological and environmental influences and comparisons with extant non-human primates and fossil hominids. Prerequisite: ANTH 1001. Laboratory fee.

ANTH 3406. Advanced Human Osteology. 3 Credits.

Advanced techniques in determination of age, sex, ancestry, and pathological conditions using the skeleton. Taught at the Smithsonian. Prerequisite: ANTH 3403, ANTH 3404.

ANTH 3407. Conservation in a Changing World: Human and Animal Behavior. 3 Credits.

How humans and animals interact in a wide variety of settings, how human and animal welfare can be ensured, and how we can create a scientifically sound, yet socially and economically acceptable, conservation of the planet's biodiversity. Prerequisites: ANTH 1001.

ANTH 3408. The Evolution of Human Families. 3 Credits.

Human parental behavior considered from an evolutionary perspective, including parental care among mammals, concepts of parental investment, and parent-offspring conflict. Focus on parenting in the human lineage from early hominins to hunter-gatherers to the modern context. Prerequisites: ANTH 1001.

ANTH 3411. Primatology. 3 Credits.

Physical and behavioral characteristics of the various primate groups and their relationship to human physical and cultural evolution. Prerequisite: ANTH 1001.

ANTH 3412. Hominin Evolution. 3 Credits.

The fossil record of human evolution, including its context. Review of the fossil evidence that concentrates on the distinctive features of each taxon. Pleistocene remains. Laboratory fee. Prerequisite: ANTH 1001.

ANTH 3412W. Hominin Evolution. 3 Credits.

The fossil record of human evolution, including its context. Review of the fossil evidence that concentrates on the distinctive features of each taxon. Pleistocene remains. Laboratory fee. Prerequisite: ANTH 1001.

ANTH 3413. Evolution of the Human Brain. 3 Credits.

Examination of how the human brain is unique in comparison to other animals, with an emphasis on understanding our species' distinctive neurobiology in terms of the evolution of cognitive abilities such as language, social comprehension, tool making, and abstract thinking.

ANTH 3491. Topics in Biological Anthropology. 3 Credits.

Topic announced in the Schedule of Classes. Instructors will be drawn from GW faculty and Smithsonian Institution staff. May be repeated for credit if topic varies. Prerequisite: ANTH 1001.

ANTH 3501. Anthropology of Development. 3 Credits.

The impact of the world economy on nonindustrial societies. Analysis of the role of anthropology in international development programs aimed at alleviating problems in the Third World. Prerequisites: ANTH 1002 or ANTH 1002W.

ANTH 3502. Cultural Ecology. 3 Credits.

Basic principles of cultural ecology. Human interaction with the ecosystem both past and present; emphasis on the application of anthropological precepts to current environmental problems. Prerequisites: ANTH 1002 or ANTH 1002W or ANTH 1004 or ANTH 1004W or permission of instructor.

ANTH 3503. Psychological Anthropology. 3 Credits.

The cross-cultural study of the relationship between culture and personality. Topics include emotion, conceptions of the self, mental health and illness, sexuality, marriage and parenting, and cognition. Psychobiological, cultural, ecological, and psychoanalytical theories are examined. Prerequisite: ANTH 1002 or permission of instructor.

ANTH 3504. Illness, Healing, and Culture. 3 Credits.

Introduction to medical anthropology. What the record of human evolution and prehistory tells about human health; the epidemiology of health and illness; how different cultures define disease; understanding illness and healing systems cross-culturally; and the role of medical anthropology in health care and international development. Prerequisite: ANTH 1002 or permission of instructor.

ANTH 3506. Politics, Ethnicity, and Nationalism. 3 Credits.

Comparative analysis of political systems; political processes, such as factionalism, styles of leadership, political ritual. Prerequisite: ANTH 1002 or permission of instructor.

ANTH 3507. Kinship, Family, and Community. 3 Credits.

Cross-cultural analysis of how people form, maintain, and transform social groups and boundaries. Focus on how communities such as family, ethnic group, and nation are defined in moral terms. Prerequisite: ANTH 1002 or permission of instructor.

ANTH 3508. Art and Culture. 3 Credits.

The role of art in culture, with emphasis on small-scale societies; influences upon the artist, and beliefs and practices associated with art production. Prerequisite: ANTH 1002 or permission of instructor.

ANTH 3513. Anthropology of Human Rights. 3 Credits.

Issues of basic human rights and their violation by different cultures, states, and organizations. Genocide, ecocide, abuses on the basis of ethnicity, religion, or similar factors, and the treatment of those seeking asylum. Rights of informants and groups studied in anthropological research. Prerequisites: ANTH 1002 or ANTH 1002W.

ANTH 3513W. Anthropology of Human Rights. 3 Credits.

Issues of basic human rights and their violation by different cultures, states, and organizations. Genocide, ecocide, abuses on the basis of ethnicity, religion, or similar factors, and the treatment of those seeking asylum. Rights of informants and groups studied in anthropological research. Prerequisites: ANTH 1002 or ANTH 1002W.

ANTH 3521. Ethnographic Film. 3 Credits.

Still and motion-picture photography as an integral aspect of anthropological research. A study of recent and historic ethnographic films and an introduction to the forms and methods of making visual ethnographic records. Material fee. Prerequisites: ANTH 1002 or ANTH 1002W or permission of instructor.

ANTH 3531. Methods in Sociocultural Anthropology. 3 Credits.

Approaches to field research. Conceptual bases and biases in the delineation of problems and in the selection, analysis, and organization of data. Students design and carry out their own field projects in the Washington area. Prerequisite: ANTH 1002.

ANTH 3601. Language, Culture, and Cognition. 3 Credits.

The role of language and culture in the organization of human experience. Beginning with debates about linguistic relativity, the course explores the way language use shapes cognition and practice in a variety of cultures and social contexts. Same as LING 3601. Prerequisite: ANTH 1004. Laboratory fee.

ANTH 3602. Ethnographic Analysis of Speech. 3 Credits.

Linguistic variation and change in discourse practices; social and political correlates of linguistic interaction; recording, transcription, and analysis of verbal interaction. Prerequisites: ANTH 1004. (Same as LING 3602).

ANTH 3602W. Ethnographic Analysis of Speech. 3 Credits.

Linguistic variation and change in discourse practices; social and political correlates of linguistic interaction; recording, transcription, and analysis of verbal interaction.

ANTH 3603. Psycholinguistics. 3 Credits.

Language as species-specific property of the human mind. Psychological processes involved in the encoding and decoding of language; first and second language acquisition and bilingualism. Same as LING 3603.

ANTH 3691. Special Topics in Linguistic Anthropology. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Same as LING 3691. Prerequisite: ANTH 1004 or permission of instructor.

ANTH 3701. Native Peoples - North America. 3 Credits.

Comparative study of Indian groups representative of the different culture areas of the United States and Canada. Contemporary issues involving indigenous groups, the wider society, and the state. Prerequisite: ANTH 1002 or permission of instructor.

ANTH 3702. Anthropology of Latin America. 3 Credits.

Culture history and ways of life in a selected region of Central or South America. Regional focus to be announced in the Schedule of Classes. Prerequisites: Anth 1002 or Anth 1002W or ANTH 1004.

ANTH 3703. Cultures of the Pacific. 3 Credits.

Culture history and ways of life among native peoples of Melanesia, Micronesia, and Polynesia. Prerequisites: ANTH 1002 or 1002W or 1004 or 1004W.

ANTH 3704. Cultures of Southeast Asia. 3 Credits.

Introduction to the history, art, ecology, and politics of Southeast Asia. Comparison and interpretation of recent ethnographic case studies, archaeological evidence, and current political events in order to understand the diversity of Southeast Asian traditions. Prerequisite: ANTH 1002 or ANTH 1002W or ANTH 1004.

ANTH 3705. Anthropology of East Asia. 3 Credits.

Intensive study of the culture and history of selected peoples of East or Central Asia. Specific area to be announced in the Schedule of Classes. May be repeated for credit. Prerequisites: ANTH 1002 or ANTH 1002W or ANTH 1004 or ANTH 1004W.

ANTH 3707. Anthropology of the Middle East. 3 Credits.

Geographic environment, language, religion, and social structure of settled and nomadic peoples of the Middle East; emphasis on the Arab world. Prerequisites: ANTH 1002 or ANTH 1002W or ANTH 1004 or ANTH 1004W.

ANTH 3708. Anthropology of Africa. 3 Credits.

Comparative examination of the history, cultural development, and contemporary problems of sub-Saharan African cultures. New World African cultures are also considered. Prerequisites: ANTH 1002 or 1002W or 1004 or 1004W.

ANTH 3709. Japanese Culture Through Film. 3 Credits.

Survey of the Japanese cultural heritage presented through films. Topics include literature, philosophy, art, religion, and social history from premodern times to the modern era. Lectures and discussion in English. Same as JAPN 3162.

ANTH 3791. Topics in Regional Anthropology. 3-4 Credits.

Culture, history, and ways of life in a selected region of the world. Topics vary. Consult the Schedule of Classes for more details. Prerequisites: ANTH 1002 or ANTH 1002W or ANTH 1004.

ANTH 3801. African Roots from Australopithecus to Zimbabwe. 3 Credits.

The development and contributions of Africa from human beginnings through medieval states. Topics include human evolution, origins of art, technology, trade, and animal/plant domestication, rise of African states, early relations with Europe and Asia, antecedents of contemporary African diversity. Prerequisite: ANTH 1003 or permission of instructor.

ANTH 3801W. African Roots from Australopithecus to Zimbabwe. 3 Credits.

The development and contributions of Africa from human beginnings through medieval states. Topics include human evolution, origins of art, technology, trade, animal/plant domestication, rise of African states, early relations with Europe and Asia, antecedents of contemporary African diversity. Prerequisites: ANTH 1003.

ANTH 3802. Human Cultural Beginnings. 3 Credits.

Survey of prehistory in Europe, Africa, and Asia from the earliest hominid cultures to the beginnings of agriculture. Prerequisite: ANTH 1003.

ANTH 3802W. Human Cultural Beginnings. 3 Credits.

Survey of prehistory in Europe, Africa, and Asia from the earliest hominid cultures to the beginnings of agriculture. Prerequisite: ANTH 1003.

ANTH 3803. Old World Prehistory: First Farmers to First Cities. 3 Credits.

Archaeology of the Near East, Egypt, Europe, and other areas, from the beginnings of agriculture to the rise of Babylon. Prerequisites: ANTH 1003.

ANTH 3803W. Old World Prehistory: First Farmers to First Cities. 3 Credits.

Archaeology of the Near East, Egypt, Europe, and other areas, from the beginnings of agriculture to the rise of Babylon. Prerequisites: ANTH 1003.

ANTH 3804. Origins of the State and Urban Society. 3 Credits.

Emergence of urbanism and the state in the prehistory of various world regions. Regions covered might include India, China, Mexico, and the Pacific, among others. Prerequisites: ANTH 1003.

ANTH 3805. Archaeology of Israel and Neighboring Lands. 3 Credits.

The archaeology of Israel and adjacent areas (Syria, Jordan, Lebanon). Examination of many major sites and monuments. Significant problems and current debates. Same as AH 3106.

ANTH 3806. Art and Archaeology of the Aegean Bronze Age. 3 Credits.

Excavational and multidisciplinary aspects of classical archaeology. Minoan and Mycenaean civilizations (1700-1200 B.C.) Same as AH 3104.

ANTH 3808. Archaeology and the Celts. 3 Credits.

Historical and archaeological study of the Celtic people.

ANTH 3811. Historical Archaeology. 3 Credits.

Survey of the basic data and methods of research in the material culture of recent history. Same as AmSt 3811.

ANTH 3812. The Aztec Empire. 3 Credits.

The Aztecs (or Mexica) of Mexico created a large empire, and while frequently the focus is on warfare and human sacrifice, they produced some of the most naturalistic art and reflective poetry that have survived the Spanish Conquest. Using archaeology, art, and ethnohistoric documents, this course focuses the importance of power in Aztec society and how the normalization of violence created a form of social cohesion central to the state. Prerequisites: ANTH 1003. (Same as AH 3116).

ANTH 3813. Archaeology of North America. 3 Credits.

History of American archaeology; survey of North American culture history from human entry into the Americas during the Pleistocene period until the time of the first European contacts. Focus on peoples north of Mexico. Prerequisite: ANTH 1003.

ANTH 3814. Ancient Mexican Civilizations. 3 Credits.

Cultural history of pre-Columbian societies in Middle America; the emergence of Mesoamerican civilization from the earliest hunter-gatherers and first farmers to the Aztec Empire. Prerequisites: ANTH 1003. Same as AH 3107.

ANTH 3821. Myths and Mysteries in Archaeology. 3 Credits.

Topics ranging from King Arthur to Atlantis are used to illustrate how archaeological methods and techniques can falsify-or support-exotic beliefs about the past.

ANTH 3822. Archaeology in Film and Television. 3 Credits.

As visual media increase public awareness of archaeology, misrepresentations and distortions abound. This course examines the relationships among archaeology, the media, and popular culture. Issues considered include nationalism, descendant communities, gender, race, and colonialism.

ANTH 3823. Archaeology of Ritual and Religion. 3 Credits.

Archaeological and ethnographic examples from around the world are used to critically evaluate how archaeologists make inferences about ritual practices and the religious lives of past peoples. Issues include the origins of symbolic behavior, sacred landscapes, shamanism, ancestor veneration, and sorcery/witchcraft.

ANTH 3832. Paleoanthropological Field Program. 0-4 Credits.

Field research in paleoanthropology, including excavation methods, identification and analysis of materials, paleoecology, archaeology, and human anatomy. Conducted at selected sites in Eurasia, Africa, or Australia. Visits to comparative sites and collections in the region.

ANTH 3833. Field Research: New World. 1-6 Credits.

Survey, excavation, and/or laboratory analysis at localities in North or South America. See Schedule of Classes for details.

ANTH 3834. Field Research: Old World. 1-6 Credits.

Survey, excavation, and/or laboratory analysis at Neolithic or later localities in Eurasia, Africa, or Oceania. See Schedule of Classes for details.

ANTH 3835. Historical Archaeology Field Program. 3 Credits.

Practical experience with a variety of excavation and laboratory techniques in historical archaeology; specific site and topics announced in the Schedule of Classes. Same as AMST 3835.

ANTH 3838. Theory and Practice in Archaeology. 3 Credits.

The primary literature in archaeology theory since the 1960s. Ethics, topical issues, and archaeological practice. Prerequisite: Anth 1003.

ANTH 3838W. Theory and Practice in Archaeology. 3 Credits.

The primary literature in archaeology theory since the 1960s. Ethics, topical issues, and archaeological practice. Prerequisite: ANTH 1003.

ANTH 3839. Lab Research Methods in Archaeology. 3 Credits.

Research methods and techniques used by archaeologists. Emphasis on hands-on experience in one or more techniques. Prerequisite: Anth 1003.

ANTH 3891. Special Topics in Archaeology. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Prerequisite: ANTH 1003 or permission of instructor.

ANTH 3991. Special Topics. 0-3 Credits.

Topics announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

ANTH 3991W. Special Topics. 3 Credits.

Topics announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

ANTH 3995. Undergraduate Research. 1-12 Credits.

Individual research problems to be arranged with a member of the faculty. May be repeated for credit. Prerequisite: permission of instructor.

ANTH 4008. Seminar: Contemporary Anthropological Theory. 3 Credits.

The development of major trends in anthropological theory. How anthropologists from the four fields—sociocultural, linguistic, biological, and archaeology—have deployed and developed the ideas of theorists in their own empirical research and theorizing about specific processes. Prerequisite: ANTH 2008.

ANTH 6101. Proseminar in Biological Anthropology. 3 Credits.

Comprehensive overview of theory and practice in biological anthropology.

ANTH 6102. Proseminar in Sociocultural Anthropology. 3 Credits.

Comprehensive overview of theory and practice in sociocultural anthropology.

ANTH 6103. Proseminar in Archaeology. 3 Credits.

Survey of the most recent archaeological techniques and theoretical approaches to reconstructing and interpreting the cultures of the past.

ANTH 6104. Proseminar in Linguistic Anthropology. 3 Credits.

Contemporary anthropological studies of language in biological, social, and historical perspectives.

ANTH 6200. Museum Anthropology. 3 Credits.

How anthropological collections take shape in the past and carry meaning in the present. Critical examination of artifacts and forms of documentation. Application of material culture theory to museum records, collected objects, the changing meaning given to objects, and the context of collecting.

ANTH 6201. Methods in Museum Anthropology. 3 Credits.

How anthropological collections take shape in the past and carry meaning in the present. Research and analysis of existing collections; issues in museum anthropology.

ANTH 6202. Museums and the Public: Exhibiting Culture. 3 Credits.

Study of the issues and problems involved in “exhibiting culture,” past and present, including issues of representation, message and interpretation, audience, ownership of objects and symbols, and ways of reconstructing the past. Critical examination of museum exhibits.

ANTH 6203. Preventive Conservation Concepts. 3 Credits.

Historical development of preventive conservation in museums, conservation ethics, team approaches to conservation, interactions of various materials with agents of deterioration. Basics of materials testing, preparation of condition reports, choosing museum storage and exhibition materials, and risk assessment. Same as MSTD 6203/ AH 6286.

ANTH 6204. Preventive Conservation Techniques. 3 Credits.

Practical applications of preventive conservation of materials, monitoring environmental conditions, conducting risk assessments, evaluation of exhibit and storage areas; developing plans, policies, and procedures for collections care; grant proposal preparation for collections care initiatives. Same as MSTD 6204/ AH 6287.

ANTH 6205. Problems in Conservation. 3 Credits.

Individual conservation projects to determine composition, construction, decomposition of materials, and possible stabilization techniques. Conservation laboratory experience. Prerequisite or concurrent registration: Anth 6203/AH 6286.

ANTH 6230. Internship in Museum Anthropology. 1-6 Credits.

Supervised individual research and/or field work at the Smithsonian Institution or other area museums, arranged in consultation with the museum and the Anthropology Department. Admission by arrangement with the department chair or museum training advisor. May be repeated for credit up to a maximum of 6 credits.

ANTH 6301. The Anthropology of Development. 3 Credits.

Theoretical perspectives that distinguish the contribution of anthropology to understanding processes of change in the Third World. Focus on health, population, environment, gender, and tourism issues. The role of anthropology in planning and implementing projects and policy.

ANTH 6302. Issues in Development. 3 Credits.

Topic to be announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

ANTH 6330. Internship in Development Anthropology. 3 Credits.

Supervised participation in a selected development agency or other relevant organization. Opportunity to observe agency procedures and gain practical experience. Admission by permission of instructor or department chair.

ANTH 6331. Research Methods in Development Anthropology. 3 Credits.

Anthropologists' roles in research-related activities, such as feasibility studies, social soundness analysis, and evaluations. Innovative research techniques, such as interactive data gathering, team survey methods, and rapid rural appraisal. Admission by permission of instructor.

ANTH 6391. Anthropology and Contemporary Problems. 3 Credits.

Exploration of anthropological perspectives on a current issue, such as refugees, ethnic violence, national mythologies, and women's health in developing countries. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

ANTH 6401. Human Functional Anatomy. 3 Credits.

Growth and function of the musculoskeletal system, including the development, anatomy, and histology of bone, biomechanics of muscle and skeletal tissue, craniofacial and dental growth and morphology, and locomotion. No prior knowledge of anatomy required. Laboratory fee.

ANTH 6404. The Evolution of Primate Life Histories. 3 Credits.

Recent developments in the study of human and non-human life histories. Life history theory. Life history traits compared among primate groups in order to determine how selective pressures have shaped extant primate life history patterns. Laboratory fee.

ANTH 6405. Human Growth and Development. 3 Credits.

Modern human growth and development considered through an evolutionary perspective. The growth stages and life cycles of modern humans, emphasizing physiological and environmental influences and comparisons with extant non-human primates and fossil hominids. Laboratory fee.

ANTH 6406. Human Genetic Variation. 3 Credits.

The genetic variation in human populations as a framework for measurement and analysis of genetic diversity and evolutionary process. Consideration of the possible roles of cultural change leading to adaptive/selective events. Same as FORS 6246.

ANTH 6412. Paleoanthropology. 1-3 Credits.

Survey of current research in hominid and hominoid evolution, focusing on the integrated nature of the field. Contributions from the geological and biological sciences will be stressed, together with innovative geochemical techniques for establishing chronological sequences. Prerequisite: ANTH 3412 or BISC 2450 .

ANTH 6413. Analytical Methods in Human Evolutionary Studies. 3 Credits.

A survey of methods and approaches for data collection and analysis in human evolutionary biology research. Topics include comparative methods and basic and multivariate statistics.

ANTH 6491. Topics in Biological Anthropology. 3 Credits.

Topic announced in the Schedule of Classes. Instructors will be drawn from GW faculty and Smithsonian Institution staff. May be repeated for credit if topic varies.

ANTH 6501. Gender and Sexuality. 3 Credits.

Study of new theoretical and methodological approaches developed in the anthropology of gender. Topics include postcolonialism, sexuality, and literary representations of gender. Same as WSTU 6257.

ANTH 6505. Medical Anthropology. 3 Credits.

Concepts and theories in contemporary medical anthropology, including “critical” versus “conventional” medical anthropology, changes in approaches since the mid-twentieth century; structural and cultural construction of illness and suffering; ethnographic and epidemiological perspectives.

ANTH 6506. Topics in Medical Anthropology. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit if the topic varies.

ANTH 6507. Nationalism and Ethnicity. 3 Credits.

Major theoretical and ethnographic issues in the study of nationalism worldwide. Explores how ethnic groups emerge in colonial and contemporary plural societies and how states attempt to integrate ethnic groups into nations.

ANTH 6508. Ethics and Cultural Property. 3 Credits.

Survey of ethical issues in anthropology, focusing on cultural property and repatriation; the epistemological, ethical, and political dilemmas of excavating, collecting, and owning cultural artifacts.

ANTH 6509. Anthropology of Art, Aesthetics, and Symbolism. 3 Credits.

Anthropological approaches to aesthetic problems and theories of symbolism in the context of ethnographic materials.

ANTH 6531. Methods in Sociocultural Anthropology. 3 Credits.

Epistemology; the definition of research problems; selection of research subjects and sites; techniques of data collection (e.g., surveys, interviews); data management and organization; ethical protocols; issues of safety; grant writing and funding.

ANTH 6561. American Folklife. 3 Credits.

The materials of American folk culture, concentrating on folk architecture, crafts, and art. Major organizing themes are regionalism and the use of objects as indicators of cultural intention. Same as AMST 6561.

ANTH 6562. Folklore Theory. 3 Credits.

An intellectual history of American folklore research; analysis of particular theories and methods. Same as AMST 6562.

ANTH 6591. Topics in Sociocultural Anthropology. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit if the topic varies.

ANTH 6691. Topics in Linguistic Anthropology. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit if the topic varies.

ANTH 6702. Issues in Latin American Anthropology. 3 Credits.

Intensive study of a selected topic in the anthropology of Central and/or South America. Topic to be announced.

ANTH 6707. Issues in Middle East Anthropology. 3 Credits.

Selected topics in the anthropology of the Middle East. Topic to be announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

ANTH 6801. Paleolithic Archaeology. 3 Credits.

Current problems relating to materials from the Old World.

ANTH 6802. Problems in Eurasian and African Archaeology. 3 Credits.

Topic announced in the Schedule of Classes. Topics may include Bronze Age conflict, the Celts, etc. May be repeated for credit.

ANTH 6803. Problems in New World Archaeology. 3 Credits.

Current archaeological problems relating to the origin and development of aboriginal cultures. Specific topic to be announced in the Schedule of Classes. May be repeated for credit.

ANTH 6804. Problems in Mesoamerican Archaeology. 3 Credits.

Topics range from specific civilizations, such as the Olmec, to pan-Mesoamerican topics, such as religion and exchange. May be repeated for credit.

ANTH 6806. Technology. 3 Credits.

Cross-cultural examination of the form, function, meaning, and use of material culture (such as ceramics or stone tools) and the behavior patterns involved in its production. Topic vary by semester. Consult the Schedule of Classes for more details.

ANTH 6807. Public Archaeology. 3 Credits.

The use and creation of the past and the relationship between archaeologists and different publics.

ANTH 6832. Paleoanthropological Field Program. 0-4 Credits.

Intensive course on field research in paleoanthropology, including excavation methods, identification and analysis of materials, paleoecology, archaeology, and human anatomy. Conducted at selected sites in Eurasia, Africa, or Australia. Visits to comparative sites and collections in the region.

ANTH 6835. Historical Archaeology Field Program. 3-6 Credits.

Practical experience with a variety of excavation and laboratory techniques in historical archaeology; specific site and topics announced in the Schedule of Classes. Same as AMST 6835.

ANTH 6838. Archaeological Theory. 3 Credits.

Overview of major theories and positions in American archaeology; examination of new issues and directions in which the field appears to be moving.

ANTH 6839. Lab Research Methods in Archaeology. 3,4 Credits.

Research methods and techniques used by archaeologists. Emphasis on hands-on experience in one or more techniques. Laboratory fee.

ANTH 6891. Topics in Archaeology. 3 Credits.

Major issues related to the theory and practice of archaeology. Topic announced in the Schedule of Classes.

ANTH 6995. Research. 1-12 Credits.

May be repeated for credit.

ANTH 6998. Thesis Research. 3 Credits.

ANTH 6999. Thesis Research. 3 Credits.

ANTH 8695. Linguistic Field Methods. 3 Credits.

The relationship between language and thought in dialogue with the study of a particular foreign language. Ethnographic study of language and cognition and the application of linguistic theory and method to anthropological research. Methods of elicitation and textual analysis, and technologies used for storing and analyzing linguistic data. Restricted to graduate students.

ANTH 8998. Advanced Reading & Research. 1-12 Credits.

Limited to students preparing for the Doctor of Philosophy general examination. May be repeated for credit.

ANTH 8999. Dissertation Research. 1-12 Credits.

Limited to Doctor of Philosophy candidates. May be repeated for credit.

APPLIED SCIENCE (APSC)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

APSC 1001. Introduction to Engineering for Undeclared Majors. 0-1 Credits.

As an introduction to disciplines within SEAS, potential solutions to problems are presented by practitioners of civil and environmental engineering; computer science; electrical, computer, and biomedical engineering; mechanical and aerospace engineering; and systems engineering.

APSC 2057. Analytical Mechanics I. 3 Credits.

First half of a one-year sequence. Concepts of statics: force systems, conditions of force and moment equilibrium, simple structures, distributed forces, centroids, internal forces, friction, moments of inertia. Prerequisites: PHYS 1021. (Fall and spring).

APSC 2058. Analytical Mechanics II. 3 Credits.

Second half of a one-year sequence. Concepts of dynamics: kinematics of particles, velocity and acceleration, translating and rotating reference frames, particle dynamics, motion under central and electromagnetic force, effect of Earth's rotation, vibrations, work, kinetic and potential energy, dynamics of systems of particles. Prerequisite: APSC 2057.

APSC 2113. Engineering Analysis I. 3 Credits.

Analytical methods for the solution of problems in engineering, the physical sciences, and applied mathematics: applications of ordinary differential equations, matrices and determinants, eigenvalues and eigenvectors, systems of ordinary linear differential equations, Bessel and Legendre functions. Prerequisite or concurrent registration: MATH 2233.

APSC 2114. Engineering Analysis II. 3 Credits.

Analytical methods for the solution of problems in engineering, the physical sciences, and applied mathematics: complex variables, Fourier series and integral, frequency filters, Laplace transforms, inversion and Duhamel integrals; partial differential equations. Prerequisite: MATH 2233.

APSC 3098. Variable Topics. 1-36 Credits.

APSC 3115. Engineering Analysis III. 3 Credits.

Analytical methods for the solution of problems in engineering using concepts from probability and statistics: probability modeling, random variables and their distributions, mathematical expectation, sampling, point and confidence interval estimation, hypothesis testing, correlation, regression, and engineering applications. (Fall, spring, and summer).

APSC 3116. Engineering Analysis IV. 3 Credits.

Analytical methods using advanced concepts from probability and statistics: multivariate distributions, expectation, generating functions, parametric families of distributions, sampling and sufficient statistics, estimation, hypothesis testing, and engineering applications. Prerequisite: APSC 3115, Math 2233. May be taken for graduate credit. (Fall).

APSC 6211. Analytical Methods in Engineering I. 3 Credits.

Engineering applications of the theory of complex variables: contour integration, conformal mapping, inversion integral, and boundary-value problems. Prerequisite: approval of department.

APSC 6212. Analytical Methods in Engineering II. 3 Credits.

Algebraic methods appropriate to the solution of engineering computational problems: linear vector spaces, matrices, systems of linear equations, eigenvalues and eigenvectors, quadratic forms. Prerequisite: approval of department.

APSC 6213. Analytical Methods in Engineering III. 3 Credits.

Analytical techniques for solution of boundary-initial-value problems in engineering: wave propagation, diffusion processes, and potential distributions. Prerequisite: approval of department.

APSC 6214. Analytical Methods in Engineering IV. 3 Credits.

Introduction to variational methods in engineering: Ritz and Galerkin approximation methods of boundary-value problems, aspects of linear integral equations arising from engineering analysis. Prerequisite: approval of department.

APSC 6215. Analytical Methods in Engineering V. 3 Credits.

Advanced methods of solution of boundary-initial-value problems in engineering; characteristics, wave propagation, and Green's functions. Prerequisite: APSC 6213.

APSC 6216. Special Topics in Engineering Analysis. 3 Credits.

Selected topics, such as perturbation techniques applied to approximate solution of nonlinear boundary and initial-value problems in engineering; application of singular integral equations in problems of mechanics. Prerequisite: approval of department.

ARABIC (ARAB)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ARAB 1001. Beginning Arabic I. 4 Credits.

Fundamentals of grammar and pronunciation and development of speaking, listening, reading, and writing skills in culturally appropriate contexts.

ARAB 1002. Beginning Arabic II. 4 Credits.

Continuation of ARAB 1001. Fundamentals of speaking, listening, reading, and writing in culturally appropriate and proficiency-oriented contexts. Prerequisite: ARAB 1001.

ARAB 1201. Intensive Elementary Arabic I. 6 Credits.

Accelerated learning of fundamentals of speaking, listening, reading, and writing Arabic in culturally appropriate contexts for proficiency.

ARAB 1202. Intensive Elementary Arabic II. 6 Credits.

Continuation of ARAB 1201. Fundamentals of speaking, listening, reading, and writing of Arabic in culturally and linguistically appropriate contexts. Prerequisites: ARAB 1201.

ARAB 2001. Intermediate Arabic I. 4 Credits.

Continuation of ARAB 1002. Further development of speaking, listening, reading, and writing skills of Arabic in culturally appropriate, proficiency-oriented contexts. Prerequisites: ARAB 1002.

ARAB 2002. Intermediate Arabic II. 4 Credits.

Continuation of ARAB 2001. Further development of speaking, listening, reading, and writing skills of Arabic in culturally appropriate and proficiency-oriented contexts. Prerequisites: ARAB 2001 or ARAB 1202.

ARAB 2201. Intensive Intermediate Arabic I. 6 Credits.

Continuation of ARAB 1202. Prerequisite: ARAB 1202. Laboratory fee.

ARAB 3001. Advanced Arabic. 4 Credits.

Emphasis on development of speaking, listening, reading, and writing skills at the advanced level of proficiency in culturally appropriate contexts. Discussion of cultural and social issues based on a selection of contemporary written and audiovisual materials from Arab literary and media sources. Prerequisites: ARAB 2002.

ARAB 3105. Special Topics. 3 Credits.

Topic announced in the Schedule of Classes may be repeated for credit provided the topic differs.

ARAB 3201. Intensive Intermediate Arabic II. 6 Credits.

Continuation of ARAB 2201. Accelerated learning of Arabic skills in speaking, listening, reading, and writing at the intermediate/advanced level of proficiency in culturally appropriate contexts. Prerequisites: ARAB 2201.

ARAB 3301. Modern Arabic Literature. 3 Credits.

Short stories, short plays, poems, literary essays in Modern Standard Arabic, with attention to linguistic and literary stylistic aspects. Prerequisites: ARAB 3001 or ARAB 3201.

ARAB 3302. Media Arabic. 3 Credits.

Authentic scripted and audiovisual materials from various contemporary Arab media outlets including television and radio newscast and cultural programs, newspaper and magazine articles, and the Internet. Prerequisites: ARAB 3001 or ARAB 3301 or permission of instructor.

ARAB 3311. Business Arabic. 3 Credits.

General and specific business language skills used in a variety of business operations and settings, such as making presentations, researching opportunities, conducting interviews, and negotiating. Prerequisite: ARAB 3001.

ARAB 3501. Arabic and Arab Identity. 3 Credits.

History of the Arabic language from pre-Islamic times and its subsequent spread into contiguous regions. The role of the Arabic language in formulating the ideology of Arab nationalism and identity. Course is conducted in English.

ARAB 3502. Arab Film & Culture in English. 3 Credits.

Historical survey of Arab cinema and its expression of Arab culture. Course is conducted in English.

ARAB 3503. Fundamentals of Arabic Linguistics. 3 Credits.

Introduction to the structures, functions, and varieties of Arabic from a descriptive linguistics perspective. The history of the language, including contributions of major medieval Arabic grammarians. Analysis of standard and dialectal varieties of Arabic. Course is conducted in English.

ARAB 4001. Genres in Modern Arabic Literature. 3 Credits.

Historical development of short Arabic stories or short Arabic plays throughout the twentieth century. Prerequisite: ARAB 3301 or permission of instructor.

ARAB 4002. Arabic Narratives Through the Ages. 3 Credits.

Reading and discussion of narratives, such as those found in stories of The Thousand and One Nights, or travel adventures, such as those of Ibn Battuta and his successors. Prerequisite: ARAB 3301 or permission of instructor.

ARAB 4501. Arabic-English Translation. 3 Credits.

Theoretical background and practical applications of translation strategies from Arabic to English that are necessary for professional translation tasks. Prerequisite: ARAB 3301 or ARAB 3302.

ARAB 4502. Arabic-English Advanced Translation and Editing. 1-3 Credits.

The professional translation and editing of various types of material. Prerequisite: ARAB 4501.

ART HISTORY (AH)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

AH 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the Schedule of Classes for more details. Restricted to First-year students in CCAS.

AH 1001. Summer Art History. 2 Credits.**AH 1031. Survey of Art and Architecture I. 3 Credits.**

An introduction to the history of art through the study of major monuments, movements, and concepts. From the prehistoric period, through the Ancient Mediterranean cultures, including Greece and Rome, to the end of the Middle Ages.

AH 1032. Survey of Art and Architecture II. 3 Credits.

Continuation of AH 1031. An introduction to the history of art through the study of major monuments, movements, and concepts. From the early Renaissance through the Baroque and modern eras.

AH 1070. The American Cinema. 3 Credits.

History and criticism of American films. The course enables the student to recognize and evaluate cinema techniques, to express the evaluation clearly in writing, and to understand the role of films in the context of American culture. Laboratory fee. Same as AMST 1070.

AH 1135. Spanish Art: Prado/Thyssen Museums. 3 Credits.**AH 1136. Spanish Art: From Goya to Picasso. 3 Credits.****AH 2071. Introduction to the Arts in America. 3 Credits.**

A survey of American art from the period of colonial exploration and settlement to the postmodern present. Political and social meanings of painting, sculpture, architecture, prints, and photographs. The relationship of art to religion and nationalism; issues of class, race, and gender. Same as AMST 2071.

AH 2109. Sem: Ancient Art & Architecture. 3 Credits.

For majors in art history; non-majors must have permission of instructor. May be repeated for credit provided the topic differs.

AH 2145. History of Decorative Arts: European Heritage. 3 Credits.

Changing styles of European furniture, textiles, ceramics, and glass in the context of general trends in art history and changing patterns in economic, technological, social, and cultural history. From antiquity to the modern age.

AH 2154. American Architecture I. 3 Credits.

Stylistic properties, form and type characteristics, technological developments, and urbanistic patterns are introduced as a means of interpretation of historic meaning. Buildings are analyzed both as artifacts and as signifiers of social, cultural, and economic tendencies. 1600-1860. Same as AMST 2520.

AH 2155. American Architecture II. 3 Credits.

Continuation of AH 2154. Stylistic properties, form and type characteristics, technological developments, and urbanistic patterns are introduced as a means of interpretation of historic meaning. Buildings are analyzed both as artifacts and as signifiers of social, cultural, and economic tendencies. 1860-present. Same as AMST 2521.

AH 2161. History of Decorative Arts: American Heritage. 3 Credits.

The decorative arts in America from the 17th century to the modern period. Consideration of changing visual characteristics in relation to the changing American experience.

AH 2162. History of Photography. 3 Credits.

The historical, social, aesthetic and technological developments of the photographic medium, including its relationship to modern art and modes of visual representation and the properties that inform our understanding of photographic meaning.

AH 2162W. History of Photography. 3 Credits.

The historical, social, aesthetic and technological developments of the photographic medium, including its relationship to modern art and modes of visual representation and the properties that inform our understanding of photographic meaning.

AH 2190. East Asian Art. 3 Credits.

Survey of the arts of China, Japan, and Korea.

AH 2191. South Asian Art. 3 Credits.

Survey of the arts of India, Pakistan, Sri Lanka, Nepal, and Tibet, from prehistoric times to circa 18th century.

AH 2192. The Art of Southeast Asia. 3 Credits.

The arts of Southeast Asia—Vietnam, Laos, Cambodia, Myanmar (former Burma), Thailand, and Indonesia, especially Java and Bali. The fusion of Indian and Chinese concepts with indigenous cultural traits.

AH 3101. Ancient Art of the Bronze Age and Greece. 3 Credits.

A survey of Greek art from the Minoans and Mycenaeans (c. 2000 B.C.) to the age of Alexander (c. 300 B.C.). Relationships among the arts of the different groups in the Aegean area and their impact on Western culture. The Thera volcanic eruption, the "Dorian Invasion," the portrayal of women, "heroic nudity," and the assumption of a stylistic chronology.

AH 3102. Ancient Art of the Roman Empire. 3 Credits.

A survey of Roman art from the successors of Alexander the Great (c. 300 B.C.) to the fall of the Roman Empire in the West (c. 300 A.D.). The impact of the Greek world on Roman art and culture; innovations and achievements of the Romans in architecture, portraiture, and historical narrative. Focus on the city of Rome and other areas of the Roman world such as North Africa and Asia.

AH 3103. Art and Archaeology of Egypt and the Near East. 3 Credits.

The great artistic tradition of the Nile Valley and the contemporary civilizations (c. 3000 B.C. to after 1000 B.C.) between the rivers Tigris and Euphrates (present day Iraq). The Pyramid Age, the temples at Karnak and Luxor, the tombs of the Valley of the Kings, and the artistic traditions of the Sumerians, Akkadians, Babylonians, Assyrians, and Persians.

AH 3104. Art and Archaeology of the Aegean Bronze Age. 3 Credits.

Excavational and multidisciplinary aspects of classical archaeology. Minoan and Mycenaean civilizations (1700-1200 B.C.). Same as ANTH 3806.

AH 3105. Topics in Ancient Art and Archaeology. 3 Credits.

May be repeated for credit provided the topic differs. Same as CLAS 3115.

AH 3106. Art and Archaeology of Israel and Neighboring Lands. 3 Credits.

The archaeology of Israel and adjacent areas (Syria, Jordan, Lebanon). Examination of many major sites and monuments. Significant problems and current debates. Same as ANTH 3805.

AH 3107. Ancient Mexican Civilizations. 3 Credits.

Culture history of pre-Columbian societies in Middle America; the emergence of Mesoamerican civilization from the earliest hunter-gatherers and first farmers to the Aztec Empire. Prerequisites: ANTH 1003. (Same as ANTH 3814).

AH 3111. Early Christian and Byzantine Art and Architecture. 3 Credits.

Art of the Mediterranean world following the collapse of Roman administration. Growth of the basilica and its decoration; the significance of small objects in medieval study. The rise and fall of the East Roman (Byzantine) Empire from Justinian to 1453.

AH 3112. Romanesque and Gothic Art and Architecture. 3 Credits.

The origin of Western art in the Hiberno-Saxon and Carolingian worlds, their relationship to the Ancient heritage and to the contemporary Byzantine art. Romanesque and Gothic architecture and its sculptural decoration as art historical and social phenomena.

AH 3113. Islamic Art and Architecture. 3 Credits.

Introduction to the visual culture of the Muslim world, from Spain to India, from the 7th century to the present. Examination of artworks in their historical, religious, and cultural contexts; key points in the field's historiography. (Same as AH 6213).

AH 3114. Art of the Book in the Medieval Muslim World. 3 Credits.

An advanced-level introduction to the visual culture of the Muslim world, from Spain to India, from the 7th century to the 17th century. Examination of artworks in their historical, religious, and cultural contexts; key points in the field's historiography. (Same as AH 6214).

AH 3116. The Aztec Empire. 3 Credits.

The Aztecs (or Mexica) of Mexico created a large empire, and while frequently the focus is on warfare and human sacrifice, they produced some of the most naturalistic art and reflective poetry that have survived the Spanish Conquest. Using archaeology, art, and ethnohistoric documents, this course focuses the importance of power in Aztec society and how the normalization of violence created a form of social cohesion central to the state. Prerequisites: ANTH 1003. (Same as ANTH 3812).

AH 3117. Special Topics in Precolumbian Art and Archaeology. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 3120. Italian Art and Architecture of the 13th through 15th Centuries. 3 Credits.

Origins, development, and theoretical foundations of Renaissance painting, sculpture, and architecture (Giotto, Duccio, Masaccio, Donatello, Ghiberti, Brunelleschi, Mantegna, Bellini, Botticelli).

AH 3121. Italian Art and Architecture of the 16th Century. 3 Credits.

The development of the universal genius within the circle of Florence and Rome (Leonardo, Raphael, Michelangelo) and their counterparts in Venice (Giorgione, Titian, Tintoretto, Sansovino, Palladio).

AH 3122. Topics in Early Northern Renaissance Art and Architecture. 3 Credits.

Royal and ducal patronage and the Flemish and French masters of the 15th century, including van Eyck, Campin, van der Weyden, Fouquet, van der Goes, Memling, and Gerard David. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 3122W. Topics in Early Northern Renaissance Art and Architecture. 3 Credits.

AH 3123. Topics in Northern Renaissance Art and Architecture. 3 Credits.

Francis I and Fontainebleau Palace, Henry VIII and Hampton Court, Johann Friedrich of Saxony, and the Holy Roman Emperors Maximilian I and Charles V. François Clouet, Hans Holbein, Lucas Cranach, Albrecht Dürer, Pieter Brueghel, Bernard van Orley, and others. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 3123W. Topics in Northern Renaissance Art and Architecture. 3 Credits.

AH 3131. Italian Art and Architecture of the 17th Century. 3 Credits.

The Counter-Reformation and creation of the Baroque in painting, sculpture, and architecture in Rome (Carracci, Caravaggio, Bernini, Borromini, Pietro da Cortona), Turin (Guarini, Juvarra), and Venice (Longhena).

AH 3132. Topics in Northern European Art and Architecture of the 17th Century. 3 Credits.

Hapsburg Flanders and Brussels under the Spanish archdukes and their patronage of Rubens and his circle. The role of Dutch merchants commissioning secular themes in Utrecht, Haarlem, Delft, Leyden, and Amsterdam from Golden Age artists such as Rembrandt, Vermeer, and Hals. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 3134. Topics in Spanish and Portuguese Art through the 16th Century. 3 Credits.

The Kingdoms of the Iberian Peninsula from the Reconquest of Granada to the Renaissance Age of Exploration. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 3134W. Topics in Spanish and Portuguese Art through the 16th Century. 3 Credits.

The Kingdoms of the Iberian Peninsula from the Reconquest of Granada to the Renaissance Age of Exploration. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs. (Same as AH 3134).

AH 3135. Topics in 17th/18th Century Spanish and Portuguese Art. 3 Credits.

Secular and sacred art of the Baroque Golden Century or the Rococo Enlightenment. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 3140. European Art of the 18th Century. 3 Credits.

Painting, sculpture, and architecture in France, Great Britain, and Italy. Emphasis on Watteau, Chardin, David, Hogarth, Gainsborough, Reynolds, Canaletto, and Tiepolo. Painting, sculpture, and architecture in France, Great Britain, and Italy.

AH 3141. European Art of the Early 19th Century. 3 Credits.

Neoclassicism and Romanticism in the context of Western European political, social, and cultural developments. Emphasis on France, England, and Germany and the representative styles of David, Ingres, Delacroix, Turner, Constable, and Friedrich.

AH 3141W. European Art of the Early 19th Century. 3 Credits.

Neoclassicism and Romanticism in the context of Western European political, social, and cultural developments. Emphasis on France, England, and Germany and the representative styles of David, Ingres, Delacroix, Turner, Constable, and Friedrich.

AH 3142. European Art of the Late 19th Century. 3 Credits.

The revolution in style of Realism, Impressionism, and Post-Impressionism in the context of Western European political, social, and cultural developments. Emphasis on representative styles of Courbet, Manet, Monet, Morisot, Repin, Seurat, Cezanne, Van Gogh, and Gauguin.

AH 3142W. European Art of the Late 19th Century. 3 Credits.

AH 3143. Early Twentieth-Century Art. 3 Credits.

Twentieth-century European painting, sculpture, and architecture, from their origins in the late 19th century through Surrealism. Emphasis on theory. The work of artists such as Matisse, Picasso, Kandinsky, Duchamp, and Mondrian. Same as AH 3143W.

AH 3143W. Early Twentieth-Century Art. 3 Credits.

Twentieth-century European painting, sculpture, and architecture, from their origins in the late 19th century through Surrealism. Emphasis on theory. The work of artists such as Matisse, Picasso, Kandinsky, Duchamp, and Mondrian. Same as AH 3143.

AH 3146. Modern Architecture in Europe and America. 3 Credits.

Major developments in architecture and urbanism from the Industrial Revolution to the end of the 20th century.

AH 3146W. Modern Architecture in Europe and America. 3 Credits.

AH 3151. American Art in the Age of Revolution. 3 Credits.

American art during the 18th-century "consumer revolution," the American War for Independence, and the early republic. Emphasis on the socioeconomic and political purposes of art, with focus on Enlightenment symbolism and the visualization of national identity. (Same as AMST 3151).

AH 3152. American Art in the Era of National Expansion. 3 Credits.

American art from the opening of the Erie Canal in 1825 to the Spanish-American War in 1898. Emphasis on the role of art in the expansion of the United States, exploring issues of race, class, and gender; art, and religion.

AH 3153. American Art of the 20th Century. 3 Credits.

20th-century American painting and sculpture from the turn of the century to the beginnings of postmodernism, with focus on the avant garde. Artists of the Stieglitz circle and later modernist movements such as Abstract Expressionism, Pop, Op, Minimal, and Conceptual art. Theory and criticism.

AH 3160. Latin American Art and Architecture. 3 Credits.

AH 3165. Later Twentieth-Century Art. 3 Credits.

Artists, art, and critical concepts from the later twentieth century, focusing on key movements and issues, including Abstract Expressionism, Minimalism, Conceptual Art, feminism, identity politics, and the rise of globalization. Same as AH 3165W.

AH 3165W. Later Twentieth-Century Art. 3 Credits.

Artists, art, and critical concepts from the later twentieth century, focusing on key movements and issues, including Abstract Expressionism, Minimalism, Conceptual Art, feminism, identity politics, and the rise of globalization. Same as AH 3165.

AH 3170. Materials, Methods, and Techniques in Art History. 3 Credits.

Working hands-on in a workshop studio, students create panels, canvases, vehicles, mediums, pigments, drawings, and paintings from raw materials and are introduced to the materials, methods, and techniques of the fine arts through traditional practices and processes of manufacture in western cultures.

AH 4119. Seminar in Medieval Art and Architecture. 3 Credits.

For majors in art history; non-majors must have permission of instructor. May be repeated for credit provided the topic differs.

AH 4129. Seminar in Renaissance Art and Architecture. 3 Credits.

For majors in art history; non-majors must have permission of instructor. May be repeated for credit provided the topic differs.

AH 4139. Seminar in Baroque Art and Architecture. 3 Credits.

For majors in art history; non-majors must have permission of instructor. May be repeated for credit provided the topic differs.

AH 4149. Seminar in Modern European Art and Architecture. 3 Credits.

For majors in art history; non-majors must have permission of instructor. May be repeated for credit provided the topic differs.

AH 4159. Seminar in American Art and Architecture. 3 Credits.

For majors in art history; non-majors must have permission of instructor. May be repeated for credit provided the topic differs.

AH 4159W. Seminar in American Art and Architecture. 3 Credits.

For majors in art history; non-majors must have permission of instructor. May be repeated for credit provided the topic differs.

AH 4169. Seminar in Contemporary Art. 3 Credits.

Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit if topic differs. Restricted to limited to juniors and seniors.

AH 4189. Seminar: Special Topics in Art History. 3 Credits.

For majors in art history; non-majors must have permission of instructor. May be repeated for credit provided the topic differs.

AH 4198. Independent Study. 1-3 Credits.

Directed research and study in a specific area of art history to be approved by a faculty member. May be repeated for credit.

AH 4199. Internship in Art History. 3 Credits.

Open to candidates for the B.A. in art history only and with the approval of advisor in art history. May not be repeated for credit toward the degree. May be taken P/NP only.

AH 6201. Proseminar in Ancient Art of the Bronze Age and Greece. 3 Credits.

Greek art from the Minoans and Mycenaeans (c. 2000 B.C.) to the age of Alexander (c. 300 B.C.). Relationships among the arts of the different groups in the Aegean area and their impact on Western culture. The Thera volcanic eruption, the "Dorian Invasion," the portrayal of women, "heroic nudity," and the assumption of a stylistic chronology.

AH 6202. Proseminar in Ancient Art of the Roman Empire. 3 Credits.

Roman art from the successors of Alexander the Great (c. 300 B.C.) to the fall of the Roman Empire in the West (c. 300 A.D.). The impact of the Greek world on Roman art and culture; innovations and achievements of the Romans in architecture, portraiture, and historical narrative. Focus on the city of Rome and other areas of the Roman world such as North Africa and Asia.

AH 6205. Ancient Art Seminar. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6211. Proseminar in Early Christian and Byzantine Art and Architecture. 3 Credits.

Art of the Mediterranean world following the collapse of Roman administration. Growth of the basilica and its decoration; the significance of small objects in medieval study. The rise and fall of the East Roman (Byzantine) Empire from Justinian to 1453.

AH 6212. Proseminar in Romanesque and Gothic Art and Architecture. 3 Credits.

The origin of Western art from the Hiberno-Saxon and Carolingian worlds and their relationship to the Ancient heritage. Romanesque and Gothic architecture and its sculptural decoration as social phenomena.

AH 6213. Islamic Art and Architecture. 3 Credits.

Introduction to the visual culture of the Muslim world, from Spain to India, from the 7th century to the present. Examination of artworks in their historical, religious, and cultural contexts; key points in the field's historiography. (Same as AH 3113).

AH 6214. The Art of the Book in the Medieval Muslim World. 3 Credits.

An advanced-level introduction to the visual culture of the Muslim world, from Spain to India, from the 7th century to the 17th century. Examination of artworks in their historical, religious, and cultural contexts; key points in the field's historiography. (Same as AH 3114).

AH 6215. Seminar in Medieval Art and Architecture. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6220. Proseminar in Italian Art and Architecture of the 13th through 15th Centuries. 3 Credits.

Origins, development, and theoretical foundations of Renaissance painting, sculpture, and architecture (Giotto, Duccio, Masaccio, Donatello, Ghiberti, Brunelleschi, Mantegna, Bellini, Botticelli).

AH 6221. Proseminar in Italian Art and Architecture of the 16th Century. 3 Credits.

The development of the universal genius within the circle of Florence and Rome (Leonardo, Raphael, Michelangelo) and their counterparts in Venice (Giorgione, Titian, Tintoretto, Sansovino, Palladio).

AH 6222. Proseminar in Early Northern Renaissance Art and Architecture. 3 Credits.

Royal and ducal patronage and the Flemish and French masters of the 15th century, including van Eyck, Campin, van der Weyden, Fouquet, van der Goes, Memling, and Gerard David. Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6223. Proseminar in Northern Renaissance Art and Architecture. 3 Credits.

Francis I and Fontainebleau Palace, Henry VIII and Hampton Court, Johann Friedrich of Saxony, and the Holy Roman Emperors Maximilian I and Charles V. François Clouet, Hans Holbein, Lucas Cranach, Albrecht Dürer, Pieter Brueghel, Bernard van Orley, and others.

AH 6225. Seminar in Renaissance Art. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6231. Proseminar in Italian Art and Architecture of the 17th Century. 3 Credits.

The Counter-Reformation and creation of the Baroque in painting, sculpture, and architecture in Rome (Carracci, Caravaggio, Bernini, Borromini, Pietro da Cortona), Turin (Guarini, Juvarra), and Venice (Longhena).

AH 6232. Proseminar in Northern European Art and Architecture of the 17th Century. 3 Credits.

Habsburg Flanders and Brussels under the Spanish archdukes and their patronage of Rubens and his circle. The role of Dutch merchants commissioning diverse secular themes in Utrecht, Haarlem, Delft, Leyden, and Amsterdam from "Golden Age" artists such as Rembrandt, Vermeer, and Hals. Specific topic announced in the Schedule of Classes.

AH 6234. Proseminar in Spanish and Portuguese Art through the 16th Century. 3 Credits.

The Kingdoms of the Iberian Peninsula from the Reconquest of Granada to the Renaissance Age of Exploration. Specific topic announced in the Schedule of Classes.

AH 6235. Seminar in Baroque Art. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6240. Proseminar in European Art of the 18th Century. 3 Credits.

Painting, sculpture, and architecture in France, Great Britain, and Italy. Emphasis on Watteau, Chardin, David, Hogarth, Gainsborough, Reynolds, Canaletto, and Tiepolo.

AH 6245. Seminar in European Art of the 19th Century. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6246. Proseminar in Modern Architecture in Europe and America. 3 Credits.

Major developments in architecture and urbanism from the Industrial Revolution to the end of the 20th century.

AH 6250. Seminar: Modern Art. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6251. Proseminar in American Art in the Age of Revolution. 3 Credits.

American art during the 18th-century "consumer revolution," the American War for Independence, and the early republic. Emphasis on the socioeconomic and political purposes of art, with focus on Enlightenment symbolism and the visualization of national identity.

AH 6252. Proseminar in American Art in the Era of National Expansion. 3 Credits.

American art from the opening of the Erie Canal in 1825 to the Spanish-American War in 1898. Emphasis on the role of art in the expansion of the United States, exploring issues of race, class, and gender; art and religion.

AH 6254. Seminar in American Art before 1900. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs. Same as AMST 6254.

AH 6255. Seminar: Studies in American Art and History. 3 Credits.

Selected problems and themes in American cultural history involving the use of artistic materials in different media; emphasis on methodology and analytic techniques. May be repeated for credit. Same as AMST 6730.

AH 6256. Seminar in American Art of the 20th Century. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6257. Seminar in Photography. 3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6258. Art Historiography. 3 Credits.

The development of art history as a discipline from the eighteenth century to the present. An investigation of different art historical methodologies, including formal analysis, iconological, feminist, Marxist, semiotic and deconstructivist approaches.

AH 6260. Seminar in African Art. 3 Credits.

Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

AH 6261. Seminar in Asian Art. 3 Credits.

Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

AH 6265. Seminar in Islamic Art and Architecture. 3 Credits.

Topic announced in Schedule of Classes. May be repeated for credit provided the topic differs.

AH 6269. Seminar in Contemporary Art. 3 Credits.

Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs.

AH 6270. Special Topics in Art History. 3 Credits.

AH 6286. Preventive Conservation Concepts. 3 Credits.

Historical development of preventive conservation in museums, conservation ethics, team approaches to conservation, interactions of various materials with agents of deterioration. Basics of materials testing, preparation of condition reports, choosing museum storage and exhibition materials, and risk assessment. Same as ANTH 6203/ MSTD 6203.

AH 6287. Preventive Conservation Techniques. 3 Credits.

Practical applications of preventive conservation of materials, monitoring environmental conditions, conducting risk assessments, evaluation of exhibit and storage areas; developing plans, policies, and procedures for collections care; grant proposal preparation for collections care initiatives. Same as ANTH 6204/ MSTD 6204.

AH 6298. Independent Research in Art History. 3 Credits.

AH 6299. Museum Internship. 3-12 Credits.

ART THERAPY (ARTH)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ARTH 6201. Survey of Art Therapy. 3 Credits.

The use of the visual arts to enhance personal development and growth; illustrated lectures, readings, discussion, and studio work presented by experts in the field. Instruction is delivered online via Blackboard. No previous art experience is necessary.

ARTH 6205. History and Theory of Art Therapy. 2 Credits.

Art therapy history and theory, milestones and practitioners. The development of art therapy as a distinct therapeutic practice. Overview of psychotherapy theories relevant to art therapy. Open only to art therapy students.

ARTH 6206. Human Development and Art Therapy. 3 Credits.

Psychological and artistic development across the life span. Theories of personality development; cultural and environmental influences; and human behavior, including developmental crises, disability, exceptional behavior, and addictive behavior. Restricted to art therapy students.

ARTH 6210. Counseling/Art Therapy Process. 3 Credits.

Theoretical and clinical dimensions of counseling and art therapy explored through study of current research concerning the diverse elements affecting the therapeutic process. The goals of each phase of treatment; development of the therapeutic alliance; assessment of client readiness; therapeutic techniques and interventions as practiced in short- and long-term treatment.

ARTH 6211. Process of Counseling and Art Therapy: Theory. 3 Credits.

Major theories in counseling and art psychotherapy through the lens of the creative process and other aspects of clinical practice; the influence of multicultural issues, contemporary and evidence-based practices, and various settings on art-making and the therapeutic encounter. Restricted to students in an art therapy program; permission of the instructor may be substituted. Prerequisite: ARTH 6210.

ARTH 6221. Studio/Technique of Art Therapy. 3 Credits.

Direct experience of the therapeutic utility and psychological influence of art processes and materials. Identifying the effect of art-making leading to assessment and intervention strategies. Open only to art therapy students.

ARTH 6231. Child Art Therapy. 2 Credits.

Practical, theoretical, and ethical considerations involved in treating children in clinical and educational settings. Application of art therapy and counseling principles and practice for diverse child populations. Development of interventions for varied DSM-IV diagnoses.

ARTH 6232. Art Therapy with Adolescents. 2 Credits.

Practical, theoretical, and ethical considerations in treating adolescents in clinical and educational settings. Assessment and treatment issues integrating the use of art techniques specifically designed for this population. Application of art therapy and counseling principles and practice for diverse adolescent populations. Development of interventions for varied DSM-V diagnoses. Restricted to students in an art therapy program.

ARTH 6233. Marital and Family Art Therapy/Counseling. 3 Credits.

Principles of working with families and couples, including an overview of systems theories and stages of family life cycle development; art techniques for evaluating of family dynamics; intervention strategies and cultural and ethical considerations. Restricted to students in an art therapy program.

ARTH 6234. Group Process. 3 Credits.

Theoretical and experiential understanding of group art therapy and counseling methods and skills. Principles of group dynamics, therapeutic factors, member roles and behaviors, leadership styles and approaches, selection criteria, and short- and long-term group process.

ARTH 6235. Social and Cultural Diversity. 3 Credits.

Consideration of stereotypes and biases that interfere with effective treatment of patients who are racially, ethnically, and otherwise diverse. The role of the art therapist in conflict resolution, advocacy, and social justice. Exploration of the therapist's heritage, expectations, and values. Racial identity development; skills for multicultural counseling.

ARTH 6241. Assessment Procedures. 3 Credits.

Instruments and procedures used in assessment of psychological health and psychopathology; diagnostic and developmental criteria as manifested in artwork and art-making; statistical concepts, including reliability and validity; selection and administration of assessment tools; treatment planning; report writing. Restricted to students in an art therapy program.

ARTH 6242. Psychopathology: Art and Diagnosis. 3 Credits.

Criteria of psychiatric diagnoses, such as the Diagnostic and Statistical Manual multiaxial system, theories of psychopathology, and relevant literature evaluation of potential indicators of functional and organic disorders in behavior and artwork of clients; ethical issues; cultural and environmental influences on diagnostic categorization; basic introduction to psychopharmacology. Restricted to students in an art therapy program; permission of the instructor may be substituted.

ARTH 6243. Substance Abuse and Addictions. 3 Credits.

Overview of substance abuse and addictions for art therapy and counseling, including theory and treatment applications. Screening and assessment tools; treatment models specific to the field of addictions. Art therapy techniques in the treatment of substance abuse for adolescents and adults in a variety of treatment settings. Restricted to ARTH majors only.

ARTH 6251. Research Methods. 3 Credits.

Planning, conducting, and evaluating relevant methodologies, including qualitative and quantitative approaches and basic statistics. The importance of research in the psychotherapy professions; ethical and legal considerations; and the use of research to assess effectiveness of mental health and art therapy services.

ARTH 6261. Ethics and Professionalism. 3 Credits.

Professional identity and the role of the therapist; the ethical practice of counseling and art therapy, including familiarity with ethical standards of various professional organizations; credentialing and licensure; public policy and advocacy for patients and for the profession.

ARTH 6262. Career Counseling and Art Therapy. 3 Credits.

The theoretical foundation and practical experience necessary to understand and support career development needs for diverse individual clients and groups. Career development over the lifespan; assessments, tools, and resources; occupational and labor market trends and resources. Specific art therapy techniques applicable to career counseling in educational and work settings. Restricted to ARTH majors only.

ARTH 6265. Advanced Issues in Psychotherapy and Art Therapy. 1-3 Credits.

Overview and application of one or more treatment models or theories to various mental and emotional disorders. Connections between the practice of art therapy and the techniques of other disciplines.

ARTH 6271. Art Psychotherapy and Trauma I: Theory and Approaches to Treatment. 0-3 Credits.

Introduction and overview of theory, practice, and treatment related to complex, trauma-related problems; psychobiology of traumatic stress, impact of traumatic stress on individuals, and specific treatment modalities in clinical setting; somatic (body-based) and nonverbal (art and image-based) treatment modalities. Supervised treatment or observation of treatment of clients with trauma histories. Restricted to students in an art therapy program.

ARTH 6272. Art Psychotherapy and Trauma II: Loss, Countertransference, and Resiliency. 3 Credits.

Multi-modal treatment of acute, serial, or complex trauma; theoretical, practical, moral, cross cultural, and personal aspects as seen through an art therapy and counseling lens. Supervised treatment or observation of treatment of clients with trauma histories. Restricted to students in an art therapy program. Prerequisite: ARTH 6271.

ARTH 6281. Practicum in Art Therapy. 1-2 Credits.

A total of 900 hours of clinical fieldwork in a professional setting. Supervised clinical experience with clients or patients in psychiatric, rehabilitation, and education settings with children, adolescents, and adults. On-site individual supervision by clinical instructors; on-campus group supervision by faculty. Open only to art therapy students.

ARTH 6292. Special Projects in Art Therapy. 1-12 Credits.

Individual work based on research. Empirical, clinical, and library research may be undertaken, as well as the development of new procedures. Details to be worked out with each student. May be repeated for credit with advisor's approval. Open only to art therapy students.

ARTH 6998. Thesis Research. 3 Credits.**ARTH 6999. Thesis Research. 3 Credits.**

ASTRONOMY (ASTR)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

ASTR 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the schedule of classes for more details. Restricted to first-year students in CCAS.

ASTR 1001. Stars, Planets, and Life in the Universe. 4 Credits.

Primarily for non-science majors. An introduction to how our Universe is structured, including the basic principles underlying astronomical systems and observations. Topics include the known laws of nature, stars, and planetary systems and the conditions for extraterrestrial life and exploration. Prerequisite: high school algebra. Laboratory fee.

ASTR 1002. Origins of the Cosmos. 4 Credits.

Primarily for non-science majors. A description of the Universe, its origins and its evolution, based on known physical principles. Topics include galactic and stellar structure, black holes, origin of the elements, and big bang cosmology. Prerequisite: high school algebra. Laboratory fee.

ASTR 1003. Introduction to Astronomy. 2 Credits.**ASTR 1004. Introduction to Astronomy. 2 Credits.****ASTR 2131. Astrophysics Seminar. 3 Credits.**

Course led each week by a different expert in the research on various astrophysical sources and phenomena. Topics may include the life and death of stars; most violent explosions in the universe; evolution of galaxies; and evolution of the universe on the largest scales. Prerequisite: PHYS 1012 or PHYS 1022.

ASTR 3161. Space Astrophysics. 3 Credits.

Physical processes of celestial phenomena as determined from space-based instrumentation. While the entire electromagnetic spectrum is covered, the high-energy (X-ray and gamma ray) region is emphasized. Results from ground-based instrumentation (e.g., radio and optical) may be introduced. Prerequisites: PHYS 1022.

ASTR 3183. General Relativity. 3 Credits.

A presentation of Einstein's general theory of relativity. Topics include the special theory of relativity, the nature of space and time, the equivalence principle, Riemannian geometry, Einstein's proposal, tests of the theory, Schwarzschild and Kerr solutions, Hawking radiation, and cosmological models. Prerequisites: PHYS 2023; MATH 3342 (or equivalent).

ASTR 4195. Undergraduate Research in Astrophysics. 3 Credits.

Research on problems in astrophysics approved by the faculty. May be repeated once for credit.

BIOCHEMISTRY (BIOC)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

BIOC 3261. Introductory Medical Biochemistry. 4 Credits.

Introduction to structures of biological macromolecules, enzyme catalysis, cellular bioenergetics, and metabolism. Same as BISC 3261. Prerequisite CHEM 2151- CHEM 2152. Credit toward the degree cannot be earned for this course and for CHEM 3165.

BIOC 3262. Biochemistry Laboratory. 2 Credits.

Study of common experimental techniques used in life science laboratories to separate and characterize biological macromolecules. Same as BISC 3262/ CHEM 3262. Prerequisite: BIOC 3261/ BISC 3261 . Laboratory fee.

BIOC 3263. Special Topics in Biochemistry. 2 Credits.

In-depth discussion of current biochemically relevant topics, including cancer and HIV chemotherapy, immune response, photosynthesis, signal transduction, hormone regulation and nutrition. Same as BISC 3263. Prerequisite: BIOC 3261/ BISC 3261 . Credit toward the degree cannot be earned for this course and for CHEM 3166.

BIOC 3263W. Special Topics in Biochemistry. 2 Credits.**BIOC 3560. Diet, Health, and Longevity. 3 Credits.**

Biochemical and molecular explanations of how calorie intake affects health; scientific principles of dieting. Prerequisite: BIOC 3261 or BISC 1005 or EXSC 2114 or EXSC 2119.

BIOC 3564. Lipid Biotechnology. 0-2 Credits.

Same as BISC 3564/ CHEM 3564. Prerequisite: BIOC 3261/ BISC 3261 . Laboratory fee.

BIOC 3820. Bioinformatics and Computational Biochemistry. 2 Credits.

How biomedical researchers integrate information from molecular biology resources for analysis and testing of hypotheses. Prerequisite: BISC 1111; STAT 1127.

BIOC 3821. Projects in Biomed Informatics. 1-2 Credits.**BIOC 4195. Undergraduate Research. 1 Credit.**

Research conducted under a mentor who is a member of the department. May be repeated for credit (only 1 credit may count toward the minor). Prerequisites: permission of the faculty member concerned.

BIOC 4701. Science and Medicine. 0-4 Credits.

A broad overview of several biomedical discoveries made in the 20th century and the often profound influence they have had on medical technology and on new directions in science and medicine, science administration, politics, ethics, and philosophy. (Same as HONR 2175, HONR 2175).

BIOC 6201. Medical Biochemistry. 7 Credits.

Required for medical students. Lecture and laboratory; emphasis on basic principles and their relation to medicine.

BIOC 6209. Resch Elective in Medical BioC. 1-12 Credits.**BIOC 6211. Biochem-Health Sci Students. 3,4 Credits.**

Basic concepts of biochemistry and their relation to health sciences.

BIOC 6221. Proteins, Pathways, and Human Health. 4 Credits.

A comprehensive course in general biochemistry for graduate students in biomedical sciences. Prerequisite: CHEM 2152, CHEM 2154.

BIOC 6222. Biochemical Genetics and Medicine. 3 Credits.

Continuation of BIOC 6221. A comprehensive course in general biochemistry for graduate students in biomedical sciences. Prerequisite: CHEM 2152, CHEM 2154.

BIOC 6223. Bioinformatics. 2 Credits.

The application of bioinformatics concepts and methods through the use of molecular biology databases and tools, covering molecular evolution, and protein sequence, structural, functional analysis. Recommended background: One undergraduate biochemistry course.

BIOC 6224. Molec biol and protein methods. 3 Credits.

Common laboratory techniques used in life science laboratories to separate and characterize proteins, including chromatography, gel electrophoresis, immunoassays, spectroscopy, and centrifugation. Corequisite: BIOC 6221. Laboratory fee.

BIOC 6227. Biochemistry Seminar. 1 Credit.

Current literature in biochemistry. Limited to graduate students in the department. May be repeated for credit.

BIOC 6234. Biochemical and Bioinformatic Approaches to Protein Structure and Function. 3 Credits.

Molecular biological, biophysical, chemical, and bioinformatic approaches to understanding protein structure and function. Protein folding, interactions, and ligand binding.

BIOC 6235. Seminar in Genomics, Proteomics, and Bioinformatics. 1 Credit.**BIOC 6236. Medical Genomics. 2 Credits.**

The structure and function of genes and genomes. Genomic theories, methods, and data analysis including bioinformatics and database mining. Prerequisite or corequisite: BIOC 6221-BIOC 6222.

BIOC 6237. Proteomics and biomarkers. 2 Credits.

Experimental proteomics, protein/proteome analysis, bioinformatics of proteomics, systems biology and structural genomics. Prerequisite: BIOC 6236.

BIOC 6238. Experimental Genomics Lab. 3 Credits.

Research applications of knowledge in genomics and proteomics. Prerequisite: BIOC 6236. Laboratory fee.

BIOC 6240. Next Generation Sequencing. 2 Credits.**BIOC 6250. Molecular Biology. 3 Credits.**

Content includes the organization and replication of genetic material, transcriptional and translational machinery, regulation of eukaryotic gene expression, and other special topics. Prerequisite: BIOC 6221-BIOC 6222.

BIOC 6252. Current Laboratory Methods in Molecular Biology. 3 Credits.

Corequisite: BIOC 6221. Laboratory fee.

BIOC 6254. Fundamentals of Molecular Biology. 3 Credits.

An intermediate-level molecular biology survey course. Prerequisite: BIOC 6221.

BIOC 6260. Analytic Methods for Lipids and Carbohydrates. 3 Credits.

Basic techniques in the biotechnology of lipids and carbohydrates. Prerequisite: BIOC 6221.

BIOC 6262. Genes, diets and aging. 3 Credits.

BIOC 6264. Membrane-Associated Complex Lipids. 1 Credit.

BIOC 6281. Topics. 1,2 Credit.

Directed readings in biochemistry, molecular biology, and genetics. May be repeated for credit. Enrollment limited to graduate students in the department.

BIOC 6290. Extramural BioChem Elective. 1-12 Credits.

BIOC 6291. Extramural BioChem Elective. 1-12 Credits.

BIOC 6295. Research. 1-12 Credits.

Participation in a project under investigation or in a field suggested by the student and approved by the staff. May be repeated for credit. Laboratory fee.

BIOC 6298. Advanced Reading. 1-6 Credits.

Limited to master's degree candidates. May be repeated for credit to a maximum of 6 hours.

BIOC 6998. Thesis Research. 3 Credits.

BIOC 6999. Thesis Research. 3 Credits.

BIOC 8225. Metabolism. 4 Credits.

Metabolic pathways and integration of metabolic processes. Limited to Ph.D. students in the Institute for Biomedical Sciences.

BIOC 8231. Bioc Basis of Human Diseases. 3 Credits.

Biochemical perspectives on disorders involving metabolic alterations, immunological dysregulation, problems of environmental/toxicological etiology, genetic/epigenetic dysfunction, neglected tropical diseases. Prerequisite: BmSc 8210, 8212.

BIOC 8232. Mol Cell Signaling. 3 Credits.

BIOC 8501. Issues in Clinical Nutrition. 3 Credits.

BIOC 8502. Molecular Biology of Oncogenes. 1-12 Credits.

BIOC 8503. Readings in Immunology. 3 Credits.

BIOC 8800. Summer Remedial Biochemistry. 8 Credits.

BIOLOGICAL SCIENCES (BISC)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

BISC 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the schedule of classes for more details. Restricted to First-year students in CCAS.

BISC 1001. Departmental Seminar. 0 Credits.

BISC 1005. The Biology of Nutrition and Health. 3 Credits.

A study of the human body and its disorders and diseases through examination of the essential molecules of life, nutrition, digestion, genetics, and reproduction. For non-majors. Same as BISC 1007.

BISC 1006. The Ecology and Evolution of Organisms. 3 Credits.

Introduction to ecology and evolution, including man's impact on other plants and animals, and an overview of Earth's biodiversity. For non-majors.

BISC 1007. Food, Nutrition, and Service. 3 Credits.

A study of biology and nutrition that uses service learning to reinforce course concepts. Topics include the need for humans to consume other organisms, processing of consumed nutrients, unexpected effects of nutritional consumption, and measures to improve nutrition.

BISC 1008. Understanding Organisms through Service Learning. 3 Credits.

The evolution of life on earth; the value of other organisms, their role in our world, and how humans can cause harm to this infrastructure. Students work with a community partner to perform activities that assist the partner while reinforcing course concepts.

BISC 1111. Introductory Biology: Cells and Molecules. 4 Credits.

Nutrition and metabolism, cellular and developmental biology, genetics, and molecular biology of plants and animals. Laboratory fee.

BISC 1112. Introductory Biology: The Biology of Organisms. 4 Credits.

Concepts and methods in the study of whole organisms. Evolutionary theory; population biology; diversity of plants, animals, fungi, and microorganisms; ecology and behavior; and animal structure and function. Laboratory fee.

BISC 2000. Sophomore Colloquium. 3 Credits.

Topics on biological diversity from the perspective of species and within the conceptual framework of evolutionary biology. The explanatory power, simplicity, and grandeur of evolution and its products. Consideration of how questions and hypotheses are empirically addressed. Restricted to sophomores, registration by department approval. Prerequisites: Bisc 1111 and Bisc 1112.

BISC 2202. Cell Biology. 3 Credits.

Structure and function of biological molecules and cellular organelles; cellular interactions. Prerequisite: BISC 1111– BISC 1112 except by permission of the instructor and one semester of organic chemistry.

BISC 2207. Genetics. 3 Credits.

Introduction to genetics, with emphasis on the integration of transmission of genetic traits and the molecular basis of gene action. Also includes cytogenetics, gene regulation, and examples of current applications of genetic technology. Prerequisites: BISC 1111, BISC 1112 or permission of the instructor.

BISC 2208. Genetics Laboratory. 1 Credit.

Study of genetic principles and genetic and molecular techniques in *Drosophila* and *E. coli*. Benchwork and comparative genomics using bioinformatics. Prerequisites: BISC 1111, BISC 1112, prior or concurrent enrollment in GEN 2207, or permission of instructor.

BISC 2213. Biology of Cancer. 3 Credits.**BISC 2214. Developmental Biology. 4 Credits.**

The molecular processes and cellular phenomena that result in the formation of organized tissues and functional organisms; formation of early body plan, cell type determination, organogenesis, morphogenesis, stem cells, cloning, and issues in human development. Prerequisites: BISC 1111 and BISC 1112 or permission of the instructor.

BISC 2220. Developmental Neurobiology. 3 Credits.

The molecular mechanisms that guide neural development: events surrounding the birth of neurons, how specific neurons are determined, how neurons find the correct targets, how cell death guides proper neural development, and how synapses are formed and maintained. Prerequisites: BISC 1111, BISC 1112 or permission of the instructor.

BISC 2305. Plant Biology. 3 Credits.

Plant metabolism and molecular biology: photosynthesis, nitrogen metabolism, membrane transport, mechanisms of hormone action, protein targeting, biotechnology, and current research topics. Prerequisites: BISC 1111, BISC 1112, CHEM 1111 and CHEM 1112; or permission of the instructor.

BISC 2318. Histology. 4 Credits.

Lecture (2 hours), laboratory (4 hours). Introduction to microscopical anatomy of normal tissues and organs with emphasis on the interrelationship of structure and function. Prerequisite: BISC 1111, BISC 1112 or permission of the instructor.

BISC 2320. Neural Circuits and Behavior. 3 Credits.

The cellular and molecular properties of neural circuits that form the basis of behavior. Circuit properties and behaviors across a variety of invertebrate and vertebrate taxa. Individual neuronal units, the organizational principles and emergent properties of neural circuits, and how these neuronal ensembles influence behavior.

BISC 2322. Human Physiology. 3 Credits.

Introduction to the function of organ systems of the human body. Prerequisites: CHEM 1111, CHEM 1112, BISC 1111, BISC 1112 or permission of the instructor.

BISC 2330. Invertebrate Zoology. 4 Credits.

Lecture (2 hours), laboratory (4 hours). General survey of invertebrate animals, including classification, morphology, physiology, embryology, and evolutionary relationships among phyla. Prerequisites: BISC 1111, BISC 1112 or permission of the instructor.

BISC 2331. Insect Biology. 3 Credits.

Overview of the class Insecta, focusing on insect external and internal morphology, classification, ecology/behavior, collection, and specimen preparation. Prerequisites: BISC 1111 and BISC 1112.

BISC 2332. Comparative Vertebrate Anatomy. 4 Credits.

Evolution and comparative morphology of phylum Chordata, stressing recent forms. Laboratory fee. Prerequisites: BISC 1111 and BISC 1112 or permission of the instructor.

BISC 2333. Evolution and Extinction of Dinosaurs. 3 Credits.

The 165-million-year history of dinosaurs; different groups and their evolution, end-Cretaceous extinction event, the origin of birds, and the biology of the group. Prerequisites: BISC 1111 and BISC 1112; or GEOL 1001 and GEOL 1002 or GEOL 1002 and GEOL 1005. Same as GEOL 2333.

BISC 2334W. Integrative Biology of Fishes. 3 Credits.

An introduction to concepts in anatomy, biomechanics, physiology, developmental biology, biomechanics and hydrodynamics, adaptive radiation, evolutionary biology, and ecology using fish as model organisms. Significant fish groups are covered, but emphasis is on exploring broader topics in which fish have figured prominently in research.

BISC 2335. Insect Biology Lab. 1 Credit.

An overview of insects, with an emphasis on ecology, behavior, economic importance, and the key adaptations that characterize the evolution of this diverse group. This lab will teach basic internal and external anatomy, field collection methods, insect identification, and discussion of the primary literature. Laboratory fee. Prerequisite: BISC 2331.

BISC 2337. Introductory Microbiology. 4 Credits.

Lecture (2 hours), laboratory (4 hours). Survey of the major groups of microorganisms with emphasis on structure, physiology, ecology, pathogenesis, and biotechnology. Antibiotic resistance and emerging diseases. Prerequisites: CHEM 1111, CHEM 1112, BISC 1111, BISC 1112, or permission of instructor.

BISC 2337W. Introductory Microbiology. 4 Credits.

Lecture (2 hours), laboratory (4 hours). Survey of the major groups of microorganisms with emphasis on structure, physiology, ecology, pathogenesis, and biotechnology. Antibiotic resistance and emerging diseases. Prerequisites: BISC 1111 and BISC 1112 and CHEM 1111 and CHEM 1112 or permission of the instructor.

BISC 2339. Parasitology. 4 Credits.

Introduction to animal parasitology; survey of parasitic types from protozoa through arthropods. Laboratory fee. Prerequisite: BISC 1111 and BISC 1112 or permission of the instructor.

BISC 2450. Organic Evolution. 3 Credits.

Synthetic theory of organic evolution, including population biology, speciation, adaptation, macroevolution, systematics, biogeography, and the geologic record. Prerequisites: BISC 1111, BISC 1112, or permission of instructor.

BISC 2451. History of Life. 3 Credits.

Overview of life through time; the origin of life, evolution of major groups of organisms, and important methodologies used in paleontology. Prerequisites: BISC 1111 and BISC 1112 or permission of the instructor. Same as GEOL 2151.

BISC 2452. Animal Behavior. 3 Credits.

An evolutionary approach to the study of animal behavior, emphasizing behavioral ecology and sociobiology. Prerequisite: BISC 1111 and BISC 1112 or permission of the instructor.

BISC 2453. Animal Behavior Lab. 1 Credit.

Demonstration of methods used in the study of animal behavior, including techniques of observation, basic statistical analysis, and experimental design. Field trips, discussion of research papers, and student-generated independent or small-group project. Prerequisites: BISC 1111, BISC 1112. Recommended background: Prior or concurrent enrollment in BISC 2452.

BISC 2454. General Ecology. 3 Credits.

The core concepts of the field of ecology across different hierarchical scales of ecological systems. Prerequisites: BISC 1111 and BISC 1112 or permission of the instructor.

BISC 2467. Marine Biology. 3 Credits.

Study of relationships between organisms and physical, chemical, and biological factors of the marine environment. Consideration of the open ocean and coastal ecosystems and human influences on them. Prerequisite: BISC 1111 and BISC 1112 or permission of the instructor.

BISC 2580. Biotechnology. 3 Credits.

Genetic engineering of bacteria, plants, and animals, including humans. Applications of modern biotechnology, especially in the field of medical biotechnology, such as gene therapy, xenotransplantation, and the Human Genome Project. Regulation, prospects, and social impact of biotechnology. Prerequisites: CHEM 2151, CHEM 2152, CHEM 2153, CHEM 2154, BISC 1111 and BISC 1112. Recommended background: BISC 2202 or BISC 2207.

BISC 2580W. Biotechnology. 3 Credits.

Genetic engineering of bacteria, plants, and animals, including humans. Applications of modern biotechnology, especially in the field of medical biotechnology, such as gene therapy, xenotransplantation, and the Human Genome Project. Regulation, prospects, and social impact of biotechnology. Prerequisites: BISC 1111, BISC 1112, CHEM 2151, CHEM 2152, CHEM 2153, and CHEM 2154. Recommended background: BISC 2202 or BISC 2207. Same as BISC 2580.

BISC 2581. Human Gross Anatomy. 3 Credits.

The structural organization of the human body and how it relates to regional and systems-based functions. Emphasis on the macroscopic structure of the body. Prerequisite: BISC 1111- BISC 1112 except by permission of the instructor. Same as ANAT 2181.

BISC 2583. Biology of Proteins. 3 Credits.

About half of the proteins in the human genome have unknown functions. Are some related to cancers, muscle degeneration, infectious disease? How can evolutionary relationships among proteins from other organisms help us discover functions of unknown proteins? Laboratory fee. Prerequisite: AP or IB Biology or Chemistry.

BISC 2584. Introduction to Bioinformatics. 3 Credits.

An introduction to the use of computational techniques in molecular biology, genetics, and evolution. Techniques and software for database searching, sequence alignment, gene finding, phylogenetics, genomics, and proteomics. Same as CSCI 3571. Prerequisite: BISC 1111- BISC 1112 except by permission of the instructor.

BISC 3122. Human Physiology. 3 Credits.

Introduction to the function of organ systems of the body. Prerequisites: BISC 1111, BISC 1112, CHEM 1111, CHEM 1112, and BISC 2207 or BISC 2202 or permission of instructor.

BISC 3123. Human Physiology Lab. 1 Credit.**BISC 3165. Biochemistry I. 3 Credits.**

Introduction to the chemistry of living cells; structure and function of proteins, lipids, carbohydrates, and nucleic acids; enzyme structure, mechanism, and regulation. Prerequisites: BISC 1111, BISC 1112, CHEM 2151 and CHEM 2152; course equivalents may be substituted for BISC 1111 and BISC 1112 at the discretion of the instructor. Same as CHEM 3165.

BISC 3166. Biochemistry II. 3 Credits.**BISC 3209. Molecular Biology. 4 Credits.**

Overview of theories, techniques, and procedures associated with molecular biology. The biosynthesis of DNA, RNA, and proteins; relationships among structure, function, and expression; and traditional and modern methods of gene and protein characterization and monitoring. Prerequisites: BISC 1111, BISC 1112, CHEM 1111, and CHEM 1112.

BISC 3210. Nanobiotechnology. 3 Credits.

Theory and application of nanotechnologies in biology and medicine. Strategies for studying the organization, function, and complexity of biological systems at nanometer scale. Several areas of research are covered, including high-resolution cellular and molecular imaging, spectroscopy, and optical tweezers. Prerequisites: BISC 2202 or BISC 3261 or permission of instructor and BISC 1111 and BISC 1112 or permission of the instructor.

BISC 3211. Nanobiotechnology Laboratory. 1 Credit.

Overview of techniques and approaches to studying complex biological interactions at nm scale. Prerequisite: BISC 3210 or permission of instructor and BISC 1111–BISC 1112 except by permission of the instructor. Laboratory fee.

BISC 3212. Immunology. 3 Credits.

Introduction to mammalian immunology covering the progression of immune responses from initial pathogen contact to immune memory. Applied topics include autoimmunity, transplantation, and the effects of HIV on the immune system. Prerequisites: BISC 1111, BISC 1112, BISC 2202, CHEM 2151, CHEM 2153. Recommended background: BISC 2207 or BISC 2322.

BISC 3261. Introductory Medical Biochemistry. 4 Credits.

Introduction to structures of biological macromolecules, enzyme catalysis, cellular bioenergetics, and metabolism. Same as BIOC 3261. Prerequisite: CHEM 2151–CHEM 2152. Credit toward the degree cannot be earned for this course and for CHEM 3165.

BISC 3262. Biochemistry Laboratory. 2 Credits.

Study of common experimental techniques used in life science laboratories to separate and characterize biological macromolecules. Same as BIOC 3262/ CHEM 3262. Prerequisite: BISC 3261 and BISC 1111–BISC 1112 except by permission of the instructor. Laboratory fee.

BISC 3263. Special Topics in Biochemistry. 2 Credits.

In-depth discussion of current biochemically relevant topics, including cancer and HIV chemotherapy, immune response, photosynthesis, signal transduction, hormone regulation, and nutrition. Topics vary by semester. May be repeated for credits provided topic differs. Consult the Schedule of Classes for more details. Prerequisites: BISC 1111, BISC 1112 and BISC 3261 or permission of the instructor. Same as BIOC 3263.

BISC 3320. Human Neurobiology. 3 Credits.

Introduction to the function of the human nervous system, gross and microscopic structure, and neurophysiology of the brain, spinal cord, and nerves; alterations caused by disease or injury. Prerequisite: BISC 1111 and BISC 1112; and BISC 2202 or BISC 3261.

BISC 3450. Evolutionary Medicine. 3 Credits.

The application of evolutionary principles, including natural selection, adaptation, phylogenetics, and evolutionary constraints, to understanding health, disease, and the biology of disease-causing organisms (viruses, bacteria, and parasites). How natural selection and phylogeny influence pathogen-host interactions, human genetics, immunology, development, cancer, and diseases of senescence. Prerequisites: BISC 1111 and BISC 1112. Recommended background: BISC 2207 and BISC 2450.

BISC 3450W. Evolutionary Medicine. 3 Credits.

The application of evolutionary principles, including natural selection, adaptation, phylogenetics, and evolutionary constraints, to understanding health, disease, and the biology of disease-causing organisms (viruses, bacteria, and parasites). How natural selection and phylogeny influence pathogen-host interactions, human genetics, immunology, development, cancer, and diseases of senescence. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement. Prerequisites: BISC 1111 and BISC 1112. Recommended background BISC 2207 and BISC 2450. Same as BISC 3450.

BISC 3458. Plant Comparative Structure and Function. 3 Credits.

Fundamental principles of how organisms are built, investigating trade-offs and coordination in design, how variation in structure influences physiological function in different ecological settings, and how relations among plants shape structure and function and responses to ecological gradients. Prerequisite: BISC 1111 and BISC 1112 or permission of instructor.

BISC 3459. Field Biology. 4 Credits.

Overview of the approaches and techniques used by contemporary field biologists for cataloging, quantifying, and comparing patterns of biodiversity across plants, animals, and fungi at multiple spatial and temporal scales. Prerequisites: BISC 1111 and BISC 1112. Recommended background: BISC 2454.

BISC 3460. Conservation Biology. 3 Credits.

Theory and practice of conserving biological diversity. Ecological patterns of biodiversity, biology of small populations, and conservation case studies. Use of ecological modeling software to explore various topics. Prerequisites: BISC 1111, BISC 1112 and BISC 2454; or permission of the instructor.

BISC 3461. Plant-Animal Interactions. 3 Credits.

Review of the major ecological and evolutionary interactions that occur between plants and animals in natural and managed ecosystems. Prerequisites: BISC 1111 and BISC 1112 or permission of the instructor. Recommended background: BISC 2450 or BISC 2454.

BISC 3462. Plant³/Animal Interactions Laboratory. 1 Credit.
Field and laboratory study of temperate interactions between plants and animals. Group projects focus on original data collection, analysis, and interpretation. Prerequisite or concurrent registration: BISC 3461 and BISC 1111– BISC 1112 except by permission of the instructor. Laboratory fee.

BISC 3463. Ecological and Evolutionary Genetics. 3 Credits.
An analysis of the ecological and genetic basis of evolutionary change. Topics include the organization and maintenance of genetic variation within and among natural populations, the genetic basis of complex traits, molecular ecology analyses, and genotype by environment interactions. Prerequisite: BISC 2450 or permission of instructor and BISC 1111– BISC 1112 except by permission of the instructor.

BISC 3464. Ecology and Evolution of Societies. 3 Credits.
Study of broadly important ecological and evolutionary patterns and processes exemplified by organisms that have undergone the major evolutionary transition to living in societies. Prerequisites: BISC 1111, BISC 1112. Recommended background: BISC 2454 or BISC 2454W.

BISC 4132. Advanced Cellular-Molecular Biology. 3 Credits.
An advanced cell biology course with emphasis on biochemistry and molecular biology; illustrations are drawn from different organisms and human biology. Oral and written analysis of research literature. For upper-level undergraduates and beginning graduate students. Restricted to Instructor approval required. Recommended background: Six credits in the Cellular and Molecular category.

BISC 4171. Undergraduate Research. 1-12 Credits.
Admission by permission of the staff member concerned. May be repeated for credit. Prerequisite: CHEM 2152 and BISC 1111– BISC 1112 except by permission of the instructor; 16 credit hours in biological science courses. Laboratory fee.

BISC 4171W. Undergraduate Research. 1-12 Credits.
Admission by permission of the staff member concerned. May be repeated for credit. Prerequisite: Chem 2152 and BISC 1111– BISC 1112 except by permission of the instructor; 16 credit hours in biological science courses. Laboratory fee.

BISC 4172. Independent Study. 1-3 Credits.
Prescribed reading list and consultations with staff advisor culminating in a written report and/or examination. Prerequisite: BISC 1111– BISC 1112 and permission of the instructor.

BISC 4173. Independent Study-Developmental Biology. 2 Credits.

BISC 4174. Independent Study-Organismic Biology. 2 Credits.

BISC 4175. Independent Study-Genetic/Evolutionary Biology. 2 Credits.

BISC 4176. Independent Study-Environmental Bio. 2 Credits.

BISC 4180. Undergraduate Research Seminar. 1 Credit.

BISC 6101. Responsible Research. 1 Credit.

This course provides an introduction to the ethical, social, and legal foundations of scientific practice. It is intended to provide a forum for graduate students and postdocs to discuss almost every aspect of the academic life of a scientist, except specific disciplinary topics that are treated in regular courses. Ensuring ethical conduct is an essential part of basic, applied, and clinical research, especially in the context of competitive, collaborative, and international settings so common nowadays. Students will be exposed to case studies typifying complex social, ethical, and legal dilemmas that may arise in the conduct of research.

BISC 6102. Scientific Presentation. 1 Credit.

This course allows students to perfect their Scientific Presentation skills. In this course, students will present, in front of peers and faculty, their current research projects and plans for future work leading towards a complete thesis or dissertation. Student presentations will be designed to address a general audience of biologists, containing sufficient background information to provide perspective insights into the fundamental questions being asked, and at the same time providing enough detail on technical issues and analytical procedures to allow evaluation of potential outcomes. The Class will provide a friendly forum for students to collect feedback and comments, to discuss project design, content, and general significance of their research.

BISC 6205. Current Topics in Cell Smith, Donaldson, Eleftherianos, Jeremic. 1-2 Credits.

May be repeated for credit. Prerequisite: BISC 2202 or BISC 3209.

BISC 6206. Current Topics in Evolutionary Ecology. 1-2 Credits.

May be repeated for credit.

BISC 6207. Seminar: Current Topics in Systematic Biology. 1-2 Credits.

Topics vary by semester. See the Schedule of Classes for more details. May be repeated for credit provided the topic differs. Prerequisite: BISC 6210.

BISC 6210. Methods of Study of Evolution. 4 Credits.

A rigorous and up-to-date treatment of the theory and methods of systematics, including phylogenetic inference and its applications in evolutionary biology. Laboratory fee. Prerequisite: BISC 2450 .

BISC 6211. Biogeography/Coevolution. 4 Credits.

Survey of methods, techniques, and theory in biogeography. Geological and paleontological aspects of biogeography; large-scale biogeographic patterns; speciation and phylogeography. Prerequisite: BISC 2451 or BISC 2452 or permission of the instructor.

BISC 6213. Descriptive Systematics: Documenting Biodiversity. 3 Credits.

Study of those aspects of systematic biology concerned with description and inventory of biodiversity. Prerequisite: BISC 6210.

BISC 6214. The Phylogenetic Basis of Comparative Biology. 3 Credits.

The use of phylogenetic hypotheses to study questions in evolutionary biology and ecology. Prerequisite: BISC 6210; STAT 1127 .

BISC 6215. Vertebrate Phylogeny. 4 Credits.

A survey of vertebrate diversity, emphasizing evolutionary relationships and adaptations of the major groups. Prerequisite: BISC 2450 ; BISC 2332 recommended.

BISC 6216. Morphological Systematics. 4 Credits.

Methods of studying organismal morphology as a means of inferring phylogeny, emphasizing the concept of homology. Laboratory includes techniques of observing, measuring, and imaging morphology in systematic biology, including morphometric methods. Laboratory fee. Prerequisite: BISC 6210 .

BISC 6218. Innate Immunity. 3 Credits.

Discussion of innate immune systems in a wide variety of organisms; from sponges to vertebrates plus higher plants. Prerequisite: BISC 3212; recommended BISC 2202, BISC 2207, BISC 3209, BISC 2330.

BISC 6219. Host-Microbe Interactions. 3 Credits.

Overview of the molecular, genetic, cellular, and physiological basis of symbiotic and pathogenic interactions between plants and invertebrate and vertebrate animals and various microbial organisms, including bacteria, fungi, and viruses. Prerequisites: Microbiology (BISC 2337). Recommended background: Intro to Immunology (BISC 3212); Cell Biology (BISC 2202); Invertebrate Zoology (BISC 2330); Parasitology (BISC 2339), or permission of instructor.

BISC 6224. Molecular Evolution. 3 Credits.**BISC 6225. Molecular Phylogenetics. 4 Credits.**

Review of molecular phylogenetic methods including data recovery, alignment, weighting, character optimization, and phylogenetic inference methods. Prerequisite: BISC 2207, BISC 2450, and BISC 6210.

BISC 6227. Seminar: Genetics. 3 Credits.

Review of selected topics in genetics, with emphasis on current literature; topics of special interest to participants encouraged. May be repeated for credit. Prerequisite: BISC 2207.

BISC 6228. Population Genetics. 3 Credits.

Origin, maintenance, and possible significance of genetic variation in populations. Selection, genetic drift, and population structure are emphasized. Both theoretical and applied aspects of population genetics are discussed. Same as FORS 6247. Prerequisite: BISC 2207.

BISC 6230. Human Genetics. 3 Credits.

Genetic mechanisms of transmission and expression of human traits, with emphasis on biochemical and cytogenetic aspects. Prerequisite: BISC 2207; previous course work in cell biology or cell biochemistry strongly recommended.

BISC 6243. Seminar: Ecology. 3 Credits.

In-depth study of selected topics, including reports on original publications. May be repeated for credit. Prerequisite: BISC 2454.

BISC 6249. Seminar: Developmental Biology. 3 Credits.

Discussion and reports on recent research on the endocrinological, genetic, and biochemical aspects of animal development. Prerequisite: a course in developmental biology or cell biology.

BISC 6251. Evolutionary Developmental Biology. 3 Credits.

Developmental mechanisms involved in the morphological changes that occur during the course of evolution.

BISC 6252. Seminar: Neurobiology. 3 Credits.

Study of current publications in functional neurobiology. May be repeated for credit with instructor's permission.

BISC 6274. Gene Regulation and Genetic Engineering. 3 Credits.

The control of gene expression as illustrated by several prokaryotic and eukaryotic model systems: discussions of recombinant DNA techniques. Prerequisite: BISC 2207.

BISC 6275. Introduction to Recombinant DNA Techniques. 3 Credits.

Lecture, 1 hour; laboratory, 4 hours. Basic techniques of genetic manipulation: cloning of genes, transformation of bacteria, PCR procedures, DNA sequencing, and other techniques. Prerequisite: BISC 2202 or BISC 2207 or BISC 2337 and permission of instructor. Laboratory fee.

BISC 6295. Research. 1-12 Credits.

Investigation of special problems. May be repeated for credit.

BISC 6998. Thesis Research. 3 Credits.**BISC 6999. Thesis Research. 3 Credits.****BISC 8998. Advanced Reading & Research. 1-12 Credits.**

Limited to students preparing for the Doctor of Philosophy general examination. May be repeated for credit.

BISC 8999. Dissertation Research. 3-12 Credits.

Limited to Doctor of Philosophy candidates. May be repeated for credit.

BIOMEDICAL SCIENCES (BMSC)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000–4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

BMSC 6218. Ethics for Translational Sciences. 2 Credits.

Ethical issues relevant to the design and conduct of translational research, such as data management, human-based research, conflict of interest, and responsible use of animals. Students debate contemporary cases on ethical issues related to translational sciences and write in-depth analyses on ethical issues in human genome research, stem cell research, and clinical research involving children. Prerequisites: permission of instructor. Recommended background: ANAT 6130 (Human Clinical Embryology), ANAT 6160 (Human Clinical Neuroanatomy), ANAT 6181 (Human Gross Anatomy), ANAT 6292 (Projects in Anatomical Sciences), ANAT 6150 (Human Clinical Microscopic Anatomy).

BMSC 8210. Genes to Cells. 4 Credits.

Proteins structure and function, introduction to metabolic processes. Structure and function of nucleic acids, organization of the genome, and regulation of protein synthesis and processing. Registration with permission of instructor.

BMSC 8212. Developmental Cell Biology and Systems Physiology. 4 Credits.

Structure and functions of cells and tissues, techniques used for the analysis of cell function (image analysis, microscopy). Physiological bases of organ systems and origins of disease. Registration with permission of instructor.

BMSC 8215. Lab Rotations. 1 Credit.

For Ph.D. students enrolled in the Institute for Biomedical Sciences. Laboratory training in advanced techniques in biomedical sciences research practices. May be repeated for credit.

BMSC 8216. Career Skills for the Biomedical Sciences. 1 Credit.

Scientific writing, presentation skills, and seminar planning. Developing roles in the field: research in varying settings, policy and program planning, grants administration, and the biotechnology issues within intellectual property law. Ethical issues related to the conduct of research, animal use, and human subject participation. The design of a successful grant proposal.

BMSC 8217. Career Skills for the Biomedical Sciences. 1 Credit.

Continuation of BMSC 8216. Scientific writing, presentation skills, and seminar planning. Developing roles in the field: research in varying settings, policy and program planning, grants administration, and the biotechnology issues within intellectual property law. Ethical issues related to the conduct of research, animal use, and human subject participation. The design of a successful grant proposal.

BMSC 8218. Career Skills for the Biomedical Sciences. 1 Credit.

Continuation of BMSC 8217. Scientific writing, presentation skills, and seminar planning. Developing roles in the field: research in varying settings, policy and program planning, grants administration, and the biotechnology issues within intellectual property law. Ethical issues related to the conduct of research, animal use, and human subject participation. The design of a successful grant proposal.

BMSC 8230. Molecular Basis of Human Disease. 3 Credits.

Principles of systems biology in the context of specific diseases. Problem solving at multiple levels of biology, integrating knowledge of DNA, RNA, proteins, cell biology, and tissue physiology. Prerequisite: BMSC 8210, BMSC 8212.

BMSC 8231. Advanced Proteomics Methods and Applications. 2 Credits.

Proteomics approaches to specific questions about a biological system. Advanced methods and applications. Prerequisite: BMSC 8230.

BMSC 8233. Integrative Bioinformatics. 3 Credits.

Bioinformatics techniques for analysis of macromolecular sequences, structures, gene expression arrays, and proteomics. Systems biology approaches to research problems. Restricted to permission of instructor. Prerequisites: BMSC 8230. Recommended background: undergraduate background in biology, computer sciences, biochemistry, or a related field.

BMSC 8234. Seminar in Systems Biology. 2 Credits.

Prerequisite: permission of instructor.

BMSC 8235. Applied Biostatistics for Basic Research. 2 Credits.

The handling and interpretation of large data sets, including biological data and genomic data. Restricted to Permission of instructor. Prerequisites: none.

BMSC 8237. Muscle: Health and Disease. 2 Credits.

Genetics, physiology, and signaling in muscle health and disease, including muscle basics, growth, damage and repair, classification of weakness-causing diseases, treatment and research. Restricted to Permission of Instructor. Prerequisites: BMSC 8230. Recommended background: Undergraduate degree in biology, chemistry, biochemistry, or related field.

BMSC 8998. Readings and Research. 1-12 Credits.

Limited to students preparing for the Doctor of Philosophy general examination. May be repeated for credit.

BMSC 8999. Dissertation Research. 3-12 Credits.

Limited to Doctor of Philosophy candidates. May be repeated for credit.

BIostatistics (BIOS)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

BIOS 6295. Reading and Research. 1-12 Credits.

May be repeated for credit.

BIOS 6998. Thesis Research. 3 Credits.**BIOS 6999. Thesis Research. 3 Credits.****BIOS 8998. Advanced Reading and Research. 1-12 Credits.**

Limited to students preparing for the Doctor of Philosophy general examination. May be repeated for credit.

BIOS 8999. Dissertation Research. 3-12 Credits.

Limited to Doctor of Philosophy candidates. May be repeated for credit.

Business Administration (BADM)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

BADM 1001. First Year Development Course I. 1 Credit.

Required of all first-year students in School of Business. This course is designed to enhance students' education and begin preparation for business careers. The course meets periodically during the semester. Course fee. Restricted to students in the first year of enrollment in School of Business.

BADM 1002. First Year Development Course II. 1 Credit.

Continuation of BADM 1001. Required of all first-year students in School of Business. This course is designed to enhance students' education and begin preparation for business careers. The course meets periodically during the semester. Course fee. Restricted to students in the first year of enrollment in School of Business.

BADM 1003. Transfer Student Development. 1 Credit.

Required for all transfer students entering the School of Business. Provides information on University and School resources to assist with the student's transition. Helps students develop career-based knowledge; begin preparation for business careers; and learn the importance of civility and integrity in business discourse. Students perform service within the District of Columbia in order to apply business concepts and entrepreneurship skills. Restricted to GW School of Business students.

BADM 1004. The Age of Globalization. 3 Credits.

A multidisciplinary foundation in the globalization of people, markets, and firms. For all School of Business freshmen.

BADM 1900. Special Topics. 1-3 Credits.**BADM 2001. Markets and Politics. 3 Credits.**

Economic and political resource allocation; social and political influences on business organizations; contemporary problems and issues.

BADM 2001W. Markets and Politics. 3 Credits.

Economic and political resource allocation; social and political influences on business organizations; contemporary problems and issues.

BADM 2301. Management Information Systems Technology. 3 Credits.

An introduction to data and information processing concepts and systems viewed from a contemporary management perspective. Emphasis on uses and applications as well as emerging managerial issues with the potential to reshape the form and function of information systems. Lab required. Prerequisite: basic knowledge of Microsoft Word, Excel, and PowerPoint.

BADM 2301W. Mgt Information Systems Tech. 3 Credits.

An introduction to data and information processing concepts and systems viewed from a contemporary management perspective. Emphasis on uses and applications as well as emerging managerial issues with the potential to reshape the form and function of information systems. Lab required. Prerequisite: basic knowledge of Microsoft Word, Excel, and PowerPoint.

BADM 3001. Career Management Strategy. 1 Credit.

Restricted to School of Business students in their junior year. The career development process, including job search strategies and formulation of a career management plan, with practice in producing a resume and interviewing for a position.

BADM 3101. Human Resource Management. 3 Credits.

Global and strategic implications of human capital policies and practices, including human resource planning, recruitment, selection, training, development, compensation, and collective bargaining. Prerequisite: BADM 1101 or PSYC 1001.

BADM 3102. Business and Government Relations. 3 Credits.

Economic and legal environment of business enterprise; social and political influences; contemporary problems and issues.

BADM 3102W. Business/Government Relations. 3 Credits.**BADM 3103. Human Capital in Organizations. 3 Credits.**

An introduction and integration of concepts drawn from human resource management and organizational behavior. Application of these concepts to individual, group/team, and organizational scenarios through experiential exercises, cases, and projects. Development of skills in analyzing and evaluating human capital problems and determining appropriate solutions.

BADM 3401. Basic Marketing Management. 3 Credits.

Consumer and organizational buying behavior. Strategic marketing processes (market research, segmentation, targeting, positioning, and relationship-building). Product development and brand management, valuation and pricing, channel and logistics management, integrated marketing communications, e-commerce. Prerequisite: ECON 1012 or HONR 2044.

BADM 3401W. Basic Marketing Management. 3 Credits.

Consumer and organizational buying behavior. Strategic marketing processes (market research, segmentation, targeting, positioning, and relationship-building). Product development and brand management, valuation and pricing, channel and logistics management, integrated marketing communications, e-commerce. Prerequisites: ECON 1012 or HONR 2044.

BADM 3501. Financial Management and Markets. 3 Credits.

Introduction to financial markets, investment analysis, and financial management. Financial analysis, risk management, working capital management, capital budgeting, financial structure, cost of capital, and dividend policy. Prerequisites: ACCY 2001; ECON 1012 or HONR 2044; MATH 1221 or MATH 1231 or MATH 1252; and STAT 1051 or STAT 1053 or STAT 1111 or APSC 3115.

BADM 3601. Operations Management. 3 Credits.

Production planning concepts and analytical tools. Designing and managing production processes: facilities, equipment, process control systems. Design issues, demand forecasting, material planning, acquisition techniques. Managing the factory floor: scheduling, total quality management, continuous improvement concepts and methods. Prerequisite: STAT 1051, STAT 1053, STAT 1111 or APSC 3115.

BADM 3999. Bus. Admin. Trans. Cred-Upper. 1-36 Credits.**BADM 4101. Business Law and Ethics. 3 Credits.**

An introduction to practical reasoning at the intersection of business and society. Emphasis on application of ethics frameworks and core principles of business law to problems of individual, organizational, and social responsibility in business.

BADM 4101W. Business Law and Ethics. 3 Credits.

An introduction to practical reasoning at the intersection of business and society. Emphasis on application of ethics frameworks and core principles of business law to problems of individual, organizational, and social responsibility in business. Includes a significant engagement in writing as a form of critical inquiry and scholarly expression to satisfy the WID requirement.

BADM 4801. Strategy Formulation and Implementation. 3 Credits.

An integrative capstone course to develop skills in diagnosing organizational problems, formulating and selecting strategic alternatives, and recognizing problems inherent in strategy implementation. Restricted to seniors in the B.B.A., B.Accy., and SEAS business concentration programs.

BADM 4900. Special Topics. 0-3 Credits.

Experimental offering; new course topics and teaching methods.

BADM 4900W. Special Topics. 0-3 Credits.

Experimental offering; new course topics and teaching methods.

BADM 4950. Internship. 0 Credits.

School of Business undergraduates may register for this course when they wish to have an internship recorded on the transcript. The supervisor must verify that the internship has been completed for a minimum of six hours per week. An administrative fee is charged. May be repeated each semester if desired.

BADM 4995. Independent Study. 1-6 Credits.

Assigned topics with interdisciplinary focus. Admission by prior permission of advisor. May be repeated once for credit but in a separate semester.

CHEMISTRY (CHEM)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CHEM 1000. Dean's Seminar. 3 Credits.

Contemporary topics in chemistry.

CHEM 1003. Contemporary Science for Nonscience Majors. 3 Credits.

Contemporary topics in physical, biological, and medical science. Chem 1003 is not prerequisite to Chem 1004. Laboratory fee.

CHEM 1004. Contemporary Science for Nonscience Majors. 3 Credits.

Continuation of CHEM 1003. Contemporary topics in physical, biological, and medical science. Chem 1003 is not prerequisite to Chem 1004. Laboratory fee.

CHEM 1111. General Chemistry I. 4 Credits.

Atomic structure and properties; stoichiometry; gas, liquid, and solid state; chemical bonding; solutions; chemical kinetics and equilibria; thermodynamics; acids and bases; electrochemistry; descriptive chemistry. Prerequisite: one year of high school algebra. Laboratory fee.

CHEM 1112. General Chemistry II. 0-4 Credits.

Continuation of CHEM 1111. Atomic structure and properties; stoichiometry; gas, liquid, and solid state; chemical bonding; solutions; chemical kinetics and equilibria; thermodynamics; acids and bases; electrochemistry; descriptive chemistry. Prerequisite: CHEM 1111. Laboratory fee.

CHEM 2010. History of Chemistry. 2,3 Credits.

CHEM 2085. Environmental Chemistry. 3 Credits.

Chemistry and physics of the environment, with emphasis on water and air pollution; environmental analysis and modeling and their limitations.

CHEM 2122. Introductory Quantitative Analysis. 3 Credits.

Theory and practice of quantitative analysis by modern methods; evaluation of analytical data emphasizing detection and correction of experimental errors. Correlated with CHEM 2123. Prerequisite: CHEM 1112.

CHEM 2123. Introductory Quantitative Analysis Laboratory. 1 Credit.

Laboratory complement to CHEM 2122. Prerequisite or concurrent registration: CHEM 2122. Laboratory fee.

CHEM 2123W. Introductory Quantitative Analysis Laboratory. 1 Credit.

Laboratory complement to CHEM 2122. Prerequisite or concurrent registration: CHEM 2122. Laboratory fee.

CHEM 2151. Organic Chemistry I. 3 Credits.

Systematic treatment of the structure, preparation, properties, and reactions of the principal classes of organic compounds. Fundamental principles of stereochemistry, reaction mechanisms, and spectroscopic methods of analysis. Prerequisite to CHEM 2151: CHEM 1112.

CHEM 2152. Organic Chemistry II. 3 Credits.

Continuation of CHEM 2151. Systematic treatment of the structure, preparation, properties, and reactions of the principal classes of organic compounds. Fundamental principles of stereochemistry, reaction mechanisms, and spectroscopic methods of analysis. Prerequisite to CHEM 2152: CHEM 2151.

CHEM 2153. Organic Chemistry Laboratory I. 1 Credit.

Laboratory complement of CHEM 2151. Introduction to and practice in basic skills of synthesis, separation, purification, and identification of organic compounds. Prerequisite or concurrent registration: CHEM 2151. Laboratory fee.

CHEM 2154. Organic Chemistry Laboratory II. 1 Credit.

Continuation of CHEM 2153. Laboratory complement of CHEM 2152. Introduction to and practice in basic skills of synthesis, separation, purification, and identification of organic compounds. Prerequisite or concurrent registration: CHEM 2152. Prerequisite: CHEM 2153. Laboratory fee.

CHEM 3140. Geochemistry. 3 Credits.

Chemical systems and processes on the planet Earth; origins and interactions among and within the Earth's lithosphere, oceans, and atmosphere; origin, distribution, and behavior of the elements; radioactive and stable isotope systems. Aqueous geochemistry; geochemical cycles. Same as GEOL 3140. Prerequisite: GEOL 1001 or GEOL 1005; CHEM 1111-CHEM 1112.

CHEM 3143. Aqueous Geochemistry. 3 Credits.

Same as Geol 143.

CHEM 3165. Biochemistry I. 3 Credits.

Introduction to the chemistry of living cells; structure and function of proteins, lipids, carbohydrates, and nucleic acids; enzyme structure, mechanism, and regulation. Prerequisite: CHEM 2151; credit toward the degree cannot be earned for CHEM 3165 and for BIOC 3261/ BISC 3261.

CHEM 3166. Biochemistry II. 3 Credits.

Continuation of CHEM 3165. Introduction to the chemistry of living cells; structure and function of proteins, lipids, carbohydrates, and nucleic acids; enzyme structure, mechanism, and regulation. CHEM 3165 is prerequisite to CHEM 3166. Credit toward the degree cannot be earned for CHEM 3166 and for BIOC 3263/ BISC 3263.

CHEM 3166W. Biochemistry II. 3 Credits.

Continuation of CHEM 3165. Introduction to the chemistry of living cells; structure and function of proteins, lipids, carbohydrates, and nucleic acids; enzyme structure, mechanism, and regulation. CHEM 3165 is prerequisite to CHEM 3166. Credit toward the degree cannot be earned for CHEM 3166 and for BIOC 3263/ BISC 3263.

CHEM 3170. Introduction to Physical Chemistry. 3 Credits.

Thermodynamics, chemical and physical equilibria, kinetics, and spectroscopy. Examples taken from biological systems. Not open to chemistry majors. May not be taken for credit by students who have received credit for CHEM 3171- CHEM 3172 or an equivalent course. Prerequisites: CHEM 1111- CHEM 1112; MATH 1231; PHYS 1012 or PHYS 1022 or PHYS 1026; or permission of instructor.

CHEM 3171. Physical Chemistry I. 3 Credits.

Gas laws, chemical thermodynamics, chemical equilibrium, kinetics, quantum chemistry, atomic and molecular spectra, structure of solids, liquids, and macromolecules. Prerequisite: CHEM 1112; MATH 1231; PHYS 1022; or permission of instructor.

CHEM 3172. Physical Chemistry II. 3 Credits.

Continuation of CHEM 3171. Gas laws, chemical thermodynamics, chemical equilibrium, kinetics, quantum chemistry, atomic and molecular spectra, structure of solids, liquids, and macromolecules. Prerequisite: CHEM 3171.

CHEM 3173. Physical Chemistry Laboratory. 2 Credits.

Laboratory complement to CHEM 3171 and CHEM 3172. Exploration of molecular structure and bonding as revealed through observation. Laboratory fee. Prerequisites: CHEM 2123 and CHEM 3171; or corequisite: CHEM 2123 and CHEM 3171.

CHEM 3262. Biochemistry Laboratory. 2 Credits.

Study of common experimental techniques used in life science laboratories to separate and characterize biological macromolecules. Same as BIOC 3261/ BISC 3261. Prerequisite: CHEM 3165 or BIOC 3261/ BISC 3261. Laboratory fee.

CHEM 3263W. Special Topics in Biochemistry. 2 Credits.**CHEM 3564. Lipid Biotechnology. 0-2 Credits.**

Study of common experimental techniques used in life science laboratories to separate and characterize biological macromolecules. Same as BIOC 3261/ BISC 3261. Prerequisite: CHEM 3165 or BIOC 3261/ BISC 3261. Laboratory fee.

CHEM 4113. Chemical Instrumentation. 3 Credits.

Electronic analog measurements and control of electrical quantities in chemical instrumentation; digital and analog data conversion and optimization of electronic measurements in chemical instrumentation; computer interfacing and programming using PC-based systems. Prerequisite: CHEM 3172 and CHEM 4122. Laboratory fee.

CHEM 4122. Instrumental Analytical Chemistry. 3 Credits.

Theory of instrumental methods in qualitative and quantitative analysis, determination of structure, with emphasis on atomic and molecular spectrophotometry, infrared spectroscopy, nuclear magnetic resonance, mass spectrometry, chromatography, and electroanalysis. Prerequisite or concurrent registration: CHEM 3171 or permission of instructor. Correlated with CHEM 4123.

CHEM 4123. Instrumental Analytical Chemistry Laboratory. 2 Credits.

Laboratory complement to CHEM 4122. Prerequisite or concurrent registration: CHEM 3171 and CHEM 4122. Laboratory fee.

CHEM 4134. Descriptive Inorganic Chemistry. 3 Credits.

Emphasis on periodic trends and structure and reactivity of transitional metal complexes. Prerequisite: CHEM 2122.

CHEM 4195. Undergraduate Research. 1-3 Credits.

Research on problems approved by the staff. Approval must be obtained prior to registration. A final written report on the work is required. For students requesting Special Honors in chemistry, a poster or oral presentation is also required. May be repeated for credit. Majors are encouraged to take the course for two semesters. Laboratory fee.

CHEM 4195W. Undergraduate Research. 1-3 Credits.

Research on problems approved by the staff. Approval must be obtained prior to registration. A final written report on the work is required. For students requesting Special Honors in chemistry, a poster or oral presentation is also required. May be repeated for credit. Majors are encouraged to take the course for two semesters. Laboratory fee.

CHEM 6221. Spectrochemical Analysis. 3 Credits.

Theory and application of recent spectrometric methods of analysis, including advances in optimization techniques, optical instrumentation, atomic spectrometry, laser-based analytical techniques, X-ray methods, and surface analysis techniques. Prerequisite: CHEM 4122.

CHEM 6222. Biomedical Mass Spectrometry. 3 Credits.

Principles, instrumentation, methods, and applications of mass spectrometry; selected state-of-the-art methods demonstrate basic principles to show how new methods of analysis are developed; typical applications highlight solutions of biomedical problems, including proteomics and metabolomics. Prerequisite: CHEM 4122.

CHEM 6235. Advanced Inorganic Chemistry I. 3 Credits.

Application of modern chemical theories to inorganic substances and reactions; detailed study, developed from the periodic table, of the chemistry of the more common elements; electronic spectra and reaction mechanisms of complexes; organometallic chemistry; homogeneous and heterogeneous catalysis; bioinorganic chemistry. Prerequisite: CHEM 3172, CHEM 4134.

CHEM 6236. Advanced Inorganic Chemistry II. 3 Credits.

Continuation of CHEM 6235. Application of modern chemical theories to inorganic substances and reactions; detailed study, developed from the periodic table, of the chemistry of the more common elements; electronic spectra and reaction mechanisms of complexes; organometallic chemistry; homogeneous and heterogeneous catalysis; bioinorganic chemistry. Prerequisite: CHEM 3172, CHEM 4134.

CHEM 6238. Chem of Inorganic Materials. 3 Credits.

Synthesis, structure, and properties of materials such as ceramics, superconductors, ionic conductors, nanomaterials, and magnetic, optical, and electronic materials. Emphasis on traditional and low-temperature routes. Prerequisite: CHEM 3171–CHEM 3172.

CHEM 6251. Advanced Organic Chemistry I. 3 Credits.

Synthesis, reactions, and properties of organic compounds; fundamental theories of organic chemistry, emphasis on reaction mechanisms. Prerequisite: CHEM 2152.

CHEM 6252. Advanced Organic Chemistry II. 3 Credits.

Continuation of CHEM 6251. Synthesis, reactions, and properties of organic compounds; fundamental theories of organic chemistry, emphasis on reaction mechanisms. Prerequisite: CHEM 6251.

CHEM 6257. Physical-Organic Chemistry. 3 Credits.

The transition state theory of chemical kinetics, applications to reaction mechanisms; kinetic isotope effects, linear-free energy relationships, concentrated and "super" acids, Woodward-Hoffman rules, free radical reactions. Prerequisite: CHEM 6251 or permission of instructor.

CHEM 6259. Polymer Chemistry. 3 Credits.

A study of the preparation, properties, and structure of macromolecules. Prerequisite: CHEM 2152 and CHEM 3170 or CHEM 3171 or permission of instructor.

CHEM 6273. Chemical Thermodynamics. 3 Credits.

Application of thermodynamics to chemical problems. Emphasis on statistical calculation of thermodynamic properties. Prerequisite: CHEM 3172 or CHEM 6372.

CHEM 6277. Chemical Bonding. 3 Credits.

Quantum mechanics, approximate methods, electron spin, Pauli principle, atomic and molecular structure. Prerequisite: CHEM 3172 or CHEM 6372.

CHEM 6278. Molecular Spectroscopy. 3 Credits.

Applications of quantum mechanics and group theory to the interpretation of electronic, vibrational, rotational, and magnetic resonance spectroscopy. Prerequisite: CHEM 6277.

CHEM 6314. Fundamental-Computational Chem. 3 Credits.**CHEM 6315. Computational Chem-Biomolecule. 3 Credits.****CHEM 6320. Selected Topics in Analytical Chemistry. 1-3 Credits.**

Advanced topics offered in a modular format to allow an in-depth examination of a self-selected field of analytical chemistry. One to three topics may be chosen for a given semester. May be repeated for credit.

CHEM 6330. Selected Topics in Inorganic Chemistry. 1-3 Credits.

Advanced topics offered in a modular format to allow an in-depth examination of a self-selected field of inorganic chemistry. One to three topics may be chosen for a given semester. May be repeated for credit.

CHEM 6350. Selected Topics in Organic Chemistry. 1-3 Credits.

Advanced topics offered in a modular format to allow an in-depth examination of a self-selected field in organic chemistry. One to three topics may be chosen for a given semester. May be repeated for credit.

CHEM 6358. Synthesis and Structure Determination in Organic Chemistry. 3 Credits.

The design of syntheses for complex organic molecules; survey of modern synthetic methods, including asymmetric induction; spectroscopic methods of structure determination. Prerequisite: CHEM 6251 or permission of instructor.

CHEM 6370. Selected Topics in Physical Chemistry. 1-3 Credits.

Advanced topics offered in a modular format to allow an in-depth examination of a self-selected field of physical chemistry. One to three topics may be chosen for a given semester. May be repeated for credit.

CHEM 6371. Physical Chemistry I. 1-3 Credits.

Same as CHEM 3171. Admission only by departmental permission. Credit assigned upon satisfactory completion of CHEM 6372.

CHEM 6372. Physical Chemistry II. 1-3 Credits.

Continuation of CHEM 6371. Same as CHEM 3172. Admission only by departmental permission. Credit for CHEM 6371 assigned upon satisfactory completion of this course.

CHEM 6390. Selected Topics in Chemistry. 0-3 Credits.

Advanced topics offered in a modular format to allow an in-depth examination of a self-selected field in chemistry. One to three topics may be chosen for a given semester. May be repeated for credit.

CHEM 6395. Research. 1-12 Credits.

Limited to master's degree candidates. Survey of a topic approved by departmental staff and resulting in a written report and presentation of a seminar. Open to qualified students with advanced training. May be repeated for credit.

CHEM 6998. Thesis Research. 3 Credits.

Limited to students in the master's degree program.

CHEM 6999. Thesis Research. 3 Credits.

Limited to students in the Master's Degree program.

CHEM 8998. Advanced Reading and Research. 1-12 Credits.

Limited to students preparing for the Doctor of Philosophy general examination. May be repeated for credit.

CHEM 8999. Dissertation Research. 3-12 Credits.

Limited to Doctor of Philosophy candidates. May be repeated for credit.

CHINESE (CHIN)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CHIN 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the schedule of classes for more details. Restricted to First-year students in CCAS.

CHIN 1001. Beginning Chinese I. 4 Credits.

Basic functional and communicative proficiency in Chinese. Development of listening and speaking skills, reading and writing abilities, and cultural awareness.

CHIN 1002. Beginning Chinese II. 4 Credits.

Continuation of CHIN 1001. Basic functional and communicative proficiency in Chinese. Development of listening and speaking skills, reading and writing abilities, and cultural awareness. Prerequisites: CHIN 1001 or equivalent.

CHIN 1011. Intensive Beginning Chinese. 8 Credits.

Intensive beginning course equivalent to CHIN 1001- CHIN 1002. Laboratory fee.

CHIN 1088. E-Learning Tools for Chinese. 1 Credit.

Basic training for using computer programs, software, or web tools for Chinese word processing. Prerequisite: CHIN 1001. Laboratory fee.

CHIN 2003. Intermediate Chinese I. 4 Credits.

Continuation of grammar, with emphasis on speaking, reading, and writing. Prerequisite: CHIN 1002 or CHIN 1011. Laboratory fee.

CHIN 2004. Intermediate Chinese II. 4 Credits.

Continuation of CHIN 2003. Continuation of grammar, with emphasis on speaking, reading, and writing. Prerequisite: CHIN 2003. Laboratory fee.

CHIN 3105. Intermediate Chinese III. 3 Credits.

Augmentation of vocabulary, with emphasis on communicative proficiency development. Prerequisite: CHIN 2004. Laboratory fee.

CHIN 3106. Intermediate Chinese IV. 3 Credits.

Continuation of CHIN 3105. Augmentation of vocabulary, with emphasis on communicative proficiency development. Prerequisite: CHIN 3105. Laboratory fee.

CHIN 3109. Introduction to Classical Chinese. 3 Credits.

Introduction to classical writings in Chinese literature, history, and philosophy. Prerequisite: CHIN 2004 .

CHIN 3110. Introduction to Classical Chinese. 3 Credits.

Continuation of CHIN 3109. Introduction to classical writings in Chinese literature, history, and philosophy. Prerequisite: CHIN 2004 .

CHIN 3111. Chinese Literature in Translation. 3 Credits.

An introductory survey of Chinese literature read in English translation, including fiction, poetry, drama, essays, diaries, testimonials. The pre-modern period.

CHIN 3112. Chinese Literature in Translation. 3 Credits.

Continuation of CHIN 3111. An introductory survey of Chinese literature read in English translation, including fiction, poetry, drama, essays, diaries, testimonials. The modern period.

CHIN 3123. Introduction to Chinese Linguistics. 3 Credits.

The structure of the Chinese language, including such topics as the structure of sounds and words, sentence meaning and structure, the writing system, adaptation of foreign vocabulary, pragmatics, variation, and change. Course conducted in English.

CHIN 3124. Introduction to Chinese Linguistics. 3 Credits.

Continuation of CHIN 3123. The structure of the Chinese language, including such topics as the structure of sounds and words, sentence meaning and structure, the writing system, adaptation of foreign vocabulary, pragmatics, variation, and change. Course conducted in English.

CHIN 3136W. Chinese Women in Myth, Literature, and Film. 3 Credits.

Women's position in Chinese cultural and political life from prehistoric myth to the present time. Confucian writing, traditional theatre, and films and novels set in China. A general survey of Chinese history establishes the context for discussions of cultural and political phenomena, such as foot binding and the one-child policy. Course conducted in English. (Same as WSTU 3136W).

CHIN 3162. Chinese Culture Through Film. 3 Credits.

Survey of the Chinese cultural heritage presented through films. Topics include literature, philosophy, art, religion, and social history from prehistorical times to the modern era. Course conducted in English.

CHIN 3163. Taiwanese Literature and Film. 3 Credits.

An introductory survey of modern and contemporary Taiwanese literary and cinematic works. Readings include poetry, folk lyrics, dramas, novels, and memoirs that bear distinctive marks of Taiwan's diverse literary trends. Films include those by internationally renowned directors such as Hou Hsiao-hsien, Ang Lee, Edward Yang, and Tsai Ming-liang.

CHIN 3171. Poetry of the Tang and Song Periods. 3 Credits.

Reading of works of leading poets. Discussion of content and style. Prerequisite: CHIN 3109 .

CHIN 3172. Poetry of the Tang and Song Periods. 3 Credits.

Continuation of CHIN 3171. Reading of works of leading poets. Discussion of content and style. Prerequisite: CHIN 3109.

CHIN 3173. Chinese Drama and Theatre. 3 Credits.

Chinese drama and theatrical genres. Topics include the relation between theatrical performance and ritual practice, gender identities, and cross-cultural exchange. Course conducted in English.

CHIN 3188. Confucian Religion. 3 Credits.

CHIN 3841. Religion in Modern China. 3 Credits.

The changes, destructions, and reconstructions of Chinese religions from the late 19th century to the present day. The relationship between the (re)making of Chinese religions and the making of a modern Chinese nation-state. Same as REL 3841.

CHIN 4107. Readings in Modern Chinese I. 3 Credits.

Readings in newspapers, social science materials, and documentary materials. Prerequisite: CHIN 3106 .

CHIN 4108. Readings in Modern Chinese. 3 Credits.

Continuation of CHIN 4107. Readings in newspapers, social science materials, and documentary materials. Prerequisite: CHIN 4107 or equivalent.

CHIN 4119W. Business Chinese. 3 Credits.

Basics of business-related communication in both oral and written form. Integrated language skills. Prerequisite: CHIN 4107 or CHIN 4121 preparation approved by the instructor.

CHIN 4121W. Advanced Conversation and Composition I. 3 Credits.

Productive skills at the advanced discourse level, topic-specific practice of commonly used speech patterns and writing formats. Prerequisite: CHIN 3106 and permission of instructor.

CHIN 4122W. Advanced Conversation and Composition II. 3 Credits.

Continuation of CHIN 4121. Productive skills at the advanced discourse level, topic-specific practice of commonly used speech patterns and writing formats. Prerequisite: CHIN 4121 and permission of instructor.

CHIN 4179. 20th-Century Chinese Literature. 3 Credits.

Selected works of major 20th-century writers, including Lu Xun, Lao She, Zhang Ailing, Bai Xianrong, and others. Lectures and discussion in Chinese. Prerequisite: CHIN 4107 .

CHIN 4180W. 20th-Century Chinese Literature II. 3 Credits.

Continuation of CHIN 4179. Selected works of major 20th-century writers, including Lu Xun, Lao She, Zhang Ailing, Bai Xianrong, and others. Lectures and discussion in Chinese. Prerequisite: CHIN 4107 .

CHIN 4185. Directed Reading I. 3 Credits.

Reading of material in the student's field of interest. Admission by permission of instructor.

CHIN 4186. Directed Reading II. 3 Credits.

Continuation of CHIN 4185. Reading of material in the student's field of interest. Admission by permission of instructor.

CHIN 4186W. Directed Reading II. 3 Credits.

Continuation of CHIN 4185. Reading of material in the student's field of interest. Admission by permission of instructor.

CHIN 4198. Proseminar: Readings for the Major in Chinese Language and Literature. 3 Credits.

Recommended for all majors. Preparation for advanced research in Chinese sources. One-on-one tutorials, seminar meetings, and practice in consulting Chinese reference works, both traditional and modern. Literary criticism; keeping abreast of sinological scholarship. Prerequisite: CHIN 3106.

CHIN 4199. Proseminar: Readings for the Major in Chinese Language and Literature. 3 Credits.

Continuation of CHIN 4198. Recommended for all majors. Preparation for advanced research in Chinese sources. One-on-one tutorials, seminar meetings, and practice in consulting Chinese reference works, both traditional and modern. Literary criticism; keeping abreast of sinological scholarship. Prerequisite: CHIN 4198.

CHIN 6109. Introduction to Classical Chinese. 3 Credits.

Students explore the basic grammar and vocabulary of literary Chinese. Selections are based on the students' interests and level of proficiency, and will include such genres as prose, short stories, performance texts, ci poetry and qu. Graduate students who are taking 6109 will demonstrate their problem-solving and reading abilities through a 15-20 annotated translation at the end of the semester. Prerequisites: CHIN 2004 or equivalent. (Same as CHIN 3109).

CHIN 6110. Introduction to Classical Chinese. 3 Credits.

Students explore the basic grammar and vocabulary of literary Chinese. Selections are based on the students' interests and level of proficiency, and will include such genres as prose, short stories, performance texts, ci poetry and qu. Graduate students who are taking 6109-6110 will demonstrate their problem-solving and reading abilities through a 15-20 annotated translation at the end of the semester. Prerequisites: CHIN 2004 or equivalent. (Same as CHIN 3110).

CHIN 6111. Chinese Literature in Translation. 3 Credits.

A survey of the literatures and cultures of pre-modern China, from the origin of Chinese civilization through the last imperial dynasty including the works of representative writers as well as major literary modes, such as historical documents, philosophical writings, poetry, folktale, short story, drama, and novel. Graduate students taking CHIN 6111 will demonstrate their ability in conducting independent research by writing a 15-20 page research paper.

CHIN 6112. Chinese Literature in Translation. 3 Credits.

A survey of the literatures and cultures of China, from late Qing (the last imperial dynasty) to contemporary China and the Chinese-speaking world. Students will be introduced to works of representative writers as well as major literary genres, including fictions, poetry, dramas, and essays. Students taking CHIN 6112 will develop the ability to conduct independent research on the primary text, and to evaluate the significance of the works in cross-cultural, comparative context, by writing a 15-20 page term paper. (Same as CHIN 3112).

CHIN 6123. Structure of Chinese. 3 Credits.

Introduction to the structure of Chinese from the perspective of linguistic analysis; serves to prepare students for more advanced graduate level courses in Chinese linguistics. Coursework includes introductory readings, readings from the primary linguistics research literature, and hands-on problem solving, etc.

CHIN 6125. History of the Chinese Language. 3 Credits.

The methodologies and theories in Chinese historical phonology and syntax. Students will read materials in the original language, e.g. Classical Chinese, Vernacular writing, and etc. Students will work towards a term research paper throughout the semester on a topic of their own choice. For graduate students, there will be one extra question on all of the assignments throughout the semester including the homework problem sets, midterm exams and final exam.

CHIN 6126. Chinese Phonology. 3 Credits.

The theory and practice in Chinese phonology. Students will be provided with fundamentals of articulatory phonetics (the study of how speech sounds are produced) and phonology (the study of sound systems), which they apply to the study of phonetic and phonological properties of standard Chinese. Prerequisites: CHIN 1001 or equivalent.

CHIN 6128. Chinese Semantics. 3 Credits.

The formal approaches to semantics and interface issues between semantics and syntax and phonology, with an emphasis on aspects related to Chinese, such as quantificational isomorphism, modality, focus, question semantics, adjectival semantics and etc. Graduate students taking this course will turn in a research paper by the end of the semester to demonstrate their understanding of a certain topic and ability to do independent research.

CHIN 6171. Poetry of the Tang and Song Periods. 3 Credits.

Introduction to the world of Chinese poetry; examination of exemplary works of leading Tang and Song poets. Students will be reading and interpreting works by Li Bo, Du Fu, Han Shan, Du Xunhe, and Bai Juyi. Through individual and collaborative analytical exercises, students will become familiar with styles and aesthetic features of Tang and Song poetry. Students will be assigned a translation project: they will select a single classical poet, and translate a selection of poems by that poet into English, with full annotations. Undergraduate students are allowed by instructor approval. Prerequisites: CHIN 3109 or equivalent.

CHIN 6172. Poetry of the Tang and Song Periods. 3 Credits.

This course introduces students to the world of Chinese poetry by examining exemplary works of leading Tang and Song poets. Students will be reading and interpreting works by Li Bo, Du Fu, Han Shan, Du Xunhe, and Bai Juyi. Class work includes lectures by the instructor but emphasizes student participation through means such as guided translation, textrecitation, and students' presentations. Through individual and collaborative analytical exercises, students will become familiar with styles and aesthetic features of Tang and Song poetry. Students who take 6171-6172 will be assigned a translation project: they will select a single classical poet, and translate a selection of poems by that poet into English, with full annotations. Undergraduate students are allowed by instructor approval. Prerequisites: CHIN 3109 or equivalent.

CHIN 6173. Traditional Chinese Theatre and Drama. 3 Credits.

Traditional Chinese Theatre and Drama is a multimedia-enhanced course, which examines dramas and theatrical genres of China of pre-modern time. Students will be introduced to the history of Chinese theatre, the aesthetics of theatrical performances, as well as works of representative playwrights in major dramatic genres. Students will develop the ability to conduct independent research by writing a 15-20-page research paper on the primary text, and to evaluate the significance of the works in cross-cultural, comparative context. Undergraduate students are allowed by instructor approval.

CHIN 6179. 20th Century Chinese Literature I. 3 Credits.

Introduction to modern Chinese literature through close reading and discussion of representative literary works from the era. The readings will include several genres such as essay, poetry, short story, and novella. All readings and class discussion will be in Chinese. Graduate students taking CHIN 6179 will demonstrate their ability in conducting independent research by writing a 15-20 page research paper. Undergraduate students are allowed only by instructor approval. Prerequisites: CHIN 4107 or equivalent.

CHIN 6180. 20th-Century Chinese Literature II. 3 Credits.

Introduction to the literature of 20th century China through close reading and discussion of representative literary works from the era. All readings and class discussion are in Chinese. Graduate students taking CHIN 6179 will demonstrate their ability in conducting independent research by writing a 15-20 page research paper. Undergraduate students are allowed only by instructor approval. Prerequisites: CHIN 4107 or equivalent.

CHIN 6199. Graduate Seminar. 3 Credits.

Preparation for advanced research in Chinese sources. One-on-one tutorials, seminar meetings, and practice in consulting Chinese reference works, both traditional and modern. Literary criticism; keeping abreast of sinological scholarship. Students will do research on a selected topic in Chinese literature or philosophy, and prepare a research paper of 25 or more pages on this topic. Restricted to individualized curriculum; admission by instructor approval.

CHIN 6201. Second Language Acquisition of Mandarin Chinese. 3 Credits.

This course is an overview of, and introduction to, the theoretical foundations of second language (L2) acquisition in general and the acquisition of Chinese as a foreign language in particular. It is designed to deepen the understanding of the Chinese language from the perspective of L2 learners. Research papers focusing on the L2 acquisition of Mandarin Chinese from various perspectives, such as psycholinguistics, cognitive linguistics, pedagogical theories, will be introduced in this class.

CHIN 6210. Introduction to Teaching Chinese as a Foreign Language. 3 Credits.

Gain knowledge of TCFL essentials including Chinese pedagogical grammar, instructional design, technology application, and testing and assessment. Discuss National Standards and assessment guidelines for proficiency development, and current studies of second language acquisition (SLA). Examine key issues, studies, and practices on the teaching and acquisition of difficult areas of Chinese, such as the pronunciation and writing systems, as well as topics of general interest. Explore language-teaching methodologies and techniques, and Chinese language testing and assessment. Admission by permission of instructor.

CHIN 6310. Practicum in Chinese Language Instruction. 3 Credits.

Develop basic skills for teaching Chinese as a foreign language (TCFL) through classroom observation, group discussion, lesson planning, syllabus writing, test designing, and supervised field experience in Chinese instruction. Gain knowledge of classroom management. Required seminar and practice sessions. Admission by permission of instructor. Prerequisites: CHIN 6210 or permission of instructor.

CHIN 6841. Religion in Modern China. 3 Credits.

The changes, destructions, and reconstructions of Chinese religions from the late 19th century to the present day. The relationship between the (re)making of Chinese religions and the making of a modern Chinese nation-state. (Same as CHIN 3841, REL 3841).

CHIN 6998. Thesis Research. 3 Credits.**CHIN 6999. Thesis Research. 3 Credits.**

CIVIL ENGINEERING (CE)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students

- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CE 1010. Introduction to Civil and Environmental Engineering. 1 Credit.

An introduction to the profession of civil and environmental engineering. Field visits and laboratory exercises complement classroom instruction. (Fall).

CE 1020. Introduction to a Sustainable World. 1 Credit.

The science underlying the basic processes that gave rise to the world we live in and that maintain its viability for human life. Ecosystem-functioning environmental issues, such as greenhouse gas emission and ozone, with current efforts to resolve them. Technological innovations in the context of sustainability.

CE 1098. Variable Topics. 1-36 Credits.**CE 2210. Engineering Computations. 3 Credits.**

Numerical methods for engineering applications. Methods for solving systems of linear equations, root finding, curve fitting, and data approximation. Numerical differentiation and integration and numerical solution of differential equations. Computer applications. Prerequisites: CSCI 1121, APSC 2113. (Spring).

CE 2220. Introduction to the Mechanics of Solids. 3 Credits.

Stress and strain, axial load problems, torsion, shear force and bending moment, pure bending of beams, shearing stresses in beams, compound stresses, analysis of plane stress and plane strain, combined stresses, deflection of beams, statically indeterminate problems, columns, energy methods. Prerequisite: APSC 2057, APSC 2113.

CE 2510. Environmental Sustainability. 3 Credits.

An introduction to environmental sustainability with focus on the nexus of water, energy, and climate; energy demands of water systems, water footprints of energy generation, and how the two valuable resources are limiting each other; technologies and research frontiers toward a sustainable water and energy supply.

CE 2710. Introduction to Transportation Engineering. 3 Credits.

Transportation system components; roadway traffic capacity and network performance measures; signalized and unsignalized intersections; monitoring techniques, instruments and data processing. Sustainability issues and environmental impact of transportation systems with focus on urban design, planning and regulation. Prerequisites: Math 2233. (Spring).

CE 3110W. Civil Engineering Materials. 2 Credits.

Mechanical properties and behavior of civil engineering materials such as metals, concrete, and fiber-reinforced polymer composites. Properties range from plastic deformations of metallic materials to crushing of confined and unconfined concrete. Basis of the strength of materials. Concepts of creep, fatigue, fracture, and crack propagation. Prerequisite: CE 2220. (Fall).

CE 3111W. Civil Engineering Materials Lab. 1 Credit.

Measurement of stress-strain characteristics and study of failure modes in ductile steel, brittle concrete, and anisotropic composite materials. Experiments include data collection, data analysis, and interpretation and presentation of results regarding tension, compression, bending, impact, and shear properties. Prerequisite or corequisite: CE 3110W. Prerequisites: CE 3110W. (Fall).

CE 3140. Sustainability in Engineering Materials. 2 Credits.

Sustainable engineering: overall materials energy needs/properties and impacts; load resistance and aging, thermodynamics, water conservation, heat transfer, use of energy-efficient materials in construction, life-cycle assessment. Prerequisite: CE 3110, CE 3111.

CE 3230. Structural Theory I. 3 Credits.

Theory of statically determinate structures; stability and determinacy; influence lines and moving loads. Analysis of beams, frames, trusses, and arches. Calculation of deflections. Prerequisites: CE 2210, CE 2220. (Fall).

CE 3240. Structural Theory 2. 3 Credits.

Theory of statically indeterminate structures using matrix methods and classical approaches such as moment distribution and slope-deflection; influence lines; energy methods. Prerequisite: CE 3230.

CE 3310. Reinforced Concrete Structures. 3 Credits.

Properties of concrete and reinforcement; design of flexural reinforcement, shear reinforcement; development of reinforcement; design of columns, floor slabs; ethics and professionalism in design. A design project, including the use of computer software and a detailed report, is required. Prerequisite or corequisite: CE 3240.

CE 3520. Environmental Engineering I: Water Resources and Water Quality. 3 Credits.

Physical and chemical analyses of water quality and characteristics. Microbiology of water and pathogens. Introduction to water treatment processes involving coagulation, flocculation, filtration, and disinfection. Prerequisite or corequisite: CE 3610.

CE 3521. Environmental Engineering Laboratory. 1 Credit.

Laboratory experiments for physical and chemical analyses of water and wastewater. Measurement of turbidity, alkalinity, dissolved oxygen, BOD, COD, suspended solids, and optimum coagulant dose using jar tests. Corequisite: CE 3520.

CE 3610. Hydraulics. 3 Credits.

Fluid statics: pressure forces, buoyancy, and flotation. Application of kinematic principles; flow fields, stream tubes, and flow nets. Fluid dynamics: applications to pipe flow, hydraulic models, measurement of pressure, and velocity. Open channel flow: applications to water resources engineering. Prerequisite: MAE 3126.

CE 3611. Hydraulics Laboratory. 1 Credit.

Laboratory experiments and demonstrations of hydraulics in pipe and open-channel flow. Topics include center of pressure, floating bodies, Bernoulli's theorem, discharge coefficients, velocity profile, and head losses. Prerequisite or corequisite: CE 3610.

CE 3720. Highway Engineering and Design. 3 Credits.

Road vehicle performance. Principles of highway design: horizontal and vertical alignments, roadside design; drainage and drainage structures, earthwork, intersections, interchanges, parking facilities; basic traffic models; highway materials. Application of safety standards. Prerequisite: MATH 2233; prerequisite or corequisite: APSC 3115 and CE 2220.

CE 3730. Sustainable Urban Planning Dynamics. 3 Credits.

Human and physical processes shaping urban environments; human-environment interactions in the context of an urban region; urban design, materials, transport, planning, and regulation. Prerequisite: CE 2710.

CE 4320. Metal Structures. 3 Credits.

Principles of the design of metal structures, structural elements, connections, specific problems of analysis including the use of computer software, methods of construction, professionalism in design. Prerequisite: CE 3240.

CE 4330W. Contracts and Specifications. 2 Credits.

Law of contracts, construction contracts, specifications, bidding, insurance and bonds, professional liability, arbitration of disputes, litigation. Prerequisite: junior standing.

CE 4340. Design and Cost Analysis of Civil Engineering Structures. 0-3 Credits.

Total structural systems concepts. Design of civil engineering structures such as piers, wharves, bulkheads, offshore platforms, dams, and other special structures. Principles of cost analysis for timber, steel, and reinforced concrete structures. Project and report are required. Prerequisites: CE 3310, CE 4320, CE 4410. (Spring).

CE 4410. Introduction to Geotechnical Engineering. 3 Credits.

Soils and rock formation, soil composition, permeability, seepage and flow net analysis, stresses in soil medium, consolidation and settlement, shear strength of soil, analysis of lateral earth pressures, soil compaction. Prerequisite: CE 2220, MAE 3126.

CE 4411. Geotechnical Engineering Laboratory. 1 Credit.

Laboratory experiments to evaluate liquid and plastic limits, grain-size distribution, shear strength, compressibility, permeability, and moisture-density relationship of soils. Prerequisite or corequisite: CE 4410.

CE 4450. Introduction to Geo-environmental Engineering. 3 Credits.

Characterization of soils and wastes, engineering properties of soils and geo-synthetics, fundamental concepts of fate and transport of contaminants, common practice in design and construction of waste containment systems, current methods for remediation of contaminated groundwater and soils. Prerequisite: CE 3520, CE 4410.

CE 4530. Environmental Engineering II: Water Supply and Pollution Control. 3 Credits.

Introduction to wastewater treatment systems including clarification, suspended and attached growth processes. Use of dissolved oxygen models. Water supply and wastewater collection systems, applied hydraulics of pipelines and pumps. Planning to meet quality needs and regulatory requirements. Prerequisite: CE 3520.

CE 4620. Hydrology and Hydraulic Design. 3 Credits.

Descriptive hydrology: hydrologic cycle, precipitation, stream flow, evaporation, and transpiration. Quantitative hydrology: hydrograph analysis, hydrographs of basin outflow, storage routing. Probability concepts in hydrology: flood frequency, rainfall frequency, stochastic hydrology. Culverts and stilling basins. Prerequisite or corequisite: APSC 3115, CE 3610.

CE 4810. Research. 1-3 Credits.

Applied research and experimentation projects, as arranged. Prerequisite: junior or senior status.

CE 4820. Special Topics. 1-6 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

CE 6101. Numerical Methods in Engineering. 3 Credits.

Eigenvalue problems. Numerical solution of systems of equations and ordinary differential equations. Solution techniques for elliptic, parabolic, and hyperbolic partial differential equations. Numerical methods for solving finite element equations. Introduction to solution of fluid-flow problems. Prerequisite: CE 2210.

CE 6102. Application of Probability Methods in Civil Engineering. 3 Credits.

Uncertainty in real-world information; basic probability concepts and models; random variables; useful probability distributions, statistical estimation of distribution parameters from observed data; empirical determination of distribution models; testing hypothesis; regression and correlation analyses; decision theory. Prerequisite: APSC 3115.

CE 6201. Advanced Strength of Materials. 3 Credits.

Deflection of beams using singular functions, unsymmetrical bending of beams, beams on elastic foundation. Beam-column problems, shear center for thin-walled beam cross sections, curved beams. Applications of energy methods, torsion, basic equations for theory of elasticity, thin- and thick-walled cylinders, stress concentration, and failure criteria. Prerequisites: CE 2220, CE 3240. (Spring).

CE 6202. Methods of Structural Analysis. 3 Credits.

Modern methods of analysis of statically indeterminate structures, matrix analysis based on flexibility, stiffness, energy and variational methods, substructuring techniques; consideration of plastic collapse of structures; introduction to the finite element method. Prerequisites: CE 2220, CE 3240. (Fall).

CE 6203. Reliability Analysis of Engineering Structures. 3 Credits.

Probability theory, theory of structural reliability, probabilistic analysis of strength and loads, risk and reliability function, empirical distribution, probability plot. The design service life, method of perturbation, Monte Carlo simulation. Fatigue and fracture, proof testing, inspection and repair-replacement maintenance. Prerequisite: APSC 3115.

CE 6204. Analysis of Plates & Shells. 3 Credits.

Bending and stretching of thin elastic plates under loading with various boundary conditions, continuous plates and plates on elastic foundations, theory of folded-plate structures. Theory of curved surfaces; general linear bending theory and its simplification to membrane theory; bending stresses in shells of revolution, shallow-shell theory. Prerequisites: CE 2220, CE 3240. (Spring, odd years).

CE 6205. Theory of Structural Stability. 3 Credits.

General criteria for stability, buckling of elastic and inelastic columns and frames, torsional and lateral buckling, variational methods. Buckling of plates and shells under static loads, stability of stiffened structures, effect of imperfections and boundary conditions. Prerequisites: CE 2220, CE 3240. (Fall).

CE 6206. Continuum Mechanics. 3 Credits.

Introduction to the mechanics of continuous media. Tensor calculus; kinematics; stress and stress rate, conservation of mass, conservation of linear and angular momentum, energy balance, second law of thermodynamics; constitutive theory; linear and nonlinear elasticity, newtonian fluids, micropolar elasticity. Prerequisites: CE 2220. (Fall, spring, and summer, even years).

CE 6207. Theory of Elasticity I. 3 Credits.

Introduction to Cartesian tensors; deformation, stress, constitutive relations for linear elasticity; formulation of boundary value problems, variational principles, torsion and bending of prismatic rods, plane problems. Prerequisites: CE 2220. (Same as MAE 6207) (Spring).

CE 6208. Plasticity. 3 Credits.

Introduction to the continuum theory of plastic deformation. Physical basis of rate-independent plasticity. Concepts of yield, strain hardening and softening, reverse yield, and cyclic plasticity. Constitutive equations describing plastic deformation. Prerequisite: CE 6201 or CE 6206.

CE 6209. Mechanics of Composite Materials. 3 Credits.

Stress-strain relationship for orthotropic materials, invariant properties of an orthotropic lamina, biaxial strength theory for an orthotropic lamina. Mechanics of materials approach to stiffness, elasticity approach to stiffness. Classical lamination theory, strength of laminates. Statistical theory of fatigue damage. Same as MAE 6233. Prerequisite: CE 3240.

CE 6210. Introduction to Finite Element Analysis. 3 Credits.

Calculus of variations. Variational formulation of the finite element method. Weighted residual techniques. Computer implementation of the finite element method. Application to problems in heat transfer, stress analysis, fluid flow, and structural analysis. Prerequisites: proficiency in one computer language, CE 2220, CE 3240. (Fall).

CE 6301. Design of Reinforced Concrete Structures. 3 Credits.

Structural behavior of reinforced concrete structures, ultimate strength and deformation characteristics; design of structural components including beams, columns, floor slabs, deep beams, corbels, and composite slab/beam systems. Prerequisite: CE 3310.

CE 6302. Prestressed Concrete Structures. 3 Credits.

Structural behavior and failure modes of prestressed concrete structures; design in prestressed concrete, including long-span structures, bridges, and precast systems. Prerequisite: CE 3310.

CE 6310. Advanced Reinforced Concrete Structures. 3 Credits.

Conception, analysis, and design of low-rise and high-rise buildings by ultimate-strength methods, precast systems, progressive collapse, earthquake considerations, domes, folded plates, shell-type structures, and special topics. Prerequisite: CE 6301.

CE 6311. Bridge Design. 3 Credits.

Application of basic design procedures for reinforced and prestressed concrete bridges, according to AASHTO bridge specifications. Various types of concrete bridges, design superstructure bridge elements (deck slab, girders, bearing pads), and development of superstructure/substructure details. Prerequisite: CE 6302.

CE 6320. Design of Metal Structures. 3 Credits.

Structural behavior of metal structures and composite girders. Conception, analysis, and design of low-rise and high-rise buildings by elastic and inelastic methods. Earthquake considerations and special topics. Prerequisite: CE 4320.

CE 6321. Advanced Metal Structures. 3 Credits.

Conception and design of advanced structural components and systems, hysteretic behavior, plastic design principles, box-type girders, cable systems, and unique structural systems. Prerequisite: CE 6320. (As arranged).

CE 6340. Structural Dynamics. 3 Credits.

Vibration of continuous systems: membranes, beam plates, and shells; approximate methods of vibration analysis; methods of integral transform; analysis of nonlinear systems; wave propagation. Prerequisites: APSC 2058, CE 3240. (Fall, odd years).

CE 6341. Random Vibration of Structures. 3 Credits.

Introduction to random processes, responses of linear structures to stationary and nonstationary random inputs. Structural responses to earthquakes, waves, boundary-layer turbulences, wind loads, etc. Failure analysis of structures under random loads. Prerequisites: APSC 3115, CE 6340. (Spring, even years).

CE 6342. Structural Design to Resist Natural Hazards. 3 Credits.

Prediction of forces due to earthquakes and strong winds; generalized codes; pseudostatic methods for preliminary design; codes based on spectra, energy absorption and ductility; influence of foundations; ground failures; static and aeroelastic effects of strong winds. Design project. Prerequisites: CE 3240, CE 4340, either CE 6340 or CE 6701. (Spring).

CE 6350. Intro to Biomechanics. 3 Credits.

Fundamentals of continuum mechanics as they apply to biological materials: concepts of stress, strain, and equilibrium; elastic and viscoelastic properties of solids; physiological fluid mechanics and bioheat and mass transfer. Fundamentals of solid mechanics of soft tissues and bone structures. Development of computer models and applications. Prerequisite: CE 2220.

CE 6401. Fundamentals of Soil Behavior. 3 Credits.

Soil mineralogy, clay-water-electrolyte systems, soil composition, fabric, structure, volume change behavior, permeability, coupled phenomena, in-situ evaluation of soil behavior. Prerequisite: CE 4410.

CE 6402. Theoretical Soil Mechanics. 3 Credits.

Porous media, stress-strain behavior of soil skeleton, elastic and elastoplastic models for soil behavior, critical state concept, cam clay, strength of soils, stress-dilatancy, stress paths. (Fall, odd years).

CE 6403. Geotechnical Engineering. 3 Credits.

Principles of soil mechanics applied to the analysis and design of mat foundations, pile foundations, retaining structures including sheeting and bracing systems, and waterfront structures. Foundations on difficult soils and reinforced earth structures. Prerequisite: CE 4410.

CE 6404. Geotechnical Earthquake Engineering. 3 Credits.

Ground motion, wave propagation, foundation isolation, site response analysis, seismic stability of retaining structures, soil structure interaction. Prerequisite: graduate standing.

CE 6405. Rock Engineering. 3 Credits.

Classification and properties of rock; nature of rock masses and rock discontinuities; field exploration; methods of excavation; design and applications to foundation slopes, tunnels, and chambers in rock. Prerequisite: CE 4410.

CE 6501. Environmental Chemistry. 3 Credits.

Principles of chemistry of natural waters, water supplies, wastewaters, hazardous wastes. Stoichiometry, equilibrium, solubility, kinetics, organic chemistry, biochemistry, analytical techniques. Examples from water/wastewater practice to illustrate applications. Prerequisites: CHEM 1111, CHEM 1112. (Fall).

CE 6502. Advanced Sanitary Engineering Design. 3 Credits.

Elements of design including basic parameters and hydraulic requirements. Layout and design of water supply and wastewater systems, pumping stations, and treatment plants. Plant expansions and modifications. Prerequisite: CE 4530.

CE 6503. Principles of Environmental Engineering. 3 Credits.

Basic concepts of water, air, and terrestrial environments and interrelationships among them. Principles of environmental chemistry and microbiology. Assessment of environmental quality and impacts. Environment and health. Water and wastewater systems. Legal and regulatory controls. Prerequisites: CE 3520. (Fall).

CE 6504. Water and Wastewater Treatment Processes. 3 Credits.

Theory and application of commonly used processes. Sedimentation, coagulation, filtration, disinfection, gas transfer, activated sludge, trickling filters, oxidation ponds, sorption, and sludge stabilization and disposal. Process combinations to produce treatment systems. Prerequisite: CE 6503.

CE 6505. Environmental Impact Assessment. 3 Credits.

Public policy and legislation on environmental quality. Methods for assessing impacts of engineering projects. Technology for assessing impacts on air, water, and land environments, applied to transportation facilities, water and wastewater facilities, industrial and community development. Prerequisites: CE 3520. (Fall).

CE 6506. Microbiology for Environmental Engineers. 3 Credits.

Principles and applications of advanced treatment systems for water, wastewater, and hazardous wastes, including: biological nutrient removal, oxidation-reduction processes, stripping, sorption, membrane processes, chemical precipitation, others. Prerequisites: CE 3520. (Spring, even years).

CE 6507. Advanced Treatment Processes. 3 Credits.

Principles and applications of advanced treatment systems for water, waste-water, and hazardous wastes, including: biological nutrient removal, oxidation-reduction processes, stripping, sorption, membrane processes, chemical precipitation, others. Prerequisite: CE 6504.

CE 6508. Industrial Waste Treatment. 3 Credits.

Types of industries, waste sources. Characteristics, measurements, and evaluation. Minimization and reuse. Treatment process selection, development, and design. Regulations, permits, standards, monitoring, and pretreatment. (Fall).

CE 6509. Introduction to Hazardous Wastes. 3 Credits.

Regulations, including RCRA and Superfund. Transport and fate of hazardous substances. Elements of environmental toxicology, risk assessment, and hazard ranking. Monitoring, data collection, and evaluation. Waste minimization. Case histories. Prerequisites: CE 3520. (Spring).

CE 6601. Open Channel Flow. 3 Credits.

Types and regimes of flow; energy and momentum principles, uniform flow, gradually varied flow, spatially and rapidly varied flow. Flow in nonprismatic channels. Unsteady flow; dam break problem, flood routing. Prerequisite: CE 3610.

CE 6602. Hydraulic Engineering. 3 Credits.

Hydraulic design of conveyance, regulating, and measurement structures. Design for spillways, energy dissipators, inlet and outlet works related to dams. Forces on hydraulic structure and stability analysis. Hydraulic turbines and pumps. Design considerations for flow through pipes. Transients and cavitation. Prerequisite: CE 3610.

CE 6603. Design of Dams. 3 Credits.

Project planning and investigations. Types of dams; design of earth-rock fill dams; stability analysis, foundation treatment, wind-wave protection. Construction methods for dams. Reservoir sedimentation. Safety inspection of dams. Prerequisite: CE 3610.

CE 6604. Advanced Hydrology. 3 Credits.

Precipitation, evaporation, and transpiration. Soil physics; stream flow, drainage basins, hydrograph analysis, and stream-flow routing. Design criteria, flood frequency statistics and analysis, flood forecasting and control, water supply forecasting. Prerequisite: CE 4620.

CE 6605. Ground Water and Seepage. 3 Credits.

Permeability theory of groundwater flow, flow nets, analogs, computer solutions; applications to engineering problems such as excavation dewatering, flow through dams, stabilization of earth slopes. Prerequisites: CE 4410. (Spring).

CE 6606. Mechanics of Water Waves. 3 Credits.

Irrrotational theory for deep- and shallow-water waves, reflexion, refraction, diffraction, attenuation. Water waves of finite amplitude: shallow-water theory, tides, bores, long-waves theory, conoidal and solitary waves. Wave generation by wind. Wave breaking and reflexion. Prerequisite: APSC 6213 and permission of instructor.

CE 6607. Water Resources Planning and Control. 3 Credits.

The parameters of water resources planning and control, economics of water resources and related natural resources, economics of water-quality control, physical parameters of water resource development, water resources law. Prerequisite: approval of department.

CE 6608. Hydraulic Modeling. 3 Credits.

Dimensional analysis and similitude. Types of models—physical, mathematical. Distortions in physical models. Erodible bed models. Prerequisite: CE 3610.

CE 6609. Numerical Methods in Environmental and Water Resources. 3 Credits.

Use of microcomputers in water resources. Elements of finite difference schemes, basic operations, convergence, stability, and consistency. Nonuniform flow and error analysis; unsteady laminar flow; diffusion problems; unsteady flow in open channels; water hammer, seepage flow, and diffusion-dispersion problems. Prerequisites: CE 2210, MAE 3126. (Spring).

CE 6610. Pollution Transport Systems. 3 Credits.

Distribution of pollutants in natural waters and atmosphere, diffusive and advective transport, mathematics for stream pollutant deoxygenation rates, groundwater pollution transport, sediment transport, thermal transport, numerical simulation of pollutant transports in streams and estuaries. Prerequisite: CE 3610, MAE 2131.

CE 6701. Analytical Mechanics. 3 Credits.

Fundamental principles, particle and rigid-body dynamics, generalized coordinates, variational principles and Lagrange's equations, nonholonomic systems, Hamilton's equations, theory of small oscillations. Prerequisites: APSC 2058, APSC 2113. (Fall).

CE 6702. Vehicle Dynamics. 3 Credits.

Engineering principles and analytical methods explaining the performance of an automotive vehicle. Basic mechanics governing vehicle dynamic performance in longitudinal, ride, and handling modes. Engineering analysis techniques applied to basic systems and subsystems to derive the governing equations. Prerequisite or corequisite: CE 6701. Prerequisites: CE 6701 (either prerequisite or corequisite). (Spring, even years).

CE 6705. Nonlinear Finite Element Modeling and Simulation. 3 Credits.

Rigid and flexible body methods for modeling crashes. Application of dynamic nonlinear finite element methods with contact algorithms for modeling crash phenomena. Modeling and simulation of vehicles, airbags, safety restraining systems, and highway barriers. (Spring).

CE 6706. Pavement & Runway Design. 3 Credits.

Pavement types, wheel-load characteristics; stresses in pavements and subgrades; empirical methods of design of flexible and rigid highway and airfield pavements; general principles of runway design. (Spring, odd years).

CE 6707. Systems Dynamics Modeling and Control. 3 Credits.

Introduction of concepts in control theory and applications to solve problems in civil and transportation engineering dealing with single-input/single-output and multi-input/multi-output systems. Review of classical control theory in the frequency and time domain, state-space analysis, system optimization, and non-linear control. (Fall).

CE 6721. Traffic Engineering and Highway Safety. 3 Credits.

Roadway traffic capacity and network performance measures; steady and unsteady traffic flow phenomena; traffic control signalization theory and practical implementation; monitoring techniques, instruments, and data processing for highway safety. Traffic related highway safety design concepts. (Fall).

CE 6722. Intelligent Transportation Systems. 3 Credits.

Commands, controls and communications in modern multimodal transportation; infrastructure/highway and vehicle automation, advanced traffic management, vehicle control and safety systems; information, data, and sensory requirements; practical applications and projects. Prerequisites: CE 2710 or CE 3720. (Spring).

CE 6800. Special Topics. 1-6 Credits.

Topic to be announced in the Schedule of Classes.

CE 6801. Civil and Environmental Engineering Graduate Internship. 1 Credit.

For graduate students in the department. May be repeated once for credit. Prerequisite: required courses in the area of focus and department approval. Additional prerequisites may be required for a specific internship as determined by the research supervisor.

CE 6808. Research. 1-12 Credits.

Basic research projects, as arranged. May be repeated for credit.

CE 6998. Thesis Research. 3 Credits.**CE 6999. Thesis Research. 3 Credits.****CE 8320. Theory of Elasticity II. 3 Credits.**

Application of integral transform and analytic function theory to solution of plane problems; elastic wave propagation. Three-dimensional elasto-statics. Prerequisite: APSC 6211; CE 6207.

CE 8321. Nonlinear Mechanics of Continua. 3 Credits.

Polar decomposition, invariance, isotropy, representation theorems for invariants and isotropic tensor functions. Deformation, kinematics, stress, balance principles. Principles for constitutive relations. Applications to nonlinear elasticity and non-Newtonian fluids. Prerequisite: CE 6206.

CE 8330. Advanced Finite Element Analysis. 3 Credits.

Review of variational formulation of the finite element method. Formulation of various continuum and structural elements. Application to static and dynamic problems in elasticity, plasticity, large deflection, and instability in plates and shells. Recent developments in finite element methods. Same as MAE 6288. Prerequisite: CE 6206, 6210; or MAE 6210, MAE 6286.

CE 8350. Sedimentation Engineering. 3 Credits.

Problems of erosion and sedimentation. Properties of sediment. Initiation of motion. Suspension of sediment and sediment discharge theories. Sedimentation measurements. Economic and legal aspects. Prerequisite: CE 6601 or approval of department.

CE 8351. Mechanics of Alluvial Channels. 3 Credits.

Physical processes in drainage basins and channels. Channel forms and bed forms. Hydraulics and sediment transport in alluvial channels. Design of stable channels. Qualitative and quantitative response of rivers. Channel stabilization, navigation channels. Case studies including environmental impacts. Prerequisite: CE 6601 or approval of department.

CE 8352. Advanced Hydraulics. 3 Credits.

Theory of unsteady flow. Diffusion and dispersion through pipes and open channels. Numerical solutions using finite element and finite difference methods. Prerequisite: CE 6601 or approval of department.

CE 8370. Intelligent Systems Theory and Applications. 3 Credits.

Overview of artificial intelligence, neural networks, genetic algorithms, fuzzy systems, and hybrid intelligent systems and their integration with other information processing methods. Intelligent systems applications; examples are drawn from ITS and traffic engineering, vehicle safety, remote sensing, and structural design optimization. Prerequisite: CE 6707.

CE 8380. Advanced Biomechanics. 3 Credits.

Historical overview of biomechanics and biomaterials. Fundamental concepts in mechanics as applied to the treatment of biological systems. Approaches to the mechanical analysis of the human structure under physiological and non-physiological loading conditions. Constitutive laws for biological materials. Finite element applications. Prerequisite: CE 6206 or 6350. (As arranged).

CE 8998. Advanced Reading and Research. 1-12 Credits.

Limited to students preparing for the Doctor of Philosophy qualifying examination. May be repeated for credit.

CE 8999. Dissertation Research. 1-12 Credits.

Limited to Doctor of Philosophy candidates. May be repeated for credit.

CLASSICAL STUDIES (CLAS)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CLAS 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the Schedule of Classes for more details. Restricted to First-year students in CCAS.

CLAS 2104. Ancient Medicine and Modern Medical Terms. 3 Credits.

The formation of medical terms derived from Greek and Latin, along with principles that govern the derivation of their meaning. The course includes a survey of ancient medical centers and practices.

CLAS 2105. Special Topics. 0-3 Credits.

Topics in Greek and Roman literature and culture; topics announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

CLAS 2105W. Special Topics. 3 Credits.

Topics in Greek and Roman literature and culture; topics announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

CLAS 2106. Mythology of the Classical World. 3 Credits.

The creation of the world, the nature of the gods, and the adventures of heroes as described in various Greek and Roman literary sources (e.g., epic, drama, hymns) and as shown in ancient art.

CLAS 2107. Greek and Roman Drama. 3 Credits.

Study of Greek and Roman tragedy and comedy; the nature and setting of dramatic performance in classical antiquity.

CLAS 2112. History of Ancient Greece. 3 Credits.

A political and social survey of Bronze Age Minoan and Mycenaean civilizations, the Iron Age, Archaic Period, Classical Greece through Alexander the Great. (Same as HIST 2112).

CLAS 2113. The Roman World to 337 A.D.. 3 Credits.

Prehistoric Italy; rise and decline of the Roman Empire and Latin civilization; cultural, social, and political developments in the Greek world under Roman rule. Same as HIST 2113.

CLAS 2803. The Ancient Near East and Egypt to 322 B.C.. 3 Credits.

Survey of Egyptian, Mesopotamian, Anatolian, West Semitic, and Iranian civilizations from the Neolithic period to Alexander's conquest. Same as HIST 2803.

CLAS 2804. History of Ancient Israel. 3 Credits.

The history of ancient Israel from the Patriarchs through the Romans. Topics include historical, archeological, political, social, cultural, religious, diplomatic, military, economic, and intellectual events, movements, and relationships. Same as HIST 2804.

CLAS 3105. Topics in Classical Studies. 0-3 Credits.

CLAS 3111. Topics in Ancient History. 3 Credits.

May be repeated for credit provided the topic differs. Same as HIST 3111.

CLAS 3114. Topics in Ancient Literatures and Cultures. 3 Credits.

May be repeated for credit provided the topic differs.

CLAS 3115. Topics in Ancient Art and Archaeology. 3 Credits.

May be repeated for credit provided the topic differs. Same as AH 3105.

CLAS 3901. Directed Project. 1-3 Credits.

Individual advanced reading or research, to be arranged with a member of the faculty. May be repeated for credit. Admission by permission of instructor and department.

CLAS 3901W. Directed Project. 1-3 Credits.

CLAS 4111. Capstone Study. 3 Credits.

The capstone study seminar enables junior or senior majors to design, in consultation with a Classical Studies faculty member, a culminating project aligned with their interests, previous curricular experience, and/or future goals. The results of a student's capstone study is submitted as a written report and shared with all Classical Studies majors in a presentation that might include written, oral, and/or digital formats. Capstone studies should demonstrate that a student can locate and evaluate information about the ancient world in both traditional and digital forms and present his or her findings clearly and logically. Restricted to Junior or Senior Status Only; Classical Studies majors only. Recommended background: Classical Studies.

CLAS 4901. Directed Project. 1-3 Credits.

Continuation of CLAS 3901. Individual advanced reading or research, to be arranged with a member of the faculty. May be repeated for credit. Admission by permission of instructor and department.

CLINICAL MANAGEMENT & LEADERSHIP (CML)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CML 2140. Mgt of HR in Health Sci Org. 3 Credits.

Builds on concepts introduced in HSci 104. Theory and application of management and leadership as they affect the management of human resources in health sciences organizations. Focus is on leadership, ethics, and organizational dynamics in a changing health care environment.

CML 2141. Planning&Mktg/Health Sciences. 3 Credits.

The role of planning and marketing in the management and promotion of health sciences services, products, and organizations. Focus on the theory and application of quality principles in assessment of on-going organizational effectiveness, concepts and techniques of project planning, and methods for identifying and addressing customer needs.

CML 2142. Financial Mgt/Health Sciences. 3 Credits.

An overview of accounting and financial concepts for management of health sciences organizations. Budgeting, cash management, reimbursement guidelines, and financial management.

CML 2143. Current Issues/Hlth Sci Mgt. 3 Credits.

Evaluation of major problem areas in the management of health sciences organizations. Discussions include legal, technological, managerial, organizational, and leadership issues in the changing health care environment.

CML 4144. Seminar/Health Sci Leadership. 3 Credits.

CML 6202. Human Resource Development. 3 Credits.

Methods, techniques and policies appropriate for the development and management of human resources complementary to an organization's vision, strategy, and desired culture. Managerial knowledge, skills and behaviors required for the effective management of people to promote and maintain a professional health care organization will be explored.

CML 6203. Health Info Quality & Outcomes. 3 Credits.

Approaches to medical informatics to support managerial decision making, patient care, and quality improvement in clinical practices. Ethical, legal, and social dimensions of health care information technology.

CML 6204. Marketing Clinical Services. 3 Credits.

The marketing process from the viewpoint of clinical practice managers. Needs assessment, environmental analysis, planning, distribution, pricing, promotion.

CML 6205. CaseStudies/CliniclMgt&Ldrshp. 3 Credits.

Integrative case-based approach to the analysis of complex problems in the management and leadership of clinical practice services.

CML 6274. Health Economics and Finance. 3 Credits.

Issues of health care economics, financial management, and budgeting that relate to managerial decision-making. Applied financial management, management control systems, budgeting, staffing, and cost accounting.

CML 6275. Ldrshp&Change in Clinical Mgt. 3 Credits.

Theories and models of leadership and change from a systems perspective. The development of leadership solutions to problems in clinical organizations; integration of all field course work into implementation plans for health care system changes.

CLINICAL RESEARCH ADMINISTRATION (CRA)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CRA 2101. Basics of Clinical Research. 3 Credits.

Fundamental concepts, trends, regulations, and practices in clinical research. An overview of industry and government practices and policies in the development of patient care products (drug, devices, biologicals, and diagnostics) and treatment protocols.

CRA 2102. Processes of Clinical Research. 3 Credits.

The key process steps involved in the design, implementation, analysis, and approval of investigational new products with an emphasis on the operational steps involved in conducting clinical trials.

CRA 2103. Good Clinical Practices. 3 Credits.

The organization and management of data, documents, materials and findings resulting from clinical research as prescribed by governmental institutions, regulatory agencies, industry sponsors, and research organizations. Audit standards and mechanisms are introduced, and practice audits are conducted.

CRA 2104. Business of Clinical Research. 3 Credits.

Fiscal and managerial components of clinical research, including the budgeting processes, fiscal management, software applications, legal and contractual issues, and recruitment of personnel and subjects. Examination of all entities involved in clinical research, including drug, device, biological, and diagnostics sponsors; academic medical centers; and contract research organizations, site management companies, physician-run organizations, and health delivery organizations.

CRA 2105. Topics in Clinical Research. 3 Credits.

Guided readings and study in selected aspects of clinical research administration.

CRA 2107. Intro Monitoring Clin. Trials. 3 Credits.

Introduction to the role of monitoring in clinical research administration to ensure valid, reliable, and accurate clinical data and adherence to good clinical practices by sponsors and study sites.

CRA 4106. Clin Research Admin Internship. 3 Credits.**CRA 6201. Critical Analysis Clin Rsch. 3 Credits.**

Analyses of the essential components of clinical research including good clinical practice, human subject protection, study design, and trials administration.

CRA 6202. Medicines Development. 3 Credits.

Examination of nonclinical, clinical, commercial, regulatory and risk assessment strategies required to develop a clinical development plan for an approvable, marketable new therapeutic and propose life cycle management strategies.

CRA 6203. Partnerships with Human Subjects. 3 Credits.

Regulatory, policy, ethical, and practical considerations associated with the engagement, recruitment, retention, and interaction with human research subjects.

CRA 6204. The Clinical Research Industry. 3 Credits.

Integration of project management principles, decision making models, cross-cultural competency, and interdisciplinary team dynamics to facilitate effective and efficient conduct of clinical trials.

CRA 6205. Clinical Investigation. 3 Credits.

Analysis and evaluation of study design strategies and current practices for major therapeutic areas of clinical research (e.g., vaccine development, cardiovascular disease, anti-infectives, CNS, etc.).

CRA 6208. International Clinical Rsrch. 3 Credits.

Analysis of the strategies and methods of clinical research in international settings; explore cultural and ethical consideration in global clinical research projects.

CRA 6209. Quality and Risk Management. 3 Credits.

Managing risk and safety assessments to ensure quality in clinical research.

CRA 6210. MedicalWriting/ClinicalResrch. 3 Credits.

Strategies and practices in writing documentation related to clinical research administration.

CRA 6212. Teaching Strategies in the Health Professions. 3 Credits.

Teaching skills pertinent to the delivery of education in health sciences professions. Course design illustrates teaching and learning practices grounded in andragogy, contributing to curriculum program objectives of enhancing teaching skills. (Same as EHS 6212).

CRA 6213. Curriculum Development in Health Professions. 3 Credits.

Curriculum development and assessment skills in the health professions. Variables that affect the manner in which individuals learn and interact within professions and organizations. (Same as EHS 6213).

CRA 6275. Ldrshp&Change in ClinRschAdmin. 3 Credits.

A capstone course focusing on the concept of leadership within the contexts of health professionals, health systems, and health policy.

COLLEGE OF PROFESSIONAL STUDIES (CPS)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CPS 0920. Continuing Research-Master's. 1 Credit.**CPS 1000. Special Topics. 1-4 Credits.****CPS 1090. Assessment of Prior Learning. 1-12 Credits.****CPS 1191. Special Topics. 1-3 Credits.**

Pre-college level course of various topics. May be repeated for credit provided the topic differs.

CPS 2101. The Criminal Justice System. 4 Credits.**CPS 2102. Resource Management. 4 Credits.****CPS 2103. Particular Forms of Crime. 4 Credits.****CPS 2104. Leading Teams. 4 Credits.****CPS 2105. Deviance & Social Control. 4 Credits.****CPS 2106. Strategic Planning. 4 Credits.****CPS 2107. Models of Policing. 4 Credits.****CPS 2108. Criminal Intelligence. 4 Credits.****CPS 2109. Criminal Analysis. 4 Credits.****CPS 2110. Predictive Policing. 4 Credits.****CPS 2130. Intro to Forensic Science. 4 Credits.****CPS 2131. Crime Scene Investigation. 4 Credits.****CPS 2132. Computer Crime Investigation. 4 Credits.****CPS 2133. Incident Management. 4 Credits.****CPS 2134. Ethical Dilemmas in Policing. 4 Credits.****CPS 2170. Domestic Violence. 4 Credits.****CPS 2171. The Criminal Mind. 4 Credits.****CPS 2172. Comparative Police Systems. 4 Credits.****CPS 2173. Transnational Threats&Security. 4 Credits.****CPS 2174. Independent Research. 1-6 Credits.****CPS 6291. Special Topics. 1-6 Credits.****CPS 6292. Special Topics. 0 Credits.**

Topics in politics and strategic communications. Topics vary by semester. Consult the Schedule of Classes for more details.

CPS 6294. Independent Research. 1-6 Credits.**CPS 6295. Supervised Internship. 1-6 Credits.****CPS 6298. Practicum. 0-3 Credits.****CPS 6300. Capstone Research Project. 3 Credits.**

COLUMBIAN COLLEGE OF ARTS AND SCIENCES (CCAS)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work

- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students
- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

CCAS 0920. Continuing Research - Masters. 1 Credit.

CCAS 0940. Continuing Research - Doctoral. 1 Credit.

CCAS 1005. GWECF Advising. 0 Credits.

CCAS 2154. Elective Internship. 0-3 Credits.

Fieldwork and academic work carried out under faculty supervision. Students contract with agency, faculty, and Columbian College. Restricted to students of at least sophomore standing who have obtained approval from the Columbian College Undergraduate Studies Office.

CCAS 2190. Special Interdisciplinary Topics. 1-3 Credits.

May be repeated for credit provided the topic differs.

CCAS 2190W. Special Interdisciplinary Topics. 1-3 Credits.

CCAS 3001. Undergraduate Research. 0-3 Credits.

Open to undergraduates at any level. Focused exploration of an idea, question, or issue, under the guidance of a research mentor/supervisor, culminating in a report about the experience. Students must find a sponsoring faculty member and receive approval from the Office of Undergraduate Studies in the Columbian College of Arts and Sciences. Zero-credit option is graded on a P/NP basis only and is available only during summer sessions. Restricted to Registration is restricted; students need to find a faculty mentor/supervisor and receive CCAS approval.

CCAS 4191. Special Interdisciplinary Major Capstone. 3 Credits.

Required of all students completing a special interdisciplinary major.

CCAS 6154. Elective Internship. 0-3 Credits.

Fieldwork and academic work carried out under faculty supervision. Students contract with agency, faculty, and Columbian College. May be repeated to a maximum of 6 credits. Admission by permission of Columbian College. Graded on a P/NP basis only. Zero credit option available only during summer sessions.

COMMUNICATION (COMM)

Explanation of Course Numbers

- Courses in the 1000s are primarily introductory undergraduate courses
- Those in the 2000-4000s are upper-division undergraduate courses that can also be taken for graduate credit with permission and additional work
- Those in the 6000s and 8000s are for master's, doctoral, and professional-level students

- The 6000s are open to advanced undergraduate students with approval of the instructor and the dean or advising office

COMM 1000. Dean's Seminar. 3 Credits.

The Dean's Seminars provide Columbian College first-year students focused scholarship on specific intellectual challenges. Topics vary by semester. Consult the schedule of classes for more details. Restricted to First-year students in CCAS.

COMM 1025. Introduction to Communication Studies. 3 Credits.

Introduction to historical and intellectual development of the field. Students survey the origins of contemporary theory; learn about fundamental concepts, models, investigative tools, and contexts of communication; and explore a variety of professional opportunities awaiting communication graduates.

COMM 1040. Public Communication. 3 Credits.

Study and practice of the basic techniques of public speaking used to inform, to entertain, and to persuade audiences. Emphasis on the speech-building process: audience analysis, research, development, composition, organization, style, delivery, and criticism.

COMM 1041. Interpersonal Communication. 3 Credits.

Study and practice of verbal and nonverbal communication in ritual, information and perspective sharing, problem solving, and relationship formation, maintenance, and dissolution. Designed to raise awareness of the complexity and power of the communication process in daily life and to help students develop interpersonal skills cognitively, affectively, and behaviorally.

COMM 1042. Business and Professional Speaking. 3 Credits.

Study of the communication process in business and professional organizations; practice in interviewing, small group communication, and public presentations. For non-majors and non-minors only.

COMM 2000. Sophomore Colloquium. 3 Credits.

Topic vary by semester. See the Schedule of Classes for more detailed information. Restricted to CCAS students with sophomore standing.

COMM 2100. Communication Theory. 3 Credits.

Inquiry into the nature and function of communication theory as a framework for the study of communicative behavior. Emphasis is placed on analysis of paradigmatic approaches in rhetorical, interpersonal, and mass communication theories and models, and on examination of contemporary research literature in communication. Prerequisite: COMM 1025.

COMM 2120. Small Group Communication. 3 Credits.

The study and practice of communication in small groups, focusing on problem solving, norms, roles, and leadership. Prerequisite: COMM 1025 or permission of the instructor.

COMM 2140. Nonverbal Behavior. 3 Credits.

Introduction to predominant theories, principles, and problems in the study of nonverbal behavior; application of research results to everyday life. Topics include facial expression, eye behavior, physical appearance, body movement and gestures, tactile messages, vocal characteristics, use of time, spatial dynamics, gender and life-stage differences.

COMM 2162. Sociology of the Family. 3 Credits.

Examination of the stages of family life: birth, childhood, premarital relationships, marriage and sex roles in marriage, retirement, and old age. Special emphasis on development and maintenance of interpersonal relations. Prerequisites: SOC 1001 or SOC 1002 or COMM 1025. (Same as SOC 2162).

COMM 3110. Research Methods-Communication. 3 Credits.

Processes of inquiry within interpersonal and public communication. Students are introduced to concepts of framing research questions, conducting literature reviews, developing a research design, using qualitative and quantitative research tools, and interpreting results of research in communication. Prerequisite: COMM 2100.

COMM 3170. Organizational Communication. 3 Credits.

Exploration of the philosophy, process, problems, and potential of human communication within organizational contexts. May involve experiential workshops and fieldwork.

COMM 3171. Professional Communication. 3 Credits.

Principles and theories of communication applied to situations encountered in organizational and professional environments. Development of knowledge and abilities for workplace tasks, such as interviewing, facilitating meetings, providing performance appraisals, designing and delivering instructional materials and other professional presentations.

COMM 3172. Health Communication. 3 Credits.

Exploration of the nature, functions, and impact of relational communication in the context of health care. Both formal (health care organizations) and informal (family communication) systems may be studied. Topics can include provider-patient interaction, media and health, confirmatory communication. Prerequisite: COMM 1041 or COMM 2100 or permission of instructor.

COMM 3173. Communication in a Mediated World. 3 Credits.

An exploration of human-to-human communication mediated by computer technology. Traditional communication theories are applied and adapted to the computer-mediated realm; newer theories of computer-mediated communication are addressed.

COMM 3174. Intercultural Communication. 3 Credits.

Exploration of the process, trends, rewards, and difficulties of human communication in intercultural contexts, with an eye toward establishing guidelines for mitigating miscommunication across cultures. May involve fieldwork.

COMM 3175. Strategic Communication. 3 Credits.

Exploration of the strategies and techniques employed in successful communication in the face of obstacles such as shrinking budgets and technological expansion. Emphasis on the principles of communication planning through a strategic matrix in an evolving communication environment.

COMM 3176. Issues and Image Management. 3 Credits.

The issues and image management function in corporate, professional, and nonprofit organizations. Assignments may include in-class collaboration on case studies of communication campaigns and crisis communication strategies, interviews with professionals in the practice of communication management, and a communication audit of strategies and messages of a selected organization.

COMM 3180. Communication Criticism. 3 Credits.

Evaluation of communication paradigms along critical dimensions of analysis. Prerequisite: COMM 1040 or COMM 4150 or permission of instructor.

COMM 3190. Selected Topics. 1-3 Credits.

Topic announced in the Schedule of Classes. May be repeated for credit provided the topic differs.

COMM 4150. Persuasion. 3 Credits.

In-depth study of the principles and techniques of persuasion from both production and consumption perspectives, in both personal and mediated contexts. Emphasis on the common-premise model, with consideration of such topic areas as pathos/ethos/logos, attitude and behavior change, effectiveness, ethics, and subconscious influence. Prerequisite: COMM 1025.

COMM 4196. Independent Study. 1-3 Credits.

Independent research and special projects. Open to seniors or exceptionally well-prepared juniors majoring in communication. Before students are permitted to register, they must submit a written proposal of the plan of study and obtain approval of the faculty member who will direct the study and of the program chair.

COMM 4197. Internship. 3 Credits.

For communication majors and minors. Student-secured internships in public or private communication-related organizations in the metropolitan area. Students spend at least 15 hours per week doing communication-related work. Meetings, reports, and/or analysis paper are required. Admission requires prior program approval. Graded on a Pass/No Pass basis.

COMM 4199W. Senior Seminar. 3 Credits.

Capstone course limited to communication majors. Students work on an individually designed research project throughout the term, the results of which are presented in a major paper. Selected reading and discussion. Restricted to Limited to students majoring in the field. Prerequisites: COMM 2100 and COMM 3110.

COMM 6100. Communication Theory. 3 Credits.

An in-depth examination of theories of human communication, including those related to interpersonal, small group, intercultural, and media communication. Emphasis is placed on close examination of contemporary research literature in these areas. Restricted to Graduate students in Communication Management program.

COMM 6110. Research Methods in Communication. 3 Credits.

Graduate-level study of communication-based quantitative and qualitative research methods. Restricted to Graduate students.

COMM 6171. Professional Communication. 3 Credits.

Principles and theories of advanced public communication used in organizational and professional environments; job interviewing, providing performance appraisals, designing and delivering instructional materials, facilitating and participating on panels, and other professional presentations. Restricted to graduate students.

COMM 6174. Intercultural Communication. 3 Credits.

A multidisciplinary examination of the conceptual foundations of culture, the effects of culture on communication in comparative and multicultural contexts, and the suggested guidelines for communication competence in intercultural communication settings. Restricted to Graduate Students.

COMM 6189. Intercultural Negotiation. 3 Credits.

Introduction to negotiation and dispute resolution in intercultural contexts. Students hone their negotiation and conflict management skills through a series of simulation exercises. Theoretical and methodological issues related to the study of negotiation in intercultural contexts. Restricted to Graduate student status. Open to undergraduate students with permission of the instructor.

COMM 6190. Leadership Communication. 3 Credits.

Leadership as a function of human communication. Theories of leadership and communication strategies employed by leaders in a variety of contexts. Exploration of leadership as a form of social action. Emphasis on effectiveness and social implications of the strategies employed in leadership communication. Case studies. Restricted to Open to undergraduate students with the instructor's approval.

CORCORAN ART AND THE BOOK (CBK)

Courses

CBK 5220. Box Elements in Book Arts. 3 Credits.

This class will cover the basic ins and outs for box making. Suitable tools and materials for box construction as well as various box applications will also be discussed. Students will create four archival box constructions as examples of storage and presentation solutions-the drop spine box, a slipcase, a paper box wrapper, and a folding box. Students will also explore using the box as a creative outlet for self-expression. For final project, the class-under instructor guidance-will create a "story box" with the goal being to produce an individual conceptual book object while at the same time finding one's own unique artistic voice. Priority to graduate students of the Art and the Book department; open to other degree students as space is available.

CBK 5750. SMdA: Charting San Miguel de Allende: The Artist's Journal. 3 Credits.

How do we write literature and make art that captures the experience of the places we visit as tourists? What strategies are available beyond the obvious ones? Through writing and the making of visual art, how can we see and record aspects of the daily life of a community that might go unremarked or unknown otherwise? The historic town of San Miguel, Mexico, with its rich history of art and literature, provides an unparalleled opportunity to explore these questions. This winter-session course focuses on the intersection of writing and bookmaking. Through a series of hands-on seminars and workshops, students will learn how to transform the raw materials of their sketchbooks and notebooks into fully realized literary texts in a variety of hand-made book forms. Two major book projects, one collaborative and one independent, will be required. Note: This course carries an additional fee which includes triple occupancy lodging, daily breakfast, materials fee for the duration of the course, and airport transportation. Airfare and tuition are additional, as is an optional excursion. Please contact the department for details.

CBK 6010. Art and the Book Seminar I. 3 Credits.

What is an artists' book and how can it be defined? Hands on in nature, Art and the Book Graduate Seminar I. will focus on Washington, D.C. and exploration of the premiere book and related collections throughout the city. This academic course consists of research topics and discussions revolving around such areas as exploring characteristics of an artists' book, origins of the artists' book itself and defining the future of the book form along with roughly five site visits to numerous museum collections at outstanding institutions like the Library of Congress, the Smithsonian American Art Museum/National Portrait Gallery Library, the National Gallery of Art Library and the National Museum of Women in the Arts. Visiting artists will also be invited to speak in reference to topics inspired by collection excursions when possible. Students will be asked to delve personally deeper by developing a research paper and PowerPoint presentation based on material presented at the various site visits and through class lectures. The last two weeks of this course will consist of in-depth formal presentations where students will present their research papers and multimedia presentations to the group as a whole.

CBK 6020. Art and the Book Studio I. 3 Credits.

Collaborations can serve as an idea generation tool, an expansion of one's own skill set, or a joining of ideas to create a piece that is larger than the sum of its parts. The Art and the Book Studio I. course will explore various forms of collaboration through a series of hands-on projects that range from working with unknown collaborators to pairing with complementary skill sets. The semester will culminate in a final collaborative project where students can experiment and explore as a synergistic unit. Visiting artists will speak about their own experiences with collaborative projects. Priority to graduate students of the Art and the Book department; open to other degree students as space is available.

CBK 6100. Layout & Design of the Book. 3 Credits.

This course provides an opportunity for visual artists from all backgrounds to combine images with text, to sequence existing content, to expand their typographic options, and to explore publishing alternatives beyond hand-made limited editions. It will cover type selection and typesetting, page grid systems and production methods for a variety of layout options, including handmade as well as commercially produced books. We will test several online publishing services, bypassing the limitations of their proprietary software by using InDesign for design and typesetting and exporting the final layouts as PDFs. Image formats, color modes, and color correction will be covered as needed. This course is open to MA/Art and the Book Students.

CBK 6110. Letterpress I: Letterpress Basics From the 1400's to the Digital Age. 3 Credits.

This course provides an introduction to traditional Letterpress applications while also exploring computer and relief printing trends used in the field today. Students will be provided technical instruction in typesetting--from composing stick to quoin key --along with presswork, inking, editioning, and Vandercook press operation schooling. Students will examine such areas as Linocut, Woodcut, and computer photographic processes with the goal being to incorporate these practices with that of traditional typesetting. A collaborative broadside project will be produced in the second half of the semester. Priority to graduate students of the Art and the Book department; open to other degree students as space is available.

CBK 6120. Binding I: Intermediate & Advanced. 3 Credits.

This course will cover advanced techniques in binding while laying a proper foundation in book arts. Both practical and aesthetic decisions will be discussed as more challenging structures such as Coptic binding, portfolio, and flag books to name only a few are created. Independent projects will be produced over the course of the semester in which content of the book will be emphasized. This course will culminate with a final artists' book project where a student will explore any binding of their choosing while making conceptual decisions under a universal theme. Priority to graduate students of the Art and the Book department; open to other degree students as space is available.

CBK 6150. Type and the Book Form. 3 Credits.

Typography for book arts and design. Development of narrative themes through the use of type, image, grid, materials, and multiple page sequencing. The history of typography including the use of technology; terminology and classification. Restricted to MA in Art and the Book degree students; other graduate students with permission of the instructor.

CBK 6210. Letterpress II: Advanced Discoveries in Letterpress. 3 Credits.

Letterpress II. provides an exploratory arena in advanced letterpress techniques with the use of text and image as a fine arts medium. This course will cover conceptual, aesthetic, and practical considerations in print media. Also, an individual book project will be introduced midway through semester that the graduate student will work on as a team experimenting with new trends in Letterpress to produce a book edition. Priority to graduate students of the Art and the Book department; open to other degree students as space is available. Pre-requisite: Letterpress I or permission of the Art and the Book Director.

CBK 6331. Vandercook Relief Fine Art Printing. 3 Credits.

An introduction to fine art relief printing methods on Vandercook presses. Technical instruction in multiple relief printing processes, including reduction cut, multiple block registration, wood block, and collagraph. The use of alternative material printing on letterpress equipment emphasizing the graphic image and fine print quality. Focus on the production of multiple print editions and small books forms using learned techniques. Recommended background: CBK 6110.

CBK 6800. Independent Study: Book Arts. 3 Credits.

This option is appropriate for degree students who want access to independent faculty supervision, lab areas, and supplies for independent projects, and do not need or desire extensive course instruction.

CBK 6900. Art and the Book Internship. 3 Credits.

For degree students only. Internships can help students develop marketable skills, establish professional contacts, and explore different career options.

CBK 7010. Art and the Book Studio II. 3 Credits.

Working with the varied talents and experiences of the Art and the Book student population, this class embarks on the creation of a collaborative book project. What emerges from the unique personality of the Studio II class make-up is a student driven book edition. Beginning with discussions, this class will experiment and hone in on the important issues of theme, content and structure which will establish the book's character. Materials choices lend texture and nuance to the book form development. Production of the collaborative book edition entails creative and disciplined work in such areas as: layout design, typesetting, plate making, papermaking, printing and binding. By completion of the book edition, students will have experienced an ambitious team-building and productive inclusive art experience. For MA in Art and the Book graduate students only.

CBK 7311. Pop-Up Books: Exploration of the Sculptural Book through Paper Engineering. 3 Credits.

This class focuses on non-traditional sculptural book formats and on the design of pop-ups as sculptural book inclusions. Students will learn to engineer a range of pop-up structures, beginning with simple non-adhesive cut-and-fold pop-ups and progressing through a series of more complex glued constructions, including platforms, props, V-folds, and volumes. Emphasis will be on how to integrate the dimensional and mechanical aspects of the pop-up with graphic and illustrative concepts. The class will also explore several sculptural bindings, including accordion books, carousel books, and tunnel books. The carousel book (a nested series of accordions) and the tunnel book (two accordions holding a series of page frames) are theatrical stage-like constructions employing layers of images and text to create dimensional graphic illustrations. Basic bookbinding tools and skills will be discussed, along with the design of jigs and templates for streamlining production in for editions. Slide shows of historical and artist-made books will be presented on each major class topic. Priority to MA Art and the Book students; open to other degree students on a space-available basis.

CBK 7320. Binding II: Leather Bindings. 3 Credits.

This course offers an introduction to the use of leather in Book Arts. Students will focus on traditional techniques for creating both historic and modern book structures. Knife care, paring and application of leather, as well as excellence in book forwarding will be emphasized. Students will sew multi-colored headbands, and be asked to design and execute several books in quarter leather. A discussion and demonstration of inlay/ onlay and tooling will offer students a glimpse into the visual opportunities afforded by this exciting medium. Prerequisite: CBK 6120 Binding I.

CBK 7322. Japanese Binding. 3 Credits.

The history and evolution of Japanese bookbinding. Exploration and production of historically important Japanese bookbinding methods, including hand scroll, stab binding variations, accordion books, and ledgers. Techniques such as backing paper or cloth for covers and making traditional book cases are covered.

CBK 7400. Exploration in East/West Papermaking. 3 Credits.

This intermediate/ advanced course is an exposure to traditional and experimental methods of hand papermaking, with an emphasis on papermaking as an expressive art medium. Work will include processing raw fiber, pigmenting pulp, exploring Eastern and Western sheet formation styles, and examining various drying and finishing techniques. In addition, 3-D techniques, including paper casting and vacuum forming will be taught. Throughout the course, the history of paper will be discussed. Prerequisite for this course is 2D Applications in Paper or Dimensional and Color Papermaking. Or permission can be granted by Instructor or Director of the Art and the Book program.

CBK 7800. Art and the Book Pro-Thesis. 3 Credits.

In the Art and the Book program, Thesis for students with a studio focus consists of a cohesive body of work grounded in the book form with a formal exhibition, defense meeting, along with a written paper component that informs the candidate's thesis studio project. For students in the program with an academic focus, an in-depth written paper, defense, and public talk to the college are required to fulfill the requirements of thesis. Students of the Pro-Thesis course will develop a thesis petition and outline that will serve as the guideline for Thesis construction. Students with a studio focus must in the petition also present a comprehensive plan for their studio exhibition to be developed and completed in the Thesis Forum course occurring in the following semester. All petitions must be approved by the Thesis Petition Faculty Committee. Students will choose a paper and exhibition theme/topic and create a mission statement and written document during the expanded research and writing phase of this course. The final Pro-Thesis document will be an academic paper that conforms to the writing standards of the Corcoran graduate programs and that of UMI dissertation publishing, where the final Thesis submission will be published online of the Spring semester. Students in Pro-Thesis will also explore professional development through a personal exploratory process culminating in the creation of a learned artist statement and CV. This class is for Art and the Book students only.

CBK 7900. Art and the Book Thesis Forum. 3 Credits.

In this course, students complete a comprehensive body of work with a written supporting thesis at the professional level exploring a unique book arts-related topic. Each student's thesis should contain a rigorous exploration of theme, under the supervision of a thesis advisor with the goal being to produce a sound body of work or comprehensive written composition. The process will culminate with the display of thesis projects developed over the course of the semester, with students presenting to jurors composed of faculty as well as professionals from the book arts community.

CORCORAN ART EDUCATION (CED)

CED 0920. Continuing Research. 1 Credit.**CED 2000. Foundations in Art Education. 3 Credits.**

This is the introduction to the subject of Art Education for every student considering the BFA/MAT5 degree program. It is also open to non-majors. We will read and discuss major historical and contemporary concepts of learning, perception, and artistic experience that form the framework for diverse approaches to art education in practice in schools, museums, and community-based institutions today. Students will integrate and compare their own artistic experiences through systematic self-reflection to deeply understand the creative learning process in themselves as a basis for developing experience-based art education. Integrating theory and praxis, this course establishes critical thinking skills for addressing the four main components of art education: interpretation/meaning-making, criticism/aesthetic discernment, studio/production, and historical understanding. The course includes visits to art education venues around the metropolitan area (some outside class time), frequent short written assignments, and oral presentation exercises. Students receive guided support in starting the required core reading program for the Art Education concentration. Prerequisite: CAS 1110 Writing I (can be taken concurrently), or permission of the instructor. Required as prerequisite for all other Art Education courses.

CED 3005. Teaching Art to Young Adults: Post-Secondary. 3 Credits.

This course is an elective addition to complete the Art Education degree program's sequence focusing on major phases of visual and aesthetic learning throughout life. This course covers the theory and practice of art pedagogy for transitional young adults, whether in formal college programs or informal circumstances. We cover widely varying developmental benchmarks in this cohort, both individuals with extensive art training and those without prior exposure, in terms of creativity, interaction with the social environment, self-understanding and expression, and technical skill. For many emergent adults, the completion of schooling and greater independence presents the first opportunity to explore artistic experience, or to do so in a self-directed environment. Emphasis is on organized learning experiences in art production, with additional attention to the important outlets for self-guided and independent art experiences at this age. At times this course may be cross-tallied at the graduate level as CED 6005. Additional work required for graduate level credit is outlined in the course syllabus. Prerequisite: CED 2000 Foundation in Art Education or CED 5000 Graduate Art Education Core, plus one additional ED course, or permission of Department.

CED 3010. Art and Learners to Age 12. 3 Credits.

This course focuses on the theory and practice of art education programs for children of elementary and middle school age, both in the school setting and beyond. We cover developmental advances in this cohort in terms of creativity, interaction with the social environment, self-understanding and expression, the dynamics and independent and group activity, and technical skill. The course considers the role of art for young learners, both as an aspect of school experience and as a separate track. Emphasis is on organized learning experiences in art, with additional attention to the important outlets for self-guided and independent art experiences at this age. This course is cross-tallied at the undergraduate level as CED 3010 and at the graduate level as CED 6010. Prerequisite: CED 2000 Foundation in Art Education, or CED 5000 Graduate Art Education Core, or permission of Department.

CED 3015. Art and Adolescents. 3 Credits.

This course starts from an understanding of the essential developmental advances of the teen years and moves to the design and implementation of a wide range of visual art experiences for young people in transition from childhood to adulthood. The class will review a variety of existing materials and formats to discover the educational approaches underlying different lessons and programs. We trace age-appropriate creative activity, social and cultural interaction, identity formation through art, the dynamics of group activity, and an increasingly divergent range of technical skill in this cohort. The course considers art education for adolescents whether in school, a museum, community programs, or increasingly, as an independent learner. This course is cross-tallied at the undergraduate level as CED 3015, and at the graduate level as CED 6015. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook). Offered for credit only, Continuing Education students need department approval to enroll. Prerequisite: CED 2000 Foundation in Art Education, or CED 5000 Graduate Art Education Core, or permission of Department.

CED 3020. Development, Behavior, and Learning. 3 Credits.

This course introduces core concepts of developmental psychology essential to future educators. Students will gain knowledge about different approaches in the field regarding the relationship between generally predictable stages of human development and the capacity of individuals to learn creatively. The course will emphasize the development of young people, their behavior and mental growth from birth through adolescence, but is not limited to those years. The class models a variety of learning strategies relevant to its subject and useful to students in their later work. Short written assignments, group learning exercises, informal oral presentations, and tests/quizzes. This course is cross-tallied at the undergraduate level as CED 3020 and at the graduate level as CED 6020. This course starts from an understanding of the essential developmental advances of the teen years and moves to the design and implementation of a wide range of visual art experiences for young people in transition from childhood to adulthood. The class will review a variety of existing materials and formats to discover the educational approaches underlying different lessons and programs. We trace age-appropriate creative activity, social and cultural interaction, identity formation through art, the dynamics of group activity, and an increasingly divergent range of technical skill in this cohort. The course considers art education for adolescents whether in school, a museum, community programs, or increasingly, as an independent learner. This course is cross-tallied at the undergraduate level as CED 3015, and at the graduate level as CED 6015. Additional work is required to earn graduate credit. Offered for credit only, Continuing Education students need department approval to enroll. Prerequisite: CED 2000 Foundation in Art Education, or CED 5000 Graduate Art Education Core, completed or concurrent; or Department permission.

CED 3030. Sociology of Family. 3 Credits.

The study of family dynamics in today's society begins with understanding of basic necessary functions such as domestic living, working, earning, educating the young, and sustaining the well-being of all. In addition, we consider the influence of family patterns and values on the lives of all its members, both within the family unit and beyond. This course surveys traditional and evolving forms of the "nuclear" family, multi-generational interactions, the extended and the informal family (among other types), especially in their impact on young people raised in a wide variety of family environments. Assignments include analysis of typical family behaviors and educational programming designed for family groups, especially in the visual arts and related subjects. This course is cross-tallied at the undergraduate level as CED 3030 and at the graduate level as CED 6030. Prerequisite: CED 3020/CED 6020 Development, Behavior, and Learning; or permission of the department.

CED 3100. Art in the Museum and Community Organizations. 3 Credits.

A comprehensive survey of approaches to informal art education as practiced in museums, community centers, educational support facilities and varied social settings. This course is based on direct observation and systematic review of diverse methodologies, to provide an informed framework for integrated art education, whether as a collaboration between schools and alternative sites, or developed separate from formal schooling. Expertise of the Corcoran's museum educators is emphasized. This course is cross-tallied at the undergraduate level as CED 3100 and at the graduate level as CED 6100. Prerequisite: CED 3020/6020 Development, Behavior, and Learning, or permission of department.

CED 3150. Classroom and Activity Management. 3 Credits.

During this semester, students learn to plan and present lessons for youth in schools or other educational settings. Skills to be emphasized include the development of educational activities to fulfill specific curricular or group goals, identification and adaptation of exemplary existing educational resources, responsive flexibility to varied group needs, group management techniques, and basic assessment methods for both student performance and program success. This course is often integrated with simultaneous Field Experience. This course is cross-tallied at the undergraduate level as CED 3150 and at the graduate level as CED 6150. Prerequisite: CED 3020/6020 Development, Behavior, and Learning, CED 3010/6010 Art and Learners to Age 12, or CED 3015/CED 6015 Art and Adolescents, completed or concurrent; or permission of department.

CED 4000. Development: Birth to Adolescence. 3 Credits.

This course provides an in-depth investigation of human development from infancy to adolescence. A sequel to the broad developmental theories and concepts that were introduced in CED 3020/6020, this course encourages students to explore firsthand the writings and perspectives of key developmental theorists. In addition, students are asked to critically review case studies and comparative research on cognitive, perceptual, and emotional development of young people and to investigate practical applications of theoretical constructs as they pertain to the field of art education. Normal and abnormal developmental profiles are covered, with emphasis on differentiations that teachers are likely to encounter within the general population, or in a mainstream classroom and activity setting. At times this course may be cross-tallied at the graduate level as CED 6000. Additional work required for graduate level credit is outlined in the course syllabus. Prerequisites: CED 3020/CED 6020 Development, Behavior, and Learning, or instructor's permission.

CED 4010. Contemporary Issues: Education Policy and Visual Art. 3 Credits.

This is an interdisciplinary investigation of current affairs concerning the interaction of cultural politics, governmental trends, and broad developments in educational philosophy in the public arena. Topics change in response to emerging issues of public concern, often including the interaction of local, regional, and national attitudes to art, the impact of educational reform efforts, the role of art education as social acculturation, and appropriate funding levels for both art and education. This course is cross-tallied at the undergraduate level as CED 4010 and at the graduate level as CED 7010. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook). Required for BFA/MAT5 and MAT.

CED 4040. Math in Art/Art in Math. 3 Credits.

One of two courses available to advanced students that reinforce their general knowledge of fundamental principles and processes of math and science. This provides a basis for integration of artistic learning with core academics in schools and for thematic development of educational activities that bridge traditional divisions between alternative modes of thought and intellectual experience. Students prepare original art education activities for both formal and informal educational settings which utilize and reinforce mathematical concepts of number, pattern, form, etc. This course is cross-tallied at the undergraduate level as CED 4040 and at the graduate level as CED 6040. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook). Offered for credit only, Continuing Education students need department approval to enroll.

CED 4050. Art Science: Developing Creativity. 3 Credits.

One of two courses available to advanced students that reinforce their general knowledge of fundamental principles and processes of math and science. This provides a basis for integration of art education with core academics in schools and for thematic development of educational activities that bridge traditional divisions between alternative modes of thought and intellectual experience. The semester includes a multidisciplinary consideration of intellectual creativity as it is understood and practiced in the arenas of art and science. Specific topics vary with the interests of faculty and students. Students prepare original art education activities for both formal and informal educational settings, incorporating concepts from the course. This course is cross-tallied at the undergraduate level as CED 3050 and at the graduate level as CED 6050. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook).

CED 4060. Digital Media for Educators. 3 Credits.

In this hands-on course, students learn the rudiments of educational technology for presentation, as well as how to search and assess existing multi-media educational teaching resources in art, adapt existing visual resources for new programs and audiences, and create simple artistic projects for students on the computer using widely available basic desktop publishing software. This course is offered at the undergraduate level as CED 4060 and at the graduate level as CED 6060. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook).

CED 5000. Graduate Art Education Core. 3 Credits.

For students with a solid grounding in studio art and art history, this course serves as a starting point for the study of pedagogy and educational practice. An intensive class reading of the core literature of the field introduces major historical and contemporary concepts of learning, perception and artistic experience that comprise the framework for diverse approaches to art education schools, museums and alternative settings today. During visits to art education venues around the metropolitan area, members of the class learn to discover the underlying goals and approaches imbedded in excellent art education programs, and will critique the advantages and disadvantages of contrasting methods for differing learners and situations. Integrating theory and praxis, this course establishes critical skills for the four main domains of art education: Interpretation/Meaning-making, Criticism/Aesthetic Discernment, Studio/Production and Historical Understanding. Students plan and carry-out a variety of original educational exercises. Enrollment restricted to 1st year MAT students.

CED 5070. Education Pro-Seminar I. 0.5 Credits.

Pro-seminar in Art Education provides a summary review of academic disciplines pertinent to research in the field, with a practical guide to the scope and methods of different disciplines which frequently overlap. The first semester is more theoretical and is intended to assist each student in skills for forming clear research questions, assessing the merits of existing research and determining corresponding implementation steps for their own extended research projects in art education. The second semester focuses topic selection, preliminary research, and proposal preparation for the Art Education thesis. A total of 1 credit in Education Pro-Seminar is required for the MAT and BFA/MAT in Art Education. Students must enroll in CED 5070 and CED 5071 sequentially and grades will be assigned upon completion of the second semester of enrollment.

CED 5071. Education Pro-seminar II. 0.5 Credits.

Pro-seminar in Art Education provides a summary review of academic disciplines pertinent to research in the field, with a practical guide to the scope and methods of different disciplines which frequently overlap. The first semester is more theoretical and is intended to assist each student in skills for forming clear research questions, assessing the merits of existing research, and determining corresponding implementation steps for their own extended research projects in art education. The second semester focuses on topic selection, preliminary research, and proposal preparation for the Art Education thesis. A total of 1 credit in Education Pro-Seminar is required for the MAT and BFA/MAT in Art Education. Students must enroll in CED 5070 and CED 5071 sequentially and grades will be assigned upon completion of the second semester of enrollment. Prerequisite: CED 5070 Education Pro-seminar I.

CED 5072. Education Pro-Seminar I. 1 Credit.

Pro-seminar in Art Education provides a summary review of academic disciplines pertinent to research in the field, with a practical guide to the scope and methods of different disciplines which frequently overlap. The first semester is more theoretical and is intended to assist each student in skills for forming clear research questions, assessing the merits of existing research and determining corresponding implementation steps for their own extended research projects in art education. The second semester focuses topic selection, preliminary research, and proposal preparation for the Art Education thesis. Effective Fall 2012, a total of 2 credits in Education Pro-Seminar is required for the MAT and BFA/MAT in Art Education. Students must enroll in CED 5072 and CED 5073 sequentially and grades will be assigned upon completion of the second semester of enrollment.

CED 5073. Education Pro-Seminar II. 1 Credit.

Pro-seminar in Art Education provides a summary review of academic disciplines pertinent to research in the field, with a practical guide to the scope and methods of different disciplines which frequently overlap. The first semester is more theoretical and is intended to assist each student in skills for forming clear research questions, assessing the merits of existing research and determining corresponding implementation steps for their own extended research projects in art education. The second semester focuses topic selection, preliminary research, and proposal preparation for the Art Education thesis. Effective Fall 2012, a total of 2 credits in Education Pro-Seminar is required for the MAT and BFA/MAT in Art Education. Students must enroll in CED 5072 and CED 5073 sequentially and grades will be assigned upon completion of the second semester of enrollment.

CED 5100. Evaluation, Program Assessment, and Criteria of Quality. 3 Credits.

This course examines program assessment and evaluation with a focus on the independent criteria of quality in the art world. The design and implementation of assessment tools in an authentic manner that is intrinsically connected to the context of the art work being both produced and viewed in an educational setting is one that must take into account the nature of art evaluation, critical analysis, content issues, audience, and technical skill. This course allows students to build a vocabulary within which to evaluate both an individual's understanding of a learning activity as well as to plan a program that addresses the unique needs of learners in a creative environment. Assignments will require both assessment and evaluation at the program level as well as the development of criteria and tools for use with individual learners. Projects may coincide with students' Field Experience. Students will have the ability to create and implement cohesive tools, from traditional methods of testing to alternative assessment, with which to critically examine both teaching and learning and to use the results of their study to adapt curricula to learners in a variety of settings.

CED 5610. Special Topics: Art & Lifelong Learning. 3 Credits.**CED 5620. Special Topics: Art Across the Curriculum. 3 Credits.**

The Art Education program offers a rotating series of advanced seminars in education, designed to apply theory and practice to the most timely issues emerging in the field as they relate changing trends in art pedagogy in particular. This semester, Special Topics: Art Across the Curriculum responds to both trends in the era of nation-wide school reform and a recognition of the dynamic relationship between visual culture and formal learning. Students will investigate existing models of art instruction applied to curricular units in subjects such as history, social studies, language arts, math, and science to determine their strengths and limitations. Then, in teams and individually, students will plan lesson units, design resource materials, and practice teaching their own cross-disciplinary lessons. The course will consider resources and approaches appropriate to both school settings and non-traditional educational sites in the community. Prerequisite: Four CED courses or permission of the department.

CED 5630. Special Topics: Art, Cultural and Character Education. 3 Credits.

At the graduate level, the MAT Art Education program offers a rotating series of advanced seminars in education, designed to apply theory and practice to the most timely issues emerging in the field as they relate changing trends in art pedagogy in particular. This special topics course will bring together two areas of recent curricular expansion in order to focus specifically on the potential for the visual arts to provide a framework for important areas of attitudinal education: 1) cultural understanding among diverse local communities and across the globe, and 2) personal development in terms of ethics, decision-making, and participation in civil society. This course will be divided between a systematic review of strong examples of materials available to educators, their similarities and differences, and weekly sessions devoted to the creation on cutting-edge lesson units by student teams. Prerequisite: Four courses or permission of the department.

CED 5680. Studio-Based Teaching & Learning. 3 Credits.

At the graduate level, the Art Education Department offers a rotating series of advanced seminars in education designed to apply theory and practice to the most timely issues emerging in the field as they relate changing trends in art pedagogy in particular. This special topics course explores teaching, learning and curriculum planning across content areas and levels of learner experience through in-depth exploration of one visual art discipline (printmaking, ceramics, photography, digital media, sculpture, painting or drawing, etc). Students will design and teach lessons and a curriculum unit/materials based on their studio experiences in class using methods and materials appropriate for PreK-12, community and museum settings. The selected medium/media changes each semester. Prerequisite: Four Education courses or permission of the Department.

CED 5682. Community-Based Teaching & Learning. 3 Credits.

In this advanced special topics course students will study theories of transformative learning and service learning as it applies in an intergenerational community setting through art study and art making. Students explore teaching, learning, and curriculum planning for learners across the lifespan through the development and implementation of a specific community/public arts project in tandem with members of that community and in some cases with creative collaboration/experience sharing with a partner institution(s). Each stakeholder (students, faculty and community members) has an equal role in planning and implementing the project. Students will study community/public art, service learning and transformative learning theory, how to write effective project proposals, community-based art curriculum, conduct visual research (plans/mock ups/sketches), and documentation of the process/project.

CED 5690. Summer Teaching Institute. 3 Credits.

To be announced.

CED 5700. Art Therapy Orientation for Educators. 3 Credits.

This course introduces classic concepts and current practices of Art Therapy which will enrich the educational work of art instructors, and familiarize them with a related profession, its goals and methods. NOTE: This is not a training course to prepare art therapists for future practice. Readings will include the books of Robert Coles and other masters in the field. Assignments include interactive exercises, reading discussions, and short and mid-length written essays. This course will include on-site observation of model art therapy techniques by professionals inside or outside of class time. Prerequisite: Four CED courses or permission of department head required.

CED 5900. Art Education Field Experience. 1 Credit.

One semester of short, coordinated part-time practicum rotations, assisting experienced educators in classrooms and cultural institutions, while observing varied teaching and learning strategies and student responses to different activities and educational methods. Students in this course write observational critiques and meet together regularly with the supervising professor to discuss their experiences. Offered in the Spring for BFA/MAT5 and MAT students only.

CED 6000. Development: Birth to Adolescence. 3 Credits.

This course provides an in-depth investigation of human development from infancy to adolescence. A sequel to the broad developmental theories and concepts that were introduced in CED 3020/6020, this course encourages students to explore first-hand the writings and perspectives of key developmental theorists. In addition, students are asked to critically review case studies and comparative research on cognitive, perceptual and emotional development of young people and to investigate practical applications of theoretical constructs as they pertain to the field of art education. Normal and abnormal developmental profiles are covered, with emphasis on differentiations that teachers are likely to encounter within the general population, or in a mainstream classroom and activity setting. At times this course may be cross-tallied at the undergraduate level as ED4000. Students wishing to pursue undergraduate credit should register for the undergraduate section. Prerequisites: CED 3020/CED 6020 Development, Behavior, and Learning, or instructor's permission.

CED 6010. Art and Learners to Age 12. 3 Credits.

This course focuses on the theory and practice of art education programs for children of elementary and middle school age, both in the school setting and beyond. We cover developmental advances in this cohort in terms of creativity, interaction with the social environment, self-understanding and expression, the dynamics and independent and group activity, and technical skill. The course considers the role of art for young learners both as an aspect of school experience and as a separate track. Emphasis is on organized learning experiences in art, with additional attention to the important outlets for self-guided and independent art experiences at this age. This course is cross-tallied at the undergraduate level as CED 3010 and at the graduate level as CED 6010. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook). Prerequisite: CED 2000 Foundation in Art Education, or CED 5000 Graduate Art Education Core, or permission of Department. Required for MAT degree.

CED 6015. Art and Adolescents. 3 Credits.

This course starts from an understanding of the essential developmental advances of the teen years and moves to the design and implementation of a wide range of visual art experiences for young people in transition from childhood to adulthood. The class will review a variety of existing materials and formats to discover the educational approaches underlying different lessons and programs. We trace age-appropriate creative activity, social and cultural interaction, identity formation through art, the dynamics of group activity, and an increasingly divergent range of technical skill in this cohort. The course considers art education for adolescents whether in school, a museum, community programs, or increasingly, as an independent learner. This course is cross-tallied at the undergraduate level as CED 3015, and at the graduate level as CED 6015. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook). Offered for credit only, Continuing Education students need department approval to enroll. Prerequisite: CED 2000 Foundation in Art Education, or CED 5000 Graduate Art Education Core, or permission of department.

CED 6020. Development, Behavior, and Learning. 3 Credits.

This course introduces core concepts of developmental psychology essential to future educators. Students will gain knowledge about different approaches in the field regarding the relationship between generally predictable stages of human development and the capacity of individuals to learn creatively. The course will emphasize the development of young people, their behavior and mental growth from birth through adolescence, but is not limited to those years. The class models a variety of learning strategies relevant to its subject and useful to students in their later work. Short written assignments, group learning exercises, informal oral presentations and tests/quizzes. This course is cross-tallied at the undergraduate level as CED 3020 and at the graduate level as CED 6020. This course starts from an understanding of the essential developmental advances of the teen years and moves to the design and implementation of a wide range of visual art experiences for young people in transition from childhood to adulthood. The class will review a variety of existing materials and formats to discover the educational approaches underlying different lessons and programs. We trace age-appropriate creative activity, social and cultural interaction, identity formation through art, the dynamics of group activity, and an increasingly divergent range of technical skill in this cohort. The course considers art education for adolescents whether in school, a museum, community programs, or increasingly, as an independent learner. This course is cross-tallied at the undergraduate level as CED 3015, and at the graduate level as CED 6015. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook). Offered for credit only, Continuing Education students need department approval to enroll. Prerequisite: CED 2000 Foundation in Art Education, CED 5000 Graduate Art Education Core.

CED 6030. Sociology of the Family. 3 Credits.

The study of family dynamics in today's society begins with understanding of basic necessary functions such as domestic living, working, earning, educating the young, and sustaining the well-being of all. In addition, we consider the influence of family patterns and values on the lives of all its members, both within the family unit and beyond. This course surveys traditional and evolving forms of the "nuclear" family, multi-generational interactions, the extended and the informal family (among other types), especially in their impact on young people raised in a wide variety of family environments. Assignments include analysis of typical family behaviors and educational programming designed for family groups, especially in the visual arts and related subjects. This course is cross-tallied at the undergraduate level as CED 3030 and at the graduate level as CED 6030. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook). Prerequisite: CED 3020/CED 6020 Development, Behavior, and Learning; or permission of the department.

CED 6040. Math in Art/Art in Math. 3 Credits.**CED 6050. Art Science: Developing Creativity. 3 Credits.**

One of two courses available to advanced students that reinforce their general knowledge of fundamental principles and processes of math and science. This provides a basis for integration of art education with core academics in schools and for thematic development of educational activities that bridge traditional divisions between alternative modes of thought and intellectual experience. The semester includes a multidisciplinary consideration of intellectual creativity as it is understood and practiced in the arenas of art and science. Specific topics vary with the interests of faculty and students. Students prepare original art education activities for both formal and informal educational settings, incorporating concepts from the course. This course is cross-tallied at the undergraduate level as CED 3050 and at the graduate level as CED 6050. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook).

CED 6060. Digital Media for Educators. 3 Credits.

In this hands-on course, students learn the rudiments of educational technology for presentation, learn to search and assess existing multi-media educational teaching resources in art, adapt existing visual resources for new programs and audiences, and create simple artistic projects for students on the computer using widely available basic desktop publishing software. This course is offered at the undergraduate level as CED 4060 and at the graduate level as CED 6060. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook).

CED 6100. Art in the Museum and Community Organizations. 3 Credits.

A comprehensive survey of approaches to informal art education as practiced in museums, community centers, educational support facilities and varied social settings. This course is based on direct observation and systematic review of diverse methodologies, to provide an informed framework for integrated art education, whether as a collaboration between schools and alternative sites, or developed separate from formal schooling. Expertise of the Corcoran's museum educators is emphasized. This course is cross-tallied at the undergraduate level as CED 3100 and at the graduate level as CED 6100. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook). Prerequisite: CED 3020/6020 Development, Behavior, and Learning.

CED 6113. Museum Teaching Applications. 3 Credits.

In this course students learn to use the museum, its collections, exhibitions and expert personnel as a resource for their teaching. Students apply instructional principles based on the Understanding by Design framework, Discipline Based Art Education, and the Art for Life/Issues-Based curricular structure to create curriculum units for historical, modern and contemporary art topics, art works and artifacts.

CED 6150. Classroom and Activity Management. 3 Credits.

In during this semester, students learn to plan and present lessons for youth in schools or other educational settings. Skills to be emphasized include the development of educational activities to fulfill specific curricular or group goals, identification and adaptation of exemplary existing educational resources, responsive flexibility to varied group needs, group management techniques, and basic assessment methods for both student performance and program success. This course is often integrated with simultaneous Field Experience. This course is cross-tallied at the undergraduate level as CED 3150 and at the graduate level as CED 6150. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook). Prerequisite: CED 3020/6020 Development, Behavior, and Learning, CED 3010/6010 Art and Learners to Age 12, or CED 3015/CED 6015 Art and Adolescents, completed or concurrent; or permission of department.

CED 6800. Independent Study: Art Education. 3 Credits.

This option is appropriate for degree students who want access to independent faculty supervision, lab areas, and supplies for independent projects, and do not need or desire extensive course instruction.

CED 6900. Student Teaching in Art I. 3 Credits.

The most extensive educational practicum experience for students at the graduate level. Each student selects a single intensive supervised assignment as a student educator in a school, museum or community organization. An individualized syllabus provides a framework for planning and implementing art education lessons in this setting, formally and informally evaluating these activities in educational terms, and reflecting upon the experience from the perspective of an artist/educator. All interns during the same semester meet intermittently to critique and support each other's educational initiatives. A total of 6 credits is needed to fulfill the Student Teaching in Art requirement. Students must enroll in CED 6900 and CED 6901 which may be taken concurrently or sequentially as approved by an advisor and grades will be assigned upon completion of the second semester of enrollment.

CED 6901. Student Teaching in Art II. 3 Credits.

The most extensive educational practicum experience for students at the graduate level. Each student selects a single intensive supervised assignment as a student educator in a school, museum or community organization. An individualized syllabus provides a framework for planning and implementing art education lessons in this setting, formally and informally evaluating these activities in educational terms, and reflecting upon the experience from the perspective of an artist/educator. All interns during the same semester meet intermittently to critique and support each other's educational initiatives. A total of 6 credits is needed to fulfill the Student Teaching in Art requirement. Students must enroll in CED 6900 and CED 6901 which may be taken concurrently or sequentially as approved by an advisor and grades will be assigned upon completion of the second semester of enrollment. Prerequisite: CED 6900 Student Teaching in Art I.

CED 6906. Student Teaching in Art. 3 Credits.**CED 6910. Art Education Internship I. 3 Credits.**

The most extensive educational practicum experience for students at the graduate level. Each student selects a single intensive supervised assignment as a student educator in a school, museum or community organization. An individualized syllabus provides a framework for planning and implementing art education lessons in this setting, formally and informally evaluating these activities in educational terms, and reflecting upon the experience from the perspective of an artist/educator. All interns during the same semester meet intermittently to critique and support each other's educational initiatives. A total of 6 credits is needed to fulfill the Art Education Internship requirement. Students must enroll in CED 6910 and CED 6911 which may be taken concurrently or sequentially as approved by an advisor and grades will be assigned upon completion of the second semester of enrollment.

CED 6911. Internship: Art Education II. 3 Credits.

The most extensive educational practicum experience for students at the graduate level. Each student selects a single intensive supervised assignment as a student educator in a school, museum or community organization. An individualized syllabus provides a framework for planning and implementing art education lessons in this setting, formally and informally evaluating these activities in educational terms, and reflecting upon the experience from the perspective of an artist/educator. All interns during the same semester meet intermittently to critique and support each other's educational initiatives. A total of 6 credits is needed to fulfill the Art Education Internship requirement. Students must enroll in CED 6910 and CED 6911 which may be taken concurrently or sequentially as approved by an advisor and grades will be assigned upon completion of the second semester of enrollment. Prerequisite: CED 6910 Art Education Internship I.

CED 7000. Integrated Art Education. 3 Credits.

For graduate students with a solid grounding in educational theory and practice, this course serves as a starting point for the study of pedagogy and educational practice relating specifically to art and art institutions. An intensive class reading of the core literature of the field introduces major historical and contemporary concepts of creativity, visual learning, perception and artistic experience that comprise the framework for diverse approaches to art education schools, museums and alternative settings today. During visits to art education venues around the metropolitan area, members of the class learn to discover the underlying goals and approaches imbedded in diverse art education programs, and will critique the advantages and disadvantages of contrasting methods for differing learners and situations. Integrating theory and praxis, this course establishes critical skills for the four main domains of art education: Interpretation/Meaning-making, Criticism/Aesthetic Discernment, Studio/Production and Historical Understanding. Students plan and carry-out a variety of original educational exercises.

CED 7010. Contemp Issues: Educ Policy/Visual Art. 3 Credits.

This is an interdisciplinary investigation of current affairs concerning the interaction of cultural politics, governmental trends and broad developments in educational philosophy in the public arena. Topics change in response to emerging issues of public concern, often including the interaction of local, regional and national attitudes to art, the impact of educational reform efforts, the role of art education as social acculturation, and appropriate funding levels for both art and education. This course is cross-tallied at the undergraduate level as CED 4010 and at the graduate level as CED 7010. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook). Offered for credit only, Continuing Education students need department approval to enroll.

CED 7100. Art and Special Education. 3 Credits.

This advanced course probes three distinct, but interrelated issues: Differentiated curriculum planning and instruction adaptive to highly varied levels of ability and disability within the same class or learning group; the specific challenges presented to both learner and educator by common physical and learning disabilities; and the special role of visual learning and artistic self-expression for individuals who are challenged by significant disabilities and special gifts in the context of schooling and prevalent educational expectations in our society. Current professional and legal standards for educational access of people with disabilities will be covered.

CED 7900. Education Thesis I. 3 Credits.

The thesis in art education equips future or practicing teachers to engage in systematic research projects during their careers. The thesis may be completed within a wide range of subject areas, using the appropriate methods of information gathering and analysis of results for the approved thesis question. Interdisciplinary projects are encouraged. Each thesis student works with an advisor from the MAT program faculty and one or more secondary readers, usually over two semesters. Particulars of the Education Thesis are published in the "Thesis Advisory" of the Art Education program. A total of 6 credits in Education Thesis are required for the MA in Art Education. Students must enroll in CED 7900 and CED 7901, and have the option to complete both in one semester or over the course of two semesters as approved by an advisor.

CED 7901. Education Thesis II. 3 Credits.

The thesis in art education equips future or practicing teachers to engage in systematic research projects during their careers. The thesis may be completed within a wide range of subject areas, using the appropriate methods of information gathering and analysis of results for the approved thesis question. Interdisciplinary projects are encouraged. Each thesis student works with an advisor from the MAT program faculty and one or more secondary readers, usually over two semesters. Particulars of the Education Thesis are published in the "Thesis Advisory" of the Art Education program. A total of 6 credits in Education Thesis are required for the MAT in Art Education. Students must enroll in CED 7900 and CED 7901, and have the option to complete both in one semester or over the course of two semesters as approved by an advisor. Pre-requisite: CED 7900 Education Thesis I.

CED 7950. Praxis Thesis. 3 Credits.

The thesis project for finishing MA/Art Ed students provides the student with an opportunity to demonstrate their educational leadership skills, pedagogical expertise and creative, artistic capabilities within the scope of a studio-based or educational research project. The process of writing the praxis thesis is intended to further professional growth through inquiry, reflection and integration and may with approval be combined with the studio capstone project. The praxis thesis may take one of three forms: independent study project, portfolio option, site-based inquiry option. Each thesis student works with an advisor from the Art Education program faculty and one or more Fine Art faculty members or approved outside experts. Note: MA in Art Education students may opt to substitute the Education Thesis for the Praxis Thesis, if they complete Proseminar (0 credits) as preparation.

CED 7951. Studio Capstone II. 3 Credits.

CORCORAN ART HISTORY (CAH)

CAH 1090. Art History I: Art Now, Contemporary Perspectives in the Visual Arts. 3 Credits.

In this seminar course, first-year students will be introduced to the major ideas and issues in modern and contemporary art and design as they explore what it means to be an artist today. Through a focused study of artworks and exhibitions, historical and critical writings on art from the 19th and 20th centuries, students will gain an understanding of how the visual arts evolved into the diverse media landscape of the present. The course is intended to introduce students to the study of art history and the relevance of art history to their own work. The student will learn how to use the vocabulary of art history and art theory to think, speak, and write effectively about art. Students will participate in discussion and other in-class activities, give oral presentations, and demonstrate their skills and knowledge in short papers, in-class writings, and on social media. There will be field trips to local libraries and collections.

CAH 1091. Art History II: Historical Perspectives in the Visual Arts. 3 Credits.

This course covers the history of art and architecture produced by cultures around the world from prehistory to the end of the 19th century. We will look at works of architecture, sculpture, and painting both in the process of their creation and meaning in cultural context. Using case studies from different cultures and time periods, the course is subdivided to explore some of the general themes that often provide meaning to artistic expression including: cosmology and belief, ceremony and society, the body, the icon, and identity. By the end of the course you should have the skills necessary to analyze works of art and architecture based on an understanding of visual, iconographic and contextual analysis, comparative study, and the interpretation of primary documents and secondary sources. Museum visits will be a major component of discussion sessions.

CAH 2025. 20th Century Art. 3 Credits.

This course is a survey of twentieth-century art beginning with the avant-garde movements of the late 19th- and early 20th-century and concluding with the major trends in contemporary art. Examines the major movements-Fauvism, Cubism, Dada, Constructivism, and Surrealism, Abstract Expressionism, Pop Art, Conceptual Art, Minimalism, and Postmodernism, in relation to biographical and formal concerns, contemporary social and political conditions and current art history debates.

CAH 2026. Contemporary Culture. 3 Credits.

This course will examine our society's production and reception of various forms of media, including print images and graphic design, TV and cable TV, film and video, computer interfaces and software design, Internet/Web as a visual platform, digital multimedia, and advertising. The course is concerned with helping students develop an informed and critical understanding of the nature of contemporary culture, in particular the mass media, the techniques used by them, and the impact of this media culture on the visual arts and design. The course will increase students' understanding of how the media works, how it produce meaning, how it are organized, and how it constructs reality. Through readings, screenings and group discussions, the course will provide students with theoretical and practical tools with which to understand and analyze contemporary culture.

CAH 2300. Medieval Legends in Art. 3 Credits.

This course examines the relationship between medieval epic tales and artistic representations of those stories from the 11th-14th centuries in Western Europe. Although the written texts often coincide with the chronological record of the literature, the visual retellings of the legends are not merely illustrations of the written word. We will examine the meanings of visual programs by comparing visual material (tapestries, manuscript paintings, stone sculpture, and small-scale decorative objects) with textual narratives. Special emphasis will be placed on the romantic legends of King Arthur and the Knights of the Round Table by Chrétien de Troyes and also romantic tales of medieval Germany, such as Roland, Tristan, and the Niebelungenlied. For term projects students will research recent reinterpretations of medieval legends, such as Monty Python's Holy Grail, Tolkien's Lord of the Rings, the literature or films of Harry Potter, King Arthur (2004), Tristan & Isolde (2006), or even the BBC series on Merlin. Course topics include: oral tradition, medieval memory, and the visual record; framing single-scene images and narrative cycles; audiences for visual and written epics; royal portraits in word and image; courtly epics and tapestries; the relationship of secular legends and their representation in stone on churches; courtly ideals for heroes and heroines; 19th c. Romantic idealization of medieval epics in art; and modern cinematic versions of Arthurian legends. This course may also be taken for AS credit.

CAH 3030. History of Architecture and Interior Design. 3 Credits.

Through this course, students are familiarized with major architectural styles, predominantly of Western civilization, from 1800 to the present. Concurrently, this seminar presents the historical development of interior design from the 19th century to the present, covering seminal movements such as the design reform of the 19th century, Art Nouveau, Arts and Crafts, and Modernism. At times this course may be cross-tallied at the graduate level as CAH 6030. Additional work required for graduate level credit is outlined in the course syllabus.

CAH 3050. History and Aesthetics of Photography. 3 Credits.

This survey describes the development of photography from a technological innovation to an artistic medium from the medium's beginnings to the 1950s. Classes consist of slide lectures, discussions, and student presentations; individual research is emphasized. Lectures and discussion will be supplemented with artifactual material from the collection of Professor Beck. Museum and gallery visits are required. This course is equivalent to CAH 2050.

CAH 3060. History of Design. 3 Credits.

Since the mid-nineteenth century design has exercised an increasingly important role as a cultural force, from the chairs we sit in to the utensils with which we eat. This wide-ranging survey from 1850 to the present presents a history of designed objects, images, and spaces, including products, furniture, appliances, interiors, posters and other printed materials, and the latest digital media. Influences among the design disciplines, as well as developments in materials and technologies, are studied within their cultural, political, economic, and social contexts. Recommended for all design students and required for BFA in Interior Design majors.

CAH 3065. Digital Media Culture. 3 Credits.

The impact of electricity on a post-Gutenberg world changed the way we live, think and communicate. From the early days of the telegraph, telephone, radio, television, to the Internet and beyond, the ease and speed with which information can be conveyed digitally is dramatically changing long-established business and social patterns. Focusing on both contemporary and obsolete technologies and mediums, this course covers the impact of the digital revolution on culture, business and the individual. Equal parts communication, media study and popular history, we'll go from Thomas Edison to MTV to Facebook, and analyze communication and social trends. This course will provide an understanding of how technology continues to consume older versions of communication, creating exciting hybrid communication mechanisms which redesign and reshape how we live and interact.

CAH 3150. Theories and History of Graphic Design. 3 Credits.

This course investigates traditional and contemporary ideas, language, and theories of graphic design. It includes a survey of the development of graphic design from 1900 until the present. Specific graphic design assignments will be assigned to support certain historical lessons.

CAH 3203. Contemporary Asian Art and Culture. 3 Credits.

This course will examine the work of contemporary Asian artists in all media, including forms of popular culture. Recognized by collectors, critics, and curators from America and Asia, Asian artists have renewed and appropriated and transformed traditional Asian values, cultures, themes, and styles, as they negotiated the hegemony of western modernism. Topics include the appropriation of traditional media and genre, the redefinition of old themes or symbols, the engagement with politics, society, and the states, the exploration of consumerism and popular culture, and the intersection of western and eastern artistic styles found in Asia, mainly in contemporary China, Taiwan, South-Korea, India, and Japan as well as East-Asian diasporas around the world.

CAH 3210. American Art. 3 Credits.

This course will explore painting, sculpture, and photography produced in the United States from the American Revolution to the end of the First World War. We will examine the work of individual artists—Gilbert Stuart, Winslow Homer, Thomas Eakins, John Singer Sargent, James McNeill Whistler, Frederick Remington, Hiram Powers, Eastman Johnson, Mary Cassatt, and Alfred Stieglitz—as well as art movements—the Hudson River School of landscape painting, Luminism, Realism, American Impressionism, Modernism and the Avant-Garde in America. Students will be expected to develop an understanding of the major artists, art movements, and art historical issues related to the visual arts produced in the United States. Instruction time will be divided between the classroom and the following museums, which have significant collections of American Art—the Corcoran Gallery of Art, the National Gallery of Art, and the Smithsonian American Art Museum. In some terms this course may be cross-tallied at the undergraduate level as CAH 3210 and at the graduate level as CAH 6510. Students enrolled at the graduate level will be required to do additional work in order to earn graduate credit.

CAH 3211. California Dreaming: 1945-1980. 3 Credits.

In the decades following World War II, California enjoyed a special status in the American national consciousness. From the coffeehouses of San Francisco's North Beach to the beaches of Los Angeles, from Hollywood to Yosemite, images and products "made in California" created a powerful dream of possibility and promise. In art and design, California offered an alternative culture to the New York art world, the importance of which is increasingly being recognized. Building on an array of recent books and exhibitions, this course examines the unique art and culture of California in the postwar decades. We will investigate the relationship of art and design to the image of California and to the region's social and political history, in the process questioning some of the prevailing myths about the Golden State. Topics include: the counterculture of San Francisco which produced assemblage, collage and the poetry of the Beats; earthworks and site-specific environmental projects; the Bay Area figurative school of painting; the "light-and-space" work of Bell, Irwin, and Turrell, called "the California sublime" by Rosalind Krauss; the beach and car culture of Los Angeles; the Chicano art movement; Pop, conceptual, and body art; West Coast Abstract Expressionism; studio productions of Hollywood and Disney; the relationship of jazz and rock to visual art; mid-century modern furniture and housing design; West Coast art photography. This course is designed to coincide with the exhibition Richard Diebenkorn: The Ocean Park Series, 1967-1988 at the Corcoran Gallery of Art, June 30 to September 23, 2012.

CAH 3240. Cultures of Photography: WWII to 2000. 3 Credits.

This course will survey the nature of photography, its practices, meanings, and visual results during a critical era of rapid development of the medium. The class will also explore the ways that contextual and cultural understandings have shaped the readings of images over the second half of the 20th century. Lectures and discussion will be supplemented with artifactual material from the collection of Professor Beck. In some semesters this course may be cross-listed at the undergraduate level as CAH 3240 and at the graduate level as CAH 6550. Additional work is required for graduate level credit.

CAH 3350. Art History Seminar. 3 Credits.**CAH 3360. The Black Arts Movement. 3 Credits.**

This course focuses on the historical, social, and cultural impact of the Black Arts Movement of the 1960s and 1970s. Through an interdisciplinary approach, students will be introduced to the issues and themes pivotal to this international art movement's symbols of racial consciousness, transformations in urban life, fashions and hairstyles, music and cinema as aesthetic statements. We will explore the works of painters, sculptors, photographers, graphic artists, and filmmakers, including Romare Bearden, Faith Ringgold, David Hammons, Gordon Parks, Elizabeth Catlett, Betye Saar, and Charles White.

CAH 3530. Art and Architecture of Washington DC. 3 Credits.

This course will investigate the art and architecture of the city of Washington, DC: major collections, special exhibitions, historic architecture, and the city itself. A majority of our time will be spent on site, outside the classroom, so this is a walking-intensive class. Weekly reading and frequent short writing assignments are required, as well as a developed seminar paper at the conclusion of the seminar. At times this course may be cross-tallied at the undergraduate level as CAH 3530 and at the graduate level as CAH 6530. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook).

CAH 3531. Iconic American Designers. 3 Credits.

This course offers an in-depth examination of works by a select group of iconic American designers, from the 19th century to the present. We will consider the esthetic, social, and historical implications of the design work of Gustav Stickley, Greene & Greene, Frank Lloyd Wright, Louis Comfort Tiffany, Eero Saarinen, Charles and Ray Eames, Josef and Anni Albers, Frances Knoll, Herman Miller, and Eliot Noyes, among others. Students from diverse disciplinary approaches (fine arts, photography, and design) are encouraged to enroll so that our discussions will be richly informed by different perspectives. Requirements include: presentations, papers, and participation in discussions. At times this course may be cross-tallied at the graduate level as CAH 6531. Additional work required for graduate level credit is outlined in the course syllabus.

CAH 3700. Theories of Art. 3 Credits.

This course investigates traditional and contemporary concepts about the relation of ideas, language, and theory to art. Readings cover the history of aesthetics and a selection of modern theoretical proposals, including ethical, political, and psychological interpretations, and theories of expression and communication. Classes combine textual analysis with student criticism. Students develop their own analytical and interpretative propositions concerning contemporary art and design.

CAH 3800. Independent Study: Art History. 3 Credits.

This option is appropriate for degree students who want access to independent faculty supervision, lab areas, and supplies for independent projects, and do not need or desire extensive course instruction.

CAH 3900. Internship: Art History. 1-3 Credits.

For degree students only. Internships can help students develop marketable skills, establish professional contacts, and explore different career options.

CAH 4110. The Photograph in Contemporary Art. 3 Credits.

Fifty years ago, the world of art virtually excluded photographs from its purview. Today, it is impossible to imagine contemporary art without the presence of photography and other lens-based media. What were the causes of this profound shift, and how did it happen? This seminar will examine the art, artists, and critical discourses that together form the environment for today's photo-based art. Class sessions will include slide presentations, discussions of assigned readings, and critiques of participants' artworks and critical writings. Among the artists to be discussed are Andy Warhol, Ed Ruscha, Robert Heinecken, Bernd and Hilla Becher, Robert Smithson, Jan Groover, William Wegman, Cindy Sherman, Nan Goldin, Robert Mapplethorpe, and Adam Fuss. Readings will include essays by Michael Fried, Roland Barthes, Rosalind Krauss, John Szarkowski, and Jean Baudrillard. Students from all disciplines and art media are welcome to register; prior knowledge of 20th-century art and photography is useful.

CAH 4202. New Media. 3 Credits.

Has the screen replaced the canvas? This class looks at the history and theory, as well as major practitioners, of new media art. Starting with Moholy-Nagy, whose *Painting Photography Film* (1927) argued for the advent of new artistic forms characterized by reproduction, projection, and transmission, we will trace the emergence of new media from the late 1960s and 1970s up to the present day. Topics will include video art, installation, and computer and internet-based art. Students will research contemporary artists working in new media. In some terms this course may be offered at the undergraduate level as CAH 4202 or at the graduate level as CAH 7202. Additional work is required to earn graduate level credit.

CAH 4300. Victorian Avant-Garde: British Art & Culture (1851-1901). 3 Credits.

The second half of the 19th century was a period of extreme technological, social, and cultural upheaval. During these years, traditional ideas about art, design, literature, and journalism were challenged by new ways of thinking that seeded the ground for more radical changes in the 20th century. The class will focus on close and critical readings of primary artworks and texts in Washington-area libraries, archives, and museums. Visits are scheduled for the Rare Book and Special Collections Department of the Library of Congress and the National Gallery of Art. Topics include: The Great Exhibition of 1851, the Pre-Raphaelite Brotherhood, the Arts and Crafts Movement, Aestheticism, and the Revival of Printing. Key figures include: John Ruskin, Dante Gabriel Rossetti, Julia Margaret Cameron, Elizabeth Siddal, William Morris, W.E. Godwin, Walter Pater, J.M.W. Whistler, Aubrey Beardsley, and Oscar Wilde. Along with weekly readings and short written responses, there will be one long-form seminar essay and presentation due at the conclusion of the semester, as well as a shorter theoretical essay and a mid-term exam. (Same as CAH 7300).

CAH 4400. History of Exhibitions 1850 - Present. 3 Credits.

The exhibition is where modern and contemporary art meets the public. This course looks at the history and theory of exhibiting new art in the past 150 years, starting with the French Salon and the independent alternatives that challenged it (Courbet, the Impressionists, and Post-Impressionists), through avant-garde exhibitions (Expressionists, Dada, and Surrealists), installation art and alternative exhibition strategies, and leading to today's art fairs and biennials (Art Basel, Documenta, the Venice Biennale, the Whitney Biennial, etc.). We will cover historic exhibits including the Armory Show and Hitler's Degenerate Art exhibit. Individual and group projects will research specific recent exhibitions, as we consider such issues as design, audience, and critical reception. At times this course may be cross-tallied at the graduate level as CAH 6400. Additional work required for graduate level credit is outlined in the course syllabus.

CAH 4410. From Arts and Crafts to Ikea. 3 Credits.

While the widespread influence of William Morris' Arts and Crafts movement confirms its importance and success, its failure to create truly affordable handcrafted goods for everyday use and everyday people eventually inspired a manufacturing revolution. Since the early twentieth-century, mass-produced objects or interior complexes assembled with specific design vocabularies have stimulated a major consumer industry, mediated by sales and marketing strategies that intentionally appeal to the broadest possible clientele. Pursuing discussions inspired by Arts & Crafts into the present age, this course will touch on discourses about fashion versus style, 'sham' or kitsch versus high design, the inherent value of crafted versus mass produced items, and innovations in materials or manufacturing techniques that either reflect their own period of time or romanticize the past—all topics that still resonate within the design and manufacturing arena. What began with many regionally inventive streams—including Germany's Bauhaus curriculum, Scandinavia's national romanticist movement, or America's Colonial and Mission revivals—has culminated in mass-marketed brands and ensemble marketing, represented by IKEA, Herman Miller, Ethan Allan, or Pottery Barn (among others). This course surveys various pioneers whose design ethos eventually merged with mass production, reviewing a variety of ensemble design approaches: for example, Peter Behrens, Lily Reich (with Mies van der Rohe), Marcel Breuer, Le Corbusier's Thonet preference, Charles and Ray Eames, the Saarinens at Cranbrook, the reproduction industry that represents Frank Lloyd Wright, Russell Wright, and others. The integration of non-Western influences (characterized in the past as Japonisme, Chinoiserie, folkloric or primitivist), the impact of various international expositions, and the success of the "museum"-store mentality (which made Isamu Noguchi, Alvar Aalto, and others more affordable to a wider audience) will also be introduced. This seminar-style survey concludes with the "Target" approach (featuring architect Michael Graves), as well as some consideration of recycled or 'green' products that are marketed as "environmentally correct." By the end of this class, students will be aware of the major stylistic distinctions, socio-cultural influences, revivals, and shifts in design practices from the eighteenth century to the present in their fields of interior design or decoration. At times this course may be cross-tallied at the graduate level as CAH 6410. Additional work required for graduate level credit is outlined in the course syllabus.

CAH 6030. History of Architecture and Interior Design. 3 Credits.

Major architectural styles and the development of interior design since the nineteenth century, covering such seminal movements as Art Nouveau, Arts and Crafts, the International Style, and Modernism. Consideration of the social and cultural forces that shape design.

CAH 6040. Contemporary Culture & Design. 3 Credits.

This course will examine how the field of design reflects the movements and attitudes of our contemporary culture and vice versa. Each year the course will explore different topics through a combination of seminar, special guest lectures, student presentations, and readings. Students will complete an extensive research project on a topic of their choice and present their findings at the end of the semester. The Spring semester will focus on the objects with which we surround ourselves— from the highly functional to the purely decorative and the imminently disposable to the cherished heirloom. We will explore the societal influences, the environmental impact, and the role and responsibility of designers in a culture of objects.

CAH 6130. The History of the Western Book: From Gutenberg to Google. 3 Credits.

This one semester course is a brief survey of the history of the book over the last 550 years. We will examine not only the production methods of a wide range of book and print materials, but the cultural and theoretical issues that underpin our understanding of the role of the book in history. Although we will discuss non-Western and ancient and mediaeval manuscript books, the focus of the course is on developments in Europe and North America. Special, but not exclusive, attention will be paid to illustrated and decorated books, as well as 20th century livres d'artiste. Many of the course sessions will be held at the Library of Congress, where students will have direct access to the materials under study. As digital technologies have forced us to reconsider the signifying power of the "body of the book," academic interest in the field of material bibliography has expanded considerably. This course is designed to introduce students to these scholarly issues and debates. Priority to graduate students of the Art and the Book department; open to other degree students as space is available.

CAH 6235. Surface, Space, Place. 3 Credits.

This course examines the thicket of practical and theoretical underpinnings of art and design in spatial contexts. Careful attention will be paid to urban planning and ideologies of power that impact decisions on what appears in the visual environment. How do planned landscapes, such as cemeteries and gardens, negotiate both physical and mental space? How do we imagine "formless" environments, such as outer space and the Internet, to have contours and divisions? This course makes extensive use of area resources, such as the National Mall, Dumbarton Oaks, Rock Creek Cemetery, and various museum collections and monuments, to register space and place in history and memory. Course open to graduate students, and to qualified undergraduates with permission of Academic Studies department chair.

CAH 6330. The 20th Century Artist Book: Tradition and Innovation. 3 Credits.

This course will explore the historical, theoretical, and critical development of artists' books throughout the 20th and early 21st centuries within the context of movements and trends in the visual and performing arts. Books associated with the Arts & Crafts Movement, Russian Futurism, Surrealism, fluxus, Conceptual Art, and Postmodernism, among others will be closely studied. Johanna Drucker's anthology "The Century of Artists' Books" (1995) will serve as a guide. Readings and presentations will be based on individual books, presses, writers, and artists. Independent research at the Library of Congress and other area research centers will culminate in a developed seminar paper to be presented to the class at the conclusion of the semester. In some semesters this course maybe offered at the undergraduate level as CAH 3330 and at the graduate level as CAH 6330. Additional work is required to earn graduate credit. Priority to graduate students of the Art and the Book department; open to other degree students as space is available.

CAH 6332. The Creative Space: Viewing & Reading. 3 Credits.

The emergence of Netscape and the Internet in the 1990s ushered in an important shift in our cultural sensibility surrounding the aesthetic apprehension of words and images. Instead of the meditative, contemplative approach cultivated by the Fine Arts and Literature, we were now asked to "browse" and adopt a more casual, less totalizing approach to our apprehension of mixed verbal and pictorial messages. This course presumes that the emergence and importance of "browsing" today is much more than a technological development limited to digital culture. Instead, it is a symptom of a larger shift in attitudes affecting aesthetic categories generally, part of the construction of a new cultural space "between viewing and reading," a space with its own attitudes and norms. To explore this potential space, and the attitudes and competencies associated with it, we will examine examples from artists' books, painting, sculpture, film, video and digital environments that mix words and images, and in doing so contest the dominant paradigms of viewing and reading and suggest an intermediary position or "betweenness". The course will begin with a theoretical overview of the problems facing works that combine words and images and suggest betweenness, problems of classification, value and meaning. After establishing a theoretical position, we will move through a series of readings and examples week by week that will allow us to cultivate a critical vocabulary. Graded assignments in this class will address both production and reception. Students will be required to produce two works that address the potential middle ground between viewing and reading and the phenomenon of browsing. Two papers analyzing a work or works that address the concepts of the class will also be required.

CAH 6400. History of Exhibitions. 3 Credits.

The exhibition is where modern and contemporary art meets the public. This course looks at the history and theory of exhibiting new art in the past 150 years, starting with the French Salon and the independent alternatives that challenged it (Courbet, the Impressionists, and Post-Impressionists), through avant-garde exhibitions (Expressionists, Dada, and Surrealists), installation art and alternative exhibition strategies, and leading to today's art fairs and biennials (Art Basel, Documenta, the Venice Biennale, the Whitney Biennial, etc.). We will cover historic exhibits including the Armory Show and Hitler's Degenerate Art exhibit. Individual and group projects will research specific recent exhibitions, as we consider such issues as design, audience, and critical reception. At times this course may be cross-tallied at the undergraduate level as CAH 4400. Students wishing to pursue undergraduate credit should register for the undergraduate section.

CAH 6410. From Arts and Crafts to Ikea. 3 Credits.

While the widespread influence of William Morris' Arts and Crafts movement confirms its importance and success, its failure to create truly affordable handcrafted goods for everyday use and everyday people eventually inspired a manufacturing revolution. Since the early twentieth-century, mass-produced objects or interior complexes assembled with specific design vocabularies have stimulated a major consumer industry, mediated by sales and marketing strategies that intentionally appeal to the broadest possible clientele. Pursuing discussions inspired by Arts & Crafts into the present age, this course will touch on discourses about fashion versus style, 'sham' or kitsch versus high design, the inherent value of crafted versus mass produced items, and innovations in materials or manufacturing techniques that either reflect their own period of time or romanticize the past—all topics that still resonate within the design and manufacturing arena. What began with many regionally inventive streams—including Germany's Bauhaus curriculum, Scandinavia's national romanticist movement, or America's Colonial and Mission revivals—has culminated in mass-marketed brands and ensemble marketing, represented by IKEA, Herman Miller, Ethan Allan, or Pottery Barn (among others). This course surveys various pioneers whose design ethos eventually merged with mass production, reviewing a variety of ensemble design approaches: for example, Peter Behrens, Lily Reich (with Mies van der Rohe), Marcel Breuer, Le Corbusier's Thonet preference, Charles and Ray Eames, the Saarinens at Cranbrook, the reproduction industry that represents Frank Lloyd Wright, Russell Wright, and others. The integration of non-Western influences (characterized in the past as Japonisme, Chinoiserie, folkloric or primitivist), the impact of various international expositions, and the success of the "museum"-store mentality (which made Isamu Noguchi, Alvar Aalto, and others more affordable to a wider audience) will also be introduced. This seminar-style survey concludes with the "Target" approach (featuring architect Michael Graves), as well as some consideration of recycled or 'green' products that are marketed as "environmentally correct." By the end of this class, students will be aware of the major stylistic distinctions, socio-cultural influences, revivals, and shifts in design practices from the eighteenth century to the present in their fields of interior design or decoration. At times this course may be cross-tallied at the undergraduate level as CAH 4410. Students wishing to pursue undergraduate credit should register for the undergraduate section.

CAH 6510. American Art. 3 Credits.

This course will explore painting, sculpture, and photography produced in the United States from the American Revolution to the end of the First World War. We will examine the work of individual artists—Gilbert Stuart, Winslow Homer, Thomas Eakins, John Singer Sargent, James McNeill Whistler, Frederick Remington, Hiram Powers, Eastman Johnson, Mary Cassatt, and Alfred Stieglitz—as well as art movements—the Hudson River School of landscape painting, Luminism, Realism, American Impressionism, Modernism and the Avant-Garde in America. Students will be expected to develop an understanding of the major artists, art movements, and art historical issues related to the visual arts produced in the United States. Instruction time will be divided between the classroom and the following museums, which have significant collections of American Art—the Corcoran Gallery of Art, the National Gallery of Art, and the Smithsonian American Art Museum. In some terms this course may be cross-tallied at the undergraduate level as CAH 3210 and at the graduate level as CAH 6510. Students enrolled at the graduate level will be required to do additional work in order to earn graduate credit.

CAH 6530. Art and Architecture of Washington DC. 3 Credits.

This course will investigate the art and architecture of the city of Washington, DC: major collections, special exhibitions, historic architecture, and the city itself. A majority of our time will be spent on site, outside the classroom, so this is a walking-intensive class. Weekly reading and frequent short writing assignments are required, as well as a developed seminar paper at the conclusion of the seminar. At times this course may be cross-tallied at the undergraduate level as CAH 3530 and at the graduate level as CAH 6530. Students enrolled for graduate credit complete additional work at an advanced level and are graded according to the Graduate Grade Standard (see Student Handbook).

CAH 6531. Iconic American Designers. 3 Credits.

This course offers an in-depth examination of works by a select group of iconic American designers, from the 19th century to the present. We will consider the esthetic, social, and historical implications of the design work of Gustav Stickley, Greene & Greene, Frank Lloyd Wright, Louis Comfort Tiffany, Eero Saarinen, Charles and Ray Eames, Josef and Anni Albers, Frances Knoll, Herman Miller, and Eliot Noyes, among others. Students from diverse disciplinary approaches (fine arts, photography, and design) are encouraged to enroll so that our discussions will be richly informed by different perspectives. Requirements include: presentations, papers, and participation in discussions. At times this course may be cross-tallied at the graduate level as CAH 3531. Additional work required for graduate level credit is outlined in the course syllabus.

CAH 6550. Cultures of Photography: WWII to 2000. 3 Credits.

This course will survey the nature of photography, its practices, meanings, and visual results during a critical era of rapid development of the medium. The class will also explore the ways that contextual and cultural understandings have shaped the readings of images over the second half of the 20th century. Lectures and discussion will be supplemented with artifactual material from the collection of Professor Beck. In some semesters this course may be cross-listed at the undergraduate level as CAH 3240 and at the graduate level as CAH 6550. Additional work is required for graduate level credit.

CAH 6800. Directed Studies: Art History. 3 Credits.

For degree students only. Enrollment requires prior permission.

CAH 6900. Internship: Art History. 1 Credit.

For degree students only. Enrollment requires prior permission. Restricted to Instructor Permission Required.

CAH 7211. Museums in the Digital Age. 3 Credits.

This intensive two-week course explores the impact of digital media on museums, with a particular emphasis on museum exhibitions. Students will examine the recent history of digital media in museums, meet distinguished practitioners in the field, and work with a local (Washington, DC) museum to introduce digital media into its permanent galleries. While the focus of the course will be on museum exhibitions, students will also examine the evolving relationship between museums and their audiences. Digital media gives museum professionals an array of tools - mobile, site-based, web-based - but raises serious challenges to long-standing expectations about collections, curatorial authority, and audience participation. Students will explore both the current impact and future visions for these tools, their implications, and their significance for museums.

CAH 7281. World Textiles. 3 Credits.

This global survey course will introduce students to the important textiles of Asia, Africa, Oceania, and the Americas, from a material culture point of view. Dress and textiles in nomadic, rural, urban, and court social settings will be covered, while exploring issues such as gender, religious and political symbolism, and trade and migration of textiles, designs, and materials in ancient, historic, and modern times. The course will equip students with the basic terminology and methodology used in analyzing and cataloging textiles. Emphasis will be on those examples typically encountered in museum and other collections. The course includes both slide lectures and museum visits, all of which are required for successful completion of the course.

CAH 7283. Modern Textiles and Contemporary Fiber Art. 3 Credits.

This course will introduce the student to the development of modernist textiles and to contemporary fiber art, examining the continued vitality of textiles in the 20th and 21st centuries and the development of fiber art as an important art form. Topics will include: overviews of important art movements (Arts and Crafts, Art Nouveau, Dada and Surrealism, Modernism and others) which have influenced modern textiles; influences of non-western art forms on textiles design; discussion of important designers, artists, and manufacturers. The course will be a mixture of seminar discussions and visits to museums with relevant textile collections (Baltimore Museum of Art, Renwick Gallery, Textile Museum). Guest lectures, drawn from museum curators, interior designers, and contemporary fiber art appraisers will augment class-led discussions. In addition there will be required visits to the homes of contemporary fiber art collectors and to studios of fiber artists. Students will be responsible for leading several class discussions based on reading. Students will produce several PowerPoint presentations based on topics drawn from themes of the course, produce two papers, and discuss their papers with the class.

CAH 7300. Victorian Avant-Garde: British Art & Culture (1851-1901). 3 Credits.

The effects of the technological, social, and cultural upheaval of the 19th century on traditional ideas about art, design, literature, and journalism; the more radical changes in these media in the 20th century. Study of primary artworks and texts in Washington-area libraries, archives, and museums. The Great Exhibition of 1851, Pre-Raphaelite Brotherhood, Arts and Crafts Movement, Aestheticism, and Revival of Printing. John Ruskin, Dante Gabriel Rossetti, Julia Margaret Cameron, Elizabeth Siddal, William Morris, W.E. Godwin, Walter Pater, J.M.W. Whistler, Aubrey Beardsley, and Oscar Wilde. (Same as CAH 4300).

CAH 7532. Pop, Wiggle, and Wave: Transformative Design of the 1960's. 3 Credits.

Culturally relevant and quintessentially American, design in the 1960's fused a slick, modern vibe with a hipster aesthetic. Explore this iconic period through a hands-on, fast-paced seminar which will inform and inspire. Students will gain an understanding of the language of design of the 1960's, its antecedents in modernism and its regional and international variations. By looking at design in this period as a cultural history and using the lens of social geography, the class will connect the impact of the 60's with culture, style, form and making today.

CAH 7540. History of Modern Graphic Design. 3 Credits.

With the Industrial Revolution came advances in printing and the new medium of photography, both of which shaped the design of books, magazines, posters, and newspapers. Beginning in the mid-19th century, the course will examine the significant historical events, modern art movements, designers, and technological advances which shaped the development of modern graphic design. The course will include readings and discussion about contemporary visual systems and the effects of the digital revolution in the field of design.

CORCORAN ARTS & HUMANITIES (CAS)

CAS 1110. Writing I. 3 Credits.

For degree students only. This two-semester Foundation sequence is conducted as a workshop, with in-class discussion of student work and of assigned readings drawn from modern and contemporary essays, short stories, and poems. Goals of the course include development and refinement of reading, writing, creative ability, critical thinking, and research skills. Successful completion of CAS 1110 Writing I and CAS 1120 Writing II is prerequisite for Academic Studies courses beyond the 1000 level.

CAS 1120. Writing II. 3 Credits.

This second part of the two-semester Foundation sequence is conducted as a workshop, with in-class discussion of student work and of assigned reading drawn from modern and contemporary essays, short stories, and poems. Goals of the course include development and refinement of reading, writing, creative ability, critical thinking, and research skills. Prerequisite: CAS 1110. Successful completion of CAS 1110 Writing I and CAS 1120 Writing II is prerequisite for Academic Studies courses beyond the 1000 level.

CAS 150. Writing I. 3 Credits.**CAS 151. Writing. 3 Credits.****CAS 200. Art History Survey I. 3 Credits.****CAS 2000. Special Topics: Humanities. 3 Credits.**

The Humanities course at the Corcoran is a required two-semester survey (CAS 2000 and CAS 2010) of works of literature, philosophy and social theory, and of the ideas that give them enduring value. The goal of this course is to provide thoughtful training in the methods of the humanities employed in all college work and in investigating ideas, books, and art: close reading and interpretation of texts, exchange of ideas in discussion, and persuasive critical writing. Works of central importance from world cultural traditions are studied, focusing on a topic of universal and contemporary significance, as a model for the personally motivated intellectual inquiry that defines and enhances the careers of artists, designers, and independent thinkers. Topics by section each semester it is offered. Prerequisites: CAS 1120 Writing II.

CAS 201. Art History Survey. 3 Credits.**CAS 2010. Humanities II. 3 Credits.**

The Humanities courses at the Corcoran is a required two-semester survey (CAS 2000 and CAS 2010) of works of literature, philosophy and social theory, and of the ideas that give them enduring value. The goal of this course is to provide thoughtful training in the methods of the humanities employed in all college work and in investigating ideas, books, and art: close reading and interpretation of texts, exchange of ideas in discussion, and persuasive critical writing. Works of central importance from world cultural traditions are studied, focusing on a topic of universal and contemporary significance, as a model for the personally motivated intellectual inquiry that defines and enhances the careers of artists, designers, and independent thinkers. Topics by section each semester it is offered. Prerequisites: CAS 1120 Writing II.

CAS 250. Humanities. 3 Credits.**CAS 251. Humanities. 3 Credits.****CAS 2590. Cultural Resources of Washington, DC. 3 Credits.**

The artistic field is a universe of belief. Cultural production distinguishes itself from the production of the most common objects in that it must produce not only the object of its materiality, but also the value of this object, that is, the recognition of artistic legitimacy. This is inseparable from the production of the artist or the writer as artist or writer, in other words, as a creator of value. (Pierre Bourdieu) As the French sociologist Pierre Bourdieu has observed: artists are made, not born. In this seminar, first-year students will be introduced to the diverse cultural resources within the major metropolitan area of Washington, D.C. that lead to the making of artists. Students will investigate the web of institutions that make up the experience of art, culture, and society; these institutions generate, motivate, activate, foster, and disseminate change - and sometimes stand in its way. Although this course is reading and writing intensive, we will move from the classroom to the locations of culture and the various institutions unique to Washington, D.C. that form the experience of art, the creation of culture, and a vision of society. For example, students may choose to explore the changes and shifts in cultural capital for black and African Americans as seen through the locations of former slave Frederick Douglass' house in Anacostia, the Black Renaissance whose music lit up the Lincoln Theatre on U Street (next door to Ben's Chili Bowl, the iconic restaurant that withstood the 1968 race riots after MLK's assassination), local café and bookstore chain Busboy and Poets named after poet Langston Hughes, the White House that now is home to the first black President of America, and the Corcoran, whose most recent successful art show highlighted 30 African American artists in 2012. As cultural institutions in Washington, D.C., including the Corcoran, continue to re-examine and re-negotiate their purpose and relevance, we will not only ask, "How have these cultural resources and tools transformed and influenced art and the world," but also ask, "How will these cultural resources and tools transform and influence my art and my world?".

CAS 300. 20th Century Art. 3 Credits.**CAS 3050. Script and News Story Writing. 3 Credits.**

The written word, as a complement to visual images, is an integral aspect of the news story. In this course, students will explore the relationship between the photograph and the written word, and will learn research and writing strategies that enhance the power of the visual information presented by the photograph. Students will learn how to caption images as well as develop the verbal and writing skills necessary for effective news reporting and proposal writing. CAS 2300 Introduction to Journalism recommended prior to enrolling in this course.

CAS 3091. Art Studies Seminar: Critical Approaches to Modern and Contemporary Art. 3 Credits.

In this seminar course students will develop skills in critical analysis of primary and secondary sources, as well as research and communication skills. Students will learn how to formulate a thesis statement and provide visual and textual evidence to support an argument. The seminar will include peer evaluation in response to written work and oral presentations. This course is offered in the spring semester. It is required for BA students, and is an elective for BFA students with permission by the instructor. Topics, which will vary each semester it is offered, will be focused on one or more of the following: visual arts, including time-based media, such as video, television, and film, performing arts, and literary arts.

CAS 3120. Principles and Theory of Interior Design. 3 Credits.

Through a seminar format, this course explores the underlying principles and themes of the design of the built interior environment. Major developments in the field and contemporary methodology are placed within a social as well as historical context. In-depth research on selected topics provides each student an opportunity to focus on areas of particular interest under the guidance of the instructor. At times this course may be cross-tallied at the graduate level as CAS 6120. Additional work required for graduate level credit is outlined in the course syllabus.

CAS 320. Artists' Writings. 3 Credits.**CAS 3205. Baudelaire to Blogs: The Art of Writing About Art. 3 Credits.**

Much writing about art occurs not in books or long scholarly articles but in short formats such as critical reviews, written introductions to exhibits, statements, interviews, opinion pieces, and more recently, blog entries. This class will both look at examples of such art-writing (from the early modern era to the present), and undertake the practice of writing short descriptive and critical pieces of the types mentioned above in a workshop setting, making use of area exhibits and resources. The goal will be for students to develop skill and enjoyment in the diverse possibilities for writing about visual art (including one's own), leading to potential publication (online or in print).

CAS 3216. Art as Social Practice. 3 Credits.

Social practice is a genre of artistic production that utilizes a range of strategies to engage diverse audiences within the public sphere: urban interventions; collaborative and participatory art; service dispersal and generosity art; public performance; and Social Media and new media applications. In this course, we will investigate how artists working within the field of Social Practice access the public sphere to shape and develop relations with a range of audiences and publics. What does it mean for artists to create work outside of the gallery and within public space? How might participatory strategies work to change notions of authorship and blur the line between artist and audience? What is the potential of Internet-based protocols as venues for publicly engaged art? To answer these questions, we'll explore the various strategies that characterize Social Practice as well as the theoretical concerns that inform the genre (social theory, relational aesthetics, pluralism) through critical readings, artist projects, guest lectures and classroom experiments.

CAS 3250. Poetics Off The Page. 3 Credits.

This course explores the history and theory of scripted literary texts that reside outside of the traditional venues for printed poetry, namely the pages of codex books. Some of the artists likely to be covered include Ian Hamilton Finlay, Kenneth Goldsmith, David Antin, Richard Prince, the anonymous graffiti poets of May 68, and many more. Students work individually and collaboratively to construct "off-the-page" poetic projects.

CAS 3330. Body and/as Image. 3 Credits.

Twentieth-century art has increasingly seen the artist's body used as both the subject and object of artists' work. Expanding and renewing the age-old tradition of self-portraiture, body and performance artists are part of the tradition of artists moving art out of the gallery, into unexpected spaces and media. Beginning with key artists such as Marcel Duchamp and Jackson Pollock, we will examine the work of artists who have used their bodies to create their art, including Carolee Schneemann, Yoko Ono, Chris Burden, Ana Mendieta, Vito Acconci, Marina Abramovic, Matthew Barney, Yasumasa Morimura, and Mona Hatoum. Representations of the artist's body in a wide range of media, including painting, photography, video, and performance, will be analyzed in relation to the social historical context as well as critical writing by philosophers and thinkers such as Georges Bataille and Gilles Deleuze. This course is designed for students whose work involves the human body. Students research artists or art movements for a paper and project. In some terms this course may be cross-tallied at the undergraduate level as CAS 3330 and at the graduate level as CAS 6330. Additional work is required to earn graduate credit.

CAS 3360. Psychology of Creativity. 3 Credits.

How can we define creativity? Do we always recognize it when we see it? How can we make access to our own creativity more reliable? Artists, designers, and innovative thinkers have always pursued these questions. In the rapidly changing age of information, they have become crucial in all fields. In this course, the psychological and biological foundations of perception through problem-solving and creative work are studied as a means of exploring and developing creativity through readings, practical exercises, and student projects.

CAS 3361. Knowing Your Mind. 3 Credits.

How is it that we come to know things? How do we process this information to know our own way of thinking and to come to terms with an external world? This course will explore several different methods of Western psychology that have developed throughout the twentieth century that explore how the mind works in processing the stimulation from the external world and how this processing is framed by the cultural and social principles and values that inform the subject how to process, understand, and in the end conditions us to think in the manner that we do. Some methodologies we will explore: American Pragmatism, Psychoanalysis, Analytic Psychology and Gestalt Theory. In conjunction with these methodologies, in the latter part of the course we will take up explore how these meanings and values inform our understanding of gender and gender identities.

CAS 3365. Cartoons, Caricature and Covergirls: Race and Gender in American Popular Culture. 3 Credits.

Throughout the 20th century, the imaging of both the sexes and various racial/ethnic groups has heavily influenced the public's perspective of gender relations, racial dynamics, public policy, and even foreign relations. The goal of this course will be to canvass the ongoing shifts in the depictions of men and women in an increasingly diverse culture. As these images are deconstructed, the class will also study the political and social climate in which they were produced. We will investigate whether racialized and gendered images in popular culture reflect historical trends and realities or instead represent stereotypical ideas or fantasies about the nature of social relations in the United States. This course will incorporate political cartoons, comic strips, advertising images, and television/motion pictures to fully explore media-based images and include study trips to the Library of Congress and other collections in Washington, DC.

CAS 3381. The Uncanny in Literature, Film and Art. 3 Credits.

The sensation of the Uncanny has been the subject of debates in criticism since the early days of Romanticism: Is it just a physical response to something creepy, unexpected, or inexplicable? Is it something more exalted, a variation on the Sublime, or the artistic trace of an attempt to represent what can never be represented? To understand how these questions moved from the periphery to the center of ideas about modern art, we will explore Freud's influential theory of the Uncanny, as well as accounts of the fantastic and supernatural in art. To trace some of the forms of the Uncanny, we will look into haunted houses, monsters, doubles, vampires, and ghosts in examples from fiction and film such as: Edgar Allan Poe, *The Fall of the House of Usher* and *The Black Cat*; E. T. A. Hoffmann, *The Sandman*; Henry James, *The Turning of the Screw*; Bram Stoker, *Dracula*; Carl Dreyer, *Vampyr*; Michal Waszynski, *The Dybbuk*; Jacques Tourneur, *Cat People*; Peter Greenaway, *A Zed and Two Noughts*.

CAS 3390. 19th Century Print Culture. 3 Credits.

The printing and publishing industries in Europe and America underwent radical transformations as a result of industrialization in the late 18th and early 19th centuries. Machine presses supplanted hand-presses, and as the century progressed mass literacy created a new demand for different forms of printed material for instruction, education, and entertainment. The making of books became faster, cheaper, and somewhat out of control, and the books themselves registered these changes in their material forms. Text and image worked with and against each other in novel and surprising ways. This course will examine these ruptures and pose critical questions about the changing socio-economic roles of reading and writing throughout the 19th century. Early sessions will cover the hand-press era, from Gutenberg to Blake, and the final session will look forward to the 20th century and the advent of digital technologies. In addition to weekly reading assignments and a short theoretical paper, students will conduct independent research in the Library of Congress and present a developed "case study" seminar paper to the class at the end of the semester. At times this course may be cross-tallied at the graduate level as CAS 6390. Additional work required for graduate level credit is outlined in the course syllabus.

CAS 3400. Introduction to Documentary Film. 3 Credits.

Following John Grierson's definition of the documentary as "the creative treatment of reality," this course will consider documentary as a special type of non-fiction film that is primarily marked by its desire to give a subjective account of the world as opposed to an objective report. In the first half of the semester, we will examine some key theoretical and formal issues surrounding the documentary form. In the second half of the semester, we will pay special attention to the history of documentary film from the 1960s as an alternative film practice and consider documentary's special relationship to reality, experience, expression, and social commentary/change. In particular, we will be interested in attempts by filmmakers to explore the limits of non-fiction.

CAS 351. Theories of Art. 0 Credits.

CAS 3582. Fiction Workshop: The Writer and Reader in Narrative. 3 Credits.

There are countless stories to tell, and each can be told in countless ways. This workshop course in short fiction explores how the interest, infinite variety, and art of narrative depend on the nature of the transaction between story-teller and audience. Outstanding examples of the form are examined for their essential elements--plot, characterization, point of view, figurative language, and literary style--and students share exercises extending their command of each. Works studied, from fairy tales and modern classics to contemporary experimental fiction, explore the difficulties and uncertainties of story-telling, the reader's participation in the construction of meaning, and the relation of narrated incidents to lived experience. Students in the course will collaborate on the development of an online magazine of short fiction.

CAS 357. Theories of Art. 0 Credits.

CAS 364. Political Myth, Symbol & Ritual. 3 Credits.

CAS 374. Elements of Poetry. 3 Credits.

CAS 3800. Independent Study: Academic Studies. 3 Credits.

This option is appropriate for degree students who want access to independent faculty supervision, lab areas, and supplies for independent projects, and do not need or desire extensive course instruction.

CAS 3900. Internship: Academic Studies. 3 Credits.

For degree students only. Internships can help students develop marketable skills, establish professional contacts, and explore different career options.

CAS 4090. BA Senior Thesis Workshop. 3 Credits.

Offered only in the fall semester, this course will prepare BA students in their final year with the conceptual and methodological framework necessary for successful completion of the senior thesis project in the spring semester. The emphasis will be on developing higher-level academic research and writing skills. Students will make a number of off-site visits to the Library of Congress and other archives in the Washington DC region. Course work will consist of frequent short writing assignments and preliminary work on the senior written thesis project: proposals, outlines, bibliographies, etc. Open only to BA majors in their final year.

CAS 4091. BA Thesis Directed Study. 3 Credits.

Reserved for BA requirement.

CAS 4105. Interior Design Professional Practices. 3 Credits.

This course explores the everyday business, legal and financial considerations of the practicing interior designer. Topics include the formation and operation of an interior design business, and designer/client relationships. Students are also introduced to portfolio preparation and business writing skills. This course is only offered during the Spring semester. At times this course may be cross-tallied at the graduate level as CAS 7100. Additional work is required for graduate credit. Prerequisites: CID 3091 Interior Design Studio IV.

CAS 4200. Business Communications for Designers. 3 Credits.

This course focuses on building business communication skills and materials necessary for success in the field of design. Written, oral, and visual communications skills and best practices will be covered. Designers will brand themselves as a creative professionals through presentation of projects in a professional and compelling manner. Projects will include writing content for resumes, cover letters, introduction and thank you letters, emails, proposals/cost estimates, websites and marketing materials; role playing for phone and in-person interviews; presentations of design work to potential clients; and establishing (or enhancing) a presence on various professional community networking sites. Please note that this is not a studio course, nor are studio-based projects part of the syllabus.

CAS 4205. Creative Writing. 3 Credits.

Creative Writing topic may vary each term it is offered.

CAS 421. Economics and Society. 0 Credits.**CAS 4290. The Object in its Public Space. 3 Credits.**

Objects exist in ritual, exhibitionary, civic, and domestic spaces. Drawing on theories of space developed in anthropology, semiotics, performance studies, urban studies, and museum studies, this course explores how spaces shape the meaning, value, and power of objects and how objects transform the spaces which they inhabit. Roland Barthes' ground-breaking semiotic analyses of objects, Carol Duncan's *Civilizing Rituals: Inside Public Art Museums*, and Barbara Kirshenblatt-Gimblett's extensive writings on display as performance provide key readings. At times this course may be cross-tallied at the graduate level as CAS 4290. Additional work required for graduate level credit is outlined in the course syllabus.

CAS 4330. Politics, Advertising, and Mass Media. 3 Credits.

In contemporary mass media, political ideas and candidates are sold in the same way as commercial products. This course highlights study of current electoral campaigns within the larger context of visual culture, political rhetoric, general and historical theories of argument and persuasion, and the practical considerations of how government, civil society, and consumer culture operate through mass representations. In keeping with the aims of traditional rhetoric, we explore means of guarding against invalid arguments that are convincingly presented, as well as making a better case for your own views. Students in this seminar should expect to deepen their understanding of the use of images and discourse to influence opinion and motivate choice in our time.

CAS 4400. Sex in American Cinema. 3 Credits.**CAS 4430. The Dream Screen - Cinematic Fantasy from The Wizard of Oz to Eternal Sunshine of the Spotless Mind. 3 Credits.**

From the earliest era of cinema, the ability of the medium to replicate the hallucinatory experience of dreaming has been exploited in some genres, but the prevailing mode has been realism. Now the paradigm is shifting: motion pictures that explore the interior space of the mind and portray imaginary worlds are popular successes and win critical esteem. This course investigates the artist's ability to invoke worlds that have never existed in waking reality through the use of photographic illusion and explores outstanding cinematic representations of the dream. The larger purpose of the course is to investigate the foundation of psychoanalytic criticism in the analogy of dream and art. To deepen the student's experience, the course also offers training in keeping a dream journal and exploring your own nightly theater of dreams. Readings in Freud, Jung, Rank, Klein, Kristeva, and film theory; films screened include Surrealist classics *Un chien andalou* and *Dreams That Money Can Buy*; the experimental films of Maya Deren, Kenneth Anger, Stan Brakhage, and Phil Solomon; Hitchcock's *Spellbound*; Ingmar Bergman's *Wild Strawberries*; Richard Linklater's *Waking Life*.

CAS 4440. Sex in American Cinema. 3 Credits.

From silent-screen sirens to contemporary bromance, the movies have not only reflected Americans' sexual mores, but taught the public what to believe, denounce, and accept. This course examines the historical capacity of American cinema both to represent sexual norms and to subvert the idea of the normal, with particular emphasis on the profound historical and cultural influence of the Hollywood Production Code. Examples for study are screened in the Corcoran auditorium and include representative works from genres such as melodrama, farce, film noir, horror and the western, as well as experimental, independent and adult film. Students undertake a critical paper on an American film as their semester project. In some terms this course may be offered at the undergraduate level as CAS 4440 and at the graduate level as CAS 7440. Additional work is required to earn graduate credit.

CAS 4480. Texts and Readers. 3 Credits.**CAS 4540. Curatorial Seminar. 3 Credits.**

Students in this course will research and prepare for an exhibition on selected topic in photography, scheduled to open at the Corcoran Gallery of Art at the end of the spring semester. Students will research the history of the specific topic and particular photographer(s) who may be in the show. Working in teams, they will also learn the hands-on elements of exhibition preparation, and will prepare checklists, wall labels, object labels, sample catalogue entries, press releases, work on exhibition design and layout. They will also learn the basics of museum techniques for gallery design, shipping costs and planning, condition reports, exhibition installation and preparation, shipping, budgeting, public relations, and catalogue publications.

CAS 4621. Postconceptualism. 3 Credits.

Focusing on contemporary art movements and practice, this course considers the connections between artists, their artworks, and the period in which they create the work. Michel Foucault called this cultural outlook the episteme, and the prevalence of Postconceptualism as *modus operandi* among the newest art stars merits our investigation of contemporary conceptual art theory and its relationship to today's art practices. The course will study purveyors of postconceptual practice, who use "style" as metonymy, where a part is meant to represent the whole, projecting their works as surface without theoretical substance. We will provoke an appreciation of Postconceptualism in both its epistemic and metonymic elements and learn how to address and distinguish between the varying results. Course lectures are supported by assigned readings from a variety of sources, with visual presentations to identify key artists. Critical discussions encourage students to support personal positions in relation to art theories, and off-campus visits provide first-hand observation of contemporary art in context. Students must maintain focused attendance, complete all assigned readings, contribute to in-class and blog discussions, make one presentation, and submit two written essays to receive course credit.

CAS 4910. Internship: BA Required. 3 Credits.

Reserved for BA requirement.

CAS 6120. Principles and Theory of Interior Design. 3 Credits.

Through a seminar format, this course explores the underlying principles and themes of the design of the build interior environment. Major developments in the field and contemporary methodology are placed within a social as well as historical context. In-depth research on selected topics provide each student and opportunity to focus on areas of particular interest under the guidance of the instructor. This course is open to students enrolled in the Masters of Interior Design program; or by permission from the Department Chair. At times this course may be cross-tallied at the undergraduate level as CAS 3120.

CAS 6290. The Object its Public Space. 3 Credits.

Objects exist in ritual, exhibitionary, civic, and domestic spaces. Drawing on theories of space developed in anthropology, semiotics, performance studies, urban studies, and museum studies, this course explores how spaces shape the meaning, value and power of objects and how objects transform the spaces they inhabit. Roland Barthes' ground-breaking semiotic analyses of objects, Carol Duncan's *Civilizing Rituals: Inside Public Art Museums*, and Barbara Kirshenblatt-Gimblett's extensive writings on display as performance provide key readings. At times this course may be cross-tallied at the undergraduate level as CAS 4290. Students wishing to pursue undergraduate credit should register for the undergraduate section.

CAS 6330. Body and/as Image. 3 Credits.

Twentieth-century art has increasingly seen the artist's body used as both the subject and object of artists' work. Expanding and renewing the age-old tradition of self-portraiture, body and performance artists are part of the tradition of artists moving art out of the gallery, into unexpected spaces and media. Beginning with key artists such as Marcel Duchamp and Jackson Pollock, we will examine the work of artists who have used their bodies to create their art, including Carolee Schneemann, Yoko Ono, Chris Burden, Ana Mendieta, Vito Acconci, Marina Abramovic, Matthew Barney, Yasumasa Morimura, and Mona Hatoum. Representations of the artist's body in a wide range of media, including painting, photography, video, and performance, will be analyzed in relation to the social historical context as well as critical writing by philosophers and thinkers such as Georges Bataille and Gilles Deleuze. This course is designed for students whose work involves the human body. Students research artists or art movements for a paper and project. In some terms this course may be cross-tallied at the undergraduate level as CAS 3330 and at the graduate level as CAS 6330. Additional work is required to earn graduate credit.

CAS 6390. 19th Century Print Culture. 3 Credits.

The printing and publishing industries in Europe and America underwent radical transformations as a result of industrialization in the late 18th and early 19th centuries. Machine presses supplanted hand-presses, and as the century progressed mass literacy created a new demand for different forms of printed material for instruction, education, and entertainment. The making of books became faster, cheaper, and somewhat out of control, and the books themselves registered these changes in their material forms. Text and image worked with and against each other in novel and surprising ways. This course will examine these ruptures and pose critical questions about the changing socio-economic roles of reading and writing throughout the 19th century. Early sessions will cover the hand-press era, from Gutenberg to Blake, and the final session will look forward to the 20th century and the advent of digital technologies. In addition to weekly reading assignments and a short theoretical paper, students will conduct independent research in the Library of Congress and present a developed "case study" seminar paper to the class at the end of the semester. At times this course may be cross-tallied at the undergraduate level as CAS 3390. Students wishing to pursue undergraduate credit should register for the undergraduate section.

CAS 6400. Introduction to Documentary Film. 3 Credits.

Following John Grierson's definition of the documentary as "the creative treatment of reality," this course will consider documentary as a special type of non-fiction film that is primarily marked by its desire to give a subjective account of the world as opposed to an objective report. In the first half of the semester, we will examine some key theoretical and formal issues surrounding the documentary form. In the second half of the semester, we will pay special attention to the history of documentary film from the 1960s as an alternative film practice and consider documentary's special relationship to reality, experience, expression, and social commentary/change. In particular, we will be interested in attempts by filmmakers to explore the limits of non-fiction.

CAS 6480. Texts and Readers. 3 Credits.**CAS 6550. The Magazine Essay. 3 Credits.**

In this graduate-level workshop-style course students research and develop a long form written piece on a topic of their choice. Students explore a variety of reporting and writing approaches through lectures, guest speakers, case studies and practical assignments. Students may use this course to develop the text to accompany their final thesis projects. Prerequisite: Research, Writing and Reporting.

CAS 6800. Directed Studies: Academic Studies. 1-3 Credits.

This option is appropriate for degree students who want access to independent faculty supervision, lab areas, and supplies for independent projects, and do not need or desire extensive course instruction. This option is justified only if 1) the project content cannot be covered in an existing course, 2) the student's department deems it of substantive value to the student's educational goals and interests, and 3) the project work will be done outside of regularly scheduled class time. All directed studies are for credit (one to three credits). Students cannot take more than three credits of directed studies per semester. Students enrolled in directed studies will have access to the facilities and equipment at times arranged by the instructor. To enroll, students must submit a Directed Studies Contract that is available at the Office of the Registrar and obtain written permission from the instructor and the chair or program director of the student's department and when different, the course department. The directed studies instructor will be responsible for working with the student to establish project goals, oversee progress, and determine final course grades. Bachelor's Foundation students and Continuing Education students are not eligible for directed studies. Under certain circumstances, directed studies may be pursued by graduate students by combining participation in an advanced undergraduate course with extra independent assignments at the graduate level, as arranged in advance with the directed studies instructor.

CAS 7100. Interior Design Professional Practice. 3 Credits.

This course explores the everyday business, legal and financial considerations of the practicing interior designer. Topics include the formation and operation of an interior design business, and designer/client relationships. Students are also introduced to portfolio preparation and business writing skills. This course is only offered during the Spring semester. At times this course may be cross-tallied at the undergraduate level as CAS 4105. Additional work is required for graduate credit.

CAS 7205. Creative Writing. 3 Credits.

This course is designed to develop the creative writing skills of those enrolled in it. Attention will be given to the essay, short fiction, and poetry. Work by outstanding exponents of each form will be examined and discussed. Each student will develop a portfolio containing examples of all three forms, with a concentration on one of them. The course will be conducted as a workshop.

CORCORAN CERAMICS (CCR)

CCR 008. Distilling Nature for Evocative Pottery. 0 Credits.

CCR 0802. Ceramics Studio Workshop. 0 Credits.

CCR 1205. Introduction to Ceramics. 0 Credits.

CCR 1250. Introduction to the Wheel. 1.5 Credit.

Students will be introduced to using the wheel to create functional pottery. The class will cover wedging, throwing, trimming, and glazing for simple forms. Assignments will explore the poetic presence that results from the character of clay, the manipulation of form, and the qualities of glazed surfaces. Weekly assignments will focus upon bowls and vertical forms with a focused glazing/slipping palette. In some terms, this course may be cross-tallied at the undergraduate level as CCR 1250 and at the graduate level as CCR 5250. Additional coursework will be required to earn graduate credit.

CCR 1253. Introduction to the Wheel. 3 Credits.

Students are introduced to using the wheel to create functional pottery. The class covers wedging, throwing, trimming, and glazing for simple forms. Assignments explore the poetic presence that results from the character of clay, the manipulation of form, and the qualities of glazed surfaces. Weekly assignments focus on bowls and vertical forms with a focused glazing/slipping palette. At times this course may be cross-tallied at the intermediate level as CCR 2253. Students who have completed CCR 1253 may wish to register for CCR 2253.

CCR 1305. Introduction to Handbuilding. 1.5 Credit.

Learn the fundamental techniques of hand-building in ceramics, including the pinch, coil, and slab methods, which provide a foundation for understanding the language of pottery and hollow construction. Explore basic vessel formats from utilitarian to sculptural and various glazing and firing techniques.

CCR 1350. Introduction to Ceramic Tile. 1.5 Credit.

Students learn to create ceramic tiles while experimenting with various methods of tile production and surface effects. In addition to understanding the process of glaze mixing, the class explores bisque and glaze firing, bisque slabs, plaster press molds, carving, modeling, slip trailing, sgraffito, and stenciling. To complement the studio work, slide lectures show the historic and contemporary uses of tile and pattern in architecture.

CCR 2230. Pyro-techniq: Atmospheric Effects/Firing. 0 Credits.

CCR 2236. Images in Clay. 3 Credits.

Ceramic object-making techniques tie in with drawing, painting, printmaking-this is an intermedia experience for students. Students work with various image-producing techniques which are compatible with ceramics-decals, printing, and painting-to bring the surface image into context with the form of the ceramic object. The class works with oxides and glazes as well as the printed and transferred image. From Majolica to digital imagery, from tile to sculptural object, students create diverse works representing the scope of image-making on clay.

CCR 2250. Intermediate Wheel Throwing. 1.5 Credit.

While being assisted in their efforts to enhance their throwing skills, students will be encouraged to explore a wide range of decorative techniques, both in the forms they produce and texturing and color treatments applied to those forms. Methods useful in the throwing of large forms will also be explored as will possibilities of combining thrown shapes to create larger vessel or sculptural forms. Prerequisite: CCR 1250 Introduction to the Wheel.

CCR 2253. Intermediate Wheel: Poetry of Pottery. 3 Credits.

The intermediate wheel class will delve into beakers, vase's, and pitchers through weekly assignments using the pottery wheel. Just as a poet contemplates the nuances of language, the class will consider the aesthetic vocabulary of volume, material and physical traces. Students will make and use hand-made brushes as one means to investigate the interrelationship of form and surface decoration. The nuance of slip and glaze application will be explored; projects will be fired in a high temperature gas kiln. At times this course may be cross-tallied at the Introductory level as CCR 1253. Students with prior experience may register for CCR 2253 if they have already completed CCR 1253 Introduction to the Wheel. Prerequisite: CCR 1250 or CCR 1253 Introduction to the Wheel; or permission from the department.

CCR 2350. Intermediate Ceramic Tile. 1.5 Credit.

This class further develops the skills learned in CCR 1350: Introduction to Ceramic Tile. Students are expected to design their own specific projects. They will be introduced to a broader range of techniques, types of clays, glazes and firing temperatures as needed. At times this course may be cross-tallied at the introductory level as CCR 1350. Prerequisite: CCR 1350 Intro to Ceramic Tile.

CCR 2380. Sculpture in Clay. 3 Credits.

This course will provide an exploration of methods of clay construction relating to sculptural form and the aesthetic concerns of the sculptural object. A variety of traditional hand building methods and innovative forming techniques will be introduced to challenge and inspire students notion of ceramic sculpture. The production of discreet objects, multiples, and issues dealing with the installation of each will be addressed. The full range of ceramic finishes and firing techniques will be introduced and explored to emphasize the interfacing of ceramic surface and form.

CCR 275. Raku/Pit-Firing Workshop. 1.5 Credit.**CCR 3600. Special Topics: Ceramics. 3 Credits.**

Students will explore ways of representing the human form utilizing various hand-building techniques. Pinch, coil, and slab methods will be reinterpreted with the hollow figure/vessel in mind. Gesture studies in clay will form a basis for understanding the connection between the inherent plasticity of the clay and the animation of the body. Sustained figure modeling studies will address more traditional sculptural focus using life models. Surface treatments will include the use of slips, engobes, sgraffito, as well as glaze and firing options.

CCR 5236. Images in Clay. 3 Credits.

Ceramic object-making techniques tie in with drawing, painting, printmaking-this is an intermedia experience for students. Students work with various image-producing techniques which are compatible with ceramics-decals, printing, and painting-to bring the surface image into context with the form of the ceramic object. The class works with oxides and glazes as well as the printed and transferred image. From Majolica to digital imagery, from tile to sculptural object, students create diverse works representing the scope of image-making on clay.

CCR 5380. Sculpture in Clay. 3 Credits.

This course will provide an exploration of methods of clay construction relating to sculptural form and the aesthetic concerns of the sculptural object. A variety of traditional hand building methods and innovative forming techniques will be introduced to challenge and inspire students notion of ceramic sculpture. The production of discreet objects, multiples, and issues dealing with the installation of each will be addressed. The full range of ceramic finishes and firing techniques will be introduced and explored to emphasize the interfacing of ceramic surface and form.

CCR 5400. Clay Loves Printmaking. 1.5 Credit.**CCR 6600. Special Topics: Ceramics. 3 Credits.**

Students will explore ways of representing the human form utilizing various hand-building techniques. Pinch, coil, and slab methods will be reinterpreted with the hollow figure/vessel in mind. Gesture studies in clay will form a basis for understanding the connection between the inherent plasticity of the clay and the animation of the body. Sustained figure modeling studies will address more traditional sculptural focus using life models. Surface treatments will include the use of slips, engobes, sgraffito, as well as glaze and firing options.

CCR 6850. Directed Studies: Ceramics. 1.5 Credit.

CORCORAN DESIGN (CDE)

CDE 1090. Design Fundamentals I. 3 Credits.

An introduction to the visual components that serve as fundamental principles in the field of design. The study, classification, and application of Gestalt theories of perception, color systems for designers, and pattern making. Design methodology, processes, and language; the critique process; project workflow; professional practices and presentation; and digital software and hand craft tools. Students create 2D and 3D forms and learn how to use materials in design projects.

CDE 1091. Design Fundamentals II. 3 Credits.

In Design Fundamentals II, students utilize and deepen the skills they acquired in Design Fundamentals I. Course projects focus on visual relationships of form and image; type and grid structures; and scale. Visual communication and visual hierarchy are concepts integrated in course projects. Students will be engaged in a series of projects that address more advanced 2D and 3D concepts of abstract forms and their professional applications. Students will learn about the cultural and functional meaning of materials and finishes, while continuing to hone their digital software tools and hand craft skills. Pre-requisite: A grade of "C" or higher in CDE 1090 Design Fundamentals I.

CDE 1250. Frame By Frame Animation. 3 Credits.

This course introduces students to the principles and workflow for frame-by-frame animation with still images. Through wire framing and drawing flip books, students will learn basic principles of animation. Students will learn how to combine claymation and hand crafted techniques with digital production tools. Student will learn animation methods and processes, along with workflow and production. Critique process and animation terminology is introduced and developed with course content and projects.

CDE 2090. Design Studio I. 3 Credits.

Course content focuses on visual hierarchy, principles of composition, design principles, and intro to Semiotics. Typography, form, image, space, and the grid are explored through projects. Students learn an iterative design process to explore and develop concepts. This course requires a high level of execution through precise craftsmanship.

CDE 2091. Design Studio II. 3 Credits.

This course explores brand identity systems and programs. Students learn an iterative design process to develop a cohesive and comprehensive branding program. The developed brand identity will be applied to various media: print, motion, and web. Prerequisite: A grade of "C" or better in GD2090 Sophomore Design Studio I; or Department Chair's approval.

CDE 3800. Independent Study: DM/GD. 3 Credits.

This option is appropriate for degree students who want access to independent faculty supervision, lab areas, and supplies for independent projects, and do not need or desire extensive course instruction.

CDE 3900. Internship: DM/GD. 3 Credits.

For degree students only. Internships can help students develop marketable skills, establish professional contacts, and explore different career options.

CDE 4170. Professional Practices for Designers. 3 Credits.

This course explores targeted résumé and portfolio development in addition to the everyday business considerations of the practicing designer. Topics include personal goal assessment, strengths vs. weaknesses, the formation and operation of a design business, and designer/client relationships. Refining a professional portfolio and reviewing projects is emphasized. This course is geared towards students who are about to enter the design job market. Prerequisites: CDM 3091 Digital Media Design Junior Studio II or CGD 3091 Graphic Design Junior Studio II or CID 3091 Interior Design Junior Studio II.

CORCORAN DIGITAL MEDIA DESIGN (CDM)

CDM 0841. Web Design for Professionals. 0 Credits.

Using industry-standard Adobe Dreamweaver, this professional development workshop introduces students to the basics of modern web development and design, including best practices; formatting with CSS; understanding Web 2.0; reusing data; using open-source JavaScript libraries; the role of the database in web design, creating forms, using Photoshop to create mouse-overs, optimizing images for the Internet, using AJAX to create widgets and drop-down menus; and much more. Students will critique sites, discuss finding a niche in the huge world of web design, review likely web design trends in the next several years, and discuss project management and customer relations, including explaining the technical and design sides of projects to clients who are otherwise not equipped to evaluate project goals. Prerequisite: At least two years professional experience with Photoshop.

CDM 0880. Digital Video Basics Workshop. 0 Credits.

Learn to plan, shoot and edit a video production using the latest DV technology. This intensive course offers the student hands-on training in digital movie making and editing techniques using Final Cut Pro. Basic script writing and tools for lighting, editing, and acquiring audio/video will be covered. Prior Mac OSX experience preferred.

CDM 1200. Digital Design I. 3 Credits.

An introduction to design fundamentals and digital software tools. The use and application of type and images to design projects; image making; methods, processes, visual hierarchy, and visual communication strategies; and professional practices, project workflow, and the critique process. Students learn to use professional design industry digital software tools, including Adobe Photoshop, Illustrator, and InDesign.

CDM 1201. Digital Design Fundamentals. 1.5 Credit.

This course introduces the fundamentals of digital design using Adobe Illustrator, InDesign, and Photoshop taught within the context of contemporary professional design. Students will learn to navigate these three essential graphic design programs and to use the tools and functions necessary for professional design work, both as individual software programs and in combination with one another. Upon completion of this course, students will have a solid understanding of how to use Illustrator, InDesign and Photoshop to create typography, layouts and images. We strongly recommend that students who do not have prior design experience also enroll in CGD 1011: Principles of Graphic Design.

CDM 1241. Web Design Fundamentals. 1.5 Credit.

In this hands-on course, students will explore the technical and design fundamentals of creating a website. Students learn how to hand-code Web pages with HTML and CSS, to format text, incorporate images, build tables and create links, as well as how to use Photoshop to prepare images for the web. Through lectures, demonstrations and critiques students will be introduced the elements of good web design, the basics of user interface, and recommended standards. Students will design and build a simple website that implements each of the skills and techniques covered in the course. Each student will be required to host and upload their website. Students enrolling in this class must have at least 2 years of experience using a Macintosh computer to save, find and open files. They must also be familiar with browsing the web.

CDM 1500. Introduction to VectorWorks. 1.5 Credit.

Introduction to the practice of architectural drawing and detailing through the use of VectorWorks, an industry-standard CAD software for Exhibition Design, Theater Design, Landscape Design, and increasingly used by Architects. Through this course students will learn the basics of orthogonal projections (Plan, Elevation, Section) while learning to use and navigate the interface of VectorWorks.

CDM 2230. Page Layout for Print and Interactive Design. 3 Credits.

This course focuses on Adobe InDesign's layout and typesetting tools for print and interactive design. Course content covers page layout, grid systems, typography, styles, tables and forms, color space, file formats, resolution sizes for print and interactive documents. Project and software workflow is included in course projects. Pre-requisite: CDM 1200 Digital Design I or CDE 1XXX Communication Design.

CDM 2280. Interactive Web Design I. 3 Credits.

This course offers a technical and conceptual introduction to web design. Topics covered include visual design; the fundamentals of website structure and navigation; accessibility and usability; writing HTML and CSS; and content management systems. Projects examine the web as a platform for both client-driven and self-published work.

CDM 2300. Motion Graphics I: AfterEffects. 3 Credits.

Motion graphics and visual effects for animation, digital video, and film using Adobe After Effects. Visual storytelling through kinetic sequencing, using images, type, and sound. Students learn to create and communicate with pre-visualization tools such as storyboards and style frames before animating in the timeline. Asset management, timeline work flow, keyframes, sound, compositing techniques, basic keying, effects, lighting, and camera use. Projects cover all facets of motion design and narrative storytelling from conceptual design to final production. Prerequisites: CDE 1090 or CDM 1200.

CDM 2320. Digital Illustration I for Designers. 3 Credits.

Digital illustration for print and web. Application of traditional illustration to digital media, using primarily Adobe Photoshop and Illustrator. Focus on concept development and personal style. Critiques consider composition, lighting, content, meaning, and other constructive criteria.

CDM 2420. Sound Design and Editing. 3 Credits.**CDM 3090. Digital Media Design Studio III. 3 Credits.**

Mood boards, storyboards, style frames, video editing, narrative structure, animation, and motion graphics for the network television industry. Design and animation methodology, processes, language, and the critique process. Project workflow, professional presentation, and professional practices for designers and animators are integrated into course projects. The semester long course project is a network ID package that includes a 10 second open, bump in, bump out, lower thirds, and in-show transitions. Adobe After Effects and handcraft tools. Prerequisite: CDE 2091. Restricted to undergraduate Digital Media Design majors.

CDM 3091. Digital Media Design Studio IV. 3 Credits.

In this advanced level course, students will learn and develop skill sets in research, script writing, and voice-overs. Course projects include creating mood boards, storyboards, style frames, video editing, narrative structure, animation, and motion graphics. Students will learn design and animation methodology, processes, language, and the critique process. Project workflow, professional presentation, and professional practices for designers and animators are integrated into course projects. Course projects include a Network Promo animation and a kinetic infographic. Students will expand their skill sets with Adobe After Effects and handcraft tools in course projects. At the end of the semester, students will obtain experience in professional animation projects and skill sets, while understanding on-the-job expectations for a fast-paced professional animation studio in the network television and film industry. This course is for Undergraduate Digital Media Design majors only. Prerequisite: A grade of "C" or better in CDM 3090 Digital Media Design Junior Studio III; or Department Chair's approval.

CDM 3280. Interactive Web Design II. 3 Credits.

In this course, students learn to design for dynamic systems. Building on the foundation of Interactive Web Design I, students use tools such as JavaScript, PHP, and SQL in to create pages that communicate up-to-the-minute information. Pre-requisite: CDM 2280 Interactive Web Design I.

CDM 3300. Motion Graphics II: AfterEffects. 3 Credits.

Animation and motion graphics using Adobe After Effects. Kinetic sequence projects include narrative animation and type in motion. Students develop advanced level storyboards and style frames as pre-visualization tools. Projects incorporate sound and audio files as tone and storytelling elements. Project workflow emphasizes narrative exploration, pacing, timing, and scene transitions. Projects encompass all facets of motion design and narrative storytelling from conceptual design to final production. Prerequisites: CDM 2300.

CDM 3311. Animation I: Cinema 4D. 3 Credits.

3D animation using Cinema 4D software. 3D space, scale, perspective, modeling, lighting, camera use, textures, and rendering. Students learn 3D animation processes, methods, and workflow as they design and produce small- and large-scale objects in 3D environments. Course content and projects focus on Cinema 4D integration with Adobe Illustrator and Adobe Photoshop.

CDM 3312. Animation II: Cinema 4D. 3 Credits.

Intermediate course in 3D animation using Cinema 4D software. Skill sets, project workflow, and production in 3D animation, including 3D space, modeling, lighting, camera use, and textures. Animation processes, methods, and workflow while creating large scale projects using the software. Introduction of more advanced subjects of character rigging and animation, Dynamics, BodyPaint, Particles and MoGraph, with an exploration of the integration between Cinema 4D and After Effects. Prerequisites: CDM 3311.

CDM 3320. Digital Illustration II for Designers. 3 Credits.

The visual communication art of illustration. Students apply drawings to visual story development by composing graphics, concept art, covers, and other application techniques for a variety of media for print and web. Adobe Photoshop with Adobe Illustrator. Prerequisite: CDM 2320.

CDM 3410. Entertainment Design: Movie Key Art. 3 Credits.

This course introduces the fundamental basics of Movie Key Art for the purpose of movie marketing campaigns, which includes movie posters, promotional merchandise, dvd packaging, outdoor and Internet advertising. Topics that will be covered include the history of Movie Key Art, marketing strategy with ideation and branding, as well as typeface development and using Adobe Creative Suite software at an advanced level. Through the use of Adobe Photoshop, Illustrator and Indesign, the process of Key Art Design for movie advertising will be handled step by step. Establishing pay rates and professional practice in the design industry will be discussed in this course. Course projects will focus on individual and team collaboration for a real world Studio Experience. Prerequisite: CDE 2091 Sophomore Design Studio II and CGD 2060 Typography II.

CDM 3420. Sound Design. 3 Credits.

This course introduces students to audio recording, mixing and mastering skills, as well as creative application of post-production techniques on campus, in the workplace, and at home. Focused on teaching audio recording and post-production mixing basics, this course also concentrates on the history of recording & recording technologies; recording personnel & duties; legal aspects of sound production and design, and the role of the creative process in the world of constantly emerging multimedia and communication technologies. This class will feature hands-on recording and digital editing in real-world scenarios using a variety of equipment & techniques.

CDM 3430. Design for Mobile Devices. 3 Credits.

Handheld, touchscreen devices as a new medium for telling stories, enhancing communication, and creating relationships. Projects combine text, images, sound, video, and interactivity. Prototyping, visual publishing tools, and HTML/CSS/JavaScript. Adobe Digital Publishing Suite (DPS) and Adobe InDesign. Prerequisites: CDE 2091 and CGD 2060.

CDM 3440. Web Applications: Google, Smart Phones, Drupal, Joomla. 3 Credits.

In this two-part course, learn how to leverage tools used to create mobile and online applications for businesses and organizations. Part 1 focuses on basic iPhone and Google apps. Part 2 covers Drupal, Joomla and Wordpress implementation, including which platform works best for a particular business or organizational model. Prerequisites: CDM 2280 Interactive Web Design I, CDM 1200 Digital Design I, or CFN 1000 Communication Design.

CDM 4090. Digital Media Design Thesis I. 3 Credits.

The senior thesis project includes conducting research, writing a thesis paper, interviewing a motion designer or animation professional, writing a script, and designing a thesis animation. Discussion and critique of motion design and animation's role in contemporary culture, commerce, and social identity. This is the culminating project for the B.F.A. in digital media design. Prerequisite: CDM 3091. Restricted to BFA in digital media design candidates.

CDM 4091. Digital Media Design Thesis II. 3 Credits.

Digital Media Design Senior Thesis is comprised of three components: written paper, interview of digital media design professional, and final multi-media installation. Students finalize the written thesis paper on a design-related topic in the digital media design field. Then, students interview a prominent practitioner in the field of Digital Media Design. As the third component of Digital Media Design Senior Thesis, students translate their thesis paper into a multi-media installation which can be either a rich media interactive experience or a linear or non-linear motion/video narrative. Upon completion, the thesis projects are presented in a special museum exhibition. This course is for BFA/Digital Media Design only. Prerequisite: A grade of "C" or better in CDM 4090 Digital Media Design Thesis I or CDM 4000 Digital Media Design IV; or Department Chair's approval.

CDM 4300. Motion Graphics III: After Effects. 3 Credits.

Students enrolled in this course will learn techniques and apply professional methods for digital filmmaking, video production and visual effects. Advanced course projects include storytelling with a green screen and digital compositing. This course builds upon projects from CDM 3300 Motion Graphics II. Topics covered include process and project workflow for large-scale projects, narrative storytelling, and best professional practices. Students develop advanced level storyboards and style frames as pre-visualization tools. Projects incorporate sound and audio files as a tool, tone, and storytelling element. Project workflow emphasizes narrative exploration, pacing, timing, and scene transitions. Critiques are integrated into course projects. Students will learn and develop professional verbal communication skills as they develop their creative and technological skill sets. Prerequisites: CDM 3300 Motion Graphics II.

CDM 4301. Motion Graphics IV. 3 Credits.

Students enrolled in this course will learn techniques and apply professional methods for digital filmmaking, video production and visual effects. Advanced course projects include storytelling with camera tracking, green screen, and digital compositing. This course builds upon projects from CDM 4300 Motion Graphics III. Topics covered include process and project workflow for large-scale projects, narrative storytelling, and best professional practices. Students develop advanced level storyboards and style frames as pre-visualization tools. Projects incorporate sound and audio files as a tool, tone, and storytelling element. Project workflow emphasizes narrative exploration, pacing, timing, and scene transitions. Critiques are integrated into course projects. Students will learn and develop professional verbal communication skills as they develop their creative and technological skill sets. Prerequisites: CDM 4300 Motion Graphics III.

CDM 4311. Time-based Media and Animation III. 3 Credits.

This is an advanced course in 3D animation using Cinema 4D software. Students will learn advanced skill sets, project workflow, and production in 3D animation, which includes: 3D space, modeling, lighting, camera use, and textures. Students will learn animation processes, methods, and workflow while designing and producing a single, high quality animation short, graphics package, commercial campaign, or other equally complex portfolio piece. Students will explore the high level subjects of scripting and expressions, while delving deeper into the capabilities of the core foundations of the software as it relates to texture painting and UVs, Organic Modeling, high quality renders, project optimization, and production processes as they relate to real world expectations. Prerequisites: CDM 3312.

CDM 4330. Interaction Design. 3 Credits.

Design - says Elizabeth Coleman - is the art of organizing the world of things to maximum effect. How does this instinct for structure and consequences speak to a practice in interactive media? This course explores ways of shaping experiences and creating meaning in interfaces and on the web. Subjects include user-centered design, information architecture, design documentation, and art direction. Pre-requisites: CDE 2091 Sophomore Design Studio II and CGD 2060 Typography II.

CORCORAN EXHIBITION DESIGN (CEX)

CEX 6001. Introduction to Vectorworks. 1 Credit.

This course, offered to non-degree and degree students in the MA/Exhibition Design program, provides an introduction to the 2-D and 3-D environments of Vectorworks. Students will learn the principles of architectural drafting, orthogonal projection, basic 3-D modeling and rendering, and efficient workflow in this software. Restricted to No restrictions. This class is open to non-degree and degree students. Priority enrollment is offered to students entering the MA/Exhibition Design program in the Fall.

CEX 6010. Core Studio: Introduction to Exhibition Planning and Design. 3 Credits.

Introduction to the process of planning and designing effective interpretive exhibitions. The final project and presentation is a conceptual interpretive exhibition design that identifies the target audiences and their needs and that develops interpretive goals and objectives, theme and subthemes, the overall visitor experience, schematic plans and drawings, and graphic design and typography typicals. Field trips and guest speakers bring real-world experience to the course. Restricted to MA in Exhibition Design degree candidates; students in the Certificate in Exhibit Design may be admitted upon request.

CEX 6011. Core Studio: Introduction to Tools & Methods of Visual Representation. 3 Credits.

This course will introduce students to tools and methods used for graphic design, drafting, and model-making for the purposes of exhibition development and design. Students will learn the essentials of graphic design through practice in Adobe Photoshop, Illustrator and InDesign. Students will document exhibition elevations and floor plans using Vectorworks. Students will practice the techniques of model-making for use in design development and final presentation of exhibition design concepts. Restricted to MA Exhibition Design Students.

CEX 6020. Core Studio: Advanced Exhibition Design & Planning: Museum Environments. 3 Credits.

With instruction of designers from the National Gallery of Art, students learn about the design of a large-scale comprehensive exhibition. Conceptual thinking, creative problem solving, and attaining project goals. Students further their skills in articulating and presenting design solutions within contexts that may include challenging architectural issues, universal design principals, and complex client requirements. Organization, clarity of thought and communication, drawing, and model making are stressed. Specific topics may vary. Restricted to MA Exhibition Design Students only; Certificate in Exhibit Design by permission only. Prerequisites: CEX 6010.

CEX 6021. Core Studio: Advanced Exhibition Design & Planning: Non-Museum Environments. 3 Credits.

For students interested in exploring exhibition design in non-traditional environments. By engaging in a real-world project students learn conceptual thinking, creative problem solving, and how to attain project goals. Students further their skills in articulating and presenting design solutions within contexts that may include challenging architectural issues, universal design principals, and complex client requirements. Organization, clarity of thought and communication, drawing, and model making are stressed. Specific topics may vary. Restricted to MA Exhibition Design Students Only; Certificate in Exhibit Design students by permission. Prerequisites: CEX 6010.

CEX 6050. Advanced 3D Modeling and Rendering: Vectorworks. 3 Credits.

Architectural and exhibition design modeling and rendering in the virtual 3D environment of Vectorworks. Students build and document construction-ready virtual structures and environments, with textures, lighting, and image props to generate photorealistic renderings. The final project is a design package that includes renderings and construction drawings for a gallery exhibition or installation. Prerequisites: CEX 1500 or demonstrated skill through portfolio review.

CEX 6100. Lighting Exhibitions. 3 Credits.

Museum lighting design, including such issues as conservation of objects, identification of lamps and fixtures, strategies for controlling lighting effects, and the safe handling of electric equipment.

CEX 6110. Materials, Finishes and Methods for Exhibition Design. 3 Credits.

The range of building and finishing materials available for the design and construction of museum exhibitions and architectural interiors. Design and fabrication of exhibit components, based on considerations of design intent, function, aesthetics, and the visitor experience, as well as ADA guidelines, security, operations, and maintenance. Basics of organizing and preparing construction documents and specifications.

CEX 6120. Core Studio: Advanced Tools & Methods of Visual Representation. 3 Credits.

Advanced instruction in the principles and fundamentals of computer-aided design, representation, presentation, and analysis. Development of skills with digital tools to communicate the design intent to a variety of project stakeholders. Systems of the design process, including analytical, expressive, syntactical, and spatial language. Prerequisites: CEX6011.

CEX 6800. Independent Study: Exhibition Design. 1-3 Credits.

For degree students only. Enrollment requires prior permission. Restricted to Instructor Permission Required.

CEX 6900. Exhibition Design Internship. 3 Credits.

For degree students only. Enrollment requires prior permission. Restricted to Instructor Permission Required.

CEX 7010. Exhibition Design Studio III: Visual Storytelling. 3 Credits.

Learning through real-world exhibition projects. Further advancement of student skills in planning, programming, developing, and designing a museum exhibition. Students gain experience in developing an exhibition concept package suitable to promote, raise funds, and acquire artifacts for an exhibition in a museum venue in the Washington metropolitan area. Definition of the exhibition mission, teaching points and goals, theme and storyline within the conceptual design. Prerequisites: CEX 6020 or CEX 6021.

CEX 7011. Exhibition Design Studio III: Media and Technology for Audience Engagement. 3 Credits.

Learning through real-world exhibition projects. Explore how digital media is used in museums, as experience and as information delivery. Understand the various forms that digital media takes from simple touch screens and linear video to visitor guided interactive projections. New software tools, applying them to increasingly more complex and demanding scenarios. Augmenting an exhibit item on a local device, activating an exhibit area with projection and motion information graphics, and finally using the visitor as a component of the museum experience. Restricted to MA Exhibition Design Students Only; Certificate in Exhibit Design students by permission. Prerequisites: CEX 6020 and CEX 6021. Restricted to MA in Exhibition Design degree candidates; students in the Certificate in Exhibition Design may be admitted upon request.

CEX 7100. Museum Management and Operations. 3 Credits.

Arts institutional management, including curatorial and collections management as well as legal and financial considerations. Strategic and tactical planning, programming, fundraising, board relations, and outcomes assessment. The roles and relationships of departments such as visitor services, development, finance, education, marketing, communications, curatorial, and collections management.

CEX 7120. Construction and Detailing for Exhibition Design. 3 Credits.

The materials, documentation, and construction techniques used by exhibition designers and fabricators. How design decisions can influence manufacturing efficiency and cost. Drawing skills for reverse engineering of typical exhibit structures. Compilation of a final design or construction documentation package with exhibit media keys and requisite components to communicate and control the design during fabrication.

CEX 7200. Curatorial Studies for Exhibition Designers. 3 Credits.

Overview of curatorial practice in institutions that vary in size, scale, and scope. Traditional and non-traditional curatorial practice, including collections management, research, exhibition planning, public programs, and educational outreach. Specific focus may vary.

CEX 7220. Conservation and Art Handling: The Art of Exhibition Mount Making. 3 Credits.

In this blended learning course, each student will combine a research project investigating mount making techniques and their relationship with museum standards for conservation and art handling with hands-on experience in brass mount-making. Students will research mount making techniques that reflect understanding of museum object conservation and display. Students will visit exhibitions and go behind the scenes to meet conservators, mount-makers, designers and other museum professionals. Students will also participate in hands-on workshop component to learn the basics of brass mount-making for museum objects and artifacts. Students will work independently towards a final written paper and presentation, along with a physical example of mount making techniques.

CEX 7800. Exhibition Design Capstone/Thesis Part 1. 3 Credits.

The equivalent of the programming phase of a professional exhibition design project, Part 1 of the Capstone/Thesis lays the critical foundation for an exhibition proposal by defining its mission, interpretive goals, and content. Students develop a design concept, based on precedent research, that serves as the guideline for the Capstone/Thesis to be completed in the following semester. The format of the final pro-thesis document is an academic research paper with concept design sketches, plans, and drawings. Prerequisites: CEX 7010 or CEX 7011. Restricted to MA in Exhibition Design students; pre-thesis assessment is required prior to registration.

CEX 7900. Exhibition Design Capstone/Thesis Part 2. 3 Credits.

The student is expected to work at a professional level in completing a comprehensive exhibition design proposal. The process culminates in a public review of the project with jurors drawn from the faculty and the professional design community. Restricted to MA in Exhibition Design degree candidates.

CORCORAN FINE ART (CFA)

CFA 1090. Fine Art Fundamentals I: Drawing. 3 Credits.

Drawing is the fundamental language of visual communication and an essential skill for all visual artists. In this course, you will improve your drawing skills through exercises in mark making, perspective, and line, with assignments also focusing on value, form and mass, and composition. Students will do gesture and contour drawings as well as fully developed drawings; frequent individual and group critiques foster both feedback and your own ability to express your point of view. Classes will include demonstrations, drawing the life model and still lifes, and exposure to the history and contemporary practice of drawing. First-year drawing is required of all prospective Fine Art majors and serves as the prerequisite for more advanced drawing, illustration, and animation courses.

CFA 1091. Fine Art Fundamentals II: Painting. 3 Credits.

First-year painting focuses on materials, techniques, and historical precedents as means to begin to develop your personal imagery, content, and techniques. Classes devoted to a rigorous, hands-on learning process provide a context for the expression and development of individual goals, from realism to abstraction to animation. Working on several paintings during the semester, students will experiment with both traditional and new methods. Discussions on the history of painting, along with faculty-moderated critiques begin to address the rich context in which the contemporary painter participates. Fundamentals of Fine Art: Painting is a prerequisite for taking intermediate and advanced painting courses.

CFA 1092. Fine Art Fundamentals II: Sculpture. 3 Credits.

This fundamental course in 3-D form and thinking introduces students to a wide variety of techniques, fabrication strategies, and conceptual approaches to form and space. Basic carpentry and welding skills will be taught, along with methods of making simple connections, cutting and bending, modeling, mold making and casting. Through demonstrations and research students will be exposed to contemporary methods of fabrication and their uses in contemporary art. Class and individual projects will be critiqued by the instructor and fellow students, with an emphasis on experimentation and the development of project management skills. Fundamentals of Fine Art: Sculpture is a prerequisite for more advanced courses in sculpture, installation, and performance.

CFA 1215. Color Across Media: Symbolism and Science. 3 Credits.

How artists have used color has changed enormously over the last century. This course will examine the main theories which they employed, experimented with, and what they abandoned, as well as some of the science involved. We will study several approaches to color, from traditional views about its spiritual aspects, symbolism and scientific properties of specific colors, including both subtractive (physical) and additive (light) color, to Postmodern practices of chance, systems, cultural contexts and commercial color charts. These approaches will be studied by a variety of means, from photo expeditions, to extensive paint mixing, to computer exercises, to experiments in chance. Studies will include color in cultural contexts; color as mood, temperature, value and space; chromatic gray; color interaction, and some paint-by-number games. Basic familiarity with Adobe Photoshop is helpful.

CFA 200. Fine Art II Core Studio. 6 Credits.

CFA 201. Fine Art II Core Studio. 6 Credits.

CFA 205. Sophomore Workshop. 1.5 Credit.

CFA 206. Sophomore Workshop. 1.5 Credit.

CFA 2090. Fine Art Studio I. 3 Credits.

Students are challenged and encouraged, individually and collaboratively, to employ resourcefulness, critical thinking and creativity to identify, analyze, understand and resolve problems related to contemporary art practice, production and theory. To facilitate this approach, broad problems are presented by a team of faculty that examine the creative appetite and move on to investigation and development of strategies for making art. Required for FA majors.

CFA 2091. Fine Art Studio II. 3 Credits.

The second semester of the fine art studio sequence. Students are challenged and encouraged, individually and collaboratively, to employ resourcefulness, critical thinking and creativity to identify, analyze, understand and resolve problems related to contemporary art practice, production and theory. To facilitate this approach, broad problems are presented by a team of faculty that examine the creative appetite and move on to investigation and development of strategies for making art. Required for FA majors.

CFA 2122. Medium and Materials Workshop: Time-Based Media. 3 Credits.

Medium and Materials workshops are required for BFA Fine Art students but may be used as electives for other programs. As the threshold for media production software and hardware drops, visual artists increasingly have the opportunity to work with time-based, trans-disciplinary tools. Even artists working primarily in traditional media are extending their understanding of their practice as they explore their subjects in time. This course will expose students to a broad range of works: from conventional film and video, to video installation, performance documentation, generative and interactive works. Students will get hands-on experience with a variety of commercial and open source tools, as they create and present projects throughout the semester.

CFA 2123. Medium and Materials Workshop: The Object in its Environment. 3 Credits.

Medium and Materials workshops are required for BFA Fine Art students but may be used as electives for other programs. This course focuses on the relationship of the created object with its environment relationships to space and time via the production of sculptural objects involving a variety of materials and processes including (but not limited to) fiber textiles leather plastics wood metals and appropriation of existing objects, placing them in a contemporary context to include practices such as installation, performance fashion, and addresses issues of site sensitivity or specificity, sustainability and environmental design. This is achieved through studio work (investigation, discovery and making) demonstrations, lectures, research and discussion.

CFA 2124. Medium and Materials Workshop: Painting Basics for Fine Art. 3 Credits.

Medium and Materials workshops are required for BFA Fine Art students but may be used as electives for other programs. This course introduces historical and contemporary approaches to painting. Students will explore the language of images- developing an awareness of the roles of visual judgement (the objective view), and intuition (the subjective response) in making our creative decisions. We will address issues of form, process and content in painting. Students will experiment with a variety of materials and surfaces appropriate for painting in watercolor, acrylic, and oil. We will also explore a wide range of subjects and sources - with the goal of building a broad visual language of exploration, discovery, and self expression. Material demonstrations, class readings and discussions, and individual and group critiques will take place throughout the semester. Intended for, but not limited to, Sophomore BFA/FA majors.

CFA 2125. Medium and Materials Workshop: Printmaking. 3 Credits.

An introduction to the use of a variety of printmaking media, connecting their use to the mainstream of contemporary artistic practice. Etching, lithography, screen print, and relief printing. Printmaking's multi-faceted relationships to photography, sculpture, painting, and other media.

CFA 2126. Medium and Materials Workshop: Ceramic Practice, Earth to Stone. 3 Credits.

This course will provide a comprehensive introduction into the materials and methods essential to ceramic practice. Clay forming techniques in all areas of hollow construction will be introduced and explored, including hand building, wheel throwing, extrusion, and casting in the creation of clay forms. A basic introduction to the range of clays, and clay bodies will facilitate the students understanding of the suitable methodologies in which to manifest their ideas in clay. The use of slips, engobes, and glazes will explore the role of surface treatments in the context of the skin and bones of ceramic objects. The final process of firing will be investigated and explored with the student being introduced to multiple firing techniques and the basic operations of an electric kiln.

CFA 2200. Intermediate Drawing. 3 Credits.

This course expands on the concept of drawing to include a wide variety of conventional and unconventional materials and techniques. Students will approach drawing both technically and conceptually. Drawing projects will focus on both traditional and prepared surfaces. Students will discover fresh approaches and open up new possibilities for personal expression. Class meetings will emphasize drawing as a sustained effort, with time allotted for demonstrations, discussions, and critiques.

CFA 2201. Drawing Strategies and Practice. 3 Credits.

Why do artists draw today? How are contemporary artists using drawing to conceptualize, to commemorate, to record, or to recall? Drawing is currently an end in itself, as well as a means to project the information that supports all art-making processes. Drawing can be imitative, descriptive, interpretive, and imaginative. The act of drawing can require only the most primitive of media-charcoal made from wood and fire, or pigment of earth mixed with water-and it can take advantage of technology such as photography and digital imaging. This course encourages your understanding of the basis of spatial perception; the value of immediacy in recording; your body's physical-action component in drawing; the rich trove of mark-making we can tap into. Students use a wide range of materials with a creative variety of substrates or surfaces. Projects are observation-based and expand through concept and narrative. All styles and techniques are appropriate for exploration and development. Where can you take drawing? At times this course may be cross-tallied at the undergraduate level as CFA 2201 and at the graduate level as CFA 5201. Additional work is required to earn graduate credit. Prerequisite: CFN 1040 Foundation Drawing, or instructor permission.

CFA 2202. Introduction to Illustration. 3 Credits.

Through lectures and assignments, students will be introduced to concepts and history, and will experience and be exposed to the multiple facets of illustration. Familiarity with the work of historical and contemporary illustrators will help students gain a greater appreciation of where illustration has come from, where it is going, and how their work might fit into the timeline. The diverse avenues to which illustration work applies will be demonstrated. The course emphasizes the importance and significance of creating works of art that have both parameters(size, media, aspect, color, etc.) and deadlines, two things that set "illustration" work apart from many other disciplines of art-making.Students will effectively brainstorm ideas and visual solutions to creatively fulfill project requirements. Students will be able to research both online and through print media the subject of their illustrations and gather quality reference material to aid in the production of final illustrations. Assignments are intended to simulate projects that illustrators might encounter in real-world working situations and give the student an understanding of the relationship between illustrators and art directors. This course helps students develop an understanding of the importance of following directions, meeting deadlines, and succinctly and effectively conveying concepts visually.

CFA 2210. Intermediate Painting I for Fine Art. 3 Credits.

This course will review fundamental painting approaches and introduce further experimentation and development of formal, technical, and conceptual aspects of painting. We will explore both current and historical painting practices, and investigate the concepts of observation, representation, abstraction, and conceptual thought as sources for our work. Discussion regarding scale, supports, surface preparation, color, and the manipulation of paint as materials and their impact on content and expression will be explored. Students will be encouraged to work from self direction and self motivation, and will begin to develop a personal language of content and expression. Prerequisite: CFA 2124 Medium and Materials Workshop: Painting I Basics for Fine Arts, or CFA 1220 Beyond Basics: Painting for Fine Art.

CFA 2270. In Stitches. 3 Credits.

This course explores the use of the stitch - by hand or machine, knitted or crocheted - as a drawing tool and as a method of creating dimension. It covers historical and contemporary uses in quilting and embroidery, and examines some of their socio-political implications. A variety of techniques will be investigated, including applique, piecing, the use of stippling, trapunto, free motion quilting/embroidery and basic knitting and crochet stitches. A variety of tools, materials and threads will be studied that include needles, thimbles, fabric stabilizers, batting, embroidery floss and yarn. Completed samples will demonstrate understanding of various techniques, and one final project will exhibit creative use of them. Intended for, but not limited to Sophomore BFA/FA majors.

CFA 2305. Digital Art I for Fine Art & Photography. 3 Credits.

Students explore the capabilities of powerful programs to manipulate, aggregate and translate digital images and video footage. The course covers editing, proofing, and printing images; provides instruction in basic enhancement to digital photography; develops skill in digital image-making to produce high-quality large scale prints. Students apply the techniques of computer drawing, painting, digitizing, and animation to computer-generated images or images from external sources such as photography, video, and scanners. Images and text are combined to create large-scale compositions. This class is designed for students with photography and fine arts background. In some terms this course may be cross-tallied at a more advanced level as CDM 3200. Students in CDM 3200 deal with more complex image making, and printing challenges, building on CDM 2200 Digital Art I. Prerequisites: CFN 1000 Communication Design, CDM 1200 Digital Art I, or CFA 2122 Medium/Materials: Time-Based Media.

CFA 2700. San Miguel/The Cult of the Hand: Craft, Ritual and Performance. 3 Credits.

This course is offered as a full spring semester course, which includes travel to San Miguel during spring break. Please note that airfare and accommodations incur additional fees outside of the course tuition. Please contact Bob Devers, rdevers@corcoran.org, Coordinator of Study Away programs with questions. This course is an interdisciplinary exploration, which introduces the traditions and culture of many genres of Mexican folk craft media. Through an immersion into the cultural, historical and artistic practices of these traditions, students will gain an understanding and appreciation of the diversity of cultural and artistic expressions of Mexican artisans. Students will have multiple hands-on experiences with a variety of mediums including papel-picado (cut-paper), papier-mâché, mask making, puppetry, talavera tiles and Zapotec textiles. This course will include tours of local museums, historic buildings and visits to artist's studios to experience demonstrations by local artists. The town of San Miguel will serve as the main stage for witnessing the profound confluence of art, culture and beauty that is Mexico.

CFA 300. Fine Art III Core Studio. 9 Credits.**CFA 301. Fine Art III Core Studio. 9 Credits.****CFA 3090. Fine Art Studio III. 3 Credits.**

Fine Art Studio III curriculum is constructed with an emphasis on the development of your individual creative process and studio production. Of equal significance is the student's first-hand understanding of areas of critical importance to the fabric of contemporary art that will be studied through the various assignments. These content areas will be explored in depth in Seminar providing the necessary background for your investigations. Seminar will act to enrich your understanding of all Studio III Assignments. Third year is a year built around assignments called "contracts" that provide a framework by which you can begin to create a vital and productive individualized studio practice. The contracts bridge faculty-directed studio projects with independent self-directed art making and emphasize the research of ideas, exploration of medium and materials, and the development of process and production over the course of the year. Formal instruction will include brief lectures and specialized demos with an emphasis on feedback on your work in progress through individual studio meetings as well as feedback on your completed work through formal group critiques. This semester your faculty will be working with each of you towards better articulation and implementation of your goals arising from your studio investigations. During the course of the year, you will be guided through a variety of art making and writing projects that operate through two distinct, but intertwined, art making approaches: expansion of your current studio practice into new and unknown areas and focused studio work. It is important to discover new tools, techniques and areas of conceptual investigation in an effort to expand both your knowledge base and your individualized studio practice. No less important, however, is the focused movement necessary for your commitment to the production of completed, well-realized art works and bodies of work. Methods for locating areas of inspiration will be studied collectively in this course. Your Third Year Studio course is a time for beginning the self-directed practices that are necessary for a studio artist beyond the framework of the academy.

CFA 3091. Fine Art Studio IV. 3 Credits.

Reserved for BFA/FA requirement. Corequisite: CFA 3121 Fine Art Seminar II. Prerequisite: CFA 3090 Fine Art Studio III.

CFA 3120. Fine Art Seminar I. 3 Credits.

Fine Art Seminar I is a companion course to Fine Art Studio III, offering students an opportunity to delve deeply into the concepts, historical context, materials, and processes that relate to the contract assignments and to the independent art making you will be engaged in this year. The Seminar will center on skills related to your work but will differ substantially from your studio class in both content and organization. Its goal is to support your development as an artist, and to challenge you to see your work and the work of your peers in a critical way. Fine Art Seminar I sessions will be led by one or more of the Seminar faculty team members, on a rotating basis. The content of these Seminars will vary according to the contract and may include lectures, presentations, and group activities such as written or experiential activities or group discussions that relate to and supplement the Fine Art Studio curriculum. Additionally, students will be asked to give presentations that relate to this work. Visiting artists and field trips will also be a major component of Seminar.

CFA 3121. Fine Art Seminar II. 3 Credits.

Fine Art Seminar II is a companion course to Fine Art Studio III, offering students an opportunity to delve deeply into the areas of conceptual investigation, historical context, materials, and processes that relate to Studio contract assignments and to the independent art making you will be engaged in this year. The Seminar will center on skills related to your work but will differ substantially from your Studio class in both content and organization. Its goal is to support your development as an artist, and to challenge you to see your work and the work of your peers in a critical way. Fine Art Seminar II sessions will be lead by one or more of the Seminar faculty team members, on a rotating basis. The content of these Seminars will vary according to the contract and may include lectures, presentations, and group activities such as written or experiential activities or group discussions that relate to and supplement the Fine Art Studio curriculum. On occasion, students will be asked to give presentations that relate to this work. Visiting artist lectures and field trips to Museums and other sites of interest will also be a major component of Seminar.

CFA 3210. Advanced Painting: Special Topics. 3 Credits.

This course will review fundamental painting approaches and introduce further experimentation and development of formal, technical, and conceptual aspects of painting. We will explore both current and historical painting practices, and investigate the concepts of observation, representation, abstraction, and conceptual thought as sources for our work. Discussion regarding scale, supports, surface preparation, color, and the manipulation of paint as materials and their impact on content and expression will be explored. Students will be encouraged to work from self-direction and self-motivation, and will begin to develop a personal language of content and expression. Prerequisite: CFA 2124 Medium and Materials Workshop: Painting I Basics for Fine Arts, or CFA 1220 Beyond Basics: Painting for Fine Art.

CFA 3240. Wear, Strut, Occupy. 3 Credits.

Explore notions of costuming, fashion, sculpture, performance, and wearer/performer. Our reasons to wear anything are varied and manifold: to conceal, reveal camouflage or disguise; for protection or to project power or threat; for the purpose of modesty or exhibitionism; to communicate an idea or establish identity, to enhance or impede movement, to express beauty, to impress or to shock. This course approaches the broadest possible definition of clothing and adornment as a vehicle to explore the relationship between the individual, the material and the environment. For their projects students may make use of traditional construction materials, methods and processes, such as patternmaking and sewing, but also can consider manipulating metal, wood, plastics, found objects, and natural materials.

CFA 3305. Digital Art II for Fine Art & Photography. 3 Credits.

Students explore the capabilities of powerful programs to manipulate, aggregate and translate digital images and video footage. The course covers editing, proofing, and printing images; provides instruction in basic enhancement to digital photography; develops skill in digital image-making to produce high-quality large scale prints. Students apply the techniques of computer drawing, painting, digitizing, and animation to computer-generated images or images from external sources such as photography, video, and scanners. Images and text are combined to create large-scale compositions. This class is designed for students with photography and fine arts background. In some terms this course may be cross-tallied at an introductory level as CDM 2200. Students in CDM 3200 deal with more complex image making, and printing challenges, building on CDM 2200 Digital Art I. Prerequisites.

CFA 3306. Performative Media. 3 Credits.

The class introduces students to the creative process of producing performance-based media works, installations, staging and time-based video. Students work with narrative and theoretical texts to study and develop works inspired by theater, cinema, TV culture and mass media. The class will focus on research, development and production of projects on a larger scale with process, evolution and decision-making as part of their creation.

CFA 3331. Fold, Tear, Build. 3 Credits.

As paper is less used to transmit information, interest in its creative potential as an art medium increases. Beginning with rudimentary objects, and concluding with elaborate pop ups, we will examine a wide range of paper objects and design, from quickly produced to intricate with painstaking detail, and using anywhere from simple techniques of folding, cutting, gluing and collage to digitally printed, these objects can have a variety of applications including character design, urban art, fine art, graphic design, illustration, animation and film. Starting with making basic volumes, students can extrapolate their own forms and designs for a variety of purposes. The second half of the semester concentrates on the pop up with its myriad of floating and moving forms. Students will learn the basic "engines" for mobilizing a 3-D effect from paper, including V-folds and parallel folds, upon which more elaborate forms can be built. Projects range from test pop ups of the basic forms, through large prototypes culminating in a large one-page display of a student's choice of subject, involving drawing, painting and/or photographic imagery. Students learn precise craft skills and organizing efficient sequences of assembly. A laser cutter may be used to save labor. Intended for any level following freshman year. Formerly titled, Paper Craft: Objects Pop Ups.

CFA 3511. Public/Spectacle: Contemporary Performance from Pop Culture to Social Practice. 3 Credits.

This class introduces students to performance art forms that create social spaces while addressing larger challenges facing society, all with an eye on pop culture and social media. Students will work on projects in D.I.Y production of popular forms, from making their own art bands, music videos and brand identities to creating collaborative artworks which address real-life problems and seek solutions in actual (and virtual) communities. This class provides a forum for students to engage with the full range of appropriations of pop culture spectacle in the field of art - from inventing a persona to creating a social movement.

CFA 3512. Illustration: Witness Art. 3 Credits.**CFA 3710. Ladakh: Ancient Culture in Modern Times. 3 Credits.**

Ladakh, a high-altitude desert beyond the peaks of the Himalaya, offers few resources in an extreme climate. Yet, it has been the home of a thriving agricultural society for more than a thousand years. In this course, you will explore the coping skills and attitudes that allow the people of Ladakh to survive and prosper in peace and harmony under the harshest of circumstances. We will examine community and family structures and the role of ancient localized knowledge, as well as Buddhist traditions to learn whether Ladakh is prepared to meet the challenges of increasing westernization without losing its ecological balance and social harmony. We will read and discuss a text on Ladakhi culture and development issues, watch and discuss videos and a movie, and get a primer on Buddhist philosophy. All students are required to write a report about the experience, contribute writing and artwork for a book, and participate in a White Halls show in the Fall semester. After registration, students will be required to arrange and pay for a current passport, Indian tourist visa, and travel health insurance. Prerequisites: instructor's permission and reference letter.

CFA 3800. Directed Studies: Fine Art. 1-3 Credits.

This option is appropriate for degree students who want access to independent faculty supervision, lab areas, and supplies for independent projects, and do not need or desire extensive course instruction.

CFA 3900. Internship: Fine Art. 1 Credit.

For degree students only. Internships can help students develop marketable skills, establish professional contacts, and explore different career options.

CFA 400. Fine Art IV Core. 6 Credits.**CFA 4090. Fine Art Thesis I. 3 Credits.**

Reserved for BFA/FA requirement. Prerequisite: CFA 3091 Fine Art Junior Studio II.

CFA 4091. Fine Art Thesis II. 3 Credits.

Reserved for BFA/FA requirement.

CFA 4170. Professional Practices for Fine Artists. 3 Credits.

No artist, however famous or successful, had a clear path to succeed from the beginning. Successful artists learn to maximize opportunities and resources available to them, navigating his or her way at every turn. There is not one single approach; a strategy with lots of planning and variables must be created and examined. Artists will develop a resume and artist statement, research and write grants, practice applying for residencies, and participate in information gathering sessions with art spaces. The instructor will create opportunities for students to meet gallery directors, curators and professional artists in the DC area. These meetings will provide substantive time to discuss practical issues and concerns that will add to a post-school plan. Writing and reading assignments will be two papers including writing a grant application and creating a personal post-college plan plus one exam. Completion of this course will result in a deeper understanding of the specific tools available to emerging artists and the nature of the art world in general. For BFA Fine Art majors only. Prerequisite: CFA 3091 Fine Art Studio IV.

CFA 4210. Advanced Painting Studio. 3 Credits.

In this advanced painting studio students will begin a cohesive body of work or fully develop one in progress. They will fine-tune image making skills on work with live models, projected images, or special projects, with emphasis on professional execution. History suggests that Van Eyck made the first oil painting medium, Rubens, Vermeer, and others helped to perfect it. Using the secret formulas and techniques of the Masters, students will learn how to use Maroger medium also known as miracle medium. Students will also explore imprimatura, underpainting and glazing, mixing and drying properties, opacities and characteristics of colors and media, and the production of effects with different brushes and painting tools. Finally, they will master these techniques and adapt them to their vision in forming expressive strategies in oil or acrylics.

CFA 4310. Art Outside the Gallery. 3 Credits.

This course will introduce students to creating site specific and installation art while emphasizing public art, the non-profit art world, pop-up and D.I.Y. galleries. Class time will be divided between studio time, research, and field visits. Field visits include studio visits with local artist, opening receptions, art fairs and festivals, as well as visits to public art locations throughout the DC area. This is a studio intensive class focusing on a cumulative project/exhibition that the students will facilitate on their own or as a class from proposal thru to exhibition installation. Students will gain experience with public art proposals and finding/creating alternative art spaces.

CFA 4311. Installation Art. 3 Credits.

This advanced level fine arts sculpture course focuses on the genera of installation sculpture through the lens of site specificity, architecture, media, and landscape. Through instructor directed research, engagement in artistic practice and theoretical exploration the students will attain a better understanding of the theories, practices, artists and historical contexts within the field of installation art. Students are encouraged to explore beyond traditional art exhibition sites in order to understand how/why the content of work cannot be separated from its context.

CFA 5013. Graduate Cross-Media Studio. 3 Credits.

Students explore areas of personal studio strength in combination with less familiar methods and materials. Through a series of class projects, students identify potent themes in their work and explore aspects of these themes using new strategies and processes. Upon successful completion of the course students demonstrate a more vibrant visual vocabulary along with an understanding of process in relation to stated goals. The importance of play and risk-taking in all aspects of art making is emphasized and alternative approaches for critique and self-assessment are introduced as each student's most successful projects are singled out for further development. Contemporary artists using cross-media will be introduced and discussed, and selected readings will be assigned. This course is graded on the graduate standard only.

CFA 5020. Graduate Collaborative Studio. 1.5 Credit.**CFA 5201. Drawing Strategies and Practice. 3 Credits.**

Why do artists draw today? How are contemporary artists using drawing to conceptualize, to commemorate, to record, or to recall? Drawing is currently an end in itself, as well as a means to project the information that supports all art-making processes. Drawing can be imitative, descriptive, interpretive, and imaginative. The act of drawing can require only the most primitive of media-charcoal made from wood and fire, or pigment of earth mixed with water-and it can take advantage of technology such as photography and digital imaging. This course encourages your understanding of the basis of spatial perception; the value of immediacy in recording; your body's physical-action component in drawing; the rich trove of mark-making we can tap into. Students use a wide range of materials with a creative variety of substrates or surfaces. Projects are observation-based and expand through concept and narrative. All styles and techniques are appropriate for exploration and development. Where can you take drawing? At times this course may be cross-tallied at the undergraduate level as CFA 2201 and at the graduate level as CFA 5201. Additional work is required to earn graduate credit.

CFA 5202. Introduction to Illustration. 3 Credits.

Through lectures and assignments, students will be introduced to concepts and history, and will experience and be exposed to the multiple facets of illustration. Familiarity with the work of historical and contemporary illustrators will help students gain a greater appreciation of where illustration has come from, where it is going, and how their work might fit into the timeline. The diverse avenues to which illustration work applies will be demonstrated. The course emphasizes the importance and significance of creating works of art that have both parameters (size, media, aspect, color, etc.) and deadlines, two things that set "illustration" work apart from many other disciplines of art-making. Students will effectively brainstorm ideas and visual solutions to creatively fulfill project requirements. Students will be able to research both online and through print media the subject of their illustrations and gather quality reference material to aid in the production of final illustrations. Assignments are intended to simulate projects that illustrators might encounter in real-world working situations and give the student an understanding of the relationship between illustrators and art directors. This course helps students develop an understanding of the importance of following directions, meeting deadlines, and succinctly and effectively conveying concepts visually.

CFA 5210. Inter. Painting for Fine Art. 3 Credits.**CFA 5270. In Stitches. 3 Credits.**

This course explores the use of the stitch - by hand or machine, knitted or crocheted - as a drawing tool and as a method of creating dimension. It covers historical and contemporary uses in quilting and embroidery, and examines some of their socio-political implications. A variety of techniques will be investigated, including applique, piecing, the use of stippling, trapunto, free motion quilting/embroidery and basic knitting and crochet stitches. A variety of tools, materials and threads will be studied that include needles, thimbles, fabric stabilizers, batting, embroidery floss and yarn. Completed samples will demonstrate understanding of various techniques, and one final project will exhibit creative use of them. Intended for, but not limited to Sophomore BFA/FA majors.

CFA 5305. Digital Art I for Fine Art & Photography. 3 Credits.

Students explore the capabilities of powerful programs to manipulate, aggregate and translate digital images and video footage. The course covers editing, proofing, and printing images; provides instruction in basic enhancement to digital photography; develops skill in digital image-making to produce high-quality large scale prints. Students apply the techniques of computer drawing, painting, digitizing, and animation to computer-generated images or images from external sources such as photography, video, and scanners. Images and text are combined to create large-scale compositions. This class is designed for students with photography and fine arts background. In some terms this course may be cross-tallied at a more advanced level as CDM 3200. Students in DM 3200 deal with more complex image making, and printing challenges, building on CDM 2200 Digital Art I.

CFA 6210. Advanced Painting: Special Topics. 3 Credits.

Special Topics in Advanced Painting.

CFA 6240. Wear, Strut, Occupy. 3 Credits.

Explore notions of costuming, fashion, sculpture, performance, and wearer/performer. Our reasons to wear anything are varied and manifold: to conceal, reveal camouflage or disguise; for protection or to project power or threat; for the purpose of modesty or exhibitionism; to communicate an idea or establish identity, to enhance or impede movement, to express beauty, to impress or to shock. This course approaches the broadest possible definition of clothing and adornment as a vehicle to explore the relationship between the individual, the material and the environment. For their projects students may make use of traditional construction materials, methods and processes, such as patternmaking and sewing, but also can consider manipulating metal, wood, plastics, found objects, and natural materials. Graduate students identify and research a topic related to the course material, and present their research to the class and any other interested parties. They also submit written and visual support for their research for review. Graduate students will adhere to level-appropriate standards regarding content, execution, and finish of their projects.

CFA 6331. Fold, Tear, Build. 3 Credits.

As paper is less used to transmit information, interest in its creative potential as an art medium increases. Beginning with rudimentary objects, and concluding with elaborate pop ups, we will examine a wide range of paper objects and design, from quickly produced to intricate with painstaking detail, and using anywhere from simple techniques of folding, cutting, gluing and collage to digitally printed, these objects can have a variety of applications including character design, urban art, fine art, graphic design, illustration, animation and film. Starting with making basic volumes, students can extrapolate their own forms and designs for a variety of purposes. The second half of the semester concentrates on the pop up with its myriad of floating and moving forms. Students will learn the basic "engines" for mobilizing a 3-D effect from paper, including V-folds and parallel folds, upon which more elaborate forms can be built. Projects range from test pop ups of the basic forms, through large prototypes culminating in a large one-page display of a student's choice of subject, involving drawing, painting and/or photographic imagery. Students learn precise craft skills and organizing efficient sequences of assembly. A laser cutter may be used to save labor. Intended for any level following freshman year. Formerly titled, Paper Craft: Objects Pop Ups.

CFA 6511. Public/Spectacle: Contemporary Performance from Pop Culture to Social Practice. 3 Credits.

This class introduces students to performance art forms that create social spaces while addressing larger challenges facing society, all with an eye on pop culture and social media. Students will work on projects in D.I.Y production of popular forms, from making their own art bands, music videos and brand identities to creating collaborative artworks which address real-life problems and seek solutions in actual (and virtual) communities. This class provides a forum for students to engage with the full range of appropriations of pop culture spectacle in the field of art - from inventing a persona to creating a social movement.

CFA 6512. Illustration: Witness Art. 3 Credits.**CFA 6710. Ladakh: Ancient Culture in Modern Times. 3 Credits.**

Ladakh, a high-altitude desert beyond the peaks of the Himalaya, offers few resources in an extreme climate. Yet it has been the home of a thriving agricultural society for over a thousand years. In this course you will explore the coping skills and attitudes that allow the people of Ladakh to survive and prosper in peace and harmony under the harshest of circumstances. We will examine community and family structures, the role of ancient localized knowledge, as well as Buddhist traditions to learn whether Ladakh is prepared to meet the challenges of increasing westernization without losing its ecological balance and social harmony. This experience presents abundant opportunities for intensive graduate level research in areas including indigenous architecture, textiles, design and object study, sustainable design as well as craft culture, teaching methodologies, narrative studies, photography, and cultural studies. Students will read and discuss a text on Ladakhi culture and development issues, watch and discuss videos and a movie, and get a basic introduction to Buddhist philosophy. Students are required to write a 25-page research paper on a topic pertaining to their respective area of study (proposal to be approved by their respective Department Heads), keep a visual notebook with sketches and photography, present their work in an exhibit at the White Halls gallery, and contribute writing and images to a group book project. After registration, students will be required to arrange and pay for a current passport, Indian tourist visa, and travel health insurance. Prerequisites: instructor's permission and reference letter.

CFA 6800. Independent Study: Fine Art. 1-3 Credits.

This option is appropriate for degree students who want access to independent faculty supervision, lab areas, and supplies for independent projects, and do not need or desire extensive course instruction.

CFA 7210. Advanced Painting Studio. 3 Credits.

Students in this course will begin a cohesive body of work or fully develop one in progress. They will fine-tune image making skills on work with live models, projected images, or special projects, with emphasis on professional execution. Using The Secret Formulas and Techniques of the Masters students will learn how to use Maroger Medium also known as Miracle Medium, history suggests that Van Eyck made the first oil painting medium, Rubens, Vermeer, and others helped to perfect it. Additionally, students will explore imprimatura, underpainting and glazing, mixing and drying properties, opacities and characteristics of colors and media, and the production of effects with different brushes and painting tools. Finally, they will perfect techniques and adapt them to vision in forming expressive strategies in oil or acrylics. For all skill levels, but some drawing is recommended. A few beginning and intermediate flourish with the Advanced students. Beginning students should register for CPT 3200 and advanced students may register for CPT 4200 if they have met the prerequisite.

CFA 7310. Art Outside the Gallery. 3 Credits.

This course will introduce students to creating site specific and installation art while emphasizing public art, the non-profit art world, pop-up and D.I.Y. galleries. Class time will be divided between studio time, research, and field visits. Field visits include studio visits with local artist, opening receptions, art fairs and festivals, as well as visits to public art locations throughout the DC area. This is a studio intensive class focusing on a cumulative project/exhibition that the students will facilitate on their own or as a class from proposal thru to exhibition installation. Students will gain experience with public art proposals and finding/creating alternative art spaces.

CFA 7311. Installation Art. 3 Credits.

This advanced level fine arts sculpture course focuses on the genera of installation sculpture through the lens of site specificity, architecture, media, and landscape. Through instructor directed research, engagement in artistic practice and theoretical exploration the students will attain a better understanding of the theories, practices, artists and historical contexts within the field of installation art. Students are encouraged to explore beyond traditional art exhibition sites in order to understand how/why the content of work cannot be separated from its context.

CFA 7950. Studio Capstone I. 3 Credits.

A culminating focused studio project, starting with an individualized artistic plan or statement of objectives, which builds upon the artistic interests and technical strengths which the student has acquired while in the Masters program. Cross-media, innovative, and experimental projects are encouraged. The Capstone leads to participation in a student exhibition at the Corcoran, a demonstration/presentation, and/or a digitized documentation of the project open to the entire College community. Students are free to choose whether their own learning and artistic goals will be best met by treating the Capstone as a freestanding achievement or combine it, with approval, with the Thesis or Praxis Thesis. A total of 6 credits in Studio Capstone are required for the MA in Art Education. Students must enroll in CFA 7950 and CFA 7951 which may be taken concurrently or sequentially as approved by an advisor and grades will be assigned upon completion of the second semester of enrollment.

CFA 7951. Studio Capstone II. 3 Credits.

A culminating focused studio project, starting with an individualized artistic plan or statement of objectives, which builds upon the artistic interests and technical strengths which the student has acquired while in the Masters program. Cross-media, innovative, and experimental projects are encouraged. The Capstone leads to participation in a student exhibition at the Corcoran, a demonstration/presentation, and/or a digitized documentation of the project open to the entire College community. Students are free to choose whether their own learning and artistic goals will be best met by treating the Capstone as a freestanding achievement or combine it, with approval, with the Thesis or Praxis Thesis. A total of 6 credits in Studio Capstone are required for the MA in Art Education. Students must enroll in CFA 7950 and CFA 7951 which may be taken concurrently or sequentially as approved by an advisor and grades will be assigned upon completion of the second semester of enrollment.

CORCORAN FIRST YEAR FOUNDATION (CFN)

CFN 1000. Communication Design. 3 Credits.

This course will examine digital design techniques and concepts that are relevant to all majors. Students will learn the basics of visual communication, typography, and design by utilizing Adobe Photoshop to create a series of projects that will result in the creation of their own basic website. Students will learn how to scan, import, and create artwork and how to correct and adjust image tone and color. Students will also use Photoshop's many selection and editing tools and will be introduced to layers, channels, color palettes, and scripted actions. By going through lessons ranging from image retouching to title banner and button creation and simple time-based animation, students will assemble and produce a simple website which will showcase a portfolio of their own work. In addition to the projects above, students will be introduced to the theories and practices of visual communications and graphic design through a series of lectures and demonstrations. Other Adobe CS software such as InDesign will be touched on as well.

CFN 102. Drawing I Core. 3,4.5 Credits.**CFN 103. Drawing Core. 4.5 Credits.****CFN 1090. First Year Studio I. 3 Credits.**

The First Year Studio course is a two-semester sequence structured as a themed, shared experience that focuses on cross-disciplinary approaches to art making and the creative process. All first-year students participate in a rotating class structure that allows for the development of an iterative art-making experience beneficial to artists, designers, and photographers alike. Working in small groups, students study with a variety of faculty across departments, explore and experience a variety of methods and materials, and are introduced to the conceptual framework of the artist in today's society. Class projects will address how artists and designers communicate to an audience, collaborate with others, and manage multi-step projects. They also will foster the development of a culture of constructive criticism and foreground the role of spontaneity and improvisation in the process of art making. Through this course, designed as a two-semester sequence, First Year students will explore all levels of artistic engagement, from the exploration of self identity to the exploration of the artist in the broader community. Successful completion of both First Year Studio courses is required for entry into major-specific studio courses in second year.

CFN 1091. First Year Studio II. 3 Credits.

The First Year Studio course is a two-semester sequence structured as a themed, shared experience that focuses on cross-disciplinary approaches to art making and the creative process. All first-year students participate in a rotating class structure that allows for the development of an iterative art-making experience beneficial to artists, designers, and photographers alike. Working in small groups, students study with a variety of faculty across departments, explore and experience a variety of methods and materials, and are introduced to the conceptual framework of the artist in today's society. Class projects will address how artists and designers communicate to an audience, collaborate with others, and manage multi-step projects. They also will foster the development of a culture of constructive criticism and foreground the role of spontaneity and improvisation in the process of art making. Through this course, designed as a two-semester sequence, First Year students will explore all levels of artistic engagement, from the exploration of self identity to the exploration of the artist in the broader community. Successful completion of both First Year Studio courses is required for entry into major-specific studio courses in second year.

CFN 112. Design Core. 3 Credits.**CFN 113. Design Core. 3 Credits.****CFN 135. Ideas, Resources, and Materials. 1.5,3 Credit.****CFN 136. Resources II. 3 Credits.****CFN 150. Fine Art I. 3 Credits.****CFN 5000. Graduate Studio Foundation. 3 Credits.**

This multi-media course introduces future educators to working with art materials, traditional and unconventional, commonly used in the studio components of art education programs in schools, museums and community organizations. The emphasis is on members of the class gaining proficiency through their own art making. Studio projects are designed for adults with prior studio experience. Instruction and critique will be at the graduate level, with discussion of educational implications for educational program development kept secondary to the primary studio experience. Note: This is not a course in which students practice techniques tailored to beginners, amateurs or children. Enrollment restricted to 1st year MAT students.

CORCORAN GRAPHIC DESIGN (CGD)

CGD 0801. Seven Sessions with Typography. 0 Credits.**CGD 1010. Fundamentals of Graphic Design. 3 Credits.**

This course is an introduction to the visual components that serve as fundamental principles in the field of Design. Projects include the study, classification, and application of Gestalt theories of perception; color systems for designers; and pattern design. Course projects focus on visual relationships of form, image, type and grid structures. Students will be engaged in a series of projects that address 2D and 3D abstract forms and their professional applications. Students will learn design methodology and processes, design language, and the critique process for designers. These design methods and processes will help students observe, understand, and articulate their intuitive visual decision-making skills. Professional practices for designers, project workflow, and professional presentation are integrated into course projects. Digital software tools and hand craft tools are learned and applied to course projects. Requirements: a working knowledge of OSX and Illustrator, InDesign, and Photoshop. Prerequisite: CDM 1200 Digital Design I.

CGD 2000. Design Studio I for CE/AFA. 3 Credits.

This course expands on the lessons learned in Design Concepts by covering design principles such as Visual Hierarchy, Principles of Composition, and Semantics. Typography, form, image, motion, space, and the grid are explored through projects. Students learn an iterative design process to explore concepts and ideas. This course requires a high level of execution through precise craftsmanship. Prerequisites: CFN 1000 Communication Design, CDM 1200 Digital Design I, CDE 1000 Design Concepts, or CGD 1010 Fundamentals of Graphic Design. Formerly "Graphic Design Core II".

CGD 2050. Typography I. 3 Credits.

This course introduces students to one of the most integral components of visual communication- typefaces and their letter forms. Topics covered include typographic vocabulary, terminology, history, technology, classification, measurement, and syntax. Students will be introduced to typographic history, nationality, and technology. Students will learn visual hierarchy and the grid as organizing principle and system. Pre-requisites: CFN 1000 Communication Design or CDM 1200 Digital Design I, CDE 1000 Design Concepts or CGD 1010 Fundamentals of Graphic Design. In some terms this course may be cross-tallied at the undergraduate level as CGD 2050 and at the graduate level as CGD 6350. Students enrolled at the graduate level will complete additional assignments to earn graduate credit.

CGD 2060. Typography II. 3 Credits.

This is an intermediate studio course in typography. Topics covered include typographic vocabulary, terminology, history, technology, classification, measurement, and syntax. Projects explore audience, structure/syntax, content/meaning, visual hierarchy, and aesthetics in message building for visual communications. Students will further their knowledge of typographic history, nationality, technology, and the grid as organizing principle and system. Prerequisite: A grade of "C" or better in CGD 2050 Typography I, and CDE 2090 Sophomore Design Studio or CGD 2000 Design Studio I (CE/AFA).

CGD 3050. Typography III. 3 Credits.

This is a course in advanced typography. Topics covered include typographic vocabulary, terminology, history, technology, classification, measurement, and syntax. Projects will cover advanced visual hierarchy, sequence, narrative tools, and the grid as organizing principle and system. Students will explore typography as legible and expressive communication within cultural context. Students will further their knowledge of typographic history, nationality, and technology. Media utilized will include print and motion. Prerequisite: A grade of "C" or better in CGD 2060 Typography II, and CDE 2091 Design Sophomore Studio; or Department Chair's approval.

CGD 3060. Typography IV. 3 Credits.

This is a course in advanced typography. Projects will cover advanced visual hierarchy, sequence, kinetic type, narrative tools, and the grid as organizing principle and system. Students will explore typography as legible and expressive communication within cultural context. Letterform ideation will be investigated. Media utilized will include print and motion. Prerequisite: A grade of "C" or better in CGD 3050 Typography III, CGD 3090 Graphic Design Junior Studio or CDM 3090 Digital Media Design Junior Studio; or Department Chair's approval.

CGD 3070. Typography in Motion. 3 Credits.

This course focuses on advanced experimental typography for animation and motion graphics. Projects will focus on narrative, storyboarding, style frames, kinetic sequence, transitions, and workflow. Students will explore typography as legible and expressive communication within cultural context. Methods and iterative processes for experimental typeface design will be explored and developed. Prerequisite: A grade of "C" or better in CGD 3050 Typography III, CGD 3090 Graphic Design Junior Studio I or CDM 3090 Digital Media Design Junior Studio I; or Department Chair's approval.

CGD 3090. Graphic Design Studio III. 3 Credits.

In this advanced level course, students focus on interactive and interaction design. Course projects immerse students in interactive web design, and mobile apps design for smart phones and tablet devices. Students learn, employ, and engage in systems design, user experience, user interface design, user interaction, and responsive design. Students learn to use mobile devices (smart phones/tablet devices) and computers as digital tools to communicate designed messages and visual content. Students learn advanced design process which includes: iterative concept development, wire framing, prototyping, design development, craft, details, production, and coding. Software and coding used in course projects include Adobe Digital Publishing Suite (DPS), HTML, and CSS. Students will develop professional oral presentation skills by participating in weekly critiques. Project workflow, professional presentation, and professional practices for designers are integrated into course projects. At the end of the semester, students will obtain experience in professional design projects and skill sets, while understanding on-the-job expectations for a fast-paced professional design studio. This course is for Undergraduate Graphic Design majors only. Prerequisite: A grade of "C" or better in CDE 2091 Sophomore Design Studio II; or Department Chair's approval.

CGD 3091. Graphic Design Studio IV. 3 Credits.

In this advanced level course, students will focus on design as instrument for social change. The semester long course project is Design Ignites Change. The project focuses on a social change or a social awareness issue. Students will learn and develop skill sets in research, messaging, strategy, mood boards, branding, identity, production, and implementation. The project components include print design, interactive design, motion design, and social media. Students will learn advanced design processes and create a cohesive brand package as they work with numerous project components and phases. The design process includes: iterative concept development, design development, craft, details, and production. Students will develop professional oral presentation skills by participating in weekly critiques. Project workflow, professional presentation, and professional practices for designers are integrated into course projects. At the end of the semester, students will obtain experience in professional design projects and skill sets, while understanding on-the-job expectations for a fast-paced professional design studio. This course is for Undergraduate Graphic Design majors only. Prerequisite: A grade of "C" or better in CGD 3090 Graphic Design Junior Studio III; or Department Chair's approval.

CGD 348. Graphic Design Internship. 3 Credits.**CGD 3960. Design Lab. 3 Credits.**

This course offers a select group of undergraduate junior and senior graphic design students the unique opportunity to design and oversee production of projects for the Corcoran Gallery of Art and College of Art Design. Design Lab serves as an in-house design studio as students gain experience interacting with clients, managing deadlines, understanding and working within the limitations of their projects, and scheduling timelines. Elements of the design process covered in the course include writing design briefs and contracts, conceptual and design development phases, producing print-ready artwork, and fabrication coordination and supervision. Permission of department required for enrollment.

CGD 3961. Design Lab II. 3 Credits.

To be announced.

CGD 4090. Graphic Design Thesis I. 3 Credits.

Graphic Design Senior Thesis is comprised of three components: written paper, interview of a design professional, and a final graphic design thesis project. In this course, students select a topic related to the field of Design, develop a thesis statement and written paper through a research and writing phase. Graphic Design briefs pertaining to the development of the written thesis and paper are explored during the semester. This course is for BFA/Graphic Design only. Prerequisite: A grade of "C" or better in CGD 3091 Graphic Design Studio IV; or Department Chair's approval.

CGD 4091. Graphic Design Thesis II. 3 Credits.

Graphic Design Senior Thesis is comprised of three components: written paper, interview of a design professional, and a final graphic design thesis project. Students finalize the written thesis paper on a design-related topic. Then, students interview a prominent practitioner in the field of Design. As the third component of Graphic Design Senior Thesis, students translate their thesis paper into a graphic design thesis project. Upon completion, the thesis projects are presented in a special museum exhibition. This course is for BFA/Graphic Design only. Prerequisite: A grade of "C" or better in CGD 4090 Graphic Design Thesis I; or Department Chair's approval.

CGD 4120. Environmental Design. 3 Credits.

CORCORAN INTERIOR DESIGN (CID)

CID 0850. Color in Interiors. 0 Credits.

Preparing a cohesive color palette in the home is a challenging task, particularly when rooms are renovated over a period of time. This seminar will provide the student with the opportunity to learn the fundamentals of color application, as well as the skills necessary to refine their design strategy as their design needs change.

CID 0860. In My Home. 0 Credits.

For the aspiring non-professional, this course focuses on the basic elements of interior design. A simplified approach to the principles of design in a residential interior allows continuing education students the opportunity to explore interior design within the context of their own homes. This course is offered for non-credit only, and is recommended for those whose interest in interior design is limited to the decoration of their own homes.

CID 1000. Introduction to Interior Design. 3 Credits.

This introductory course provides students with an overview of the elements that comprise the practice of interior design. Studio assignments promote theoretical and analytical problem-solving skills. Students will learn the rudiments of the use of materials and finishes, interior construction, drafting and rendering, space planning, and color theory. This course is recommended for students considering interior design as a profession. This course may be cross-tallied as ID5000 at the graduate level for MA in Interior Design program prerequisites. Additional work is required for graduate level credit.

CID 1200. Stand on the Right, Walk on the Left: Human Response to the Urban Environment. 3 Credits.

This course explores the dynamics of people and space, how they interact with each other, and how this informs the way we design. Students will be immersed in a collaborative, interactive studio experience which will involve: instructor-led or self-guided expeditions in and around the city during class time; observation, data-collection, and thoughtful documentation of findings; conceptual sketching; and model making. An increased curiosity and awareness of our surroundings and the way we interact with our environment will lead to an introductory exploration of human factors including; scale, anthropometrics, ergonomics, universal design, and cultural contexts. Students will also engage in the study of texts and films which explore the basic frameworks of design at its core, and will be asked to react to the readings/viewings. Students will use photography and social media tools such as Pinterest and Instagram to explore and document observations in their own environment using the rich, dynamic setting of Washington DC. The final product of this studio will be a photo-documentary, inspired by Jane Fulton Suri's "Thoughtless Acts," which probes ideas and asks questions similar to those we will be exploring in the course.

CID 1210. Elements & Principles of Interior Design. 3 Credits.

This introductory interior design studio focuses on the fundamental elements and principles of interior design. The studio explores the elements and principles of design as tools to create, manipulate, and affect interior environments. Specifically, the course explores point, line, plane, form, shape, color, texture, light, proportion, scale, balance, harmony, unity and variety, rhythm and emphasis in relation to 3D space. Students translate the elements and principles to 2D visual presentation strategies through the creation of physical and digital design boards. The elements and principles of design are explored in relation to architectural drawing as communication, 2D visual presentation, and 3D spatial experience.

CID 1250. Drawing for Interior Design. 1.5 Credit.

Architecture and Interior Design professionals use drawings to communicate ideas and designs to their clients. This course will introduce students to the skills of hand drawing and sketching of architectural interiors. The basics of orthogonal projections such as plan, section, elevation, and simple perspectives will be taught in this course.

CID 2000. Introduction to Perspective and Interior Rendering. 3 Credits.

This course provides an introduction to linear, two-, and three-point perspectives, and rendering of interior space (and elements within that space) in various media. Students will learn to observe, analyze, interpret, and reproduce what they see. Special attention will be paid to the expressive use of color, the interrelationships of forms, and the placement of the human figure in an interior space. It is recommended that students take this course in a different semester than CID 2100, Color Theory for Interiors.

CID 2050. Representation/Documentation. 3 Credits.

Through a series of projects including drawing and model making, students will gain valuable skills in documenting visual culture, developing tools for representing design concepts. This studio course provides an in-depth study of the conventions of plan, section and elevation as they relate to visual experience. Problems expand the students' ability to translate between two-dimensional exercises and three-dimensional visual experience. This course is only offered during the Fall semester. This course may be cross-tallied as CID 5150 at the graduate level for MA in Interior Design program prerequisites.

CID 2090. Interior Design Studio I. 3 Credits.

In this course, students utilize the elements and principals of design and human factor considerations to explore the design of a compact space. Students learn an iterative design process to explore and develop concepts. The course provides continued emphasis on presentation, hand drafting, and translation of concepts to 3D spatial experiences. This course requires a high level of execution through precise craftsmanship.

CID 2091. Interior Design Studio II. 3 Credits.

In this course, students explore branding in relation to spatial environments. This approach to interior design focuses on the manipulation of space, the selection of furniture, finishes, and materials, and graphics development to create a unique experience and identity. The developed brand identity will be applied to the interior design, as well as presentation materials in a comprehensive and cohesive manner. This studio provides an introduction to commercial space planning, building codes, and ADA guidelines. Prerequisite: A grade of "C" or better in CID 2090 Interior Design Studio I; or Department Chair's approval.

CID 2100. Color Theory for Interiors. 3 Credits.**CID 3050. Interior Design Digital Applications I. 3 Credits.**

This course focuses on the foundations of AutoCAD and basic drafting skills. Students learn the basics of computer-assisted drafting techniques, including basic drawing, dimensioning, layering, and various commands for drawing and document output. Prerequisite: CID 1000.

CID 3060. Revit I. 3 Credits.

Upon the completion of this course, students will be proficient in building information modeling (BIM). BIM creates coordinated, consistent, computable information that is used for design decision making, high-quality visual presentation production, construction documents, performance prediction, cost estimating, construction planning, and, eventually, for managing and operating a facility. Mirroring the real world of buildings and interiors, Revit Architecture helps students accurately capture their design concepts. The software will bridge students' visions from concept to reality through innovative design, accurate documentation, and efficient construction. Integrated bidirectional associativity helps ensure that any change to students' project information is reflected throughout the students' models, while parametric components offer an open, graphical system for conceptualizing and expressing detailed design intent. Course concepts will facilitate more precise conceptual design, which will enhance client understanding while supporting more efficient and sustainable production, construction, and fabrication. At times this course may be cross-tallied at the graduate level as CID 6060. Additional work is required to earn graduate credit. Prerequisite: CID 1000 Introduction to Interior Design.

CID 3090. Interior Design Studio III. 3 Credits.

This studio class pursues the aesthetic and technical principles of more complex and larger-scale residential and contract projects. Conceptual thinking, creative problem solving, and attaining project goals are stressed. Students work at a more advanced level in articulating and presenting design solutions. Drawing, model-making, and other presentation skills are stressed. Prerequisite: CDE 2091 Interior Design Sophomore Studio II.

CID 3091. Interior Design Studio IV. 3 Credits.

This course focuses on the design issues implicit in commercial spaces, including office, hospitality, retail, medical and institutional. Students will become acquainted with the organizational, social, physical, psychological, and cultural factors integral to the design of such spaces. Students will focus on one of the building project types and prepare a comprehensive design solution for a professional critique. Prerequisite: CID 3090 Interior Design Studio III.

CID 3100. Interior Lighting Design. 3 Credits.

This course provides an introduction to the effects of light on interior space, as well as to various lighting products and lighting systems. Students will learn about the lighting challenges for interior spaces and how to effectively meet them. The course teaches the basics of lighting layout, lighting terminology, and the lighting designer's role in the interior design process. Within the studio structure, students are expected to produce a complete lighting package, including a fixture schedule and reflected ceiling plan. At times this course may be cross-tallied at the graduate level as CID 6100. Additional work required for graduate level credit is outlined in the course syllabus. Prerequisite: CIR 1000 or CID 1000 Introduction to Interior Design, or permission of Department Chair. The textbook, *Interior Lighting for Designers* by Gary Gordon and Jim Nuckolls (either third or fourth edition), will be necessary for the first class.

CID 3110. Materials, Methods, and Finishes. 3 Credits.

This course surveys the major materials available to designers and architects, including their structure, properties, potential expressive qualities, and their use. Students learn how to integrate materials into the design and construction of interior spaces. The course familiarizes students with the selection of appropriate materials for various uses based on function, aesthetics, safety, comfort, and maintenance. During the course of this class, students will gain an understanding of construction documents including both drawings and specifications. At times this course may be cross-tallied at the graduate level as CID 6110. Additional work required for graduate level credit is outlined in the course syllabus. This course is only offered during the Fall semester. Prerequisite: CID 1000 Introduction to Interior Design. It is also recommended that CID 3050 Autocad I or CID 6060 Revit I is completed prior to enrolling in this course.

CID 3900. Interior Design Internship. 3 Credits.

Internships can help students develop marketable skills, establish professional contacts, and explore different career options. A good internship should offer the student career-related experience in a setting where the student may learn about professional practice in their field. While some administrative tasks are necessary, these should be minimal with most of the work focusing on skill building or educational opportunities. Continuing Education students are not eligible to receive credit for internships. Students are responsible for locating and securing individual internships, with the assistance and approval of their department chair. To receive credit for an internship, the student needs to complete an internship contract and the appropriate registration form. The internship contract is the agreement between the internship provider, the Corcoran, and the student; all three must be signed. Undergraduate Students To be eligible to earn academic credit for an internship, students must have completed their Foundation Year or have earned equivalent credits (30). While students are free to do multiple internships while enrolled at the Corcoran, students cannot take more than one internship per semester. A 45-60 hour internship is equivalent to 1.5 credits and a 90-120 hour internship is equivalent to 3 credits. The student must receive signed approval from his or her department chair before he or she will be allowed to register for internship credit. The department chair's signature must appear on both the contract and the registration form or the internship registration will not be processed. The contract must be turned into the Office of Student Affairs before the internship start date. The registration or add/drop form must be submitted to the Registrar's Office before the add/drop deadline of the semester the student is seeking credit. Late contracts will not be accepted and credit will not be given. In order to receive a grade for the internship the student is required to submit a mid-semester evaluation and final evaluation of the internship experience. The internship provider is required to submit a final evaluation of the student's performance with a recommendation for a grade (pass/fail) no later than 10 working days prior to the end of the semester. The student's department chair is responsible for reviewing the student and employer evaluations and submitting the final grade to the Registrar's Office.

CID 4060. Advanced Revit. 3 Credits.

This class expands upon the fundamental skills learned in Revit I, allowing students to produce independent projects that reflect the full scope of tools and techniques available to Revit users. At times this course may be cross-tallied at the graduate level as CID 7060. Additional work is required to earn graduate credit. Prerequisite: CID 3060 Revit I.

CID 4090. Interior Design Thesis I. 3 Credits.

Interior Design Senior Thesis is comprised of three components: a written paper, interview of a design professional, and a final interior design thesis project. In this course, students select a topic related to the field of Interior Design, develop a thesis statement and written paper through a research and writing phase. Interior Design project concepts pertaining to the development of the written thesis and paper are explored during the semester. This course is for BFA/Interior Design only. Prerequisite: A grade of "C" or better in CID 3091 Interior Design Studio IV; or Department Chair's approval.

CID 4091. Interior Design Thesis II. 3 Credits.

Interior Design Senior Thesis is comprised of three components: a written paper, interview of a design professional, and a final interior design thesis project. Students finalize the written thesis paper on a design-related topic. Then, students interview a prominent practitioner in the field of Interior Design. As the third component of Interior Design Senior Thesis, students translate their thesis paper into a interior design thesis project. Upon completion, the thesis projects are presented in a special museum exhibition. This course is for BFA/Interior Design only. Prerequisite: A grade of "C" or better in CID 4090 Interior Design Senior Thesis I; or Department Chair's approval. Prerequisite: CID 4090 Interior Design Thesis I.

CID 4600. Selected Topics in Interior Design. 3 Credits.

Through a changing selection of design studios with instructors drawn from the professional design community, this studio will offer a broad range of topics from which students may choose during their course of study. The shifting nature of the subject matter of this studio intentionally allows for topical issues in the design community to be addressed. Topic varies each time it is offered.

CID 5000. Introduction to Interior Design. 3 Credits.

This introductory course provides students with an overview of the elements that comprise the practice of interior design. Studio assignments promote theoretical and analytical problem-solving skills. Students will learn the rudiments of the use of materials and finishes, interior construction, drafting and rendering, space planning, and color theory. This course is recommended for students considering interior design as a profession. This course may be cross-tallied as CID 1000 at the undergraduate level.

CID 5100. Color Theory for Interiors. 3 Credits.

The use of color and interaction of color and light are essential elements of interior design. Through in-depth study of color sequences and primary, secondary and tertiary relationships, students will explore the effects of color on design concept and application. Using various media including painting, textiles and finishes, students will explore issues of color interaction. Throughout this studio class, students will work toward developing their own unique aesthetic as artists and designers. It is recommended that students take this course in a different semester than CID 2000, Introduction to Perspective and Interior Rendering.

CID 5110. Perspective and Interior Rendering. 3 Credits.

This course provides an introduction to linear, two-, and three-point perspectives, and rendering of interior space (and elements within that space) in various media. Students will learn to observe, analyze, interpret, and reproduce what they see. Special attention will be paid to the expressive use of color, the interrelationships of forms, and the placement of the human figure in an interior space. It is recommended that students take this course in a different semester than CID 2100, Color Theory for Interiors.

CID 5150. Representation/Documentation. 3 Credits.

Through a series of projects including drawing and model making, students will gain valuable skills in documenting visual culture, developing tools for representing design concepts. This studio course provides an in-depth study of the conventions of plan, section and elevation as they relate to visual experience. Problems expand the students' ability to translate between two-dimensional exercises and three-dimensional visual experience. This course is only offered during the Fall semester. This course may be cross-tallied at the undergraduate level as CID 2050.

CID 5200. Intro to Digital Presentation and Techniques. 3 Credits.

This class will explore the possibilities for creating, manipulating images, and transforming ideas using computer software. Students will learn basic tools and techniques along with the overall concepts of scanning and digitizing images, rendering elevations and perspectives and creating presentation boards and templates for the Interior Design and Exhibition Design profession. The course will introduce a variety of software from the Adobe Creative Suite. Students will experience enough knowledge to aid them in their future classes. Additional lab time is encouraged for class assignments and individual projects. CID 5000 Intro to Interior Design completion recommended prior to enrollment in this course but not required.

CID 6000. Interior Design Summer Studio. 3 Credits.

This course exposes the student to the studio environment for learning and exploring various topics related to design of the built environment. Through an intensive two-week series of assignments, the student will be exposed to fundamental topics and skills requisite of the interior design discipline. The program will model the ideals of studio culture, including regular presentation, critique, and peer-review of ongoing and final work. The course will introduce students to a design-thinking methodology with experiences in both analog and digital media in the representation of interior design ideas.

CID 6010. Interior Design Studio I. 3 Credits.

Studio 1 introduces the fundamental conventions and principles of interior design, visual and verbal communication, formal analysis, and design process. Students will develop an awareness of spatial composition, perceptual sequence, basic program, and simple building systems related to the built environment.

CID 6020. Interior Design Studio II. 3 Credits.

Building on the foundation of CID Studio 1, this course will further student understanding of the fundamental conventions and principles of interior design. Emphasis will be placed on issues of specific program, site, or typology with a focus on understanding design standards and regulations. Through the completion of a series of projects, students will develop a deeper understanding of more complex spatial and anthropometric considerations. Additionally, students will be introduced to material and color systems.

CID 6050. Interior Design Digital Applications I. 3 Credits.

This course introduces digital applications as they relate to an interior design process. Students are introduced to the drawing methods of drafting and annotation in the examination of digital visualization as it relates to analysis and synthesis. Assignments concentrate on fundamental concepts of digital representation, including the creation of measured drawings, layer management, and various output formats. Formerly titled: AutoCAD II.

CID 6060. Interior Design Digital Applications II. 3 Credits.

Information modeling for an interior design process. Three-dimensional visualization, digital rendering, and the development of construction documents. Concept models, accurate documentation, and efficient construction. Prerequisites: CID 6050.

CID 6100. Interior Lighting Design. 3 Credits.

This course provides an introduction to the effects of light on interior space, as well as to various lighting products and lighting systems. Students will learn about the lighting challenges for interior spaces and how to effectively meet them. The course teaches the basics of lighting layout, lighting terminology, and the lighting designer's role in the interior design process. Within the studio structure, students are expected to produce a complete lighting package, including a fixture schedule and reflected ceiling plan. Prerequisite: CID 1000 Introduction to Interior Design, or permission of Department Chair. The textbook will be necessary for the first class. "Interior Lighting for Designers" by Gary Gordon and Jim Nuckolls. Either the 3rd or 4th Edition are fine. At times this course may be cross-tallied at the undergraduate level as CID 3100. Students wishing to pursue undergraduate credit should register for the undergraduate section. This course is only offered during the Fall semester.

CID 6110. Materials, Methods, and Finishes. 3 Credits.

This course surveys the major materials available to designers and architects, including their structure, properties, potential expressive qualities, and their use. Students learn how to integrate materials into the design and construction of interior spaces. The course familiarizes students with the selection of appropriate materials for various uses based on function, aesthetics, safety, comfort, and maintenance. During the course of this class, students will gain an understanding of construction documents including both drawings and specifications. At times this course may be cross-tallied at the graduate level as CID 6110. Additional work required for graduate level credit is outlined in the course syllabus. This course is only offered during the Fall semester. Prerequisite: CID 1000 Introduction to Interior Design. It is also recommended that CID 3050 Autocad I or CID 6060 Revit I is completed prior to enrolling in this course.

CID 6250. Portfolio and Resume Design. 3 Credits.

This course will introduce students to Portfolio and Resume Design. It will focus on developing a "brand" for each student, which is represented on their resume, portfolio, business cards, and other material that may be used during a job search. The purpose of this "brand" will be to set the students apart from other aspiring designers entering the job market to aid them in obtaining a job. Students will incorporate work from previous studios and classes that they have completed to include in the portfolio. The final deliverables will be a professional resume, cover letter and portfolio. Prerequisites: CID 6050 AutoCAD II or CID 6060 Revit I, and a minimum of 2 Interior Design Studios.

CID 6800. Directed Studies: Interior Design. 3 Credits.
